MOORE AND SIMON, 339 MARKET ST., PHILADELPHIA, PA.
A Word to Our Customers

IT WILL BE MONEY IN YOUR POCKET
TO BUY THE BEST SEEDS

WE WARRANT OURS THE BEST IN EVERY RESPECT

MANY THOUSANDS of the most successful MARKET GARDENERS and FLORISTS throughout the United States use no other

WHY WE ARE MOST RELIABLE.—Because we are the only seedsmen in the United States who grow seeds especially for Market Gardeners and Florists. All our time and energy is devoted exclusively to producing the purest and best qualities of seeds possible, for the market, garden and florist trade. We send out only such strains as are adapted to the wants of the most critical, and offer nothing that should disappoint those engaged in this important business.

NOTE CAREFULLY THE REMARKS BELOW

REMIT MONEY WITH ORDER.—Money can be sent safely by Post Office Order, Express Money Order, Registered Letter, Bank Draft or Check.

ALL EXPENSES of sending money with order, when it amounts to one dollar or more, will be borne by us, and may be deducted from the amount sent.

FREE GIFTS.—This year we will distribute one million packages of seeds for trial. Everybody will get something, even if their order amounts to only twenty-five cents. The larger the order the more extras will be added.

CASH, SILVER OR POSTAGE STAMPS will reach us safely if carefully wrapped and inclosed in letter and registered.

OUR PRICES include bags, boxes and free cartage to depot. Bags are free excepting on Clover, Timothy and Millet.

SEEDS BY MAIL.—Four cents per half pound and eight cents per pound must be added to our wholesale prices if seeds or bulbs are to be sent by mail. Postage for Beans and Peas, please add 15 cents per quart, and for Corn 10 cents per quart to catalogue prices, except where noted.

WE PUT LARGER QUANTITIES OF SEEDS IN OUR PACKETS than any other house, and our customers get more value in seeds for the prices charged.

Please WRITE your NAME, POST OFFICE, COUNTY and STATE as distinctly as possible, especially the name. Many orders reach us lacking either or both; customers when writing about unsigned orders will aid us in identification by mentioning the articles ordered and quantity.

THOSE WHO SEND a neat, plainly written order, will be sure to have it filled correctly and with dispatch, and will also receive some valuable "extras." Always carry out the price of each article, and after adding the amounts and deducting the discounts, remit the exact sum.

GIVE FULL SHIPPING INSTRUCTIONS on each and every order you send. To avoid chance of error, never write letters on the same sheet as your order.

IF GOODS ARE WANTED C. O. D., 25 per cent. of the amount must accompany the order.

ORDERS FROM UNKNOWN CORRESPONDENTS, without remittance, should be accompanied by Philadelphia references, to save delay.

EVERY ORDER IS FILLED IMMEDIATELY on arrival, or is acknowledged, if under rare circumstances, its shipment is likely to be delayed for a day or two. If goods, notification of shipment or acknowledgment of order is not received by the customer after a reasonable lapse of time, it may be assumed that the order has miscarried, or that the name or address was omitted from the order. We will, when notified of such a case, use our best efforts to trace it without delay.

SPECIAL NOTICE ABOUT WARRANTING SEEDS, ETC.—Most of the failures with seeds, plants and bulbs are due to unfavorable weather or soil conditions, too deep or too shallow planting, or other causes entirely beyond our control, which render it impossible for us to guarantee success, and although we take all possible care to supply only such goods as will under proper conditions, produce satisfactory results, we will give no warranty as to description, quality or productiveness of any of the seeds, plants or bulbs we send out, and will not be in any way responsible for the crop, and every order for articles named in this catalogue will be executed on these conditions only. It must, however, be plain to every one who gives the matter the slightest thought, that it is to our best interests to send out only such stock as will not only grow but prove true to name and description.

BE FREE TO WRITE us for any information pertaining to our business not found in catalogue. Use a separate sheet of paper from your order, as your letter goes to the general office and our order to the mail-order department. Always be free to write. We always like to hear from our friends and customers upon anything we can give advice about. We urge customers to giving method of cultivation, character of soil and season. We try to make it. If you need information, don't be afraid to ask for it. Your success is an essential part of our business. A 10-cent mail order is given the same careful attention that a carload order receives.

Deutsche Correspondenten.—Alle Bestellungen und Correspondenzen in Deutscher Sprache werden sorgfältig ausgerührt.

DO YOU MAKE MISTAKES?—WE ARE BUT HUMAN.

We take pride always in trying to be correct in all our shipments. However, we are but human, and occasionally make mistakes like other poor mortals, but when we make a mistake we want to remedy it. If in the course of business with us, you find an error or mistake on our part, please write us a letter with a plain statement of facts, and you may depend upon receiving honorable and pleasant treatment. Don't get angry and come at us like going to war. We pride ourselves on having a large warehouse full of patience, but are not indifferent to facts pleasantly stated, and separated from abuse.
ASPARAGUS

A favorite vegetable with all: almost every rural family has a patch or bed of it in their garden, and there is generally great competition among neighbors in cutting the first bunch of the season. The seed should be sown early in spring, and thinned so that the shoots remain from ten to twelve inches apart. It is necessary to apply a dressing of manure or compost; fork the beds early in spring, and apply a dressing of manure or compost at the rate of 600 lbs. per acre. Cut for use the second year after planting.

STARKEY’S MAMMOTH EARLY PROLIFIC ASPARAGUS

The Best and Most Profitable Sort to Grow

This highly valuable new variety has been grown early for a number of years by one of Philadelphia’s most successful market gardeners, who invariably cut the largest and handsomest asparagus ever sent to this market, from ten days to two weeks earlier than his neighbors and upon which he always realized very high prices. This asparagus has attracted much attention from dealers and commission merchants generally, and from the State, all anxious to get it. The color is notably different from either of the famous Barr’s Philadelphia Mammoth or Palmetto, while the stalks are far more tender and succulent. Its mammoth size can be realized from the fact that in whole crops three stalks will average a pound in weight, and it requires much less labor in cutting and bunching, thus lessening the expense of marketing. Everyone who ever saw this marvelous variety pronounces it many times superior to any other known sort.

It is beyond question the finest, largest, earliest and most profitable for the market gardener to grow. Stalks frequently measure two inches in diameter, and even when twelve to fifteen inches long are perfectly tender. The quality is exceedingly fine, growth rapid, and remains in good, tender condition several days after being ready to cut. It is very productive, throwing up a perfect mass of very large sized stalks of medium green color and very handsome appearance, and invariably commands a much higher price than any other variety. In every case after most thorough and extensive trials, Starkey’s Mammoth Early Prolific has been found immensely superior to the Palmetto, and other varieties for Southern planting. We request our customers to place their orders with us as early as possible.

Prices of seeds: Pkt. 5c., oz. 20c., lb. 50c., lb. $1.50, 5 lbs. and upwards, $1.25 lb.; strong roots, one-year-old, per 100, $1.00; by mail, postpaid, per 100 $1.50, 1,000 $6.00; two-year-old, per 100 $1.25, 1,000 $2.00; 500 roots furnished at 1,000 rate. We will furnish 1,000 two-year-old roots for $3.25, 10,000 for $65.00, larger quantities a matter of correspondence. This variety is also known as the “Hub.”

BARR’S PHILADELPHIA MAMMOTH. Oz. 5c., 1 lb. 15c., lb. 40c., 5 lbs. $1.75; two-year-old roots, per 100 60c., 1,000 $5.00; 100 roots, by mail, postpaid, $1.25.

CONOVER’S COLOSSAL. A good standard variety. Oz. 5c., 1 lb. 10c., lb. 30c., 5 lbs. $1.50; two-year-old roots, per 100 60c., 1,000 $1.00; 100 roots, by mail, postpaid, $1.00.

DONALD’S ELMIRA. This new asparagus, first introduced by us, was originated by Mr. Donald, a prominent market gardener of Elmira. Prices of seed: Oz. 10c., 1 lb. 15c., lb. 75c., 5 lbs. $3.25; strong roots, two-year-old, per 100 75c., 1,000 $6.00 (500 roots furnished at 1,000 rate).

PALMETTO. A large growing, bright green productive sort, quite early from South Carolina. Oz. 5c., 1 lb. 15c., lb. 60c., 5 lbs. $3.50; very strong two-year-old roots, per 100 60c., 1,000 $3.00; 100 roots, by mail, postpaid, $1.00.

COLUMBIAN MAMMOTH WHITE. The stalks are very large, produced abundantly and very early. Prices of seed: Pkt. 5c., oz. 10c., 1 lb. 20c., lb. 60c., 5 lbs. $3.50; strong good two-year-old roots, 100c., per 100, $3.50 per 1,000 (500 roots furnished at 1,000 rate).

GIANT EARLY ARGENTAEUIL ASPARAGUS

A ROYAL FRENCH VARIETY

The seed we offer is genuine imported French Argenteuil seed and will give better results than that grown in America, with the exception of those varieties of Argenteuil that are both the size of anything now on the market excepting Starkey’s. It is a prolific, long lived sort. Oz. 10c., 1 lb. 25c., lb. 75c.; one-year-old roots, $1.00 per 100, postpaid. Roots furnished at 1,000 rate, $3.00 per 100, $5.00 per 1,000.

ARTICHOKE

LARGE GREEN GLOBE. Cultivated for its flower heads, which are cooked like asparagus. Pkt. 10c., oz. 20c., 1 lb. 60c., lb. $2.00.

ARTICHOKE ROOTS. (See farm seeds.)
This superior variety is a prolific and continuous bearer and absolutely stringless. Very tender and of a distinct and delicious flavor.

This most excellent variety was introduced by us into cultivation in 1905, and is a distinct improvement in green beans, and at once becomes popular wherever known. The rich, dark-green pods are produced in enormous abundance, being thick, long, very uniform in shape, solid, meaty, stringless, very brittle and tender. It is almost a continuous bearer, and is among the first to give edible pods in the Spring. The yield is enormous, and it is very early, and the pods remain tender a long time. Pkt. 10c., pt. 20c., qt. 50c., pk. $1.50, bu. $7.00.

**EARLY**

**MARKET**

The pods are of a light silvery green color, long and perfectly round, solid flesh, very tender and stringless. In earliness it is ahead of the Red Valentine, and in productivity it excels. The pods are borne in thick clusters well up under the foliage; this fact renders it of great value for fall planting; the thick, heavy foliage thus protects the pods from frosts. Repeated tests have proven it to be much harder than the Valentine, which enables it to be planted much earlier than the later sort. Market gardeners will find it a very profitable sort to grow. Pkt. 10c., pt. 20c., qt. 30c., 2 qts. 50c., pk. $1.50, bu. $3.50, 2 bu. $18.50.

**Boston Round Pod Early Snap-Short**. Market gardeners will unquestionably find this an improvement over many existing sorts of green-podded beans. It has been grown for over ten days earlier than the old sort. Its pods are round. The beans are larger and of better shape. They yielded the past season over one-third more per acre on the same soil. Fine market sort. A continuous yielder, and very profitable to grow. Pkt. 5c., qt. 30c., pk. $2.00, bu. $7.00.

**King of the Early Market**. It is fully a week earlier than the Valentine, the old pod is round. The beans are larger and of better shape. They yielded the past season over one-third more per acre on the same soil. Fine market sort. A continuous yielder, and very profitable to grow. Pkt. 5c., qt. 30c., pk. $2.00, bu. $7.00.

**Extra Early Red Valentine**. This is the well-known improved round pod strain. Pkt. 5c., qt. 25c., pk. $1.50, bu. $5.50.

**New Improved Early Refugee**. A large, long-podded, yellow-green, stringless, round bean, excellent for early use. Pkt. 5c., qt. 30c., pk. $1.50, bu. $5.50.

**Early Six Weeks**. A delicious light-green, round pod from Italy. Very early, tender and immensely productive. Pkt. 10c., pt. 20c., qt. 35c., pk. $2.00, bu. $7.00.

**Refugee or 1,000 to 1**. True bush growth, fifteen inches in height, branching freely. The pods are nearly round, pale-green, five inches long, tapering to a slender point; quite solid flesh, brittle, and mild in flavor, but with slight strings. Rather later than the other green-podded beans, but extremely prolific. Our strain is very hardy, and will resist more frost than any other. Per pkt. 10c., qt. 25c., 2 qts. 45c., 4 qts. 75c., pk. $1.50, bu. $3.00. Write us for special prices for large quantities.

**Sutton’s Forcing**. A remarkably dwarf and prolific bean. Market gardeners will find it an improvement over many existing sorts. It is not only stringless, but very large; produces a heavy crop; is a valuable variety for the greenhouse or forcing; a good for early market. Pkt. 5c., qt. 15c., pk. $1.50, bu. $5.50.

**New French Stringless.** Retains its delicate tenderness even when a little old. This new variety recently introduced by us has become famous in all the bean-growing sections of our country. At Paris, where we first saw it growing, it has superseded nearly all other sorts on account of its deliciousness. It cannot be recommended too highly for the local market gardener or shipper, for it simply sells on sight. It is a true, stringless round-pod bean, surpassing many varieties for earliness and productivity, the yield being simply prodigious. The pod is of medium length, in color a very attractive light green, and is unequalled by any other sort for tenderness and fine flavor. We unhesitatingly recommend it to our many thousands of friends throughout the United States as being one of the best green-pod beans obtainable. Pkt. 10c., qt. 35c., ½ pk. $1.15, pk. $2.00, bu. $7.50.

**Moore’s Newington Wonder or English Stringless.** A new early variety with round green pods, entirely stringless, very meaty, delicious flavor, wonderfully tender, remarkably early. Enormously productive, continues a long time in bearing, valuable for private gardens. This bean was introduced by us in 1905, and has grown steadily in popularity ever since. The bean is stringless at all stages of growth. It combines unusual hardiness and extreme earliness. No market gardener, shipper or amateur gardener should plant any but our English, German or French stringless beans. All other sorts are obsolete. Very profitable to the market gardener. Pkt. 10c., qt. 25c., ½ pk. $1.15, pk. $2.00, bu. $7.50.

**NOTICE, POSTAGE.** If peas and the other beans are to be sent by mail, add 15c. per quart to prices quoted in this catalogue. We will send any three 10c. packets postpaid for 25c.
NEW CALIFORNIA RUST-PROOF DWARF WAX.

ONE OF THE HANDSOMEST AND MOST PRODUCTIVE FLAT PODED WAX BEANS EVER GROWN.

This new very early variety introduced by us, we have one of the very best wax sorts offered to market gardeners and private families. It will sell twice as well and at a higher price than many other sorts. The pods are longer, broader, and of a brighter yellow color than any other sort, very superior quality, tender and stringless. The vines are of vigorous growth, leaves dark green, hardy, and yield enormous quantities of large, handsome, flat, meaty pods, borne well up from the ground, and has shown any disposition to rust, no matter where grown. It is from eight to ten days earlier than the Valentine or any other flat pod wax sort. We particularly recommend this valuable new sort to all our market garden friends. Pkt. 10c., pt. 30c., qt. 35c., ½ pk. $1.00, pk. $5.00, bu. $7.50. Special prices for 4 bu., lots and upwards will be made upon application.

THE MOST VALUABLE. GENTLEMEN—We have been growing beans for twenty-two years, and I find your California Rust-Proof Wax the most valuable ever introduced. I picked 1,660 ½-bu. baskets from one bushel of seed.

PROLIFIC EVERBEARING WAX.
The Most Delicious and Best Selling Round-Pod, White-Seeded, Wax Bean on the Market.

This is a first-class wax bean in every respect, having originated with one of the leading Philadelphia market gardeners, who never sold the seed to his neighbors at less than $1.00 per bushel. The pods are nearly round, of a beautiful bright yellow color, long and hang in perfect clusters well up from the ground, very early and hearty and continues a long while in bearing, and this combined with immense productiveness and handsome appearance, has made it a favorite with market gardeners everywhere. Pkt. 10c., qt. 30c., pk. $1.75, bu. $7.50. Special prices for 4 bu., lots and upwards will be made upon application.

IMPROVED RUST-PROOF DWARF GOLDEN WAX. Flat pod. Our stock is perfectly free from runners. Pkt. 5c., qt. 30c., pk. $1.50, bu. $5.50.

FLAGOLET WAX. Perfection Wax. Pkt. 10c., pt. 30c., pk. $4.75, bu. $6.50.

DAVIES’ KIDNEY WAX (New). Pkt. 10c., pt. 30c., qt. 35c., pk. $2.00, bu. $7.50.

EARLY GOLDEN STRINGLESS. A very early, round podded sort of great value to the market gardener. A heavy yielder and good market sort. Will stand more cold weather than other wax sorts. Pkt. 10c., pt. 30c., qt. 35c., ½ pk. $1.00, 1 pk. $2.25, bu. $8.00.

WARDWELL’S IMPROVED DWARF KIDNEY WAX. Our strain of this sort is very pure. Pkt. 10c., qt. 35c., pk. $2.50, bu. $6.50.

NEW BEAN FOR SHELLING

Bismark Great German Soup Bean

Epicure Extra Early Wax Bean.

The Only ABSOLUTELY Rust-Proof Round Pod Wax Bean Ever Introduced. Being entirely stringless, this variety can be used as a string bean until nearly ripe; in fact, LONGER THAN ANY OTHER SORT. It is also one of the hardest varieties and does not spot like many other round pod wax sorts. Quality is unexcelled. An ideal bean for either early or late planting. An immune yielder, bearing almost the entire summer. No market gardener will be disappointed with this excellent new sort. It is especially valuable for long distance shipping. Pkt. 10c., pt. 30c., qt. 35c., pk. $5.00, bu. $7.50. Special prices will be quoted upon application for 5 bu. and upwards.

CURRIE’S RUST-PROOF WAX. Pkt. 10c., qt. 30c., pk. $1.75, bu. $6.00.

Important! It may be well for our southern and other customers to know that our California Rust-Proof Black Wax and King of the Wax beans will stand from 5 to 10 degrees more cold than any other Flat Pod wax sort.

Everybody relishes a good bean soup, but ninety-nine out of one hundred varieties of beans are too large and lack that rich delicacy of flavor that a soup bean should have. Now the German nation is great for good soup. They have known the world over for that, and a bean soup is one of their great specialties. We know while traveling in Germany that everywhere bean soup was served, and the rare delicacy and flavor thereof called forth pleased remarks from every traveler. The secret of the whole thing was that they used a small soup bean. The size of the bean is smaller than a small pea, is magnificently flavored, and just the article required to make a magnificent bean soup. A pint of beans will grow sufficient beans to supply a good-sized family all winter, while for baking there is no bean so good as this one.
M & S IMPROVED LARGE EXTRA EARLY TWENTIETH CENTURY BUSH LIMA

Buy Direct from Us and Get the Genuine.

"The most remarkable of new vegetables," the only bush form of the true delicious Large Lima. It is pronounced by all good judges as unquestionably the Real Bush Lima, distinct and superior in every way—in its splendidly vigorous, upright, bushy habit of growth, its great uniformity and truth to type, and bearing the huge, largest Lima Beans in great abundance. There is absolutely nothing to compare with it. The largest Lima Beans can now be raised in quantity at small cost, without expense and labor attached to the use of poles. This large Bush Lima comes absolutely true from seed. The bushes grow eighteen to twenty inches high, of stout growth and always erect. It is an immense yielder, the handsome large pods being well filled with from three to four, and sometimes five very large beans of a beautiful green color, identical in size and delicious flavor to the well-known large pole lima. This strain produces beans for the table from ten to twelve weeks from the time of planting and market gardeners will find no strain as early nor as productive as our improved. We are continually improving it every year. Pkt. 10c., qt. 25c., 4 qt. $1.25, pk. $5.00, bu. $25.00.

Ours Were Best.

Gentlemen:—I bought three pecks of Bush Limas last year from three different Philadelphia seedsmen. Yours were the best strain, being larger, earlier and better color. Yours also yielded much better.

Not a Runner in the Whole Lot.

The eight bushels of your Improved Large Bush Limas bought from you last year did not yield a single runner. Many of my neighbors asked me where I got such pure seed.

WILSON B. MILLER,
Camden, N.J.

BUSH BUTTER LIMA

A MARVEL IN YIELD!

Outyielding all of the Earlies, and equaling the heaviest cropping Lates. & &

One of the good characteristics of this Bush Lima from the South is its remarkable earliness. Our tests show it to be earlier than any of the Pole or Bush Limas. It is simply delicious when cooked and served with a butter sauce. It is economically productive (see our Illustration), bearing continuously throughout the Summer until killed by frost. Our customers find it a delicious vegetable and one that will please them in both quality and quantity, being tender, rich and buttery. It is a true bush variety, growing only about fifteen inches high requiring no stakes nor other supports whatever. Our Bush Butter Lima is especially adapted for family gardens and we hope all having such will plant it liberally as it thrives well in all parts of the United States and Canada. It also makes a delicate Winter Shelled Bean. Pkt. 25c., $1.00, qt. 40c., 4 qts. $1.00.

Other Bush Limas

EXTRA EARLY BUSH LIMA, NEW WONDER. This is a novelty of the highest merit, being the earliest, largest and most prolific of the whole class of Bush Limas and of most excellent quality. Pkt. 10c., qt. 25c., 4 qts. $1.00, bu. $5.00.

KUMERLE, or DREES' BUSH LIMA. This originated with a market gardener in North-east New Jersey, and the bushes grow from one and a half to two feet high. Pkt. 10c., qt. 35c., pk. $1.00, bu. $5.00.

HENDERSON'S BUSH LIMA BEAN. Of hardy growth and very prolific, bearing continuously until the end of the season. Each bush generally matures from forty to eighty pods. Pkt. 10c., qt. 30c., pk. $1.50, bu. $5.00.

BURPEE'S BUSH LIMA. Twentieth century strain. Pkt. 20c., qt. 30c., pk. $2.00, bu. $5.00.

Dwarf Beans for Shelling

ROYAL WHITE KIDNEY. Are grown almost exclusively for shell or soup beans. Price, Pkt. 5c., qt. 15c., pk. $1.00, bu. $5.00.

DWARF HORTICULTURAL. A very productive sort, with fine rich flavor. Very nutritious, highly recommended. Pkt. 10c., qt. 25c., 4 qts. $1.00, pk. $2.00.

New Wisconsin Tree Bean

The grandest Bean for a farm crop we have ever seen; side by side with any lima known to us, it outyields it by fully one-third to one-half, placing it as a marvelous cropper. The pods are large and filled full with medium-sized pure white Beans. Extremely early; can be picked from the time the buds are formed and market gardeners will find no strain as early nor as productive as our improved. We are continually improving it every year. Pkt. 25c., qt. 50c., 4 qt. $2.00, pk. $10.00.

Black Turtle Soup Beans

If cooked in the form of a soup until the Bean is soft, they will have the exact taste of soup made from the famous Diamond Black. Pkt. 25c., qt. 50c., 4 qt. $2.00.
POLE LIMA BEANS

WILKIE'S PERFECTION PRIZE

POLE LIMA SHOWING HABIT OF PODS GROWING IN CLUSTERS

WALTER’S PROLIFIC THICK GREEN POLE LIMA BEAN

A grand selection, possessing great merit.
Of most delicious quality. Will always command the highest market price.

Our illustration herewith which was taken from a photograph aptly illustrates the shape and compact habit of the bean. It originated and was grown for many years by Mr. Henry Walter of Gloucester Co., N.J., and who always jealously guarded his seed from “outsiders.” By paying him an enormous price we finally induced him to grow seed stock which we now offer to our many market gardener friends. This variety invariably commands a higher price in all markets than any other sort, and it will be found very profitable to grow by all who plant for profit. The distinctive improvements are its remarkable productivity, delicious flavor, and the forming of the beans so closely in the pod. Vines vigorous and productive, with pointed leaves and white blossoms, Pods broad, straight and thick. Beans dark green, tender, sweet and juicy, medium size, broad and much thicker than the Large Lima, and formed very close together in the pod. This is an excellent sort for the family garden.

Pkt. 10c., pt. 20c., qt. 60c., $1.00, pk. $6.00, bu. $10.00.

SEIBERT’S EXTRA EARLY LIMA. In earliness, ease of shelling, size, and quality of the green bean, this variety is far in advance of many sorts. Pkt. 10c., pt. 20c., qt. 35c., pk. $1.75, bu. $5.00.

M. & S. IMPROVED POLE LIMA. Our strain is much superior to the old type of Drier’s Improved or Potato Lima. The distinctive features of this are early maturity, large yield and extra quality. The bean itself is thick and round, rather than oval-shaped, as most other Limas are. Pkt. 10c., pt. 20c., qt. 35c., pk. $1.25, bu. $5.00.

KING OF THE GARDEN LIMA. Pkt. 10c., pt. 20c., qt. 35c., $1.00, bu. $5.00.

JERSEY EXTRA EARLY LIMA. Very early, prolific bearer and vigorous grower, beans large and pods borne in clusters. Pkt. 10c., pt. 20c., qt. 35c., pk. $1.75, bu. $7.00.

SALEM IMPROVED MAMMOTH LIMA. True stock. Pkt. 10c., pt. 20c., qt. 35c., pk. $3.75, bu. $7.00.

FORD’S MAMMOTH PODDED LIMA. Pkt. 10c., pt. 20c., qt. 35c., pk. $6.00.

EVERGREEN LARGE LIMA. The seed of this sort is deep green in color. Pkt. 10c., pt. 20c., qt. 35c., pk. 50c., bu. $1.00.

One Quart will Plant 100 Hila. Lima Beans are apt to rot if planted too early.

WILKIE’S PERFECTION PRIZE LIMA

THE STANDARD LIMA BEAN

A GRAND ACQUISITION...

After twelve years’ trial this famous Pole Lima has proved superior to all for our many thousand customers who have planted it. This world famous variety originated, and the seed was grown by a noted Philadelphia market gardener who desires us to distribute it to all those who wish to grow the most profitable and delicious of Pole Limas. Mr. Wilkie was over twenty-five years perfectioning this truly valuable variety and which is unhesitatingly pronounced to be the best large Pole Lima in cultivation. The beans are large, very tender, sweet and juicy, of a fine green color and enormously productive—1627 pods have been gathered from a single vine. The vines while young produce pods in great abundance and continue to grow and bear profusely the entire season. This is unquestionably the earliest and best variety for the market gardener to plant; the beautiful green color and delicious quality of the beans always create a big demand for it wherever known. Pkt. 10c., pt. 20c., qt. 40c., ½ pk. $1.30, pk. $2.50, bu. $5.00.

NO GARDEN SHOULD BE WITHOUT WILKIE’S PERFECTION PRIZE LIMA

READ WHAT OTHERS SAY:

IMMENSE CROP.—The Wilkie Prize Limas I bought from you last year were the wonder of the neighborhood for earliness, yield and size of pods. In spite of the drought I had an immense crop.—William Singleton, Willow Grove, Pa.

GRAND SUCCESS.—An old customer of yours persuaded me last season to plant the Wilkie Prize Lima. I planted 16 quarts and had grand success.—John Long, Pittsburgh, Pa.

PLANTED THEM ELEVEN YEARS.—I have planted your Wilkie Lima for the past eleven years, getting fresh seed from you every year. I have tried many other sorts but find it best. I believe it was the earliest Pole Lima on the market.—Peter Leeming, market gardener, Cape May, N. J.

WALDIE'S PROLIFIC THICK GREEN POLE LIMA BEAN

Our illustration herewith which was taken from a photograph aptly illustrates the shape and compact habit of the bean. It originated and was grown for many years by Mr. Henry Walter of Gloucester Co., N.J., and who always jealously guarded his seed from “outsiders.” By paying him an enormous price we finally induced him to grow seed stock which we now offer to our many market gardener friends. This variety invariably commands a higher price in all markets than any other sort, and it will be found very profitable to grow by all who plant for profit. The distinctive improvements are its remarkable productivity, delicious flavor, and the forming of the beans so closely in the pod. Vines vigorous and productive, with pointed leaves and white blossoms, Pods broad, straight and thick. Beans dark green, tender, sweet and juicy, medium size, broad and much thicker than the Large Lima, and formed very close together in the pod. This is an excellent sort for the family garden. Pkt. 10c., pt. 20c., qt. 40c., ½ pk. $1.75, pk. $2.20, bu. $5.00.

SEIBERT’S EXTRA EARLY LIMA. In earliness, ease of shelling, size, and quality of the green bean, this variety is far in advance of many sorts. Pkt. 10c., pt. 20c., qt. 35c., pk. $1.75, bu. $5.00.

M. & S. IMPROVED POLE LIMA. Our strain is much superior to the old type of Drier’s Improved or Potato Lima. The distinctive features of this are early maturity, large yield and extra quality. The bean itself is thick and round, rather than oval-shaped, as most other Limas are. Pkt. 10c., pt. 20c., qt. 35c., pk. $2.25, bu. $8.00.

KING OF THE GARDEN LIMA. Pkt. 10c., pt. 20c., qt. 35c., $1.00, bu. $5.00.

JERSEY EXTRA EARLY LIMA. Very early, prolific bear, and vigorous grower, beans large and pods borne in clusters. Pkt. 10c., pt. 20c., qt. 35c., pk. $1.75, bu. $7.00.

SALEM IMPROVED MAMMOTH LIMA. True stock. Pkt. 10c., pt. 20c., qt. 35c., pk. $3.75, bu. $7.00.

FORD’S MAMMOTH PODDED LIMA. Pkt. 10c., pt. 20c., qt. 35c., pk. $6.00.

EVERGREEN LARGE LIMA. The seed of this sort is deep green in color. Pkt. 10c., pt. 20c., qt. 35c., pk. 50c., bu. $1.00.
CLIMBING, OR POLE BEANS

These are more tender and require rather more care in culture than the Bush varieties and should be sown two weeks later. They should be liberally enriched with well-rotted manure in the hills, which are formed, according to variety, from three to four feet apart; from five to six seeds are planted in each hill about two inches deep.

NEW GOLDEN LAZY WIVES POLE. It is nothing unusual to pick one-half bushel to three pecks from a single vine. The pods are five to six inches long, broad, thick, fleshy, a beautiful yellow, and entirely stringless, surpassing all other varieties in this respect, and retaining these important qualities until almost ripe. Extremely rich, buttery and fine flavored. The vines cling well to the poles. They commence bearing in great abundance when the vines are quite young, and continue to bear profusely the entire season. The beans when dry are pure white in color, and make a fine shell or winter bean. Pkt. 10c., pt. 20c., qt. 50c., pk. $1.00.

GOLDEN ANDALUSIA WAX. A variety of recent introduction, with large, broad, flat pods, very productive. Pkt. 10c., pt. 20c., qt. 50c., pk. $1.00.

SCARLET RUNNER. Ornamental as well as useful. It grows ten feet high, and produces bright scarlet flowers, followed by large shell beans. Pkt. 10c., pt. 20c., qt. 35c.

IMPROVED DUTCH CASE KNIFE. Early, productive and excellent, whether used green or dry. Beans vigorous, climbing well. Pkt. 10c., pt. 20c., qt. 35c., pk. $1.50.

WREN'S EGG POLE BEAN. Pods hang in enormous clusters. Beans large, beautifully spotted with red, and of the highest quality. It is a capital pole bean, taking to the pole exceptionally well. Being stringless it makes an excellent snap bean at any stage of growth, and when ripened is unsurpassed for baking or boiling. Pkt. 10c., pt. 20c., qt. 50c., pk. $1.75.

OLD HOMESTEAD OR KENTUCKY WONDER. It is enormously productive, the pods hanging in great clusters from top to bottom of the pole. It is entirely stringless, and the pods are of a silvery green color, resembling the popular Refugio Bush Bean. Vine vigorous, climbing well and very productive, bearing its pods in large clusters; blossoms white; pods green, very long, often reaching nine or ten inches, nearly round, when young, and very crisp. An early and very prolific sort, with showy pods which are excellent for snaps. Pkt. 10c., pt. 20c., qt. 50c., 400s. $1.00, pk. $3.50.

WHITE CREESE BACK OR FAT HOSE. The pods are round, of a beautiful light green color, stringless, about six inches long, perfectly round in a crease in the back, and of most excellent quality. Pkt. 10c., pt. 20c., qt. 35c.

TENNESSEE WHITE CORN HILL BEAN. It is undoubtedly the best variety ever grown for planting among corn, thus securing two crops easily from the same ground with but one cultivation—this is practical wisdom. The seed is white, pod flat, light green, very mealy, and they are without doubt the most productive bean in cultivation. As a green snap bean they are superior to any sort grown. While it is the earliest pole bean grown, it will continue to bear until frost if the pods are removed while yet young. Don't fail to plant a dozen or more hills among your corn. Pkt. 10c., pt. 20c., qt. 35c., 400s. 4 qts. $1.00.

HOMESTEAD OR KENTUCKY WONDER POLE BEAN.

EXACT SIZE GOLDEN CARMINIE POLE BEAN.

Selected Pedigree Varieties

Wesley's Earliest Market Beet.

This group of Roots was drawn from specimens grown in our trial grounds.

WESLEY'S EARLIEST MARKET BEET...

This excellent Beet is an improved form of the famous "French Early Blood Red Beet," so extensively grown in the south of France for early shipment to the Paris and London markets, where it is held in higher esteem than any other early variety. It is a source of great profit to the French market gardeners, as well as to all others who grow it.

Pkt. 5c., oz. 10c., ½ lb. 25c., 1 lb. 70c., 5 lbs. $3.00. Special price will be quoted for lots of 25, 50 and 100 lbs. and upwards.

OUR CUSTOMERS WILL USE OVER 20,000 POUNDS OF WESLEY BEET SEED FOR THEIR 1905 CROPS.

The Most Wonderful Early Beet of the Century

THE DARKEST RED EARLY BEET EVER GROWN.
MEETS A LONG-FELT WANT AMONG BEET GROWERS.
EVERY BEET SALABLE. ALWAYS BRINGS THE HIGHEST MARKET PRICE

Handsone Dark Blood Red Variety
For First Early, Second Early and Late Planting.

AMERICAN EGYPTIAN. This is an entirely new and distinct form of the old Egyptian Blood Turnip Beet, and will be found much superior to the old type of imported seed. This selection is much earlier, has a shorter top, shape not so flat, and entirely devoid of cracking at the bottom. Pkt. 5c., oz. 10c., ½ lb. 25c., 1 lb. 75c., 5 lbs. $1.25.

CROSBY'S EGYPTIAN. An improved form of the imported variety, and not so liable to crack down. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c., 5 lbs. $2.25, bu. $6.50.

BASTIAN'S EARLY RED TURNIP. Flesh tender. Oz. 5c., ½ lb. 15c., 1 lb. 40c., 10 lbs. $3.50, bu. $8.50.

BASTIAN'S HALF-LONG. Oz. 5c., ½ lb. 15c., 1 lb. 45c., 10 lbs. $3.50.

EDMUND'S EARLY RED TURNIP. Smooth, good marketable size. Oz. 5c., ½ lb. 15c., 1 lb. 50c., bu. $6.00.

IMPROVED BASSANO. Oz. 5c., ½ lb. 15c., 1 lb. 35c.

ARLINGTON IMPROVED BLOOD TURNIP. A good second early. Oz. 5c., ½ lb. 15c., 1 lb. 35c., bu. $6.00.

DETOUR RED TURNIP. A new early blood-red turnip sort of fine quality. Original stock. Pkt. 5c., oz. 10c., ½ lb. 15c., 1 lb. 40c., 10 lbs. $3.50.

SWISS CHARD or SILVER BEET (Large Ribbed White Silver). Much superior to the common beet for greens. Oz. 5c., ½ lb. 15c., 1 lb. 35c.

Newest and Best Up-to-date Sorts for Up-to-date Planters.

If you buy from Us you get the Best.

We have yet to hear of a user of Moore & Simon's SEEDS who would willingly give them up for any other brand.

CULTURE.—The soil best suited for the culture of the Beet is that which is rather light than otherwise, always provided that it is thoroughly enriched with well-rotted manure. For an early supply sow in spring, as soon as the ground is fit to work, in drills about one foot apart and two inches deep. For main crop, sow the first week in May, and for winter use sow in June. These dates are for the latitude of Philadelphia. For the South, sow earlier; for the North, later. When the plants have attained three or four leaves, thin out so that they may stand five or six inches apart. In October, the roots may be taken up and stored in cellar or pits outside.
NUTTING'S 

EARLY GEM 

RED TURNIP BEET.

THE EARLIEST & BEST FOR SASH, EARLY BORDERS SQUARES, OR LATE SUMMER SOWING.

NUTTING'S EARLY GEM. It seldom f lls to the happy lot o' any seedman to have the honor to introduce a novelty of such great merit as this, Mr. Nutting's success and fame as an early beet grower has extended over a long period of years, and the giving of this grand new early beet to the public through us--we have purchased his entire stock--he considers the crowning effort of his life. His neighbors have often purchased him fabulous sums for this seed, so highly do they prize it for its extreme earliness, dark blood-red color and fine quality. Its especial valuable features consist in its being two weeks earlier than the Bastian Lentz. Dewing's and Egyptian strains, together with its being much better adapted to growing under glass, owing to its very few and small leaves, thus rendering it very profitable to the market gardener. It will invariably command the highest market price, and not infrequently sells at a higher figure than any other sort. For a general outdoor early crop it is unsurpassed. The quality is the highest, being very tender, sweet and juicy even when the leaves die off from age. It does not become tasteless, "woody" or stringy when fully grown, as many other sorts do. It will also be found to be the ideal beet for hot-house forcing, as our numerous testimonials will show. The seed of this variety is unusually small, and a given quantity will plant a larger space than any other sort, which makes it a remarkably economical sort for large planters to use. Pkt. 5c., oz. 10c., 2 lb. 25c., 1 lb. 75c., 5 lb. $1.25 to 10 lb. $6.00. Those who plant 25, 50 or 100 lbs. are quoted upon application.

IMPROVED EXTRA EARLY RED TURNIP. O.S. 20c., 5 lb. 75c., 1 lb. 40c., 10 lbs. $3.50, lbs. $4.50.

IMPROVED EXTRA EARLY EGYPTIAN. Flesh blood red. Of good quality when young. Oz. 25c., 5 lb. 75c., 1 lb. 40c., 10 lbs. $3.00, lbs. $6.00.

IMPROVED EXTRA EARLY ECLIPSE. Our type will be found much superior in many respects to that usually sold, and is the result of careful selection of the best roots for stock seed. O.S. 25c., 1 lb. 75c., 1 lb. 40c., 10 lbs. $3.00, lbs. $6.00.

SELECTED LENTZ. Original stock seed grown by Henry Lents. Much superior to that ordinarily sold. Pkt. 25c., oz. 10c., 2 lb. 25c., 1 lb. 75c., 5 lbs. $3.25, lbs. $6.00.

SUTTONS TABLE DELICACY BEET.

SUTTON'S TABLE DELICACY. We have eaten of nearly all varieties of beets grown in this and other countries and pronounce the Table Delicacy the finest flavored and tenderest beet grown. No matter how old the beet may be, the exquisite flavor and tenderness remain; this peculiar quality causes it to be the best of all varieties for the family garden. In earliness it is equalled by none. When sown late for winter use it is equalled by none for table use. In size of root and top it closely resembles our Nutting's Early Gem described elsewhere. Everyone with a family garden should plant this very toothsome variety. It will surely please all. Many of our market gardener friends will find this delicious variety to outclass all other sorts. Pkt. 25c., oz. 10c., 2 lb. 25c., 1 lb. 60c., 5 lbs. 75c.

ARLINGTON FAVORITE EXTRA EARLY.

M. & S. STOCK.

This very early dark red variety has many points in its favor. The top is short, small and well adapted for growing under glass for open ground planting it will be found one of the first dark red extra early beets--shape, size and quality, much superior to many existing varieties. The roots are perfectly smooth, of beautiful round shape, intense blood red skin and flesh, fine grained and very sweet. It is earlier than Bastian, Dewing's and Egyptian, and will be found valuable for sowing for a second, third or autumn or winter sort. Pkt. 5c., oz. 10c., 2 lb. 25c., 1 lb. 75c., 5 lbs. $3.00, 10 lbs. $6.50, lbs. $8.00.

LOWER'S EARLY KING BEET

Lower's Early King Beet

Especially Valuable to Florida Shippers

Lower's and have the exclusive right to offer it to the public. The best sort for transplanting. An excellent market beet and will be found superior to all others when bought. Pkt. 25c., oz. 10c., 2 lb. 25c., 1 lb. 75c., 5 lbs. $3.25, 10 lbs. $6.00, lbs. $8.00.

SIMON'S STRASBURG DARK BLOOD HALF ORM.

The ideal in color, size and quality.

SI\MON'S INCOMPARABLE SECOND EARLY.

This is without doubt the finest second early market beet ever introduced. Our illustration well depicts the shape. The root is medium in size, rich dark red in color, which it retains when cooked. All our customers praise it highly. Pkt. 25c., oz. 10c., 2 lb. 25c., 75c., 1 lb. 75c., 5 lbs. $3.00, 10 lbs. $6.00, lbs. $8.00.

SIMON'S INCOMPARABLE SECOND EARLY.
In our opinion no crop is a better paying investment for farmers to grow than Mangel Wurtzel beets. The value of these for stock feeding as well as human use is greatly overestimated. The results from their use are wonderful, as is clearly shown in the improved health and condition of animals, the increased yield of milk in cows, and the great saving of hay. They need to be planted on very richly fertilized and well-manured land. We have found that some seed will yield immense crops per acre.

A horse, a cow, or a sheep will thrive and do well on good pasturage alone. Cut this grass, carefully cut it and feed the animal on hay alone. It will lose its appetite in a few weeks, become thin and it will not have a healthy appearance. The hay is a dry feed, the grass a succulent feed. If the best results are to be secured from feeding hay or some succulent feed should be provided to take the place of the green feed of summer.

The cheapest, most convenient and best way of providing succulent food is with roots. We recommend the growing by farmers, and especially dairymen, of Mangel Wurtzels as the root crop best adapted to make farming profitable.

Certain wealth and prosperity is assured all stock or dairy farmers who feed their livestock on this succulent root for brood cows during the winter, fed in connection with grain they keep the animals healthy, the hair glossy and the system cool. Fattening hogs like them as a change from pig food and a different variety of food. A good crop of milk in winter without succulent feed, and mangels supply this to the dairy cow in a manner it cannot do. Mangels help push the calves a long during the winter. Plant an acre this spring.

Mangels are the most important of all root crops for feeding, as has been proven by many experiments in all parts of the country. Dairymen and stock growers who feed them largely. They may be grown in any part of the American continent on fairly good farm land; all that is necessary is good cultivation.

The best soil for Mangels is loose friable loam and deep plowing. If experiment, follow the plow with a subsoil plow, and the crop will in most cases repay the extra trouble. The ground should be well enriched, and the seed sown in May in drills 2 inches apart in light soil, and 3 inches apart in strong rich land; thin out the plants with a hoe to 9 inches apart in the former and 12 inches apart in the latter. 5 to 6 lbs. of seed are used per acre if sow a drill, or double that quantity by hand. Cultivate with a horse hoe.

If by mail, add for postage at the rate of 8 cents per pound.

NEW ENGLAND MILK AND BUTTER SUGAR MANGEL

This distinct variety which we have introduced after repeated tests with other sorts is a most important addition to our list of roots for stock feeding as it contains less water and more sugar and nutritive matter than any other variety of Mangel. A special feature is the rich dark color of the flesh, making it a rich milk and milk flesh producing qualities. In England, where it is considered red indispen-
sable for dairy farming, large dairy farmers state that they are not only able to obtain a higher price per gallon for milk from cows fed on this mangel, but also that the cows produce fully one-third more milk and butter and are in condition to sell which brings the highest price on hay and the milk and butter sells for hay alone. The largest yield of cattle food ever known has been obtained from this variety. Chemical tests show it to contain twenty per cent sugar, while other sorts only analyze from twelve to fourteen per cent. It is a compact grower, and if well fertilized, this variety will stand close cropping better than any other. The root and top is red and very smooth. Pkt. 5c., oz. 10c., $1 lb. 25c., 1b. 60c., 5 lbs. $2 50.

Your New England Milk and Butter Sugar Mangels Are the Best I ever grew. No one ever saw their equal in this part of the country. Have planted them for many years, and the results from feeding the dairy cows are most satisfactory. Both the milk and the butter from this mangel is noted for its unusual excellence. My herd is always in the pink of condition which is largely due to the liberal feeding of beets.—W. Scott Laws, Esq., of Hatfield, Mass.

I have Planted Your Danish Long Keeping Mangels for Many Years with the greatest satisfaction. Both the milk and butter from my dairy is said to be from mangels for its unusual excellence. My herd is always in the pink of condition which is largely due to the liberal feeding of beets.—W. Scott Laws, Esq., of Hatfield, Mass.

I have increased the Net Income of My Dairy Over 42 Per Cent. since I commenced the cultivation and feeding of your milk and butter mangels. I feed much less grain than formerly while the quality and yield of the milk from the cows has increased wonderfully. C. H. Cook, West Chester, Pa.

BRUSSELS SPROUTS

Produces a very early crop of large, solid sprouts, delicious in flavor. Leaves rather small, crumpled, a green in color, standing well out from the stem. For comparison on the exhibition table this fine strain of Brussels Sprouts has no equal. The accompanying illustration is produced from a photograph. Enormous productive and a sure breeder. The finest of all sorts. Pkt. 10c., oz. 25c., $1 lb. 75c., 1 lb. $2 50.

MATCHLESS. Pkt. 5c., oz. 10c., $1 lb. 25c., 1 lb. 60c., 5 lbs. $2 50.

SUITON'S CHAMPION LONDON RED MANGEL. This variety is a long red root growing and best red root produced. The crop grows to an immense size, single roots weighing thirty pounds each, and always of fine texture and flavor. It is remarkable for the broad shoulder and massive shape of the root. This variety is a great weight which is sought after in England. The root is fine and long, and a large proportion of the root is the fleshy portion. Pkt. 10c., oz. 25c., 1 lb. 60c., 10 lbs. $2 50.

SUTTON'S CHAMPION LONDON RED MANGEL. This variety is a long red root growing and best red root produced. The crop grows to an immense size, single roots weighing thirty pounds each, and always of fine texture and flavor. It is remarkable for the broad shoulder and massive shape of the root. This variety is a great weight which is sought after in England. The root is fine and long, and a large proportion of the root is the fleshy portion. Pkt. 10c., oz. 25c., 1 lb. 60c., 10 lbs. $2 50.

GOLDEN YELLOW, LONG, MAHOMOT MANGEL. This variety is a long red root growing and best red root produced. The crop grows to an immense size, single roots weighing thirty pounds each, and always of fine texture and flavor. It is remarkable for the broad shoulder and massive shape of the root. This variety is a great weight which is sought after in England. The root is fine and long, and a large proportion of the root is the fleshy portion. Pkt. 10c., oz. 25c., 1 lb. 60c., 10 lbs. $2 50.

SUGAR RED. A very large root, very sweet, well adapted to feeding the dairy cows. Pkt. 5c., oz. 10c., $1 lb. 25c., 1 lb. 60c., 5 lbs. $2 50.

FREE GIFTS

This year we will distribute one million packages of seeds for trial. Everybody will get something, even though their order amounts to only twenty cents. The larger the order the more extras will be added.

BROCCOLI

Sutton's Snow-White Broccoli.

This variety is a distinct acquisition. The immense large close, snow-white heads are of spotless purity, alike valuable for a spring crop or for a sure crop planted in the fall when cauliflowers are uncertain. They deserve a prominent place in every garden. While those grow for market will find this variety unusually profitable to cultivate. This variety is a winner. Pkt. 5c., oz. 10c., $1 lb. 25c., 1 lb. 60c., 5 lbs. $2 50.

WHITE CAULIFLOWER. A close, close, creamy white color. Pkt. 10c., oz. 25c., $1 lb. 25c., 1 lb. 60c., 5 lbs. $2 50.
HIGHEST QUALITY CABBAGE SEED

German, Keffkohl.—French, Chou Pomme.—Spanish, Repolla. 1 ounce will produce 1500 plants; ½ lb. of seed to transplant for an acre.

Culture. The early varieties of Cabbage are cultivated more extensively than any other vegetable. In latitudes where the thermometer never indicates twenty degrees below the freezing point, seed may be sown in the open border in October and planted out on the first opening of spring; but in our Northern States they must either be sown in hot beds in February, or, what is still better, wintered over in cold frames; for this purpose the seed is sown from the 10th to the 20th of September. Attention to date is important; if too soon the plants might run to seed, and if too late they would be too small. In four or five weeks from the time of sowing they will be fit to transplant into the cold frames. In planting it is very important with Cabbage or Cauliflower that the plant is set down to the first leaf, so that the stem is all under ground, for, if exposed, it will be split by the action of the frost, and will be injured in consequence. The plants are usually set out from the middle of March to the middle of April, in rows about two feet apart, and eighteen inches between the plants in rows. This earliest crop matures in June. For second early the early kinds should be sown first week in April and planted out in May. This crop should mature in July and August. The late varieties are usually sown in the early part of May, and the plants are set in July, at distances of three feet between the rows, and two feet between the plants. This crop matures September, October or November.

READ THIS. We dare say that we bestow more care in the selection and growing of our Cabbage Seed than any other seed house, and intending customers may rest assured that they will get the finest Cabbage Seeds from us obtainable, much better in fact than from any other source known to us.

GENUINE CROWN JEWEL. This is without doubt the most wonderful cabbage ever introduced, and possesses more desirable qualities for the market gardener than any other so far known. Many of our customers who have tried it say they prefer it to any other for marketing during the early summer, fall or winter. It matures immediately after our Large Early Oxford. It is also an extraordinary fine sort for winter use. Heads uniform, very thick, solid, of medium size, very fine grained and the most productive sort grown, as it is absolutely all head, with scarcely any outer leaves. In quality and tenderness it surpasses all others; the midriff are also smaller than any other variety. It was originated by crossing our Boston Hard Head and Champion Late Drumhead by a practical market gardener of long experience, who has never found any variety that sells so readily to his trade, and justly claims that it is unequalled by any cabbage raised. Pkt. 10c., oz. 25c., ½ lb. 50c., lb. $1.00, ½ lb. $2.50.

M. & S. Selected Long Island Beauty Early Jersey Wakefield

This is the Best Type of Early Wakefield

Our strain is universally conceded to be the best type of Wakefield early cabbage in cultivation. The heads are pyramidal in shape, remarkably hard, have a blunted or rounded peak, size large, outer foliage small, and capable of being planted very close, and will mature all at once. It has always been our aim to have the very finest strain of this important variety, and it pleases us to state that we have a really superior strain for our Market Garden friends, and we hope they will avail themselves of the opportunity to get our extra stock of this valuable early variety. Pkt. 10c., oz. 25c., ½ lb. 50c., lb. $1.00, ½ lb. $2.50, 1 lb. and upwards at $5.75.

New Early Flat Brunswick. A grand new early cabbage from Germany. Every head as uniform as if moulded, and remarkably solid even when young. The shape and habit of growth is well shown in our illustration herewith. It is ready to cut as early as our Early Ox-Heart, somewhat larger, equal of fine flavor and delicate texture. A remarkably compact grower, on well manured ground it can easily be planted 30 inches apart. Its uniformity in shape, solidity and large yield per acre makes it especially valuable for market gardeners. Its compactness particularly recommends it to small sized gardens. We earnestly commend it to our many thousands of customers. Pkt. 10c., oz. 50c., ½ lb. 50c., 1 lb. $1.00, ½ lb. $2.50, and upwards at $5.75 per lb.

LARGE EARLY OX-HEART. For many years past the true type of this valuable cabbage has not been offered by any American seedmen. We are proud to say that we are now enabled to offer to our patrons the true type of this long famous and valuable old sort. We pronounce it the very best early cabbage in existence. The heads are nearly twice as large as the Early Jersey Wakefield, often weighing fifteen pounds, and nearly as solid as our Boston Early Head, and of very compact growth. It also stands the cold better than many other sorts. The color is a beautiful emerald green, leaves smooth, small ribs, habit vigorous, stem short. Very few outer leaves, this admitting of close culture, upwards, or nearly so. This variety is particularly adapted to light, sandy loam soil, and the grower will at once recognize it. Pkt. 10c., oz. 25c., ½ oz. 25c., 1 oz. 50c., 2 oz. 75c., ½ lb. 85c., 1 lb. $1.50, 2 lb. $2.50.
M. & S. NEW EARLY GEM CABBAGE

Procurable only from Moore & Simon, Philadelphia

It has taken us ten years of hard, continuous labor to produce and perfect the New Early Gem Cabbage, which for extreme earliness and hardiness of head, is the peer of early sorts. Everywhere cabbage is grown, specialists have been struggling to combine a hard head with earliness, and it must be conceded that until now all these efforts have failed and that the great desideratum has been left to us to accomplish. We feel confident that at last a variety has been produced which combines extreme earliness with hardness and good size; likewise delicious flavor, tender leaves, and great productiveness. This is another valuable feature which it possesses and should be taken into consideration by all, viz.: Its compactness of growth. Notwithstanding the large size of its head, the leaves are very few, small and set close to the head. So compact is its growth that 14/30 heads can be grown to the acre on any good ground, sufficiently fertilized. The seed is so pure and highbred that practically every plant will produce heads of this size, and we can recommend it to the market gardener, trucker and private planter, as it is a perfect first early cabbage in every respect. All are safe in planting it, and we especially recommend it to southern growers. Pkt. 10c., oz. 30c., 1/4 lb. 85c., lb. $3.60.

EARLY JERSEY WAKEFIELD. Selected. Pkt. 5c., oz. 35c.; 1/4 lb. 75c., lb. $2.50.

PHILADELPHIA EARLY WINNINGSTADT. Our strain of Philadelphia grown seed of this excellent variety will be found much superior to the imported seed usually sold. In season, it comes very close to the Wakefield; heads large, leaves bright, glossy green; heads solid and hard, even in summer. This is a very sure heading variety. Pkt. 5c., oz. 30c., 1/4 lb. 85c., lb. $1.50.

NEW RUSSIAN ROUND GIANT

The Largest Hard-Heading Cabbage in Cultivation. Sure to Head.

This new cabbage originated in Russia, and well deserves the name Round Giant, for never before have we seen any cabbage that produces such uniformly large, solid heads, or any very large cabbage in which the heads were so hard and solid. The New Russian Round Giant is uniformly true to type and sure to head hard—solid as a rock—and we have a stock of it ready for all our market garden friends, who wish large heads, as being a distinct summer, all and winter cabbage, sure to please all. Pkt. 10c., oz. 36c., 1/4 lb. 85c., lb. $3.00, 2 lbs. $4.50.

NEVER SAW ANYTHING LIKE IT.

A. J. Lind's, Astoria, Long Island, writes: "Have grown the following for two years, yet I never saw anything like the New Russian Round Giant I received from you. Rendiont's Succession (True Stock). About one week later than Early Summer. Our stock is unusually fine. Pkt. 5c., oz. 35c., 1/4 lb. 75c., lb. $2.50.

NEW MODEL SUMMER CABBAGE

In the illustration we display what we consider—as well as all those whom we sold it to last year—the finest type of summer cabbage in existence, whether for medium early, main crop or winter use. We class it as a second early sort coming in a few days after our Crown Jewel, but immeasurably superior, in some respects, being double the size, with no tendency to run to seed nor drop the leaves during hot summer days. We say, without exaggeration, that it is the finest summer cabbage in existence to-day, and for summer use it has no equal. It is the cabbage in every respect for the market gardener or private planter, being large in size, handsome in color and of the finest quality. It is, in all probability, the most profitable sort to plant, as a crop is sure, no matter when planted. All our varieties of cabbages have for many years been the acknowledged standard of excellence by everyone interested in this important seed. For compact growth and solidity and fine quality, it is without a peer; and Mr. William S. Lippincott, of Morton, Pa., writes us: "It is the most rapid selling and satisfactory summer cabbage I ever grew." Pkt. 10c., oz. 36c., 1/2 lb. 85c., lb. $2.00, 5 lbs. and upwards $2.90 lb.

CHARLESTON LARGE EARLY WAKEFIELD. The uniformity and truthness of our strain is appreciated by all who use it. Pkt. 10c., oz. 35c., 1/2 lb. 75c., lb. $2.50.

NEW MODEL SUMMER CABBAGE

IMPROVED EARLY SUMMER. Pkt. 5c., oz. 25c., 1/4 lb. 75c., lb. $2.50.

NEW RUSSIAN ROUND GIANT

Not a plant missed making an extra large, round, firm head, very fine grained, tender and handsome in appearance. My entire crop of 4700 heads, rated as extra-fine and returned me $20.00 per hundred, with good stock. Enclosed find money order for four pounds more." Rendiont's Succession (True Stock). About one week later than Early Summer. Our stock is unusually fine. Pkt. 5c., oz. 35c., 1/4 lb. 75c., lb. $2.50.

ORIGIN SALIUREHEAD. Large, round, flat heads. True stock, grows from selected heads. Pkt. 5c., oz. 15c., 1/4 lb. 45c., lb. $1.50.

SOUTHERN KING. A new variety from southern Georgia, of usual early growth, heads solid, very tender, and will produce a good crop where other sorts fail. Leaves are of a beautiful glossy green and withstand the ravages of the cabbage worm better than any other sort. Medium early, heads hard. Pkt. 10c., oz. 35c., 1/4 lb. $1.00, lb. $3.50.

SUMMER CABBAGE

Known. Summer Cabbages are a favorite class with the American housewife, as the large heads are good for sauerkraut, green stock, and as a substitute for winter cabbage in certain dishes. We have a choice strain of Summer Cabbage, in both early and main crops, Pkt. 5c., oz. 35c., 1/4 lb. 75c., lb. $2.50.

All Who Plant EARLY CABBAGE Should Plant This. It Means Big Money to All Who Plant It.

SUCCEEDS EVERYWHERE From Maine to California and the Philippine Islands, From Canada to Cuba and Porto Rico.
M. & S. New Royal Danish Ball Head Cabbage

PROCURABLE ONLY FROM MOORE & SIMON,
PHILADELPHIA

It is the Best of All the Danish Cabbages
Early, Hard Head, Short Stem and the Best Keeper of All
Always Commands a Higher Price Than Any Other Kind of Imported Cabbage
40,000 Pounds Per Acre Is No Unusual Yield

Pkt. 10c., oz. 30c., 2 oz. 50c., ½ lb. 85c., lb. $3.00

WHAT ENTHUSIASTIC GROWERS SAY OF IT

THE BEST CABBAGE IN NEW YORK STATE

Gentlemen: I am both a grower and a shipper of cabbage. I have used 25 acres of your New Royal Danish Ball Head, and all who saw it, as well as myself, pronounced it the best strain of Danish Cabbage in New York State. My crop averaged 85½ tons per acre, and I did not lose one head from rot or blight."

S. J. THOMAS, Ontario Co., N. Y.

THE EARLIEST TO MATURE

Peter Folwell, Leeds, N. Y., writes:—"I planted three kinds of Danish Cabbage last season, including your Royal Ball Head, which was ready to cut two days before the other. For solidity and long keeping it beats anything in my twenty-two years experience."

DEALERS ALWAYS PREFER IT

James Ousick, Ashby, O., writes:—"In answer to your inquiry, I find my customers decidedly prefer your Royal Ball Head, which is due to its great tenderness and delicate sweet flavor. The heads are large and the leaves larger than the German Export, Danish Round Head sorts. I find dealers always prefer it to any other cabbage they can get."

CREATED A GREAT SENSATION

James Clergue, Irondequoit, N. Y., writes:—"Your New Royal Danish Ball Head Cabbage has created a great sensation here. No cut, no blight, no failures, no loose heads. It is 100 per cent pure. I had a little over ten tons on half an acre. It is all head, no stalk, no outside leaves, and it keeps in perfect condition until May.

UNEXCELLED FOR DELICIOUS QUALITY, AND THE MOST PROFITABLE SORT TO GROW

Marshall Smith, Paducah, Ky., writes:—"The New Royal Danish Ball Head Cabbage I purchased from you last season is unexcelled for delicious quality, the interior leaves are of the most ivory white, very sweet flavor, crisp and tender. The heads are as heavy as 'a heavy head,' so my customers say. I have tried many kinds of Danish and German cabbage seeds, but I find your New Royal Danish Ball Head the best of all. The stems are remarkably short. The type is very pure; not a plant mislaid making a solid head, not a plant blighted. I did not find a decayed head in my entire crop of six and one half acres. Moreover, it is the most profitable sort to grow."

CLEARED $127.00

"Last season I cleared $127.00 on less than a half acre of your New Royal Danish Ball Head."

MORTON HAINES, Harrisburg, Pa.

SIMON’S BRUNSWICK NETTED SAVOY

THE HARDEST HEADING AND BEST VARIETY FOR EARLY OR LATE CROP

Heads large, very compact, solid and deliciously tender and sweet, and well adapted for either early summer or late autumn and winter crop. Entire "pits" of it will keep in perfect condition until May. Walter P. Fenton, Cynthoohocking, Pa., writes:—"I have grown all the advertised kinds of Savoys, but found no other half so good a keeper, it being in good market condition on the 15th of May. It also differs from all other kinds of Savoys in making heads as hard as a rock, standing late frosts in the field better than the Lee or Marvin strains. Its rich, sweet flavor and fine, curly, netted look, cause it to out sell all other varieties. Pkt. 10c., oz. 30c., ½ lb. 85c., 1 lb. $1.15, 3 lbs. $3.50.

LARGE DARK RED DANISH DRUMHEAD

We unhesitatingly pronounce this the best of all late Red Cabbages, producing uniform large solid heads, of a rich, deep red color. Many of the heads average eleven pounds each, it also keeps longer than any other variety, and never falls to head. Either for packing or table use there is no variety so good. It is grown for use by a celebrated Danish market gardener, and will give the greatest satisfaction to all. Pkt. 10c., oz. 30c., ½ lb. 85c., 1 lb. $3.00.

IMPROVED EARLY RED DUTCH ERFURT. By careful selection we have greatly improved this sort in size and color, and our improved strain will give universal satisfaction for all purposes. Very early solid dark red heads of medium size. Pkt. 10c., oz. 30c., ½ lb. 85c., 1 lb. $3.00.

AMERICAN PERFECTION DRUMHEAD SAVOY. Pkt. 5c., oz. 20c., ½ lb. 50c., 1 lb. $1.50.

MATCHLESS LATE FLAT DUTCH. Pkt. 10c., oz. 20c., ½ lb. 60c., 1 lb. $2.00.

GERMAN EXPORT. Pkt. 10c., oz. 30c., ½ lb. 70c., 1 lb. $2.25.

PREMIUM BAVARIAN LATE FLAT. Pkt. 5c., oz. 15c., ½ lb. 50c., 1 lb. $1.50.

PREMIUM LATE DRUMHEAD. Pkt. 5c., oz. 15c., ½ lb. 50c., 1 lb. $1.50.

John L. Wilson, North Carolina, writes:—"The cabbage seed I bought of you last season was the best I ever grew, and more than represented."
THE WORLD'S BEST CABBAGE SEED
IS GROWN BY AND CAN ONLY BE HAD FROM US

15 Distinguishing Points

1. It is the surest heading American variety of cabbage.
2. It is known to flourish on all soils, north, south, east or west.
3. It is planted by more gardeners than any other late sort.
4. It is almost proof against the destructive cabbage worm.
5. It is the best winter keeper for the southern states.
6. It will produce the greatest money value per acre.
7. It is the best for family gardens.
8. It is the best to sell by the 100 heads or carload.
9. It is the best for the dealer to handle.
10. It is sure to head solid.
11. It makes a crop where other sorts fail.
12. It is worth many times the price we ask for it.
13. It is best for making fine quality sour kraut.
14. It is sure to please everybody.

HAINES' PERFECTION LATE BEAUTY CABBAGE:
Our attention was first called to this new late cabbage by the raiser, Mr. Albert Haines of Burlington, N. J., who for many years kept in his own family and occasionally sold a little to his friends at 50c per lb. Many of those who grow it call it the "Greasy Head," owing to the peculiar dark smooth, oily appearance of its outer leaves. This feature renders it quite free from the attack of the cabbage worm. This feature alone is of inestimable value to all who plant it. Our seed stock, being obtained direct from Mr. Haines, can be relied upon as being absolutely pure. All those who grow it pronounce it different and superior to all other late sorts. The interior is creamy white, compact and crisp, flavor especially fine. Produces enormous solid heads, averaging from fourteen to twenty pounds, and which if properly grown will often reach thirty lbs. each. We pronounce it the best late sort for winter keeping and shipping we ever introduced. Every plant makes a beautiful large solid head which will usually sell above the highest market price. A field of this cabbage presents such a beautiful and interesting sight that it is no uncommon thing for cabbage growers to drive many miles to view it. Many cabbage growers write us annually that they realize from $1.00 to $2.00 per 100 heads more from this sort than any other. Cabbage worms never bother it, and if so seldom do much harm as in other sorts. If you grow late cabbage you will miss an excellent opportunity to make money if you fail to plant it. We offer it at the extremely low price of pkt. 10c., oz. 35c., 1/4 lb. $1.00, 1 lb. $3.50, 2 lbs. $6.50.

"The Haines' Giant Late Beauty I had from you received nothing but praise from all who saw it. Will plant ten acres, my entire crop, with it next season."

L. S. BURGOYNE, Buffalo, N. Y.

"I realized thirty per cent more money per acre from the Haines' Giant Late Beauty I planted last year than I did from the Autumn King."

CHAMPION'S LATE FLAT DUTCH CABBAGE.

We know this to be the finest strain of Late Flat Dutch Cabbage Seed ever offered. It is all head, always sure to head, and will produce a greater weight of cabbage from a given space than any other Late Flat Dutch or Drumhead sort. The heads have scarcely any outer leaves, are remarkably uniform, solid, of fine texture, have a short stem, and usually weigh from ten to thirteen pounds. It is very sweet flavored, keeps well, is an excellent shipper, withstands draught well and is without doubt the finest Late Flat Dutch Cabbage for the Market Gardener and Consumer that we ever saw during our thirty years experience. No variety of Late Flat Dutch can approach it for fine quality and uniform reliability to produce solid, firm heads of good size during the most unfavorable weather. Pkt. 35c., oz. 35c., 1/4 lb. 75c., 1 lb. $2.50, 2 lbs. $4.50.

The Cabbage Worms Passed It By.
John Smoot, Selmy, Fl. writes:—I am much pleased with your Haines' Cabbage; while the worms here are very bad, they seemed to pass it by, while two other sorts I had were completely ruined by them.

Got Big Dividends.
Benjamin Teller, Richmond, Va., writes:—I certainly got big dividends from the pound of the Haines' Perfection Late Beauty Cabbage seed I bought from you last season. Not a plant failed to head, not a head was lost by the worms. It is the only sort here that escaped. Every head was salable at top notch prices.

Kept Fine and Made Lots of Money.
"I must write you about your Haines' Late Beauty Cabbage. It keeps fine; had it in fine condition until May, and made lots of money on it. Keep me ten pounds for my spring order; have made up a club among my neighbors for it."

LEWIS SELZER, Pittsburgh, Pa.
CARROTS

Germany, Mühre.—French, Carotte.—Spanish, Zanahoria.

One ounce of carrot seed will sow a row about 100 feet long; four pounds will sow an acre.

FRENCH RED FORCING. An excellent dark red coreless variety with very small, short top, remaining tender, juicy and sweet a long time after being put to pull. Its remarkably rapid growth and very small top render it one of the best and most profitable sorts for early spring and late fall planting. Can be allowed to remain quite thick in the ground. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 30c., lb. $1.00.

PERFECTION MARKET. Fine grained and good flavor. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 30c., lb. $1.00.

OX-HEART, or GUERANDE. It is intermediate as to length between the half long varieties (such as Danvers) and the Short Horn Carrot, but much thinner than the latter, attaining at the top from three to four inches in diameter. It is a very fine quality for the table. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.75.

AMERICAN LUC HAC LONG. The color of this valuable new sort is a rich shade of orange-red, and in shape and size midway between the Early Scarlet Horn and Long Orange. Top small, considering the size of the roots, which are smooth, straight and free from roughness; early; without core, very tender and sweet. Admirably adapted to either glass or open-ground culture; excellent for early or late. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

NEW PERFECTION RUBICON, or MODEL CARROT. In this new variety we have an entirely new and distinct American carrot; very symmetrical in shape and color; and develops its deep golden orange color the season. The stock is so finely bred, and the carrots have assumed such uniform shape, that they are almost exact duplicates of each other. It is earlier than the Danvers; the leaves are one-third shorter; fewer and finer than this well-grown sort. It is an excellent sort for growing under glass or outside, at any season of the year. It grows without neck; the crown is hollow; and it grows well under the ground, which prevents it from becoming sunburnt—a very important feature. It’s table qualities are unequalled, while its yield is enormous. Neither does it crack open like many others. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

CHANTENAY. They are a little longer than the Short Horn, being thicker at the shoulder and hence more productive. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.25.

LONG NANTES STUMP ROOTED. For second early or late; very uniform; handsome and of excellent color. Our customers will find this a very fine type of carrot, showing marks of the highest breeding. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

AMERICAN RED ALTRAINING. A handsome cylindrical-shaped carrot of good color. Its rich, dark orange color, grows to a large size, is smooth and the flesh very close in texture, with little core. It is a first-class carrot for all soils, and it is claimed as the best, under the most vigorous conditions. It will yield the greatest weight per acre with the smallest length of root of any new variety. For sowing in the autumn, under glass, it has no equal. (See ext.) Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

EARLY HALF LONG POINTED. A most excellent variety for either field or garden culture; large symmetrical roots of a deep orange red; in size between the Half Long and Long Orange varieties. They are smooth and straight, and free from roughness. The tops are smaller in size than the roots. It will be found superior to the Danvers Stump Rooted variety as a market sort, and much more productive. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

NICHOL’S LONG ORANGE. We have the finest type of this valuable sort of any seedsmen in America. Our seed is Connecticut grown. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

PROVED DANVERS HALF LONG. (Extra Stock.) Very smooth and fine in texture and easily dug. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

LONG RED ST. VALENCY. The roots grow very regular and smooth; not as productive as the Nichol’s Long Orange. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

EARLY HALF LONG SCARLET POINTED ROOTED. Second early or late sort. Our strain is unusually fine. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

LONG RED SURREY. A great improvement on the various types of Long Orange Carrots, this variety, by careful selection for successive years of the best formed and deepest colored roots; it is larger, better flavored, of a deeper orange color, and more certain to produce a crop than any type of long carrot; flesh very sweet and tender; very productive; the tops become hard or woody at the heart. The roots grow very regular and smooth; they are of good size, being from six to eight inches in length and two inches in diameter. The tops taper gradually from the shoulder to the tip of the roots. In color, shape or size this is the ideal sort for a market gardener’s late crop. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

RUBICON HALF LONG. A wonderful producer. Pkt. 5c., 1 oz. 10c., $1.75.

IMPROVED INTERMEDIATE. Extra fine. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

LONG NANTES. Stump-rooted sort. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.00.

The NEW LONG RED SURREY CARROT is the finest variety grown, being equally suitable for the exhibition stage and the table. The roots are longer, fuller, and brighter in color than those of any other sort, and are very handsome.

John Saunders, Washington, D.C.

CARROTS FOR STOCK

The carrots are excellent and highly profitable for feeding to all kinds of stock. Horses and cows relish them and fatten on one feed of carrots daily. The yield is so heavy that an acre will keep your horses and cows fat and healthy all winter.

NEW IMPROVED WHITE AUSTRALIAN. This new variety is undoubtedly the best of all sorts for feeding stock. This attains the largest size, and will yield more in bulk and keeps better than any other sort grown. Uniformly smooth in form; they are easily cleaned. The color is white below the ground and light green above; flesh rich, white, solid, crisp, and nutritious. It has yielded as high as twenty and a half tons per acre of roots, and we predict that it will soon become a general favorite as a cattle carrot. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.75, 5 lbs. $3.75.

WHITE VOSGES. This is a field carrot, and especially suitable for sells that are in rows. The roots are long, large, and thick, and are very handsome. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.75, 5 lbs. $3.75.

LARGE RED BELGIAN. Immeasurably productive. Preferred by many as the best for stock-feeding. Pkt. 5c., 1 oz. 10c., Pkt. 1 lb. 35c., $1.75, 5 lbs. $3.75.
CELERY

Celery Culture. Celery can be successfully grown with but little labor, in any good garden soil, by using plenty of well-rotted manure with a liberal sprinkling of coarse salt worked into it, and this mixture should be put into the trenches, working it well into the soil.

Growing the Plants. Sow in the open ground as soon as it is fit to work in April. Sow in rows, so that it can be kept free from weeds. Prepare the soil well and cover the seed very shallow and firm the soil well after sowing; also keep very moist until the seed germinates. After coming up, the plants should be partially shaded for a week or ten days, and see that the soil does not get too dry. When two inches high, thin and transplant to three inches apart. To insure good "stocky" plants, the tops should be cut back to within, say, two inches of the crown, when about four inches high.

Transplanting. The evening is the best time, and especially if after a shower; otherwise give them a good watering and plant when set out, especially if done in a dry time; the old method of setting in deep trenches is a thing of the past. Some of our most successful growers set the level surface, while others prefer a broad, shallow trench, only three or four inches deep. These trenches should be at least three feet apart for the dwarf, and not less than four feet for the larger sorts; set plants in single rows not over six inches apart in the trench. Transplanting is done about the middle of June for the first early, and as late as the middle of August for the latest. Keep well cultivated, and in about six weeks "handling" should begin (never do this when wet from rain or dew). This is done to make the celery grow upright. The soil is drawn to the row from each side with an ordinary hoe. Now take all the leaves of the plant on one hand and with the other draw the soil around it, pressing firmly, being careful that no soil gets between the leaves, as it is apt to cause rust, or rot the plant.

In about two weeks, or as often as it is necessary to keep the leaves in this upright position, more soil should be drawn to the row.

the best.

CELERY

200,000 PLANTS

This is an entirely new strain, having originated with a highly successful market gardener near Boston, who sent it to us for introduction. It has now been in our possession for nearly ten years, and we have improved it remarkably by the most careful re-selection every year. It is remarkable for its robust size, as it grows unusually tall and thick, while the number of hearts it produces is simply astonishing. It is no less remarkable for its long-keeping qualities, it being no unusual thing for it to remain in perfect condition as late as March 20th. It is a very rapid grower, "whitens up" earlier, and is ready for market sooner than the old sort. The ribs are thick, long, straight, remarkably tender, crisp and rich flavored, and possesses a beautiful pearlly-white color, hitherto unknown to White Plume. This stock is also absolutely pure, contains no green whatever and will surely give extra satisfaction to all, as it is the finest type of White Plume Celery in the world. Market gardeners who plant it once, plant it always. Pkt. 10c., ½ oz. 20c., oz. 30c., ½ lb. 85c., lb. $3.00.

SCHUMACHER CELERY. Selected. This variety produces very large half dwarf stalks, ribs very broad and brittle, with heart of rich golden yellow. Its great point is its remarkable keeping qualities. We offer only true stock. Pkt. 10c., oz. 25c., ½ lb. 60c., lb. $1.50.

WINTER QUEEN. A strain of half-dwarf golden heart of stocky growth and a good winter variety. Pkt. 10c., oz. 25c., ½ lb. 65c., lb. $1.50.

GIANT SELF BLANCHING. New. Pkt. 20c., oz. 50c., ½ lb. 1.00.

GOLDEN HEART OR GOLDEN DWARF. Selected stock. Pkt. 5c., oz. 20c., ¼ lb. 60c., lb. $1.50.

IMPROVED PERFECT HEARTWEIGHT. We offer the same fine stock as of previous years. Pkt. 10c., oz. 25c., ½ lb. 60c., lb. $1.50.

INCOMPARABLE CRIMSON. The color is a beautiful shade of rose, of exceptionaly fine, delicious flavor, solid and crisp. Pkt. 10c., oz. 25c., ½ lb. 75c., lb. $2.00.

GIANT AREZZO WHITE SOLID. Half-dwarf, very solid, pure white producing many hearts; fine keeper. Pkt. 10c., oz. 25c., ½ lb. 75c., lb. $1.50.

SOUP CELERY SEED. For flavoring. Oz. 5c., ½ lb. 20c., lb. 50c.
THOUSANDS OF MARKET GARDENERS

AND PRIVATE FAMILIES THROUGHOUT THE UNITED STATES ACKNOWLEDGE OUR CELERIES TO BE THE FINEST IN EXISTENCE, AND USE NO OTHER

California Mammoth Solid Golden Self-Blanching Celer...
CELIAC, or TURNIP-ROOTED CELERY.

French, Celeriac. German, Knollekraut. Spanish, Apio raiz de Nabo.
One ounce will produce about 2,000 plants. Produces turnip-shaped roots which may be cooked and sliced and used with vinegar, making a most excellent salad.

NE PLUS ULTRA. The best seed. Very large and smooth globular-shaped roots. By far the best and most profitable sord to grow. Pkt. 25c., oz. 50c. lb. $1.50.

APPLE SHAPED. Small size. Pkt. 5c., oz. 25c., 1/2 lb. 40c., lb. $1.25.

PRAGUE. Large and smooth. Pkt. 5c., oz. 25c., 1/2 lb. 40c., lb. $2.00.

CELENY PLANTS.
We have in season strong plants of all our leading varieties. Prices upon application.

CARDOON.
The mid-ribs of the leaves are blanched in the same manner as celery.

LARGE SPANISH. The best variety. Pkt. 25c., oz. 40c.

CHICKORY.

MAMMOTHROOTED. Used to mix with, or as a substitute for coffee. Cultivation the same as for carrot. Pkt. 5c., oz. 25c., 1/2 lb. 30c., lb. $1.00.

ITALIAN CURLED. The young leaves are used in soups or salads. Sow in drills or thinly, one foot apart. Pkt. 5c., oz. 25c., 1/2 lb. 50c.

CHIVES.
Are grown exclusively for their tops, which are used wherever the flavor of onion is desired. Roots per bunch, roc. doz. 60c.

Worth Its Weight in Gold.
John R. Roffinus, Buford, S. C., writes: "I have grown Early Snowball, Early Erfurt and Danish Cauliflower, none of which ever gave half the fine crops that your Italian Giant Surehead has. It seems to carry long distances better too. I shall want another pound next season. It is worth its weight in gold.

Cut Fine Heads in October.

LACE VIEW, CHICAGO, ILL.

Gentlemen:—Accept my best thanks for inducing me to buy your Early Surehead Cauliflower. I cut fine heads in October, a thing I never did before with seed from anyone else, no matter how hard I tried.

JAMES L. STURRIS.

Orders Three Pounds.
Please send me three pounds of your M. & S. Italian Giant Early Surehead Cauliflower. I am a market gardener and wish one pound for a neighbor. Your Surehead is the best ever grown here.

SILAS OFFINGER, NEWPORT, R. I.

"GILT EDGE" EXTRA EARLY SELECTED DWARF ERFURT. A variety of the greatest merit. It is the finest and best type of all the Erfurt strains, every regular header producing beautiful pure white, smooth heads, with small, short leaves. Extremely early. Excellent for hot beds, cold frames or early borders. Very pure seed. Pkt. 25c., oz. 50c., 1/2 lb. 75c., lb. $1.50.

IMPROVED EARLIEST SNOWSTORM. One of the earliest and best for forcing. It is dwarf, with short outer leaves; makes large, fine heads. This variety must be kept growing constantly, as it will not stand a check at any period of its growth. Pkt. 25c., oz. 50c., 1/2 lb. $1.00, lb. $1.75.

SELECTED EARLY DWARF ERFURT. One of the earliest, small-leaved dwarf, for open ground, producing pure white heads of fine quality. Pkt. 25c., oz. 25c., 1/2 lb. 40c., lb. $1.00.

M. & S. ITALIAN GIANT EARLY SUREHEAD CAULIFLOWER

Those who have never succeeded before, should grow M. & S. Italian Giant Early Surehead. It is the best and may be sown in September and winter. In every respect this variety is unsurpassed for early Cauliflower. Cut fine heads in October. Thousands pronounce it the BEST Cauliflower for Early or Late Crops, for the Market Garden, Private Garden, Green House forcing or Cold Frames . . . .

Italian Giant Early Surehead. This is the very best early Cauliflower in cultivation, either for forcing under glass or out-of-doors. It is remarkable for its extra earliness and certainty to produce fine, large, handsome, pure white, compact, in every respect of first quality. Many heads often measure twelve inches in diameter. It is the earliest of all Cauliflowers, and is becoming the standard everywhere. Whoever essay to grow this most delicious vegetable either for home use or market, should plant this variety. Of dwarf, compact habit and short leaves; it is enabled to be planted very close—less than two feet apart each way. This sort has given the very finest results wherever planted, for a late crop. One grower of twenty-nine years' experience, says he has got fifty per cent. better satisfaction from it than from any other advertised early sorts.

Pkt. 25c., double pkt. 50c., 1/2 lb. $1.00, 1 lb. $5.00.

Raised 96,500 Heads.

Your Italian Giant Early Surehead Cauliflower is a wonder. I grew 96,000 of the most perfect heads from one of the two pounds of seed purchased from you. I never saw anything of its quality for sale, and nothing but your Surehead hereafter.

C. L. LANGLEY, Washington, D. C.

All Are Planting It Now.
Since I tried your Italian Early Surehead five years ago, all my neighbors are using it also. It is the best for warm climates.

S. M. JOHNSON, Jacksonville, Fla.

Gives a Crop Every Time.
Gentlemen:—I get a full crop every time I plant your Surehead Cauliflower. It is good for either early or late. Seven of my neighbors plant no other now.

JOHN BALLING, Bayberry, Philadelphia.

IMPROVED EARLY ALABASTER. Very early and reliable in heading. Of dwarf habit, with very short outer leaves, allowing it to be planted close together. Pkt. 25c., oz. 50c., 1/2 lb. $1.00, 1 lb. $2.00.

IMPROVED EARLY BERKSHIRE BALL. Extra quality. A really fine variety generally. Sure to head. Pkt. 25c., oz. 50c., 1/2 lb. $1.00, 1 lb. $2.00.

EARLY PARSLEY FAVORITE. One of the best for early or late. Extensively grown in France. Pkt. 25c., oz. 50c., 1/2 lb. $1.00, 1 lb. $3.00.

There are many other varieties, but in our experience they are of no practical value.

COLLARDS.
TRUE GEORGIA OR SOUTHERN CURLED. Cultivation same as cabbage. Pkt. 25c., oz. 50c., 1/2 lb. 30c., 1 lb. $1.00.

CORN SALAD—FETTUCUS or LAMB'S LETTUCE.

German, Lammmessalat. French, Mache.

LARGE-SEEDED ITALIAN BROAD-LEAVED (True). The best and most profitable for family and market purposes, and deserving of more wide spread cultivation. Oz. 5c., 1/2 lb. 15c., 1 lb. 50c.

BROAD-LEAVED DUTCH. Oz. 5c., 40c.

CRESS, or PEPPER GRASS.

German, Kreuze. French, Cresson. Spanish, Maitruco.

A well-known pungent salad. Requires to be sown thinly in rows and covered very slightly. Sow in April in open ground in rows one foot apart, and thin out as needed to keep up a succession, sow frequently, as all varieties deteriorate rapidly.

VINE CURLED (Pepper Grass). Used mixed with lettuce, its leaves impart an agreeable, warm, pungent taste. Pkt. 25c., 1/2 lb. 15c., 1 lb. 50c.

WATER CRESS. One of the most appetizing, delicious flavored of small salads, which is fairly well in very moist situations, but thrives best in shallow water, on edges of streams, where it grows most luxuriantly. Pkt. 25c., oz. 25c., 1/2 lb. 85c., 1 lb. $2.50.

UPLAND CRESS. Resembling water cress in flavor. Cut often, using only the young leaves, which are of a pleasant, pungent flavor. Pkt. 25c., oz. 50c., 1/2 lb. 1.50.

FREE. Celery for Profit or Home Use. An expose of modern methods in growing celery, abounds with the cost of production of first quality celery is very materially reduced. To every enterprising grower. We will send it free to all who order seeds to the amount of $5.00.
CORN—Sweet or Sugar

OF PRICELESS VALUE

Stop! Read! Think it over! This is the Earliest Corn on Earth!!

MOORE'S FIRST EARLY TABLE CORN

Every market gardener who wishes the earliest table corn of good quality, he can get; should not fail to plant this exceedingly valuable sort. In our Moore's First Early Corn we have a truly remarkable and profitable extra early variety. It is positively the earliest table corn ever introduced. It is the hardest of all varieties of corn, and cold, wet weather has little or no effect upon it. On account of its extreme hardiness it can be planted from two to four weeks earlier than ordinary, early, or other varieties of sugar corn. We particularly caution our market garden friends to plant it at least two weeks earlier than their ordinary corn, if they would secure all the advantages of this profitable extra early sort. Again, don't fail to plant it early. The stalks grow about six feet high, and produce more than two, and sometimes four, and developed ears from six to nine inches in length. Leaves small and few; will bear very close planting. Ground should be well fertilized to secure its wonderful productivity. The grain is deep, pearly white, very tender, sweet and juicy, constituting its extreme earliness. The ear nature very rapidly and ears should be taken to the ears while young. It required long and patient care, as well as the expenditure of much labor to develop this variety, and we assure our market garden friends they can easily amass large fortunes if they will plant it heavily for large markets. Big profits await all who plant it early. We advise our many thousands of market garden friends not to be afraid to plant plenty of it. It is a great money maker, and you cannot afford to get behind the time. Plant Moore's First Early Table Corn. It is ten days earlier than Cop; besides there is no other ear of better size; no other early sort half so good; no other early sort that will make you half the money.

M. & S. EARLY SUGAR

This is the best variety to follow our Moore's First Early. It is veritable, handsomely for family gardens, and equally valuable to grow for market, where the earliest sugar corn always brings by far the highest prices. Ears contain ten to twelve rows. Many stalks yield two dozen, pt. $1.35, qt. 35c., pk. $1.30, 40c. by express or freight.

BUCK MOUNTAIN. Similar to the Early Adams and Burlington Hybrid, but much earlier and better quality. Originated in Connecticut. Our stock is very pure. (Add 25c. per qt. if to go by mail.) Pkt. 10c., pt. 15c., qt. 20c., pk. $1.00, bu. $3.50.

COOPER'S LARGE EARLY SHOE PEG

We have obtained this delicious sort from Mr. Thomas Cooper, of Newport, R. I., who has grown quite wealthy by marketing it to the northern markets by Boston and New York. The productiveness of this sort is simply prodigious. When grown on good ground and well succedared, ears of twelve inches in length are often developed. The kernels are large and very flat, the grain deep and of rich flavor. Stalks bearing four ears are not uncommon. The green or dried fodder is superior to all others for feeding stock. Pkt. 10c., pt. 15c., qt. 35c., pk. $1.30, bu. $4.50.

We found your Cooper's Large Early Shoe Peg the best and most profitable corn we ever grew. John Long & Co., O. Wood, N. J. You deserve great credit for recommending Cooper's Large Early Shoe Peg. All my neighbors are begging seed from me. I send this from A. J. Hickey, Boston, Philadelphia.

The one acre I had planted with your Cooper's Early Shoe Peg Corn netted me $80.50. Can any of your customers beat that?

James O. Simpson, Jersey City, N. J.

PRICE'S PERFECTION EARLY SUGAR

One of the best and earliest varieties for market, excellent quality, very productive, yielding from two to four beautiful large ears per stalk. It is the result of many years of careful selection to secure a kernel large, with large size, very rich, and fine quality. The grain is deep and remains in "milks" a long time. Pkt. 10c., qt. 15c., pt. 25c., pk. $1.25, bu. $4.50.

ADAMS EXTRA EARLY. A very large improvement over the old kind. Pkt. 5c., pt. 10c., pk. $1.00, bu. $3.50. (Add 25c. per qt. if to go by mail.)

NEW PEACHBLOW SUGAR. A very decided and new variety from Mr. Adams, pt. 10c., qt. 15c., pk. $1.00, bu. $4.00.

MAMMOTH WHITE CORN. Quite early and remarkably sweet and succulent; excellent family garden sort. Pkt. 5c., qt. 20c., pk. $1.25, bu. $4.00.

EARLY TRUMP. Pkt. 5c., pt. 10c., pk. $1.00, bu. $3.50.
M. & S. NEW EARLY LONGFELLOW SUGAR CORN

This grand, new and decidedly distinct Sweet Corn, which we herewith illustrate, is no old variety under a new name. We have had our friends in many states try it. It has given great satisfaction, and has been universally pronounced distinctly distinct from anything ever sent out before, besides being one of the best and longest eared early Sweet Corns in existence. We have never seen one that will approach it in large size and earliness. Its yield is enormous, almost invariably yielding two, and very frequently three or four ears to the stalk. The cob is very white, completely covered with from ten to fourteen rows of very deep, handsome and toothsome kernels. As a market variety it is unsurpassed—it sells on sight. Once planted, always planted.

Pkt. 5c., qt. 20c., ½ pk. 75c., pk. $1.25, bu. $4.50.

NEW FRENCH HONEY SUGAR

 Pronounced by those who grow it, to be the most delicious sugar corn ever grown and heavy yielding, with white, large and pearly ears; it has twelve to fourteen rows, and comes in after the earlier sorts, and does not intra. It is the sort for fine market trade. Excellent sort for the family garden. We cannot say too much in its praise. Pkt. 10c., qt. 20c., ½ pk. 75c., pk. $1.25, bu. $4.50.

M. & S. EARLY BOY AND SUGAR. Fine, large twelve-rowed ears, filled from end to end with extra large grains, cannot be surpassed in delicious flavor. Ripens early, and its superior quality and productivity makes it very popular. It remains longer in an edible condition than any other early variety. Can only be grown by those who can have ears to each stalk. Excellent market sort. Sure to please all who plant it. Pkt. 10c., qt. 20c., pk. $1.00, bu. $4.00.

EARLY MAMMOTH. Pkt. 10c., qt. 20c., pk. $1.00, bu. $4.50.

THE COUNTRY GENTLEMAN. Pkt. 5c., qt. 10c., pk. $1.00, bu. $3.50.

HYDE'S EGYPTIAN (Tunia). Pkt. 5c., qt. 10c., pk. $1.00, bu. $3.50.

Pkt. 10c., qt. 20c., pk. $1.00, bu. $3.50.

LATE MAMMOTH. Fine stock. Pkt. 5c., qt. 20c., pk. $1.00, bu. $3.50.

MORRIS'S NEW SNOW SUGAR

This is without doubt the most valuable Sugar Corn introduced for many years past. It is white as chalk, white marble in color—very pure and clear. Those who have seen the boiling ears, say—I never saw a better. This has been grown for the past two years. It is a very deep, rich, and sweeter than any Sugar Corn grown. The stalks are of strong, vigorous growth, six to seven feet high. All the good points of the famous Stowell's Evergreen are retained and intensified in this superb variety.

The largest Sugar Corn Seed grower in the United States wrote us that there was NO BETTER strain of White Evergreen Corn grown than our Moore's Snow White.

Market gardeners, canners and all lovers of Sugar Corn will find it to represent the highest ideals of the white, sweet, tender and wholesome. It is just the corn you have long been waiting for. Our seed is limited, and we hope our many thousands of customers will send their orders in early, as we wish every customer to have plenty of this wonderful novelty. Generally speaking, those who come first are served. Pkt. 10c., qt. 15c., qt. 30c., ½ qt. 75c., pk. $1.25, bu. $4.75.

M. & S.'S LATE CONCORD OR MAIN CROP SUGAR

This LATE CONCORD or MAIN CROP was first introduced by us, and all who have grown it since are enthusiastic in its praise. It is now recognized everywhere as a standard variety of the highest merit and quality. When grown in a good soil and under favorable conditions, it ripens with extreme regularity, and its ears are large, round, handsome, and toothsome. Its finest quality is its yield of sugar, which is very large, and the ears are very clean, and the kernels are of a delicious flavor. The stalks are of good variety, and are very uniform and strong. The variety is one of the earliest, and is also one of the most productive, and is a fine market crop. It is a very valuable variety for canning. Pkt. 5c., qt. 20c., ½ pk. 75c., pk. $1.00, bu. $4.75.

SWEET CORN FOR PODDER. Cattle highly relish it, and when fed on it keep in fine condition and produce a whiteness of milk. It has the great merit of being so sweet, and palatable that cattle eat every part of the stalk and leaves, and consequently none is wasted. Prices subject to market changes. Pkt. 10c., qt. 15c., qt. 30c., ½ qt. 75c., pk. $1.25, bu. $4.75.
CUCUMBER

**MOORE’S EARLIEST CUCUMBER**

This grand new variety was selected from the famous French Fournier and is of the highest merit, possessing that rich, dark green color which has been so long sought for but never before obtained. It is truly an evergreen, retaining its color until fully ripe. On sight, its distinct dark green color and smooth skin attracts the attention of every one. We will be delighted with it. Pkt. 5c., oz. 20c., ½ lb. 55c., lb. $2.00.

**MOORE & SIMON’S MATCHLESS WHITE SPINE!**

As an extra early white spine cucumber there is no strain equal to this. We have devoted a number of years to the careful selection of the finest specimens for seed purposes and herewith offer it to our many thousands of customers. Color is dark olive green, white or light spine running from blossom end. It is the earliest and finest of all the strains, and the best for home market or shipping. It is smooth, tender, crisp, remains green on the vine and after picking, and in fact never turns yellow. It is very hardy. We recommend this as the best strain of extra early white spine for the market gardener. It seems to be peculiarly adapted to southern soil and climate, always developing symmetrical fruit of a beautiful dark olive green color, at the same time it gives the earliest picking and the largest crop of any known variety. The spine are stout and very free from disease which is so devastating to many varieties. Indeed, the fact of its combining every good quality, its ready and quick sale in our market, and the consequent sort prices, its fine appearance and its remarkable astonishing productiveness led us to give it the name of Matchless. We can heartily recommend same to all who desire a really matchless cucumber for shipping long distances, as it holds its color longer than any white spine heretofore introduced. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**SUMMARY**

As an extra early white spine cucumber there is no strain equal to this. We have devoted a number of years to the careful selection of the finest specimens for seed purposes and herewith offer it to our many thousands of customers. Color is dark olive green, white or light spine running from blossom end. It is the earliest and finest of all the strains, and the best for home market or shipping. It is smooth, tender, crisp, remains green on the vine and after picking, and in fact never turns yellow. It is very hardy. We recommend this as the best strain of extra early white spine for the market gardener. It seems to be peculiarly adapted to southern soil and climate, always developing symmetrical fruit of a beautiful dark olive green color, at the same time it gives the earliest picking and the largest crop of any known variety. The spine are stout and very free from disease which is so devastating to many varieties. Indeed, the fact of its combining every good quality, its ready and quick sale in our market, and the consequent sort prices, its fine appearance and its remarkable astonishing productiveness led us to give it the name of Matchless. We can heartily recommend same to all who desire a really matchless cucumber for shipping long distances, as it holds its color longer than any white spine heretofore introduced. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**OUR PARIS EARLY CLUSTER**

is the most remarkable and valuable of all pickling cucumbers, and our illustration above gives a very clear idea of its wonderful productiveness. For every one who has made cucumbers for pickles a study, testing and originating new sorts for this purpose, and now think we have perfected in our Paris Early Cluster. It is short (just the right length) bearing in numerous clusters near the root, of fine form, solid and crisp in texture, excellent in quality, and combines all the elements to make it a superior pickle, as well as for slicing. Its productiveness is marvelous, cropping from 20 to 40 bushels per acre on good ground. We believe our market gardeners will find it by all means the best offered in America, and to always command the highest market price. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**EARLY FRAME or EARLY SHORT GREEN.** Productive, of vigorous growth, early fruit, medium and straight. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**NEW EVERGREEN WHITE SPINE.** Ours is the finest strain of this excellent sort. It is very hardy, early, remarkably prolific and attractive in appearance. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**BEERLESS WHITE SPINE.** Very even in size and form and very productive. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**EARLY GREEN PROLIFIC or BOSTON PICKLING.** Ours is the improved strain. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**IMPROVED LONG GREEN (Jersey Pickle).** A very prolific variety. Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**LONDON LONG GREEN.** Pkt. 5c., oz. 10c., ½ lb. 30c., lb. $1.00.

**DIXIE WHITE SPINE.** New. Grows from 8 to 9 inches in length, of fine quality. Pkt. 30c., 6 for $1.00.

**OVER 35,000 OF OUR CUSTOMERS PLANTED THIS VALUABLE VARIETY IN 1905, AND ALL PROCLAIM IT THE IDEAL SORT FOR COMMERCIAL PICKLING.**

**PARIS EARLY CLUSTER PICKLE.**

YIELDS FROM 250 TO 400 BUS. PER ACRE.

UNAPPROACHED IN QUALITY: COLOR OR BRITTLENESS

Over 35,000 of our customers planted this valuable variety in 1905, and all proclain it the ideal sort for commercial pickling.
ENGLISH FORCING OR FRAME VARIETIES

These produce remarkably long and very solid fruits, with few and small seeds. Our seed is from the best English strains.
- Cuthill’s Black Spine. A prolific variety of medium size. Pkt. 30c.
- Duke of Edinburgh. Large, thick, dull green fruits, often 30 inches long. Pkt. 30c.
- Locke’s Perfection. Very uniform, color, beautiful green. Pkt. 30c.
- Lord Kenyon’s Favorite. A great favorite, uniform in size and perfect in shape. Pkt. 30c.
- Telegraph. Clear, green, smooth fruits, 14 to 18 inches long; free bearer. Pkt. 30c.

ENGLISH PICKLING

This entirely distinct cucumber is, as its name implies, of English origin, and yields beautiful miniature pickles. They are preferably picked when quite young and small, in order to preserve their peculiar appearance, as they become smoother when approaching maturity. They are deep green in color, very prickly, with flesh that is always firm and brittle. The fruits are excessively productive, being covered with the curious little fruits, making delicious sweet pickles. Don’t fail to try them. Pkt. 10c., oz. 50c., lb. 1.00.

WEST INDIA GHERKINS

A very small, oval, prickly sort, distinct from all others. It is grown for pickles only, for which purpose it is held in high favor. It is the smallest of all cucumbers and should be picked when young. Pkt. 5c., oz. 10c., lb. 25c.

QUEEN’S GOLDEN CUCUMBER, A NOVELTY OF MERIT

New, extensively grown in China and held in great esteem by the wealthy there, owing to its many delicious qualities. It is usually boiled before being pickled, sliced, or salted. It is a beautiful yellow color, large size, productive and hardy. We obtained the seed direct from China. We hope every one of our customers having a garden will give it a trial. Pkt. 10c., oz. 50c., lb. 1.00.

BOSSON MARKET OR PRIZE-TAKER

A hybrid between White Spine and English Prize; of large size and excellent for market gardens or family use. Immensely productive, fine pickling variety. In length it is medium between the White Spine and Long Green; very thick through and full at both ends, presenting a beautiful type. An excellent market sort. Pkt. 5c., oz. 10c., lb. 25c., lb. 1.00.

NEW GIANT WHITE CUCUMBER. The flesh is very solid, pure white, with exceptionally few seeds, and is exceedingly crisp, of most superior flavor. Pkt. 5c., oz. 10c., lb. 25c., lb. 1.00.

Serpent, or Snake Cucumber. A remarkable and very interesting curiosity. The cucumbers grow curled up like a snake with the head protruding, and sometimes are five feet in length. Pkt. 5c.

DANDELION

The Dandelion resembles Endive and is sometimes cultivated for spring greens, or for blanching for salad, also a valuable remedy for diabetes.

THICK-LEAVED, or CABBAGING. An improved thick-leaved variety, double the size of the common dandelion. The only sort worth planting. Very profitable to grow for market. Pkt. 10c., oz. 10c., lb. 1.00, lb. 1.50.

FENNEL

CELERY-ROOTED FENNEL. Cultivated same as parsley. Thickened part of the root should be covered with soil, similar to celery. Pkt. 10c., 3 pkts. 25c., oz. 50c.
KALE or BORECOLE

German, Blatter-Kohl. French, Chou Vert. Spanish, Breton.
1 oz. will sow 150 feet of drift.

Kale, or Borecole, may be grown in almost any soil, but the richer the soil, the more abundant the product. If wanted for use in early or late winter, sow our Norfolk Green Curled Scotch early in January and transplant, as directed for cabbage. Middle of July is best for seed for spring, summer or fall use, sow our Welsh Curled as early in the hot bed and transplant a month later. Of all the Cabbage tribes this is the most tender and delicate, and would be much more exclusively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

NORTHERN GREEN CURLED SCOTCH. (Long standing.) Beautifully curled, very hardy, immune yielder. The hardest and best for wintering out in northern latitudes. pkt. 5c., oz. 10c., 1/2 lb. 35c., lb. $1.00.

WELSH CURLED. The most beautifully curled variety in cultivation, heavy long conical, with an extremely tender, light foliage. Very productive, and very rich in quality. Always grown in hot beds, and transplanted, or sown broad cast. If not cut too close to the ground it will yield continuously from spring until winter. Quite the most profitable sort for spring sowing. pkt. 5c., oz. 10c., 1/2 lb. 35c., lb. $1.00.

DWARF GERMAN GREENS. Pkt. 5c., oz. 10c., 1/2 lb. 35c., lb. 60c.

SEA KALE. Pkt. 10c., oz. 25c., 1/2 lb. 75c.

HORSE RADISH

Sets planted in May, small end down, with the top one inch below the surface, in rich well cultivated soil, will form radishes of large size in one season’s growth. Before planting, the top of the set should be cut off slantingly, so as to prevent decay from exerting pressure on the top. The large roots will be ready to pull in October, and from these large roots a heavy supply of sets can be cut off for the next spring’s planting. It is customary to gather the crop of roots in October and keep them in trenches ready to market at any time during the winter. Small roots, 8 for 20c., 50c. per dozen or 75c. per 100, by mail, postpaid. By express, 95c., per 100, 1.00 per 1,000 lb.

Medium size, 100 10c., 1.00 3.00. Large roots, per dozen, 20c., per 100 75c., per 1,000 3.00.

LEEK

German, Lause. French, Poireau. Spanish, Puerro.
1 oz. will sow 100 feet of drift.

The Leek is very hardy and easily cultivated; it succeeds best in a rich, but well enriched soil. Sow as early in spring as practicable, in drills one inch deep and about one inch apart. When four or five inches high they may be transplanted into beds two or three inches apart each way, as deep as possible, that the neck being covered, may be blanched. If fine Leeks be desired, the ground can hardly be made too rich, for the Leek is a greedy plant.

SIR AYTON CASTLE WINTER (New). The largest and best sort of all. Of a charmingly fine quality and good flavor. A hardy variety, well suited to market or private use. Pkt. 10c., oz. 25c., 1/2 lb. 60c., lb. $1.00.

"Your SIR AYTON CASTLE, is a grand variety, the finest I have ever saw, many, a foot in length, two inches in diameter, and will get much larger."

Mr. A. White, Franksburg, Pa.

IMPROVED NEW GIANT ITALIAN. Extra stock. Pkt. 5c., oz. 20c., 1/2 lb. 45c., lb. $1.30.

LONDON FLAG. Extra stock. Pkt. 5c., oz. 25c., 1/2 lb. 30c., lb. $1.00.
ENDIVE

Moore's Mammoth Green Curled Italian

Very large valuable new sort retaining a diameter of twenty-two inches. Leaves beautifully curled, tender, of an attractive green color and blanches easily. The centre is very close and full.

**WHITE CURLLED GUIJLANDE.** A beautiful variety, leaves almost white, large compact grower. Pkt. 5c., oz. 30c., 1 lb. 15c., lb. $1.60.

**BROAD-LEAVED BATAVIAN.** Leaves green. Pkt. 5c., oz. 20c., 1 lb. 30c.

**SIMON'S BORDEAUX.** A new large green curly sort, splendid for summer or fall. Very distinct; will outsell any other sort. Should be grown by all. Pkt. 10c., oz. 35c., 1 lb. 75c., lb. $2.50.

**LETTUCE**

California Giant White Forcing

Every plant head, and the heads are uniformly shaped, very large and thick through, and of a solidity equal to that of a cabbage. They measure about seven inches across the solid head; the leaves are slightly crumpled, of a beautiful white color, and for tenderness as it is unsurpassed by any existing forcing variety. It heads more rapidly than any of the large lettuces, and has the advantage of being unaffected by bad weather, even excessive rains exercising no unfavorable influence upon it, and nearly every plant makes a beautiful compact head. It has an attractive appearance, is one of the best for forcing under sash or as an out-door autumn or early spring crop. A great favorite with Southern growers. Unsurpassed for forcing in low temperatures. Pkt. 10c., oz. 20c., 1 lb. 50c., lb. $1.75. 5 lbs. $8.00. Those planting 25, 50 or 100 lb. lots will be quoted upon application.

**AUSTRALIAN WHITE TRIUMPH**

Heat Resisting

A Sure Header  Slow to Run to Seed  Not Affected by the Hottest Weather

This superb new variety was sent to us by one of the largest and most successful market gardeners near Melbourne, Australia, where it is grown to the exclusion of almost all other varieties. Melbourne is noted for its hot, dry summers. Notwithstanding this, the Australian White produces large solid heads during the entire season. The trials we have made of it during the past two years in various parts of the country show it to be a remarkably valuable variety for the United States. The heads are large and firm, very tender, crisp and clear white inside, and of a beautiful shade of light blue on the outside. It is well adapted for spring, summer and autumn crops, and will often produce the finest marketable heads where other varieties fail utterly. Pkt. 10c., oz. 30c., 1 lb. 60c., lb. $2.00.

This is undoubtedly one of the hardest heading varieties of all summer lettuces and particularly valuable for summer planting. The heads are large, form up rapidly and are of a beautiful creamy white color, very crisp and tender. Market gardeners write us from all sections that it heads up uniformly and is among the most desirable lettuces they ever saw. Excellent for private gardeners. Don't fail to try it. Pkt. 3c., oz. 30c., 1 lb. 75c., lb. $3.50.

**SIMON'S EARLY DUTCH BUTTER SPOTTED** (Private Stock). A sure heading variety. The best strain of Dutch Butter for forcing during winter under sash. Sure cropper; best for market purposes. Pkt. 10c., oz. 30c., 1 lb. 80c., lb. $3.00.

**PHILADELPHIA DUTCH BUTTER.** Pkt. 5c., oz. 15c., 1 lb. 35c., lb. $1.25.

**STINGER'S EARLY HARDY WHITE BUTTER or HARDY RIDGE** (Private Stock). The best hardy variety for fall sowing to be wintered over on ridges; absolutely pure and reliable. Pkt. 10c., oz. 25c., 1 lb. 60c., lb. $1.00.

**BOSTON WHITE HOT HOUSE** (Rutter's Private Stock). This extensive grower of hot house lettuce ships, the most solid heading lettuce and realizes higher prices than any other Boston grower. Pkt. 10c., oz. 25c., 1 lb. 90c., lb. $5.50.

**BOSTON MARKET.** Extra stock. Pkt. 5c., oz. 15c., 1 lb. 35c., lb. $1.25.

**MOORE'S SUMMER GEM**
Moore's Early Cabbage Head Lettuce

Produce's immense solid white heads 14, 16 and often 18 inches across. The ideal lettuce for first sowing either under sash or on warm borders. Unsuspassed as a market variety or for private garden. Very late to ship.

It has required years of careful crossing and selection to bring this up to its present high standard. It is in fact an all-seasons lettuce as the testimonials from growers of the leading and largest lettuce growers in the United States will show. Our illustration shows its heading qualities to perfection. Pkt... oz. 25c., ½ lb. 75c., lb. $1.50. Large buyers will be quoted special prices by stating quantity wanted.

Moore's Early Cabbage Lettuce was the best in Wilmington, Delaware, last year and again this year Moore's Early Cabbage Lettuce is the earliest and hardest-heading hot grown here. Ninety-nine per cent. heads. Have shipped it successfully to Denver and Minneapolis. It is a great seller. Will want 50 lbs. a mother season.

John Moore, Alachua County, Florida.

Stinson's Early Buttercup Head Lettuce

A SUPERIOR VARIETY FOR SPRING AND AUTUMN

Distinct and of great value. We obtained this valuable sort from Mr. John Stinson, one of Philadelphia's oldest and most successful market gardeners, in whose possession it has been for the last twenty years, during which time it was always the "Best Grown in the Neck" at any season of the year. His neighbors tried long and vainly to get a stock of it, which Mr. Stinson always valued at less than an ounce. Mr. Stinson having retired, he sold his entire stock to us for distribution throughout the world. Heads very large, solid leaves smooth, of a light green, inside white and "buttery." Very hardy, especially valuable for growing under sash, cotton or canvas. Good shipper, especially valuable to Southern buyers. All who grow head lettuce should plant it. Quality the best. Pkt. 10c., oz. 25c., ½ lb. 60c., lb. $2.00. Large buyers will be quoted special prices by stating quantity wanted.

New Turkish Butter Lettuce

Those who like a cabbage lettuce, with rich, buttery leaves of great substance, will be thoroughly pleased with this new variety from Turkey, which is accurately shown in the illustration hereafter. From a photograph it stands hot weather without becoming bitter or running to seed, and bears beautiful large white heads of superb quality, of delicious, rich, buttery flavor. It is the result of many years' careful selection. Most highly recommended for family garden and market purposes. Pkt... oz. 25c., ½ lb. 60c., lb. $2.00.

Improved Silver Ball. Selected stock, large heads of a beautiful silvery-white color, very solid and firm. Pkt. 25c., oz. 15c., ½ lb. 40c., lb. 100c.

Golden Gate Hardy Head. A variety of special merit for early spring and summer planting. Pkt... oz. 25c., ½ lb. 60c., lb. $2.00.

Improved Big Boston. It must not be confounded with "Boston Market," "Large Boston," etc. It is twice the size of Boston Market and altogether different in character. Our stock is very pure. Pkt. 10c., oz. 15c., ½ lb. 60c., lb. $2.00.

New Sensation. Original stock, fine large heads. Pkt. 25c., oz. 15c., ½ lb. 40c., lb. $1.25.

Moore's Magnum Bonum Lettuce. This is the finest quality and one of the best selling head lettuces ever introduced for open-ground planting. Early seasons, excellent variety for summer use. The heads are so solid that generally they have to be cut before any seed stalk can make its appearance. No market gardener can afford to be without it. Pkt. 10c., oz. 25c., ½ lb. 60c., lb. $2.00.

Simon's Neapolitan Sash Lettuce. This is the finest and only perfect variety ever introduced for sash. It is a large, solid, pure headed, of a beautiful silvery-white color. Very profitable to grow. Pkt. 10c., oz. 25c., ½ lb. 60c., lb. $2.00.

Black Seeded Simpson. Pkt. 25c., oz. 15c., ½ lb. 25c., lb. $1.25.

Arlington Tennis Ball. Pkt. 10c., oz. 25c., ½ lb. 60c., lb. $2.00.

Mammoth Salamanco. Very superior strain, extra large uniform heads entirely free from all mixture; stands the heat well. Pkt. 25c., oz. 15c., ½ lb. 25c., lb. $2.00.

Salamanco. Pkt. 25c., oz. 15c., ½ lb. 25c., lb. $1.25.

Grand Rapids Forcing. Pkt. 25c., oz. 15c., ½ lb. 35c., lb. $1.25.

Hammersmith Summer Drumhead Lettuce. An exceedingly fine English variety. It particularly forms large, solid heads of a rich dark golden color, stands the summer heat well, and produces a full crop when all other sorts fail. The heads are turned very early to get best results. Pkt. 25c., oz. 20c., ½ lb. 60c., lb. $2.00.

Deacon. Pkt. 25c., oz. 15c., ½ lb. 25c., lb. $1.25, 5c. 50c.

New Parisian Celery Lettuce. The leaves when bleached are still like celery stalks and can be eaten in the same manner. In many countries in Europe this lettuce is preferred to celery. Those who have never grown lettuce with much appreciation may try it by giving this new sort a trial. Pkt. 10c., oz. 25c., ½ lb. 75c., lb. $2.75.

White Heart Rough Head Lettuce. This is the famous Gigante variety of the Paris market. Pkt. 25c., oz. 15c., ½ lb. 35c., lb. $1.25.

California Cream Butter. A favorite among some Southern shippers. Pkt. 25c., oz. 15c., ½ lb. 35c., lb. $1.25.
MELON, MUSK OR CANTALOUPES

German, Melone.—French, Melon.—Spanish, Melon.

1 oz. for 40 hills; 2 to 3 lbs. in hill for an acre.

Culture melons thrive best in a moderately enriched light soil; the hills should be from three to six feet apart each way, according to the richness of the soil. If the soil is poor or sandy, plant at four feet. Previous to planting, incorporate well with the soil in each hill a couple of shovelfuls of thoroughly-rotted manure; place eight or ten seeds in each hill early in May, for latitude of Philadelphia, for South earlier, for further North later, and when well up thin out to three or four of the most promising.

IMPORTANT FOR YOU TO KNOW

That for many years we have been one of the largest growers of Melon Seeds in the United States, and we supply, every season over our counter, hundreds of New Jersey truck gardeners with our superior strains, and ship many thousands of pounds to the largest melon-growers of the South. We attribute the popularity of our melon, as well as of other seeds, to our careful selection of the very finest specimens of our seed stocks, thus improving and breeding up our stocks to the highest state of perfection. Many of the best and most popular melons now known were first introduced by us.

Correspond with us for SPECIAL PRICES if Seed be wanted in Large Quantities.

MATCHLESS EARLY MUSK MELON

Positively the Earliest

Green Fleshed Musk Melon

ever grown, outyielding all other sorts.

Ideal size for dessert.

A healthy, vigorous grower.

Exceedingly prolific.

It is a small melon, weighing 1 to 1 1/2 pounds. The flesh is deep and thick and light green in color, except next the seeds, where it inclines toward yellow. The flavor is exceedingly fine. The skin is green, regularly ribbed and thickly notted. It is a firm, solid melon, and will carry in perfect condition for a week or more after its removal from the vine. It is a heavy cropper, and is in wide favor as a market melon. Indeed, its ability to bear transportion without breaking down has made it one of the most profitable of crops, and explains why it is so universally grown. It is absolutely the earliest of all flat shaped melons and we particularly recommend it to all whose profit depend upon being first in market. In size it is small, being from 3 to 5 inches in diameter; a very convenient size for serving in halves. It is more largely grown in the great melon-producing State of New Jersey than any other sort, and is used in enormous quantities in the Eastern cities and at the seaside resorts. These melons were of uniform size, of fine shape and appearance, green fleshed, extremely delicious, and sold readily in our market at from $1.25 to $2.00 per dozen, the profit on an acre being something enormous, as all the melons were usually sold before other sorts came into the market. Pkt. 50 cts., 1 oz. 10 cts., 1/2 lb. 30 cts., 1 lb. $1.00.

Your Matchless Early Musk Melon Seed was the earliest grown in this section last year. You must use great care in growing your seed.

O. J. SPAULDING, Charleston, S. C.

The Matchless Early Musk Melon Seed you sent me last season surprised me and my neighbors. It was the earliest and most productive melon in this locality.

WILLIAM T. TEAS, Portsmouth, Va.

Please accept my best thanks for advising me to buy your French Cantaloupe. I planted two acres and cleared $602.75 net. Both eating and shipping qualities are unsurpassed.

SILVESTRE MUNIZER, Cape May, N. J.

OUR MELON SEED is grown exclusively from our own seed stocks. We attribute the large sales of melon seeds, as well as other seed, to our careful and painstaking selection of the very finest specimens only for seed saving; this insures purity—a thing that all planters will appreciate.

FRENCH CANTALOUPES

We regard this as one of the very best and most profitable extra early melons in existence for Market Gardeners and Shippers, and nothing among the green fleshed varieties surpasses it for quality. We have the honor of introducing this singularly beautiful melon, which was placed in our hands by the raiser, Mr. Vanclispe, of Paris. In quality this leads all, and every home garden should include it. Medium sized, round, with salmon red flesh, so rich, sweet and juicy that it needs to be eaten with a spoon. No other melon compares with it in eating qualities and it is the sort of all others for the home garden. It surpasses many melons as a shipper, and is unequalled for marketing near home. When known in our village and cities, the French Cantaloupe easily brings double the price of any other sort, and for gardeners who deliver the melons to customers, or to the market direct, this is the most profitable variety to grow. They average about 3/4 lbs. each and will produce from 3,000 to 7,000 perfect melons per acre. Pkt. 50 cts., 1 oz. 25 cts., 1/2 lb. 45 cts., 1 lb. $1.50.
NEW EARLY HONEY SWEET

They grow very uniform in shape and size, weighing about two pounds each, skin green and thickly netted. They are very thick matted, flesh of a light-green color, the inside surface when cut open, being of a beautiful green color. In quality and flavor they are superior, being uniformly rich, sugary, and luscious. They are EXTRA EARLY, ripening a few days after the Matchless Early and Extra Early Prize. They grow green longer and produce better than any variety we have ever known. The melons, even if left on the vines a week after they are ripe and ready to pick, still retain their good quality. Pkt. 5c., oz. 10c., ½ lb. 25c., 1 lb. $1.35. Special prices on this variety to large buyers.

M. & S. PERFECT GEM

The King of All the Yellow-Fleshed Sorts. The Handsomest, the Best Netted, the Best Shipper, the Flavor the Most Delicate, and Spiciest of All. A Perfect Bonanza to All Who Grow It.

This delicious new musk melon, introduced by us, is the famous "Up-River" melon from Canon City, Colorado, whereas a few successful melon growers have heretofore controlled the entire supply and obtained prices for it more than double that of the famous Rocky Ford variety. Hitherto this luscious variety has only been obtainable at the highest class hotels and cafes. Fancy fruiterers have frequently sold it for 96c. per single melon. All who have grown it pronounce its perfect gem; hence its name. They are very thick matted, with thin rind, heavily and deeply netted. This sort is remarkably productive in a vine usualy producing ten well-shaped melons of uniform size, which average about two pounds each. They are quite early, maturing with our Early Honey Sweet. Our seed is direct from the originator in Colorado. Pkt. 5c., oz. 10c., ½ lb. 25c., 1 lb. 50c., 5 lbs. $3.75. Special price on 5, 10, and 25 lbs. lots.

CREOLE PRIZE

An excellent, new, and very distinct variety, which we commend to all who grow melons for home use. We obtained it from an old New Orleans, La., market gardener, when it was only a vine, under the name of "Honey Grape." Its remarkable luscious quality and sweet spicy flavor causes it to be in great demand wherever known, and it will sell first in the market to be introduced to the public and our many thousands of customers. It is noted for its unusually large size. It is the handsomest fruit imaginable; $6.00 per acre can easily be realized from a good crop. It is a constant grower and very prolific. Flesh bright scarlet, crisp and melting, and will sell for double the price of many other varieties. Pkt. 10c., oz. 25c., ½ lb. 50c., lb. $2.00.

A Famous New Variety

With Many Good Qualities
MUSK MELON—Continued

EVERY ONE SHOULD TRY OUR

BANANA. Flesh, very thick, of a salmon color; in flavor, remarkably delicious. It looks almost like an overgrown banana, and, moreover, smells like one. This curious melon attains a length of 18 to 20 inches, and a diameter of 8 to 10 inches. This sort is not a mere curiosity, but is in such favor as to command good prices in choice city markets, and is very desirable for family use as well. Pkt. 50c., oz. 15c., $1 lb. 45c.

JERSEY BELLE. Unlike other early sorts, it does best on light soils, and will develop a large fruit in the ends, deeply ribbed and heavily netted. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

GOLDEN NETTED GEM. (Golden Jenny.) Very early; small and of fine flavor. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

IMPROVED MONTREAL GREEN NUTMEG. This variety is largely grown by market gardeners. The fruit is nearly round, slightly flattened at the ends, with a deeply netted green skin. The flesh is remarkably thick and of splendid flavor. Selected seed only. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

PERSIAN GIANT. We can honestly recommend this as the largest of all musk melons. The flesh is green, melting, and sugary. If you want to astonish everybody, include Persian Giant in your order. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. 25c.

GREEN-FLESHED OSAGE. In ripening it runs to a bright yellow, retaining its green color in the grooves, while its flesh becomes a beautiful pea green. Selected seed only. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. $2.50.

IMPROVED NETTED GEM. A medium, large, early, dark green melon, deeply lobed, heavily netted, fine grained, and deliciously sweet. Seed saved from selected specimens only. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. $2.50.

EMERALD GEM. Small, early, productive; sweet salmon flesh. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

YELLOW-FLESHED OSAGE. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

MILLER'S CREAM. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

PAUL ROSE or PETOSKEY. The Paul Rose is a cross of the Osage with Netted Gem. It possesses the fine netting of the Gem, and averages about the same size; but owing to the great thickness of its beautiful salmon-colored flesh will weigh at least one third more than a Netted Gem of the same size. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. $2.50.

NORFOLK BUTTON. A carefully selected and improved strain, prized for its great earliness, and when grown on good ground is very thickly and beautifully netted. Rather small in size, of excellent flavor and quality. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. $2.50.

NEW EARLY HACKENSACK. This New Early is a selection or improvement almost equal in size to the Hackensack, and at least ten days earlier. Thorough trials have proven it to be the best as well as the earliest of all the large netted melons of this type. The melons weigh from four to six pounds each, and are of delicious flavor. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. $2.50.

ANNE ARUNDEL. This is an improvement on the Acme or Baltimore Musk-melon, growing to double the size, with thicker flesh. Very deeply netted, of luscious and beautiful green flesh. It is ready for picking immediately after the extra early sorts, in a heavy yielder and bears shipment well. A specially valuable quality is the hardness of the skin and its freedom from the blight which attacks many varieties of muskmelon in hot climates. Fruits often continue as good fruit when other vines have entirely succumbed to unfavorable weather. Seeds saved from selected specimens only. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. $2.50.

EARLY JENNY LIND. Small, early; light green flesh; fine for market. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

ROCKY FORD. Selected Colorado green seed. It is very sweet and luscious in flavor, and is entirely devoid of any stringy character. Our seed was specially grown for us by a careful grower at Rocky Ford, Colorado, and is the best type of the genuine Rocky Ford Musk Melon to be had from any source. Pkt. 50c., oz. 10c., $1 lb. 25c., lb. 50c., 5 lbs. $2.50.

Paul Rose.

ACME, or BALTI. MORE, Early; oblong; pointed; light green flesh; a fine shipper. Oz. 50c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

TIP-TOP NUTMEG. Grows to good size; sweet, juicy; yellow flesh. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

New Eden Gem

Our Seed is Direct from Rocky Ford, Colorado.

This magnificent new muskmelon is a selection of the old Rocky Ford, which it completely surpasses in lusciousness, yield, carrying, and good selling qualities. In shape it is somewhat larger and a trifle longer and closer and deeper netted. Pkt. 50c., oz. 10c., $1 lb. 20c., lb. 50c., 5 lbs. $2.50.

VINE PEACH. A splendid novelty which was introduced by us. The vine on which they are borne is somewhat similar to the musk melon vine, and requires the same cultivation. The fruit is about the size of a large peach, oval-shaped, and of a bright orange-yellow color, somewhat russeted. For sweet pickles, pies or preserving they are superb. Receipts for preparing them for the table will be sent with each order. In the west and northwest, where fruit is scarce, they are becoming popular, as they are easily cultivated, wonderfully prolific, and can be used in every way in which you would use a peach except that they are not usually liked raw.

Per pkt. 50c., oz. 15c., $1 lb. 50c.

Anne Arundel.

Large Early Jenny Lind.

Montreal Green Nutmeg.

Improved Extra Early Hackensack.
MOORE'S NEW MAJESTIC WATERMELON

The Most Valuable New Watermelon of the Day.

It has come to stay, with all Shippers.
Large Growers need not hesitate to plant it largely.

True stock. Seed grown by the originator. The rind is dark green, lightly striped, flesh scarlet, very firm, solid, and of luscious quality, and frequently attains a weight of eighty pounds. For the past three years this has proved to be the most profitable watermelon sent to the Northern markets. An acre of Majestic's will net 100 per cent, more money than an acre of Striped Dires, Icings, Sweet Hearts, etc. Last year we supplied seed for over 1,000,000 melons in South Carolina and for over 2,000 car loads in middle Southern Georgia. We mention this merely to show its popularity in large melon-growing centres. As a shipping melon, it is in every way superior to the Blue Gem of Alabama origin; also the old Kolb Gem. Its beautiful appearance and good quality always insures the highest market prices. Every melon-grower should plant it. Pkt. 25c., oz. 1oz., ¾ lb. 25c., lb. 75c., 5 lb. $1.75. Buyers of 25, 50 and 100 lb. lots quoted upon application.

NEW WHITE DIXIE

We have devoted years in patient effort to produce a white Dixie watermelon, and have finally succeeded. It possesses all the good qualities of the old Dixie, and attains a much larger size also. It is pronounced the finest of all watermelons for home use and nearby markets. The color of the seed is grayish brown, the flesh a clear brilliant red, is very crisp, sugary, melting, and devoid of all stringiness, the rind hard and thin. Another valuable feature is it will remain in good eating condition longer than any sort we know of. It will hold its own in the watermelon patch for years to come, and will always command fancy prices. Pkt. 25c., oz. 1 oz., ¾ lb. 25c., lb. 75c., 5 lb. $4.25.

EARLY MARKET KING

SUPERIOR FOR LONG DISTANCE SHIPPING

THE LARGEST EARLY MELON EVER GROWN
MATURES 83 DAYS FROM PLANTING

Notwithstanding the fact that this melon will average forty pounds in weight, they will readily withstand packing seven layers deep, without injury, in a car; whereas the Kolb Gem or any other variety cannot be packed more than five layers deep for long distance shipping thus fully proving it to be superior to all others as a shipper. Fruit large and heavy (thirty to fifty pounds). A melon large growers need not hesitate to plant largely. This is not only an early watermelon of fine quality, but it is also of large size. From seed planted on the fourth day of May, large, ripe melons were picked July 25th. Its eating qualities superior to all other early sorts, and always commands the highest market prices. Pkt. 25c., oz. 1 oz., ¼ lb. 25c., lb. 75c., 5 lb. $1.00, 10 lbs. $6.00, 25, 50 and 100 lb. lots will be quoted upon application.

MELOS

I planted five acres of your famous Florida Gem water melons and gathered 15,000 handsome melons of which I sold at the car for 50 cents each, or a hundred for $1.00. I am certainly greatly indebted to you.

THOS. E. LAW

Valdosta, Georgia

New Florida Gem Water Melon

...IT BRINGS THE HIGHEST PRICE OF ANY ON THE MARKET...

This prince of water melons is the result of a cross between the Florida Favorite and Louisiana Mammoth Melting Sugar by one of Florida's largest and most successful melon growers and who cleared over $17,000 in two years growing and shipping these delicious melons north. Our seed stock was procured from him and we take pride in offering it to our many thousand customers throughout the world, knowing it will be the means of making many honest dollars by growing it for market. This fine new melon will average about forty pounds in weight and is of the highest table quality. It is remarkably productive as the testimonials of those who have grown it will show. While it is of Southern origin it is equally well adapted for the North and will grow anywhere where water melons can be grown. The color of the outside is rather light with distinct dark markings. The flesh is of a pleasing brilliant red and decidedly solid, and will be found to be firm and very dense to the core. The flavor is peculiarly delicious. While the rind is thin it is remarkably tough and it possesses all the qualities to make it a highly profitable sort for long distance shipping. It grows very uniform in size and is without doubt the most productive melon ever grown and the vines will remain green longer than any other variety known to us and will also sell for higher prices in all markets than any other sort. We predict for it a wonderful future and earnestly recommend all melon growers to plant it.

Pkt. 30c., oz. 10c., 1 lb. 50c., 10 lb. $1.00, 50 lb. $4.50.

ARIZONA WONDERFUL SUGAR

While traveling in the State of Arizona, we found this sort to be almost universally grown on account of its many good qualities. We procured some of the seed and are now able to offer it to our many thousand customers. The melon is of good large size, flesh of a bright red, and of a luscious sweetness. The rind is unusually thin and tough. This variety has attained great popularity wherever known, and the seed is greatly sought after and it will be found a money maker by all our market garden friends. 18,977 melons were produced on one acre. Pkt. 30c., oz. 10c., 1 lb. 50c., 10 lb. 75c., 50 lb. $3.25.
MINER'S BLACK PEARL

We are indebted to Mr. Miner, one of the most successful Melon growers of Georgia, for this remarkably fine new Melon. It is his own production, and by growing it exclusively has realized a handsome fortune from it. When we say we had to pay him at the rate of $300.00 per bushel for the seed stock, you can readily see how valuable a Melon it is.

It has exceptional qualities not found in any other sort. The shape is well depicted in our cut. The flesh is brilliant red, very solid, sweet and luscious. Skin is a beautiful dark green; the rind is very thin but exceedingly hard, which renders it a valuable shipping sort.

Many of our Southern customers, who ship long distances, rely on our fancy seed of this Melon and will use no other, planting very largely of it. Truly a wonderful Melon; none can excel it in delicious eating qualities. We recommend it to all our customers who wish a very dark skinned Melon. Pkt. 5c., oz. 10c., lb. 25c., lb. 75c., 2 lbs. $1.60.

BLACK BOULDER (New). Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c.
KLECKLEY'S SWEET. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.
MOUNTAIN SWEET. Oz. 5c., 1/2 lb. 25c., 1 lb. 50c., 2 lbs. $2.00.
LIGHT ICING or ICE RIND. Oz. 5c., 1/2 lb. 25c., 1 lb. 50c., 2 lbs. $1.75.
DARK ICING. Oz. 5c., 1/2 lb. 25c., 1 lb. 50c., 2 lbs. $2.00.
STRIPE DYING or GEORGIA RATTLE SNAKE. A favorite melon in the Southern States. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 2 lbs. $1.00.
JORDAN'S GRAY MONARCH, or LONG WHITE ICING. The flesh is deep red in color and of very fine quality. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.
DARK MELONS. Dark skin, red flesh, large size, immensely productive, fine quality, excellent shipper. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 50c., 2 lbs. $2.00.
MINIATURE WONDERFUL SUGAR. Extra selected stock. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 50c., 2 lbs. $2.50.
DIXIE. Our true stock seed will be found much superior to that offered by many other houses. Extra selected stock seed saved from picked melons. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 50c., 2 lbs. $2.50.
BLACK BOULDER. Of large size and excellent quality. Seed direct from the grower. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.
KOLB'S GEM. Extra quality seed, oz. 5c., 1/2 lb. 25c., 1 lb. 50c., 2 lbs. $1.00.
TRUMPH. A cross between the Duke Jones and Kolb Gem, of handsome dark green skin. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 50c., 2 lbs. $3.50.
GEORGIA BLUE GEM. A large dark skinned melon, variety of same shape as Kolb's Gem. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 50c., 2 lbs. $2.75.
FRENCH PRESERVING MELON. This is quite distinct and superior to the ordinary preserving citron. It is immensely productive. The flesh is very firm and solid, with few seeds and of spherical shape. The preserving qualities are the very finest; it makes beautiful, clear, nearly transparent preserves, of surprisingly fine flavor. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 70c.

MARTYNIA PROBOSCIDEA. The seed-pods make delicious pickles in May or June. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 50c.
OKRA, OR GUMBO

German. Elephant, French, Gumbo, Spanish, Quimomba.
The seeds should be sown quite thinly in drills two or more feet apart. For either cooking or drying, the pods must be gathered when young and tender, before any blight or mold is formed.

HOLT'S PROLIFIC DWARF EARLY GREEN STRINGLESS. Our illustration herewith shown, is engraved from a photograph, and plainly shows the wonderful prolific character of this exceedingly desirable variety. It is very early, begins to bear beautiful, slender, smooth pods when not more than eight inches high. The best and most profitable market sorts; very tender, smooth pods. Will remain in full bearing until frost. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c.
PERKINS' MAJOR'S EARLY STRINGLESS. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c.
EMPLOVED DWARF GREEN. Profuse. Oz. 5c., 1/2 lb. 25c., lb. 75c.
LONG WHITE POD. New. Pods unusually long, very light and tender. Pkt. 5c., oz. 10c., 1/2 lb. 25c.
Moore & Simon's Onion Seed is Unequaled in Quality.

LARGE ONIONS FROM SEED

By choosing varieties suited to your locality full-sized Onions may be grown from the seed fully as well, much more cheaply, and only a little later than from sets. For this purpose four to five pounds of seed per acre are required, depending upon distance apart at which the rows are sown. In the Northern States very large bulbs of Prize-Taker and our globe Italian Onions, as well as from many other varieties, may be raised by sowing the seed early in hot beds or cold frames, and transplanting the young plants out in the field at the proper time.

The land should be highly fertilized. Raw Bone Meal is an excellent fertilizer, culture should be frequent. Where very large bulbs are not wanted seed can be sown where the crop is to be grown.

AMERICAN-GROWN MAMMOTH YELLOW PRIZETAKER ONION WILL DO IT.

Our American-Grown Prizetaker seed we offer produces large, well-ripened bulbs the first season from seed; flesh white, crisp and mild in flavor. The skin is thin, of a bright straw-yellow; form nearly a perfect globe, as shown in our illustration. Under ordinary cultivation this variety will yield bulbs nearly three times as large as the Globe Danvers, while under special cultivation we have raised specimen bulbs to weight from four to five and a half pounds each. These are the large mild onions which are sold in small crates in the early fall and are esteemed for their large size, handsome appearance, mild and delicate flavor. With ordinary culture the crop of Prizetaker onions is not infrequently 2,000 to 1,500 bushels per acre, and often runs up to 1,500 bushels. Our Strain Prizetaker is by far the handsomest, most productive, most popular and best of all Yellow Globe Onions. It is a bright clear straw color, and always grows to a uniform shape, which is a perfect globe. It has a very small neck, and ripens up without stiffness of the neck. In market it never fails to attract attention on account of its beauty, and is sure to bring a far better price than any other Onion. Our Strain of Prizetaker is even more attractive in appearance than the large Spanish Onions sold on the city fruit stands, and in fact takes the place of that variety. Pkt. 10c., oz. 30c., 1/2 lb. $1.00, lb. $3.00 post-paid. By express in lots of two pounds or more $2.50 per pound.
M & S. JAMES' LONG-KEEPING YELLOW ONION. The only variety that will produce perfect yellow sets. Will produce large perfect onions the first year from seed. The most satisfactory and profitable variety for Market Gardeners to plant. Our customers will find in our James' Long-Keeping Yellow that reliability of bottoming and large yields are both combined in this popular variety. It cannot be too highly recommended. It is extremely favored by all growers and frequently produces five hundred bushels of beautiful sets per acre from seed sown in the spring. The genuine James' Long-Keeping is a very handsome large, round Onion, thick, of good size, with thin, smooth, skin, flesh white, mild, and of excellent quality. The large onions of this variety will keep in perfect condition longer than any other, and are easily as perfect in spring as when put away in the fall. It produces the handsomest set ever seen, which ripens early and keeps better than any other yellow sort, and sells rapidly, and is in every way the most profitable to grow. So beautiful are the sets grown from this seed that they will sell from fifty cents to one dollar per bushel more than any other yellow variety. When sown thinly same as our Early White Spanish it produces beautiful large yellow onions of excellent quality, which will mature earlier and keep longer and better than any other yellow variety. Pkt. 100c., oz. 25c., lb. 50c., $1.75, 10 lbs. and over, $1.50 per lb.

PHILADELPHIA YELLOW GLOBE DANVERS ONION. This is the standard Yellow Globe for Winter use, being most adapted to our eastern markets, producing well-ripened bulbs averaging two inches in diameter and nearly globe-shaped. Skin a light golden brown or pale yellow; flesh pure white, crisp, and mild in flavor. Our Philadelphia grown and especially selected, the plants having very slender necks and the bulbs ripening uniform. Other perfectly globe-shaped varieties are generally larger-shaped varieties than our Philadelphia Yellow Globe Danvers. Pkt. 25c., oz. 25c., lb. 50c., $1.25, 10 lbs. and over, $1.00 per lb.

SOUTHPORT LARGE WHITE GLOBE. A large, globe-shaped Onion; flesh firm, fine-grained, of mild flavor; excellent keeper. This is one of the handsomest onions grown; of beautiful form, clear white skin. Owing to its large size it is much later in ripening than the White Globe Danvers; our stock is very choice. Pkt. 10c., oz. 20c., 2 oz. 50c., lb. 1.25, 5 lbs. $2.25.

LARGE RED GLOBE (True Southport Strain). This variety produces large perfectly globe-shaped onions of an extra rich deep red. It brings the highest prices on market, and is very profitable. It is also known as Globe Wethersfield, but is not so early nor quite so sure to ripen well in unfavorable seasons as our Extra Early Red and Large Red Wethersfield, which are of the flattened type. We highly recommend it to all our market garden friends. Pkt. 10c., oz. 25c., 2 oz. 50c., lb. 60c., $1.50 per lb. In lots of 10 lbs. or more at three times the price of any other white sort on sale, produces 1,200 more bushels per acre. Keeping qualities are excellent, in spring the bulbs become very firm and solid as well as tender. Over 6,000 lbs. of this valuable onion were sold last year. Sow as early as the ground is in working condition. Pkt. 10c., oz. 20c., lb. 50c., $1.00, 5 lbs. and over, $8.00 per lb.

ITALIAN EARLY WHITE GLOBE ONION. This magnificent onion is about as handsome as a newly made snowball, and sells at a higher price than any other white globe onion. All of our many thousand market garden customers are unanimous in saying that no white globe onion in America can equal it. It is nearly as large as the famous Muscatel Yellow Pritzaker, and keeps remarkably well. It is an excellent seller in all markets and stands shipping long distances to perfection. It produces the onions the first year from seed. It is a heavy yeilder, from 800 to 1,600 bushels per acre are frequently reported to us. It is essentially a money-making onion, and all are so fine that they sell at the very highest market prices in all markets. We urge every onion grower to try it. It is sure to please and make money for all. Pkt. 10c., oz. 25c., 2 oz. 50c., lb. 75c., 5 lb. $3.00, 10 lbs. $5.00.

WHITE PORTUGAL, OR WHITE SILVER SKIN ONION. The bulbs grow to good size, ripening early and quite evenly. It is a good keeper. The flesh is very white, of very handsome appearance if the bulbs are gathered as soon as ripened, and carefully dried under shelter away from the strong sunlight. Pkt. 3c., oz. 60c., lb. 50c., per lb. $2.00, 5 lbs. $9.00.

EXTRA SELECTED OHIO YELLOW GLOBE. We name it Ohio Globe to designate it from the many strains of Globe Danvers now offered; besides to Ohio growers belongs the honor of producing, by many years of painstaking care, selection and careful raising, a true and distinct strain of that extreme type of Globe which is now so eagerly sought after by all the best growers, and whose excellence is commended by nearly all in large onion circles. Our varieties of excellence are: Distinct and attractive shape, handsome, bright, even color; ripens early and all at once; necks very small, and cure down to almost nothing. The firm, solid bulbs are excellent for market, and all that early white varieties are noted for in size and quality; enormous yielders—2,000 bushels (standard weight) per acre are frequently grown on rich onion land. This is a superior soil (well enriched) and especially good on dark muck lands on account of its quick maturing qualities. Grown from careful hand selected bulbs only. Pkt. 5c., oz. 25c., 2 oz. 50c., lb. 60c., 5 lbs. $3.00.
GOOD ONION SEED is of the utmost importance. Fully realizing this, we make a Specialty of the BEST ONION SEED. A dollar saved on the purchase of the seed is likely to be lost many times over when the bulbs are harvested. The first cost of the seed is a small item compared with the expense involved in further proper preparation, fertilizing, and cultivation of the soil. It costs as much to raise a crop of inferior bulbs from poor seed as to produce a crop of fine evenly ripened bulbs from a selected strain of seed. Our Onion Seed is absolutely unsurpassed.

ROUND WHITE MADEIRA SILVER SKIN. The best, pickling onion. Uniformly small, round, and handsome, with an outer white skin which does not turn green upon exposure to the sun. They are compact and hard, but at the same time crisp and brittle. Pkt. 5c., oz. 20c., ½ lb. 50c., lb. $1.65.

MAMMOTH SILVER KING. The skin is of a beautiful, silvery white. The flesh has a particularly mild and pleasant flavor, and is so sweet that it can be eaten raw like an apple. No other white onion attains such a mammoth size, nor will any other white variety grow uniformly so large. We have a record of two of these onions weighing 4 pounds and 9 ounces. Thousands of letters and postal cards have reached us containing words of the highest praise of the wonderful size, early maturity and good quality of this famous onion, and the fact that these voluntary testimonials come from all parts of the country proves the adaptability of the onion to a wide range of soil and climate. Pkt. 10c., oz. 20c., ½ lb. 35c., lb. $1.75.

LARGE RED WETHERSFIELD ONION. Extra Fine. This is the most popular standard variety for winter market in many Northern States. It has an early ripening set, as it continues in growth throughout the season and consequently makes very large onions. Continued selection of bulbs planted for seed gives us a small-necked, sure-ripening strain, entirely free from scions or thick-stalks. Though well flattened, the solid onions are thick through, as shown in the photograph of a specimen bulb reproduced above. This onion, when grown on rich soil, is solid and weighs exactly six ounces. The outer skin is a deep rich purple red, smooth and glossy; flesh white, slightly tinged with pinkish rose. The magnificent large-sized onions are nearly as mild in flavor as in many varieties with skin of lighter coloring. Its splendid keeping qualities make it easy to hold crops for late winter market. There is no better strain of the true large Red Wethersfield in cultivation to-day than that offered by us. Pkt. 5c., oz. 20c., ½ lb. 50c., lb. $1.25, or more at 20c. per lb. 

EXTRA EARLY WHITE PEARL (Bloomdale Pearl). Of early, quick growth, frequently maturing in seven to nine weeks, from sowing the seed. Excellent for market in summer and early fall. Bulbs are round, flattened, with a delicate, pure white skin; flesh very mild and pleasant in flavor. Pkt. 5c., oz. 20c., ½ lb. 50c., lb. $1.50, or more at 20c. per lb.

PHILADELPHIA EARLY BUNCH ONION. The Philadelphia Early Bunch Onion was named and introduced by us in 1886. It attains a large size from the seed very early in the season. The bulbs are of attractive form. Battered but thick and of a beautiful silvery white; the flesh is snow-white and so sweet and tender that it can be eaten raw like an apple. For bunching in flower like an onion, for bunching in flower like a flower, and for storage, it is unequalled for market. Large full size onions very early in the spring. Market gardeners will find this a very profitable sort to grow. Pkt. 10c., oz. 20c., ½ lb. 50c., lb. $1.75, $3.00.

SOUTHPORT LARGE YELLOW GLOBE. Like the well-known White Globe Onion in size, but with pale, straw yellow skin. A heavy cropper, handsome in appearance, large size, and sells readily in the market. Our strain is the best obtainable. Oz. 5c., ½ lb. 25c., lb. 50c. Connecticut grown seed.

MOORE & SIMON'S PHILADELPHIA CROWN YELLOW GLOBE DANVERS ONIONS—FOR SETS. Very carefully grown and selected for producing sets of the proper shape, size and color and producing onions of equally fine quality. The sets grown from these onions will keep under favorable conditions during the winter and longer than those from seeds grown in any other locality. Pkt. 5c., oz. 20c., ½ lb. 40c., lb. $1.00, 10 lbs. $9.50.

LONG KEEPING WHITE MADEIRA ONION. Of handsome appearance, the best for family use and for growing sets. A much better keeper than the White Portuguese or Silver Skin, and will also produce both a larger and better set of marketable bolts. Flavor mild and delicate, ripens extra early. Pkt. 5c., oz. 20c., ½ lb. 50c., lb. $1.50, or 100 lbs. $9.00.

PHILADELPHIA YELLOW CUBE DANVERS. Select stock, very productive. Pkt. 5c., oz. 20c., ½ lb. 50c., lb. 50c., 10 lbs. and over 25c. lb.

ROUNDBOY GLOBE DANVERS. A leading market variety. Oz. 5c., ½ lb. 25c., lb. 50c. $1.00.

PHILADELPHIA YELLOW STRASBURG. FINE ONION. Bulbs of large size, good shape, of a good size; skin rich yellow, turning to brown when exposed. Ripens early, flesh white, and of white mild flavor; keeps well. It is one of the very best to grow for sets. Pkt. 5c., oz. 20c., ½ lb. 50c., lb. 75c., 10 lbs. $6.50. Prices on 25, 50 and 100 lbs. will be quoted on application.

QUEEN. This is a very early onion; small, flat, white and mild flavored. Pkt. 5c., oz. 20c., ½ lb. 50c., 1 lb. $1.00, 10 lbs. $9.00.
TRUE BERMUDA ONION SEED

We annually obtain our seed direct from the most reliable grower in the Teneriffe Islands, and no better can be had.

BERMUDA ONION

Pale Red. Pkt. 10c., oz. 25c., 1/2 lb. 60c., lb. $2.00. Pure White. Pkt. 10c., oz. 25c., 1/2 lb. 60c., lb. $2.50. New Zittau Extra Early Onion

The Earliest Large Onion on Earth. (See page 35 for illustration.) This is the biggest and best money-maker ever offered to any seed-man. You grow it direct from the seed, and you will have bigger and better onions than any you may grow from sets, and at one-third the cost of sets, and one-half less labor. Big statements these, but every word the truth.

We believe we do a kindness to every one of our customers who in we induce to plant this valuable New EASY EARN ONION, and thus put them in the way of making money. It thrives exceedingly well on any kind of soil—of course, the richer you make the soil the better. 1,000 BUSHELS PER ACRE, can easily be grown from seed of this variety, and in ideal soil they can be laid on the market by June 1st., when prices range from $4.00 to $5.00 per bushel, for new onions. When we introduced this onion 5 years ago, we had no idea it would spring so suddenly into popularity, for today there is no onion grown in the United States, which is higher praised for a money-maker than our Zittau Extra Early. After repeated and impartial trials, this onion has proved superior in all qualities and excelled quality, which stamps it absolutely the very finest grade, fine quality, large flat onion grown. Is of fine shape, almost white; it is mild flavor, and sweet in flavor when onions command a high price. It is unquestionably the largest, handsomest, finest flavored, best shaped, finest keeping, most superior early onion ever introduced, and is an onion that will sell on its merits in any market. Pkt. 10c., oz. 25c., 1/2 lb. 75c., lb. $1.25. Large buyers will be quoted special prices upon stating quantity wanted.

LARGE WHITE ITALIAN TRIPOLI. An excellent variety, of quick growth and mild flavor. Pkt. 5c., oz. 15c., 1/2 lb. 40c., lb. $1.50.

NEW JERSEY WHITE SCALLION ONION. Many millions of bunches of Scallions are produced annually in New Jersey and shipped to surrounding towns at great profit to the growers. The fine quality of these Scallions causes them to find ready sale wherever known. They can be allowed to remain in the ground for three years before re-setting and will produce from 40 to 40 scallions per bushel. Furthermore, the private garden and market gardener. Pkt. 15c., qt. 25c., 4 qt. 75c., pk. $1.25, bu. $4.50.

WHITE MULTIPLIER. This variety produces a large cluster of small to medium-sized onions from a single bulb, maturing very early in the season, being ripe and ready for use even earlier than the Extra Early White Queen, or they can be planted in the fall for a supply of early bunch onions. If planted in the spring and left to mature they will increase wonderfully, ripen early, and are all the right size for pickling. They should be gathered just as soon as the tops die down and spread three inches to the drill; 25c. per quart 40c., by mail or postpaid, by press: 25c. per qt., 4 qts. for 75c., pack $1.25, per bush $4.50.

PHILADELPHIA ORION SETS

Philadelphia grown onion sets are everywhere recognized and esteemed by the public for their beauty and quality. We grow each season large quantities of these sets. These are grown from our Philadelphia seed, which being by nature and climate capable of producing better quality than that grown in any other section. Onion sets are subject to fluctuation of the market. They will probably rule about as follows: Customer sets $8.50 per large quantity than here quoted will please write for special prices. Add 10c. per quart, 25c. per peck for postage, if ordered sent by mail.

Per qt. Per pk. Per bu.
Yellow Strasburg...$0.30 $1.00 $3.50
Yellow Globe Davers...$0.25 $0.75 $2.50
James' Long-Keeping Yellow...$0.25 $0.75 $2.50
Long-Moisturing Red Madera...$0.35 $1.00 $3.50
White or Silver Skin...$0.25 $0.75 $2.50
Potato Onion...$0.25 $0.75 $2.50
Shallots...$0.25 $0.75 $2.50
Extra Early Red...$0.25 $0.75 $2.50
Garlic...$0.25 $0.75 $2.50

EGYPTIAN OR PERNIAL TREE ONION. Pkt. 15c., qt. 25c., pk. $1.00, bu. $3.00.

PARSLEY

German, Potsville—French, Perigil—Spanish, Persil.
1 oz. for 150 feet of drill.

Parsley succeeds best in rich mellow soil. As the seed germinates very slowly, three or four weeks elapsing sometimes before it makes its appearance, it should be sown early in spring, great care being taken that the drills be not more than an inch in depth and that the seed be well pressed down after sowing. Sow thickly in rows a foot apart and half an inch deep. For winter use, protect in a frame or light cellar, or a few plants may be placed in pots or boxes and kept in the house for convenient use in winter.

PARIS MARKET PARSLEY

PARIS MARKET, OR GIANT PARSLEY. Our French Market Parsley is much superior to all other varieties. In color it is a beautiful rich green, leaf fronds large, delicately cut and handsomely curled; the plant is half dwarf, hardy, a heavy yielder, being greatly improved by frequent cutting. For growing in greenhouses, as cut-glass parsley, it surpasses all old varieties. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 75c., 10 lbs. $3.50.

CHAMPION DUTCH ERFURT. This splendid variety originated in Germany. Extra curled dark green, and free growing which we recommend for a summer crop, owing to the fact that it will not turn yellow. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 75c., 10 lbs. $3.00.

SHEEP'S FIELD FERN LEAVED. New, dark green, robust grower, fine summer variety. Pkt. 5c., oz. 20c., 1/2 lb. 60c., lb. $2.00.

EMERALD, OR DwarFA EXTRA CURLED. Double. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 75c., Extra Double Curled, Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 75c., 10 lbs. $5.00. 10 lbs. at 100 lb. rate.

PLAIN OR SINGLE. Very hardy, dark green color. Extra good quality; valuable for a summer crop. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 60c.

PARSNIP

German, Potsincke—French, Pannet—Spanish, Aventine.
1 oz. per 200 feet of drill; 5 to 6 lbs. in drills for an acre.

Sow as early in spring as the weather will admit, in drills eighteen inches apart, covering half an inch deep. When well up thin out to five or six inches apart in the rows. This keeps the plants improved by frost, and is usual to take up in fall a large amount of moisture for winter use, and store as directed for Turnips, leaving the rest in the ground until spring, to be dug up as required.

NEW WHITE MALTESE HOLLOW CROWN PARSNIP

This strain is the result of years of careful selection by a noted parsnip specialist. It embodies all the points of excellence desirable to a market gardener, in smoothness, shape, true hollow crown, extra sweet rich flavor, beautiful white color, and is not too deep or too short. It does not crack open and is entirely free from all coarse or stringy, and is so common in other varieties and will usually bring from fifty to one hundred per cent. higher prices. If you grow parsnips be sure and get this seed from us. Pkt. 5c., oz. 10c., 1/2 lb. 25c., 1 lb. 75c., 10 lbs. $5.00.

IMPROVED IDEAL HOLLOW CROWN.

Medium length, smooth, hollow crown, fine grade, sweet and pretty appearance. Oz. 10c., 1/2 lb. 25c., 1 lb. 60c., 5 lbs. and over, 25c. per lb.

SUTTON’S STUDENT OR LONG SMOOTH. Heavy yields. Oz. 5c., 1/4 lb. 12c., 1 lb. 40c.

BEST EVER EATEN

Your Maltese Hollow Crown Parsnip are pronounced by all my customers the best they have ever eaten. I had in one acre last season, will have to grow more next.

JAMES S. WILLIAMS, Hoboken, N. J.
EXTRA WE MCLEAN'S Queen.

"I must say the flavor, we know, is equal to that in ears of corn, and literally fills itself with large pods, all ripening evenly and of excellent flavor. It is very early—earlier than American Wonder—testing in forty-six days. When once tried, no other dwarf sort will be grown. No words of praise are too extravagant for this wonderful dwarf blue pea novelty. It is grand beyond description, of delicious flavor and heavy copper. We know that all who try this pea will agree with the words of a pleased patron by saying: "Do not exaggerate when I say that this is the very best dwarf pea to grow in a family garden for the table that I ever saw. I congratulate you in planting a pea of its remarkable character before the American people, and I predict for it a bright future.

Its strong points are the delicious richness of flavor and dwarf habit. It is very hardy and Bour-lah everywhere. It is of uniform height, soft and smooth in its growth that a row resembles a well-kept hedge. It is also a profitable variety for market gardeners; as the pods are large, it fills a bushel quickly, and brings a very fine price in market."

**M & S LIGHTNING EXTRA EARLY**

M & S LIGHTNING EXTRA EARLY

The Earliest and Most Productive of All Extra Early Peas

ARE PLANTED ANNUALLY BY OVER 20,000 MARKET GARDENERS THROUGHOUT THE UNITED STATES.

This is the market gardeners' favorite early pea; indeed, it is our favorite early pea. We consider it a good friend to all market gardeners. It never disappoints. It is always the first, the earliest, and the smallest in the market. We do not know of any pea that is superior or earlier or would give the market gardener more profit and a greater sale than this variety. There is certainly no pea grown by seedsmen today which we know of that can equal it in earliness and uniformity of ripening. It has proven itself to be the seed for many years.

The pods are nearly 6 inches, a beautiful shade of green, covering the plant with astonishing profusion, and well filled with large, smooth peas of a splendid flavor, very sugary and tender.

**MOORE & SIMON'S FAMOUS PEAS**

**M & S May Queen.**

MAY QUEEN

It is the Finest and Most Delicious Dwarf Pea in the World for the Cottage Garden

This grand new blue dwarf wrinkled pea is one of the very best peas we have ever grown. It is extremely early, growing 17 inches, and literally fills itself with large pods, all ripening evenly and of excellent flavor. It is very early—earlier than American Wonder—testing in forty-six days. When once tried, no other dwarf sort will be grown. No words of praise are too extravagant for this wonderful dwarf blue pea novelty. It is grand beyond description, of delicious flavor and heavy copper. We know that all who try this pea will agree with the words of a pleased patron by saying: "I do not exaggerate when I say that this is the very best dwarf pea to grow in a family garden for the table that I ever saw. It is also a profitable variety for market gardeners; as the pods are large, it fills a bushel quickly, and brings a very fine price in market."

**MOORE & SIMON'S EXTRA EARLY BLUE BEAUTY.**

Those who wish to be first in market with Peas should plant this sort. It is a good companion for our Lightning Extra Early. It is absolutely unsurpassed in earliness, size of pod, productivity, vigor, hardiness, quality and regularity of growth. For a pea so early it is of remarkable good flavor. It has the full and complete endorsement of our market gardeners, who rate it as being the best early smooth green pea in cultivation in America today. It will mature from the date of planting, the color green, and in time of year planted. The crop can be cleared in usually one picking. It is the best for all, whether for market or family use. Pkt. 10c., pt. 15c., qt. 30c., qt. 60c., bu. $1.00.

**MOORE & SIMON'S EXTRA EARLY.**

In earliness and yield our selection of this important seed is not surpassed. Height from twenty to twenty-four inches. Pkt. 15c., pt. 25c., qt. 60c., bu. $1.00. The flavor and quality are equal to the best may queen.

**MOORE & SIMON'S LIGHTNING EXTRA EARLY.**

The earliest and most productive of all extra early peas.

**SCOTCH CHAMPION PEA (New).**

This delicious variety is a cross between Windsor Castle Marrowfat and the well-known Dr. Maclean. It is now the leading garden sort in Scotland and Ireland where peas of the highest quality only are always in demand. In our annual trials of peas, numbering hundreds of sorts, this has been conspicuous for its astonishing profusion of large dark green pods which are unusually large, handsome and filled with pellicul dark green peas of true marrowfat flavor. We have counted from 50 to 60 pods on a single plant. Height nearly six feet, large, and in the front rank as a main crop variety. Pkt. 10c., pt. 20c., qt. 30c., 4 qt. $1.00, pk. $1.25, bu. $6.00.

**AMERICAN WONDER.**

Pkt. 5c., qt. 30c., pk. $1.50.

NEW PEa—PRIZETAKER.

“A Prizetaker.” Plant two and one-half feet high of a branching habit, and vigorous growth, pods long, round and well filled with large peas of very sweet and luscious quality; pods are produced in pairs, usually from sixty to eighty fine pods to a plant; exceedingly hardy, can be planted fully as early as our Lightning Extra Early. Matures in about forty days from sowing. Its immense productiveness and fine quality make it an excellent sort for main crop for the family garden and market gardener. One of the most valuable features of this grand new pea is that it is almost a continuous yielder, three full crops are always yielded by it, plants frequently yield 230 pods and we have no hesitation in pronouncing it the most prolific and finest quality pea ever introduced. Once planted, always planted. Pkt. 10c., pt. 20c., qt. 30c., pk. $1.50, bush. $5.50.

Evidence of Quality and Yield.

I have grown all the best varieties of peas both in Europe and America, but I find none to equal your Prizetaker in the combined quality of hardiness, yield, and quality.

Peder Pederson, Huntington, Pa.

LONG ISLAND MAMMOTH. Pkt. 10c., qt. 30c., pk. $1.50, bu. $5.00.

Nott’s Excelerator. It is a medium early, green wrinkled pea, 12 to 15 inches high. Pkt. 10c., qt. 30c., pk. $1.75, bu. $7.00.

EARLY JUNE. It is a medium early, large wrinkled pea; a robust grower, two feet in height, producing its large pods in abundance. The pods are large and well filled with large, delicious peas. Pkt. 10c., qt. 30c., pk. $1.75, bush. $6.00.

TOM THUMB PLENTIFUL. We take pleasure in introducing this new pea to our customers and we predict that it will become more popular with our customers than any other dwarf sort. It is one of the hardest, most prolific, and best varieties of first early wrinkled peas we have ever seen; the peas were ready for the table June 28th, as early as the American Wonder, planted side by side, while the vines were much more productive, and it comes very near to being a “one picking variety.” Of handsome dwarf growth, the vines are eight to twenty inches high, stocky, with abundant foliage. The pods literally cover the vine, average three inches long, and are well filled with large peas; each pod containing six to eight, so closely packed that the peas are flattened against each other. Quality the very best; rich, sugary, and most delicious in flavor. Pkt. 10c., qt. 30c., pk. $1.75, bush. $7.00.

Sutton’s Green Gem Forcing. A delicious first early. Very prolific; fine for private garden; 20 inches high. Pkt. 10c., pt. 20c., qt. 30c., pk. $2.00.

YORKSHIRE HERO. Two and one-half feet. Pkt. 30c., qt. 90c., pk. $1.75, bush. $7.00.

BLISS’ EVERBE/RING. Pods long, pea large and fine quality; two feet; extra fine stock. Pkt. 50c., qt. 30c., pk. $1.00, bush. $4.00.

CARTER’S TELEPHONE. Pods round, contain from six to seven peas of large size; three feet. Pkt. 10c., qt. 30c., pk. $1.50, bu. $5.50.

SUTTON’S EMERALD GEM.

No new pea since the introduction of “Prizetaker” has created such a sensation. Everyone who sees it wants it—amateur, market gardener and amateur. It is far superior to all other varieties of medium dwarf peas, as it combines quantity and quality in a degree possessed by few other varieties. The Emerald Gem is a medium early, green pea, grows uniformly about twenty-two inches high and is literally covered with large, heavy pods—in fact, so striking and distinct is this variety that it would be picked out at once in a field of one hundred other varieties. The quality of this pea is excellent, that rich, buttery, narrow-like flavor for which the peas grown in the gardens of Old England are celebrated. Pkt. 10c., qt. 30c., pk. $1.75, bush. $7.00.

Sutton’s Emerald Gem.
We grow the Largest Assortment of DELICIOUS PEAS of any Seedsmen in America. You will get the World's Best if you buy from us.

**SIMON'S FILLBASKET**

Introduced by us in 1890, this grand new Pea has been very much admired. The illustration here with shows a pod engraved exactly natural size. The vines are of strong sturdy growth, 2½ to 3 feet high, and of a decidedly branching character and bear an enormous crop of magnificent large dark-green round pods, each containing eight to twelve peas, of remarkable size and very rich and sugary flavor. It has been appropriately termed the "Fillbasket," on account of the extraordinary quantity of large pods that it produces. We have had many letters in praise of its great productiveness, the extra large size of the pods, and the delicious quality of the peas. It is unquestionably the very best large podded Pea ever introduced. Pkt., 35c.; qt., 50c.; ½ pt., 75c.; pt., 1.50; bu., 6.00.

**WOTT'S EXCELSIOR.**

**McLEAN'S ADVANTAGE.**

Large buyers of Peas will please write us for special prices, stating quantity wanted.

**NEW GIANT PODDED MARROW.**

This new pea has given satisfaction to all who have planted it. It grows about two feet high, and bears handsome pods, filled with large, deep green peas. Pkt., 35c.; qt., $1.75; bu., $6.00.

**NEW EARLY SUGAR MARROWFAT PEA.**

In our annual trials of peas, numbering many hundreds of rows, this variety was conspicuous among them all for its astonishing profusion of pods, which are large and handsome and bountifully filled with dark green tender peas of the true delicious marrowfat flavor. In England, where we obtained our stock seed, it is extensively grown by the nobility, who prize the Sugar Marrowfat above all others of its class. It is the earliest of all marrowfats and will satisfy the most exacting who strive for the best quality. We recommend it to all who plant for home use or market; one of our best introductions. Height, two feet. Maturing about one week after our Lightning Extra Early. Pkt., 10c.; qt., 30c.; ¼ qt., 55c.; ½ pt., $1.50; bu., $5.50.

**YOUR NEW EARLY SUGAR MARROWFAT PEAS ARE A REAL DAINTY.** Its delicious quality is a revelation to all who eat it. JAMES SYLVESTER WORTHINGTON Chestnut Hill, Pa.
Pedrick’s New Early Prolific Pepper

The EARLIEST and Most Productive PEPPER in Cultivation.

No grower of peppers will be disappointed in this grand new variety. Its earliness, compared with any other sort is astonishing, and its yield is almost beyond description, and like our Moore’s Mammoth Prizetaker Pepper introduced by us in 1901, it has come to stay, and will prove a source of much profit to all who plant it. It is fully three weeks earlier than the Chinese Giant or Ruby King, and about five days earlier than the Neapolitan, and notwithstanding its earliness it will continue to yield fine large peppers, which are longer and narrower than Ruby King, up until frost. Mr. Pedrick had one plant that yielded 327 full-sized fruits during the season. To get best results the fruits should be removed from the plants as fast as they are grown. The size and yield will thus be fully maintained through the season. They carry and keep well, the flesh is thick and smooth, slightly pungent and is a glossy, brilliant red when ripe, and being first in market secures the highest price. Pkt. 10c., 5 for 25c., oz. 30c., 1/2 lb. $1.50, lb. $5.50.

A GRAND PEPPER

MOORE’S MAMMOTH PRIZETAKER PEPPER is the greatest pepper on earth. Thousands of gardeners have found it ahead of any other large variety they have ever tried. If you have not grown it you ought to, as you need it. Sixteen large specimens till a half bushel basket. We discovered it growing in a patch of Chinese Giants we were saving seeds from in 1899, and at once recognized its many good qualities. We, as well as many hundreds of pepper growers who have grown it, pronounce it in every way superior to the Chinese Giant and the most valuable acquisition to our list of peppers. It is taller, more symmetrical, earlier, and a better yielder than the Chinese Giant; 8 baskets per acre was its record for 1902, and 91 for 1903. In shape it is longer from stem to blossom end than the Chinese Giant; decidedly smoother and fully 25 per cent. more productive. Never before has there been a variety that produced uniformly such enormous fruits. Our illustration is taken direct from a photograph, and an exact representation as to size and shape. The plants are of a strong stocky growth of bushy, erect habit, growing 2 feet in height; stout stems and branches, with abundant foliage; leaves dark green, large and broad. The fruits of brightest scarlet, average 4 inches broad by 8½ to 9½ inches long. Moreover, the fruit sells from 10c. to 25c. per basket or any other large sort, which makes it extremely valuable to the market gardener. Flesh thick and very mild, being entirely free from any pungent flavor. The yield is simply prodigious, being twice that of the Chinese Giant. We especially recommend it to all our customers who grow for market, for it sells readily at good prices. Pkt. 10c., ½ oz. 35c., oz. 60c., ¼ lb. $2.50, lb. $7.50. Our seed was saved from many samples weighing 100 ounces.

Early Hot Bull-Nose Pepper. Many of our customers ask us for HOT BULL NOSE PEPPER seed “because they sold much better.” The peppers of this most excellent variety grow nearly as large as our famous Pedrick’s Early Prolifics, are of a beautiful glossy, brilliant red. The fruit is about as large as Ruby King, and produced in much greater profusion, and are ready to pick about two weeks earlier. The flavor is unusually hot and pungent both in the green and ripe stage, and it will be found the most desirable of all sorts for making “mangoes,” pickling, or pepper hash. A very profitable market sort, and we especially recommend it to the Florida growers, as HOT BULL NOSE peppers are in great demand at very high prices in all Northern markets during the winter months. Pkt. 10c., oz. 35c., ¼ lb. $1.00, lb. $3.75.

New Cardinal Pouter Pepper. This is just the right thing for bunching with potherbs, neither too long nor too small; color a rich, glossy cardinal red. Strong and pungent. It is the most productive pepper we ever saw. Our illustration gives an excellent idea of its habit of growth. Pkt. 10c., ½ oz. 35c., oz. 60c., ¼ lb. $1.00.

Ruby King. Fruit of a bright red color, and our stock is very pure. Pkt. 5c., oz. 20c., ½ lb. 60c., lb. $2.00.

Chinese Giant. True stock, very popular, of large size, but not as good a market sort as our Moore’s Mammoth Prizetaker. Pkt. 16c., ½ oz. 35c., oz. 45c., ¼ lb. $1.50, lb. $5.00.

Long Red Cayenne. Small, narrow pointed, hot and pungent. Pkt. 5c., oz. 20c., ½ lb. 60c., lb. $2.00.

Mammoth Golden Queen. They grow from 15 to 20 perfect fruits on a plant, from 8 to 10 inches long and 2½ to 3½ inches through. Color, bright golden yellow, and so mild they can be eaten like tomatoes. Pkt. 10c., oz. 30c., ½ lb. 60c., lb. $3.00.

Bird’s Eye or Creole. No peppers are hotter or more fiery in flavor than these little Bird’s Eye or Creole Peppers, as they are called in the south. Each plant bears hundreds of miniature peppers. Pkt. 10c.

Neapolitan Early. Fruit red when ripe, very early and productive, recently introduced from Italy. Pkt. 10c., oz. 35c., ¼ lb. $1.50, lb. $4.50.
POTATOES

Grown for seed in the far North. 10 to 12 bushels to the acre. 1 peck will plant about 25 hills. Michigan Grown Seed Potatoes.

Our seed potatoes have been carefully grown, especially for seed, on light, sandy loam, entirely free from all disease, in the extreme north of the State of Michigan, and will give the best possible results to all who plant for private use or profit. Prices vary with the market. Special prices given by letter on lots of five barrels and over. We give full legal weight.

...Advantages of Changing Seed Potatoes...

There is no other crop that we raise that is so much benefited by the introduction of fresh seed from time to time as the potato. They seem to take on new life and prosper wonderfully, provided the change is to a well-fashioned seed, and the further north it is grown, the better. Our best customers will not plant their own raising of seed at all, but buy of us every year. They can grow nearly double the crop on the same land that they can from their own raising, and the tubers are smoother, handsomer and of better quality and more salable in the market. A good change of seed always pays. The yield is frequently doubled thereby.

Potatoes by mail. The price of all varieties is 30c. per lb. or 3 lbs. for 75c., correctly labelled, and sent, postpaid, to any address in the United States.

FILLBASKET EXTRA EARLY Originated by crossing our famous Snowball and Quick Crop. The Fillbasket Potato soon proved itself to be a very popular and profitable sort for home use and shipping and has forced its way among our largest planters. Those who grow it for market find it to be twice as profitable as Early Rose, Hebron, Triumph or Early Ohio. It always commands a higher price than other sorts and besides it is an enormous cropper, as our photo illustration shows. It is, as its name would suggest, a remarkably quick grower, of the most approved shape—viz., a very smooth, full tuber, with no split points nor projections to waste in preparing for the table, or waste in handling. Sufficiently elongated to make a good baker, it is not too much so to serve well boiled. It is an ideal general purpose potato. In color, it somewhat resembles the Prince Edward Island Rose. When cooked, the flesh is pure white, dry and flaky. 1/2 lb. 35c., pk. 60c., 1/4 bu. $1.00, bu. $2.00, bbl. $4.50.

NEW EXTRA EARLY POTATO.

The Bovee A GREAT CROPPER.

It takes a leading place among the heavy cropping varieties, an unusual thing among first earlyes... It is even earlier than Early Ohio, and compares favorably with Triumph. True stock. Pk. 65c., bu. $1.75, bbl. $4.00.

QUICK CROP VERY PROFITABLE FOR EARLY MARKET.

It is several days ahead of the Early Rose, and is a special favorite with farmers and marketmen. Maturing early, brings highest prices, and the land can be used for other crops; does well on any soil suitable for potatoes. The tubers grow compact in the hill, are easily dug, very few small ones—nearly every one marketable size; few eyes which are even with the surface. Skin a delicate pink color. They keep firm until late in the spring. Many of our Southern growers plant this variety almost exclusively for early shipment. North. With heavy manuring, close planting and good culture, a very large and profitable yield can be expected; 500 to 600 bushels per acre is not an unusual yield. Pk. 60c., bu. $2.00, bbl. $4.50.

SUTTON'S EARLY MONARCH (New)

Under ordinary cultivation, this variety has by actual test produced 463 bushels per acre.

This new early potato is now attracting wide attention. Its points of excellence, as claimed, are its earliness, wonderful productiveness, vigor of growth, quality, smoothness and handsome shape and appearance. It received its name from its originator, Mr. Sutton, a noted potato hybridizer. It is a pink or flesh colored potato, of the shape indicated by the illustration. The shape is very uniform. It matures from early to second early, and in table quality is white, dry and mealy. It is as perfect in shape as the Snowball, and probably about one week later. The introducer says that the Early Monarch takes a leading place among the heavy cropping varieties, an unusual thing among first earlyes. Our own observations on Early Monarch are favorable, and we do not hesitate to recommend it highly. As a variety for planting for second early or late crop, it is without an equal. The tops are comparatively short and stocky, and the tubers are all bunched together in the hill, and are of good size and quality. 1/2 lb. 35c., pk. 65c., 1/4 bu. $1.10, bu. $2.00, bbl. $4.50.

Moore's EXTRAEARLY FILLBASKET Without A Peer For Earliness AND Productiveness

Showing Habit and Wonderful Growth in Hill

Suitable For All Soils.

NEW VARIETY.

Sutton's Early MONARCH
POTATOES—Continued

M. & S. Early Snowball Potato

THE EARLIEST AND MOST PRODUCTIVE POTATO IN CULTIVATION

THE EARLY SNOWBALL IS FULLY A WEEK IN ADVANCE OF ANY
OTHER KIND IN EARLINESS. HEAVIEST CROPPER.

...THE BEST POTATO FOR SOUTHERN TRUCKERS...

It can always be marketed at least ten days before the top
dies, as the new potatoes commence to grow before the tops are
six inches high. Another great merit lies in its great keeping
properties, remaining solidly fresh until the new crop is dug,
and will often remain in the cellar without sprouting until
June 1st. Hills of "new potatoes" of a fit size for
table use can be dug in six weeks from the time of
planting if weather for growing has been favorable, and tops
thoroughly ripened in from eight to nine weeks, with crop fully
matured. The Snowball was produced from a seed bar
taken from a vine of the Snowflake, growing between Early
Rose and Early Ohio. Tubers are oblong, skin a beautiful pink
color, flesh white; upright, strong vines, with tubers growing
compactly in the hill. We have never tested a kind which
possessed the desirable points of an extra early, large
yielding, high quality potato like the Snowball. Our
grower informed us early last season, when all early crops were
but half grown, that The Snowball had set much more and
that tubers were double the size of any extra early
varieties he had planted, and adds, "we should save seed for a
larger planting next year." ½ pk. 40c., pk. 65c., ½ bu.
$1.10, bu. $2.00, bbl. $5.00, 2 bbls. $9.60, 5 bbls.
$23.00.

New White Rose

A valuable new variety and one many thorough治好 of it
show it has come to stay. This new potato is no experiment;
we have watched it for five seasons, and pronounce it the best
long white potato we ever saw. It has never shown the first
sign of blight, and in point of yield is ahead of all other long
white sorts. This potato is a cross between the Early Rose
and White Star, and is medium early, and a strong grower.
Vines are rank, rich dark green in color, and absolutely blight proof.
It seems also to be proof against the potato beetle as well. There are
no poor or slim hills with the White Rose, all hills yielding
about the same throughout the whole field. In cooking qualities it is
second to none. When cooked it resembles Early Rose and is
equally good. It is the most productive of the long white var-
ieties, and will yield 300 to 400 bushels per acre on any good
land. Its unusually fine appearance enables it to command
"fancy" prices in all markets.

Potato growers who neglect to secure some of these for seed
will make a mistake.

½ pk. 35c., pk. 60c., bu. $2.00, bbl. $4.50.

Lily White

THE GREAT FAMILY POTATO

Is the result of a cross between the Early Rose and White Star. It possesses table qualities
of the highest order. In ripening, it ranks
with the medium and late varieties. Its table
quality is of high excellence, cooking
"mealy," and of fine flavor even when not ma-
tured. In appearance, smooth and shallow-
eyed, bright and shapely, and sells for
highest prices on the market; of thrifty growth,
and the tubers grow compactly in the hills, mak-
ing digging easy. Very heavy yielder. Potatoes
uniform, hardly any second-size ones. It keeps
until June in our cellars without sprouting. We have tried to find a
fault in this potato, but can unhesitatingly call it near perfection. ½ pk. 35c., pk. 60c., bu.
$2.00, bbl. $4.50.

Humphrey's Concave Potato Knife...

Reinforcement of seed and proper size and
shape of cut pieces are subserved by the
use of this knife in preparing potatoes
for planting. Will cut to expose more
eyes without injuring the vital tissues.
Practical planters state that beside the
quantity of seed saved there is a gain
in the product from a given weight of
seed cut by this method.

Price each, 20c.,
postpaid.
New Early Harvest Potato

This exceedingly promising new potato was sent out for trial to some of our customers, under the name No. 17. The reports received were very flattering. The name, Early Harvest, is bestowed in honor of its originator, Clyde Somerset, a leading potato specialist of New York. It is handsome, medium early, highly prolific and very desirable in every respect. In character, Early Harvest potato has the same parentage as Empire State. It is somewhat on the order of the Beauty of Etobicoke, but is the same shape as the Quick Crop. Some of the blood of the M. & S. Early Snowball flows in its veins. In a word, it is high bred all over. The eyes and sprouts indicate vigor and youthful strength, and the table quality is superb; last, and most important, it is a heavy cropper. Mr. M. W. Parsons, an experienced potato grower of Delaware Co., Pennsylvania, who has grown the Early Harvest for several years, says: "It has, in fact, for several years outyielded all old standard and new varieties." He, moreover, testifies that the tubers are free from both blight and rot, owing to the vigorous growth. The vines are brimming with fresh vitality, and we recommend Early Harvest as a money maker. From our personal experience we highly endorse it for light sandy land and sandy loams along river bottoms.

½ pk. 35¢, pk. 75¢, bu. $2.00, bbl. $4.50.

New Morning Star

This handsome new variety is the finest in quality of all the long shaped early potatoes as well as the very earliest variety combining large size. We have tested it several years and find it earlier than the Houlton or P. K. Island Rose, fully as large, and vastly more productive. The color is a very light pink. Its exceedingly fine table and cooking qualities make it a great favorite with all, housekeeper and grower as well. We have several records of yields exceeding 50 bushels per acre. The tops die down quickly after maturity, which allows the ground to be prepared early for a second crop; consequently of great value to market gardeners. We know all our customers who plant it will be well pleased with it. Another valuable feature is, it is adapted to all kinds of land. Please order early. Pkt. 75¢, ½ bu. $1.10, bu. $2.00, bbl. of 155 lbs. $4.50. Special prices for large quantities will be quoted by letter.

NEW POTATO
"Noroton Beauty"

This new potato is claimed by the originator to be the earliest potato ever grown, that it is a descendant of the famous Peachblow, yielding as heavily as any of the medium early sorts, handsome in appearance, and uniform in size and shape. It is highly productive, quality superb, and it keeps longer than any other sort, early or late. Our supply is direct from headquarters. Lb. 35¢, 3 lbs. $1.00, postpaid; ½ pk. 60¢, pk. $1.00, bu. $3.50, bbl. $7.50.

New Northern Star

For main crop. This grand variety origin- nated near Van Buren, Aroostook County, Maine. So eager were potato growers to obtain seed of it that they paid $5.00 per barrel for it, and considered it cheap at that. The vines are strong with exceptionally deep green foliage, making a robust healthy growth, where other sorts are cut down by blight. It has proved unequalled for main crop, and for a fall or winter crop it will bring a higher price than any other sort. It is the quickest and finest cooking late potato we ever tested as well as the most delicious in flavor. Fresh finely grated, and of a pearly whiteness, and cooks dry and floury. Even when freshly dug it cooks dry and mealy. It has produced at the rate of 800 bushels per acre, which makes it a very profitable variety for the planter. All who have seen it pronounced it the handsomest and best of all the main or late crop varieties. It will pay every potato grower to plant or or more barrels of this magnificent variety so that they can send seed to their neighbors at top notch prices. As a keeper we have had it in perfect condition as late as August 28th. Don't fail to include it in your order. Our word for it, the more the better for you and your bank account. Pkt. 75¢, ½ bu. $1.25, bu. $4.25, bbl. $14.75.
NEW JERSEY SEED SWEET POTATOES

New Jersey grown Sweet Potatoes are everywhere acknowledged to be the best in quality, being much dryer and sweeter than those grown in the South and West, while their keeping and shipping qualities are away ahead, and will always bring the highest market price. We grow them on our stock exclusively in New Jersey about eight miles from our Philadelphia warehouse, where we have unequaled facilities for handling and shipping. We take every care that can be taken to make the best possible potatoes, and as they are very susceptible to climatic changes, we cannot hold ourselves responsible for their condition after long journeys of several hundred miles, and wish it distinctly understood that customers take ALL RISKS after delivery in good condition to the express or railroad company here. We do not ship until about planting time unless specially ordered to do so. Our barrels contain three bushels—good measure.

IMPROVED VINELAND BUSH SWEET POTATO

The Improved Vineland Bush Sweet Potato is bound to revolutionize sweet potato culture. It is shorter and more chunky in shape than the old variety. It originated on the farm of John Maytrott, the extensive sweet potato grower of New Jersey, from the well-known Early Shanemo and old Vineland Sweet Potato. It is a perfect bush, with no inclination for spinning, resembling a bean bush very closely. The tubers grow directly under the stalk. They are very abundant, best bearers, good flavor, handsome rich yellow color and excellent keepers. Customers who have tried them say: "They are simply perfect and a great improvement over all other vineless potatoes heretofore sold."

Prices: Per lb. 40c., 3 lbs. $1.00, by mail, postage paid; pk. $1.40, bu. $4.50, by express.

Plants of the Improved Vineland Bush Sweet Potato ready after May 1st; 50 for 60c., 100 for $1.00, by mail, postage paid, 75c. per 100, $1.50 per 1000, by express. (300 plants at 1000 rates.)

EXTRA EARLY CAROLINA, JERSEY "UP-RIVERS," EARLY NANSEMOND and NEW EXTRA EARLY ACCOMAC. The justly celebrated Philadelphia sweet potatoes, universally grown for market. Each, per pk. 80c., bu. $3.50, bbl. $4.50.

Plants of the above ready May 1st; 100, by mail, postpaid; express, 40c. per 100, $2.50 per 1000.

NEW GOLDEN SWEET. It is better adapted for cultivation in the Northern States than any other variety, and is especially popular for early sales. Price: per pk. $1.00, bu. $3.75, bbl. $5.50. Price of plants, ready May 1st, $1.00 per 100, by mail, postpaid; 75c. per 100, $4.00 per 1000, by express.

We will make special prices by letter for larger quantities—write us before you buy. We are headquarters.

HYBRIDIZED POTATO SEED

We offer a very fine strain of Potato Seed, the product of numerous hybridizations between many of the best new and old varieties in cultivation, to which we have added the best selections from prominent English, French and German potato growers. All notable new varieties are obtained from hybridized seed. We frequently purchase at good prices promising seedlings grown from seed purchased from us. Price, postpaid, pkt. 15c., 4 pkts. 30c. Full directions for planting, cultivation, etc., on each packet.

PATENT PLANT BED-PROTECTING CLOTH

This will be found an excellent substitute for glass in protecting and forwarding all kinds of seeds and plants for which glass ashes are used in early spring. The patent treatment given the cloth fills the threads and fibres and preserves them moisture, and also renders it tougher, heavier and stronger, and prevents it from shrinking after getting wet, and, to some extent, sheds rain. It is of great value to market gardeners and florists who grow either hardy or greenhouse plants. We have supplied it to our customers in all sections of the country, and with hardly an exception have had grateful reports from its use. We have found it an excellent substitute for glass in protecting and forwarding all kinds of seeds and plants for which glass ashes are used in early spring, etc. It is safer in fact than glass, as it protects at night, while the temperature is not raised too high by day, as is the case with glass, unless great care is given in venting. All our grades are of extra quality, and with proper care it will last for a number of seasons. We furnish this cloth in one-yard widths as follows: by mail add 5c. per yd.

LIGHT GRADE. Per yd. 45c., by the piece of 70 yds., 35c. per yd.

MEDIUM GRADE. The best for general purposes, per yd. 65c., by the piece of 60 yds., 55c. per yd.

EXTRA HEAVY GRADE. Per yd. 100c., by the piece of 40 yds., 90c. per yd.

WHAT YOUR NEIGHBORS SAY AND DO

NO LIMIT

G. F. SMITH, Lee County, Fla., writes: "It affords me much pleasure to write a line of praise of your tomatoes. I picked a six pack from each plant of your Moore's King of the Earlies and had many left; there seemed to be no limit to their yield. They made more and better fruit than any other variety. I give it my pleasure to readily write the above this year."

MUCH PLEASED

MRS. GEO. PANKHURST, Pasco County, N. J., writes: "We have been very much pleased with your seed, and send you our order again this year.

SIX WEEKS BEFORE OUR NEIGHBORS

Millesgrove, Pa.

Estesmend Sirs:—"I write to say that your Moore's Early Goldfinder and Cabbage Early King of the Earlies were the best tomatoes I ever raised, we had tomatoes six weeks before our neighbors to whom we sold some, as well as on market. We had the largest and best crop we ever raised, having lots of greens and tomatoes were at their best came on."

Yours respectfully,

A. USKEL.

ARE YOU SURE?

Manatee County, Fla.

Dear Sirs:—"I am the fifth of the season, saying that you had sent me five pounds of Duke of York tomato seed. Were they Moore & Simon's best seed? Their seed are the only seed we can get that will well in our soil."

Yours truly,

M. O. HARRISON.

NO SIGN OF BLIGHT

Harold Clarison, Lee County, Fla., writes:—"I planted four pounds of your Moore's New Duke of York last season with fine results. No sign of blight even on hand in which former seasons every plant succumbed to blight."

HAD BIG SUCCESS

Isaac C. Myers, Toledo, O., writes:—"I planted four ounces of your Big Victor Tomato last season, the crop was the finest ever, the fruit was twice the size of Earlish, one-third more productive, and brought fifty per cent better prices. My crop was a wonder to all who saw it."

AS FINE AS IT COULD BE

"I planted your Duke of York and Moore's New Wonderful last season, and found them to be as fine as could be."

Yours truly,

R. T. White, Gillette.

PERFECTLY SATISFIED

"I am perfectly satisfied with the seeds you sent me, and herewith enclose you an order for two more pounds of your Early Cabbage Head Lettuce."

L. E. NIXON, Wilmington.

BEST CROPS

"The seed I bought from you gave me the best crops I ever grew, I recommend your seeds to all my neighbors."

R. C. POTTER, Cameron, O.

ASTONISHING

"I grew your Moore's King of the Early Tomatoes last year, and my success was astonishing."

J. H. HAMILTON, Maryland.

FINES WE EVER HAD

"The California Mammoth Solid Golden Self-Blanching Celery we had from you last season was the finest we ever had."

HOODENHORN & SON, Indians.
PUMPKIN.

German, Kurbitz—French, Courge—Spanish, Calabaza.

The country.

1 oz. for 50 to 500 hills. 1 lb. for 200 to 500 hills.

LARGE CHEESE. Of fine grain and excellent flavor. Pkt. 5c., ½ lb. 20c., 1 lb. 60c.

TENNESSEE SWEET POTATO. Of medium size, pear-shaped, color, creamy white, slightly striped with green; flesh, thick, creamy white, fine-grained, dry, brittle, and of excellent flavor. When cooked it has the appearance of sweet potatoes, but of more delicate taste. Pkt. 5c., ½ oz. 20c., 1 lb. 25c., 1 lb. 80c.

CASHAW. Long, yellow crookneck. Oz. 5c., ½ lb. 20c., 1 lb. 60c.

NEW JERSEY SWEET POTATO. Flesh a rich yellow color, solid, finely-grained, very thick, sweet and excellent for pies and baking. Very hardy and productive. Extra good keeper. Bugs seldom bother it. Pkt. 5c., ½ oz. 20c., 1 lb. 25c., 1 lb. 75c.

GENUINE MAMMOTH, or TRUE POTIRON (also called KING OF THE MAMMOTH). It grows to an enormous size, three feet or more in diameter, and one hundred to two hundred pounds or more in weight. Pkt. 5c., oz. 20c., ½ lb. 20c., 1 lb. 80c.

JAPANESE PIE PUMPKIN. The seed cavity is extremely small. The seeds are curiously sculptured in the manner of Chinese letters. It is a very productive variety, ripens early, of medium size, goodekeepers and weigh fifteen to twenty pounds each. The flesh is a rich, salmon color, unusually fine-grained and when cooked or stewed almost as dry and mealy as a sweet potato. Pkt. 5c., oz. 20c., ½ lb. 25c., 1 lb. 75c.

MAMMOTH GOLDEN CASHAW (new). The flesh is a rich yellow color, solid, fine-grained, very thick, sweet and excellent for pies, and entirely good for baking. They are very hardy; bugs seldom bother them; can be grown among the corn, and yield a much heavier crop than most other sorts. Pkt. 5c., oz. 20c., ½ lb. 25c., 1 lb. 75c.

LARGE COMMON YELLOW FIELD. Easily grown alone or in the corn. Oz. 5c., ½ lb. 20c., 1 lb. 25c., 1 lb. 80c.

NEW GOLDEN SUGAR. One of the best yellow pie pumpkins. They are round in shape, and very slightly ribbed; the skin is of a rich golden-orange color; very beautiful; flesh of extra fine flavor; cool, soft and tender. It is a splendid keeper. Pkt. 5c., oz. 20c., ½ lb. 25c., 1 lb. 75c.

MAMMOTH ETAMPS BRIGHT RED. This giant has recently, also from France, is quite celebrated and has been grown in this country to an enormous size; it is of a bright, glossy red color; a splendid variety to grow for exhibition purposes. Pkt. 5c., oz. 20c., ½ lb. 20c., 1 lb. 60c.

YANKEE COW PUMPKIN. This valuable pumpkin will be found a great boon to farmers with dairies, large or small. It greatly increases the flow of milk, besides imparting to it a rich yellow color and really adds to the flavor and color of the butter of all cows fed upon it. Twelve tons to the acre is not unusual yield. If land be manured liberally a full crop can be grown among corn. It is a most excellent keeper and will be sure wealth to all who grow and feed it liberally. Oz. 10c., ½ lb. 20c., 1 lb. 25c., 5 lbs. 1.50.

THANKSGIVING PUMPKIN. On account of the extra thickness the yield in pounds is double that of other kinds. The flesh is orange in color, fine-grained, sweet and has the delicious pumpkin flavor essential to the making of first-class pumpkin pies. The name "Thanksgiving" was suggested by the almost universal custom of having pumpkin pie at the Thanksgiving dinner. Pkt. 5c., oz. 20c., ½ lb. 25c., 1 lb. 75c.
The seed of this new variety was originally sent to us by Mr. M. S. New Red Strawberry Radish. It gives us great pleasure to introduce this unusually delicate red radish to our many thousands of customers. Its beautiful glowing crimson color, size, and shape cause it to bear a striking resemblance to certain varieties of strawberries, hence its name. It is unquestionably the handsomest small red radish ever produced. The flesh is pearly white which forming a strikingly beautiful contrast with the glowing crimson color of its skin and beautiful delicate green color of its small, short leaves. It is the earliest, handsomest, finest, juiciest, tenderest, sweetest and best small radish ever grown. It is equally valuable for market gardeners or home use, for forcing under glass or for outdoor culture under proper conditions it can be planted any month in the year. Pkt. 5c., oz. 10c., $1 lb. 25c., lb. 50c.

M. & S. NEW RED STRAWBERRY RADISH

We have never been able to offer to our patrons an early white radish which possesses in a marked degree as many desirable qualities as this, for growing in the greenhouse, hot bed, cold frame or early border. The color is pearly white, symmetrical shape, remarkably short top, very solid and rapid growth. It is the ideal white radish for all the above purposes. It possesses very little pungency, is remarkably sweet, tender and juicy. This is the best white radish ever produced, and it is the only white radish that can be successfully grown under glass where heat is used. It is an extremely small top allows it to be grown closer together than any other white variety. As a market variety its beautiful shape and pearly white color cause it to out sell all other white sorts. Pkt. 5c., oz. 10c., $1 lb. 25c., lb. 50c.

M. & S. NEW PINK LADY FINGER

This strikingly beautiful variety is from California, where it is known as the "Cherry Radish." It is an excellent soil so fine that our delicious cherry radish and cannot fail to desired for all who are so fortunate to plant it, and we hope every one of our customers will. This delicious radish is excellent for all purposes on account of its earthiness, crispness and great beauty. It makes a fine garnish for any table. It sells readily and quickly at good prices in any market and makes an extra fine sort for the home garden. Pkt. 5c., oz. 10c., $1 lb. 25c., lb. 50c.

M. & S. NEW CALIFORNIA CHERRY RADISH

The world’s best radishes are to be had only from Moore & Simon, Seed Growers.

THE BEST GROWN

Mr. E. D. V. Burr, Arch Creek, Fla., writes:—I consider your Duke of York the finest tomato grown. MUCH PLEASED

Mr. Geo. W. Smith, Ambler, writes:—I am much pleased with the way you have attended to my order. Your seeds are the best I ever purchased.
### White Swan's Egg Radish

This is a wonderfully good sort for late summer and autumn use, and it gives us pleasure to recommend it to all our customers. Seed should not be sown before July 1st in this latitude. It resembles the China Rose in size and shape, and is the sweetest of all radishes. We, however, especially recommend it as the best of all winter radishes! from seed sown early in August. Instead of being woody, as are so many winter radishes, the skin and flesh are both snow-white, crisp, brittle and of best quality. Our illustration faithfully shows its shape, and all who plant it will be delighted if buried in places like apples or potatoes it will keep in perfect condition until spring.

**NEW WHITE ICICLE**

The flavor of this new variety is very mild, and it is especially valuable for slicing. The top is quite short, flesh very crisp, tender, juicy and very attractive when bushed. It matures in about thirty-seven days from the time of sowing the seed and remains in prime condition for eating for fully two weeks. For the cottage, garden or market purposes we consider it a great addition.

**R.O. Ketchum's Early Frame**

This new sort is a cross between Wood's Early Frame and our Improved White Strasburg. A most distinguishing characteristic is its rich, waxy appearance. The shape is one long sought for, and the most advantageous for bunching, being what might be called half stump rooted. The color is pearl white, with the waxy appearance above described, and the texture is very firm and solid. It is about one week later than Simon's Solid Ivory, but after they are ready for marketing they remain in marketable condition fully two weeks before they show signs of going to seed, and do not become woody. Top short, flesh mild and crisp.

**Improved New White Strasburg**

Our stock of this excellent summer sort is better than ever before. Our seed of our own growing. The skin and flesh are of an almost transparent white, very tender and a delightfully pungent taste. Remains in a tender condition unusually long. Can be pulled in thirty-five days from the time of sowing. The top being small, it can be grown very close, making it very productive and profitable.

**White Strasburg**

Imported seed, not as good quality as the above. Pkt. 5c., oz. 10c., lb. 20c., $1.00.

**Philadelphia White Box**

White Vienna. Sold by some seedsmen (?) under the name of Lady Finger. Pkt. 5c., oz. 10c., lb. 20c.

**Red Strasburg**

Handsome deep crimson color, blending off to almost white at the bottom. Valuable market variety. Pkt. 5c., oz. 10c., lb. 20c.

**Philadelphia Gardeners' Long Scarlet Short Top**

Our own variety. Very good for seed, cut and market. Pkt. 5c., oz. 10c., lb. 20c.

**New Scarlet Olive**

A very early red sort; good market variety; selected seed. Pkt. 5c., oz. 10c., lb. 20c.

**Philadelphia Gardeners' Long Scarlet Short Top**

Our own variety. Very good for seed, cut and market. Pkt. 5c., oz. 10c., lb. 20c.

**New Scarlet Olive**

A very early red sort; good market variety; selected seed. Pkt. 5c., oz. 10c., lb. 20c.

**Oliveshaped Golden Yellow**

Perfect for market. Seedsmen will supply this variety.

**Early French Breakfast**

Our own variety. Very good for market.

**Early Scarlet Turnip**

Our own variety. Very good for market.

**Yellow May Duke**

A valuable, quick-growing short-top, oval-shaped variety, from England. Highly prized by all who plant it. Pkt. 5c., oz. 10c., lb. 20c.

**Moore's Scarlet Gem Radish**

Very crisp, tender, juicy and very attractive when bushed. It matures in about thirty-seven days from the time of sowing the seed and remains in prime condition for eating for fully two weeks. For the cottage, garden or market purposes we consider it a great addition.

**White English Summer**

A very desirable radish for summer use, remaining solid and crisp after spring sorts are over. Top of medium length. Much used in England. Very crisp and sweet.

Our Seed is Grown from Transplanted Roots only, which Insures the Greatest Possible Perfection. Our Seed will therefore give much better Satisfaction than that obtained elsewhere.

**Cincinnati Market**

This sort is largely planted by market gardeners around Cincinnati, Ohio. Roots 5 to 6 ins. in length, color bright red, top small, good for sash or open ground. Pkt. 5c., oz. 10c., lb. 20c., 5 lbs. $1.00.

**Parishan Black Spanish**

Excellent variety, good keeper, very black skin, pure white flesh. Pkt. 5c., oz. 10c., lb. 20c., 5 lbs. $1.00.

**Cardinal Globe**

Very pure stock. Pkt. 5c., oz. 10c., lb. 20c., 5 lbs. 75c.

**Perfection China Rose Winter**

We have a very much improved strain of this important variety of our own growing. Shape perfect; color a beautiful, brilliant, rosy carmine flesh white. Selected seed. Pkt. 5c., oz. 10c., lb. 20c., 5 lbs. $1.00.

**Long Black Spanish**

Good keeper, fine dark color. Pkt. 5c., oz. 10c., lb. 20c., 5 lbs. 75c.

**Perfection China Rose**

A very desirable radish for summer use, remaining solid and crisp after spring sorts are over. Top of medium length. Much used in England. Very crisp and sweet.

All our Seed is Grown from Transplanted Roots only, which Insures the Greatest Possible Perfection. Our Seed will therefore give much better Satisfaction than that obtained elsewhere.

**White English Summer**

A very desirable radish for summer use, remaining solid and crisp after spring sorts are over. Top of medium length. Much used in England. Very crisp and sweet.

All our Seed is Grown from Transplanted Roots only, which Insures the Greatest Possible Perfection. Our Seed will therefore give much better Satisfaction than that obtained elsewhere.
SALSIFY, or VEGETABLE OYSTER PLANT
German, Buchbarte. French, Salisfie. Spanish, Ostra Vegetal.
One ounce will sow 25 feet of drill; 6 to 10 lbs. per acre. Salsify is one of the most delicious and nutritious of vegetables, and should be more extensively grown in Winter, when the supply of really good vegetables is limited. It has a gristy top, and a long, white, tapering root, nearly resembling a slim parsnip. It is an assimilator of the taste and flavor of the oyster when properly cooked, and is a good substitute for it; very wholesome and nutritious. The roots are either boiled or mashed and made into delicious fritters, or half boiled and grated fine, made into balls, dipped into batter and fried like oysters; it is a very good substitute for the shell fish itself.

MOORE'S GIANT WHITE RUSSIAN SALSIFY. This is the largest, smoothest and most profitable in cultivation. Roots pure white in color, three times larger than the ordinary salsify, of very superior quality and fine flavor, flesh very fine grained, tender and of more pronounced and agreeable oyster-like flavor. Invaluable to market gardeners. The tops remain in good condition until late in the following Spring. The seed should not be sown so early as other varieties. This first-class variety was sent to us by the Russian Consul at St. Petersburg, Russia, where it is grown to the exclusion of all other sorts. Pkt. 10c., oz. 15c., lb. 45c., lb. $1.35.

LONG WHITE. Not at all the above. Pkt. 5c., oz. 10c., lb. 50c., lb. 50c.

SORREL
Of the earliest growth, Sorrel is cultivated for its leaves, which possess a very fine flavor both raw and cooked like spinach. It also makes delicious soup according to directions given in Mrs. Rorer's book, "How to Cook Vegetables." For that purpose it is sown in early Spring or at the close of December. Covered 1/2 inch deep. It will grow through the Winter, but if allowed to go to seed will not come up in the Spring unless the seed is first sown in pots inside of the greenhouse in late Winter. The flowers should be cut off as soon as they appear. One ounce of the seeds will yield many pounds of the vegetable. It is a very delicate and nourishing food, and is grown for that purpose in France and Germany.

SPINACH
One ounce for 100 feet of drill; 10 to 30 lbs. in drills for an acre, according to method of culture.

NEW AMERICAN PROMIC LONG STANDING. The most abundant cropper; the longest keeper; the finest quality; double the yield of all other long standing sorts; the best Spinach in the world today for the market or market-garden. A new variety, distinguished for its exceedingly fine, smooth, long, dark green, thick, tender leaves, of robust growth, and for its remarkably long standing qualities, being from two to five months longer than all other long standing sorts. The seed is inclined to be pricky. In our trials of Spinach last Spring it outyielded every other variety and at the same time stood longer before going to seed. It is very hardy and will withstand the severest Winter of gradual cold and is adapted to sow any time in the year. In the account it is said of it that it "is a true Spinach," and that "its yield is so much larger than any other Spinach, that it is an. enormous yield," the ground for which is very well made. Pkt. 5c., oz. 15c., lb. 40c., 5 lbs. 2.00, 10 lbs. 5.00.

AMERICAN ROUND SEEDED SAVOY, or BLOOMSBURG. True stock. Oz. 5c., lb. 25c., 1 lb. 50c., 10 lbs. $1.00.

NEW GIANT THICK-LEAVED NORFOLK SAVOY, or HARDY WINTER. The best for Fall sowing as well as early Spring; of a handsome dark-green color, producing more tender, thick-leaved plants than any other. Will yield double the bulk, and remain firm and bright longer than any other. The best and most profitable curved variety to grow. Oz. 5c., lb. 25c., 1 lb. 50c., 10 lbs. $1.00.

BELGIUM EVERGREEN, or VIENNA LONG STANDING. Leaves very thick, tender, dark-green, and well curled: the leaf resembles our well-known Norfolk Savoy. We will stand longer and yield double the quantity of the Eckhard's or Prickled-seed long standing sorts. Pkt. 5c., oz. 10c., lb. 40c., 1 lb. 50c., 10 lbs. 5.00.

VICTORIA LONG STANDING. English grown. Oz. 5c., oz. 10c., lb. 50c., 10 lbs. 5.00.

NEW ZEALAND SPINACH. Yields an abundance of the tenderest Spinach during the hottest months of the year, or in dry, arid localities where the ordinary Spinach runs to seed. The seed is sown where the plants are to be grown. In May or earlier in a hot-bed and transplanted, and the plants will continue to yield a supply of good quality, excellent quality during the entire summer, requiring but little attention. Genuine imported seed only. Pkt. 5c., oz. 10c., lb. 50c., 1 lb. 1.00.

PARIS MARKET, or PERPETUAL SPINACH. A most excellent variety for early Spring, Summer or Autumn sowing; very tender and productive: excellent for private gardens, does not run to seed, and very hardy. Pkt. 5c., oz. 10c., lb. 50c., 1 lb. 5.00.

Rhubarb, or PIE PLANT
German, Rhubarber. French, Rhubarbe. Spanish, Ruberbe Basterde.
One ounce will produce about 500 plants.

Where Rhubarb is planted for market purposes we advise the planting of roots and not seed, as this causes our customers against buying roots known as 'seedlings.'

M. & S. GIANT EXTRA EARLY PARAGON. We introduce this remarkable novelty in the confidence that eventually it will supersede all other varieties for forcing, and that it will supplant all other sorts in open ground culture. In growth it resembles the Victoria and is quite as large and productive as that well-known variety, but the Rhubarb is a more upright habit, and has already become an open ground favorite, and is now in the process of introduction. Another and still more important merit is the beautiful color—a rich, bright red, and this characteristic is retained remains after cooking, even when the roots have been forced in absolute darkness. The stalks are large and exceedingly tender, and have a delicious flavor. Attention is called to the fact that this variety possesses a much greater hardiness than any other, and its cultivation to the extent of the produce of a market gardener. Just as desirable for the family gardener as for the market gardener, and at a much lower price than the best varieties. Prices of the customers took $1.50 per one ounce from one acre of this sort. Extra strong roots 5c., for 5c., oz. 10c., lb. 50c., 1 lb. 1.00.

Large roots of three above sorts, each 10c., oz. 25c., lb. 50c., 1 lb. 1.00.

Red Strawberry. Early red. Pkt. 5c., oz. 10c., lb. 50c., 1 lb. 1.00.

VICTORIA (Large Green) and LIMONNET. Pkt. 5c., oz. 10c., lb. 50c., 1 lb. 1.00.

Mixed, Large-Fruited Hybridized Strawberry Seed.

We herewith offer a remarkable opportunity to our customers to procure the best new and novel varieties of the best American and European varieties of Strawberries. Our mixture includes all the best, large-fruited, white, red and purplewavering, also the finest early and late fruiting sorts of the highest merit, which will insure the planter the most satisfactory results possible. Many valuable new varieties will result from planting our hybridized seed. From seed sown in April or May, we have in the following year picked large quantities of delicious fruits. No customer with a garden or farm should miss this fine opportunity for obtaining valuable new varieties of Strawberries. Pkt. 10c., oz. 25c., 1 lb. 1.00.
SQUASH

Dow's Extra Early Pattypan.

THE STRICKLER'S GREEN SUMMER CROOK NECK. This new variety of Summer Crock Neck grows twice as large as the common sort. They have a dark green skin, slightly striped with lighter shades of green and yellow, are very productive and of the finest quality. As a squash for frying they are unequalled, being superior in flavor to eggplant. Delicious when made into fritters. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. $1.00.

CHICAGO WARTED HUBBARD. This seems to be, by all odds, the best strain of Hubbard Squash we have ever grown, of large size, dark green, almost black color. A good keeper. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. $1.00.

PIE SQUASH. The skin is similar to that of the golden russet apple. The flesh is yellow and very thick, making them appear almost solid. It is early, surprisingly productive. All in all, we call it the grandest thing out for pies. A ready seller on market. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.

IMPROVED CUSHAW. It is very beautiful, being a distinct mottled green and white striped. The flesh is yellow, solid, fine grained, very sweet, and excellent for pies or baking. Can be grown among corn, same as pumpkins, and yield a good crop. This variety sells well and should be in the hands of every market gardener. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.

SWEET CROOKNECK SQUASH. Delicate. Early and very prolific. Ground color orange-yellow, splashed and speckled with very dark green. Although small in size, they are very solid and heavy, while the quality is rich and dry. An excellent "all season" squash. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.

DUNLAP'S EARLY PROLIFIC GOLDEN MARROW. This new Marrow Squash is certainly a valuable acquisition; for, while it is remarkably productive, it can be harvested a couple of weeks ahead of the Boston Marrow, and for this reason can be planted a week later than any other variety of marrow. Its color is most attractive, a brilliant orange-red. A good keeper. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.

FRENCH COCOANUT. For both summer and winter use. The most delicious flavored squash grown, dry, sweet, rich and wonderfully solid and productive and the best keeper of all. Will keep matured and taken off the vine before frost. Nolan no uncommon thing for them to keep one year in good condition. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.

GREEN SUMMER CROOKNECK SQUASH. The most productive Marrows in cultivation. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c.

SUTTON'S LONG WHITE VEGETABLE MARROW. The most productive Marrows in cultivation. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c.

MAMMOTH CHILI SQUASH. Specimens weighing 250 pounds have been grown. The flesh is very thick and of very rich quality; it is good and very nutritious. They are most profitable to grow for stock feeding. They keep well throughout the winter. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c.

CHINESE. Beautiful yellow flesh, dry, rich, sweet flavor, even without the use of sugar. Bush variety. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 60c.

THE WARREN. It has an extremely hard, flint shell and is an excellent keeper. The flesh is of a beautiful, bright golden yellow. Pkt. 5c., oz. 10c., 1/2 lb. 25c., lb. 75c.

The Warron.

Improved Cushaw Squash.

Mammoth Chili Squash.

French Cocoanut.

Autumn AND Delicata WINTER VEGETABLE.

Dunlap's Early Freilife Golden Marrow

Bush sorts, 1 oz. for 50 hills. Bush varieties, 5 to 6 lbs., and running varieties, 3 to 4 lbs., in hills for an acre. German, Kurkis—French, Courge—Spanish, Calabaza Tomatana. It is useless to sow until the soil has become settled and warm. Light, rich soils are best suited to their growth, and it is most economical of the seeds in the ordinary manner by incorporating two or three showyhead of well-sorted manure with the soil for each hill, as is done for Melons. For bush varieties, from three to four feet each way, and for the running sorts, from eight to ten feet. Eight or ten seeds should be sown in each hill, thinning out after they have attained their third and fourth leaves, leaving three or four of the strongest plants.
TOMATO

GERMAN, LIEBESAPFEL
FRENCH, TOMATE
SPANISH, TOMATE

1 OZ. FOR 1,500 PLANTS
QUARTER POUND (TO TRANSPLANT) FOR AN ACRE

Culture. This seed should be sown early in March in a hotbed, greenhouse, or inside the window or sitting room, where a night temperature of not less than sixty degrees is kept, in drills five inches apart and half an inch deep. When the plants are about two inches high they should be set out three inches apart in boxes three inches deep or potted into three inch pots, allowing a single plant to a pot. They are sometimes shifted a second time into larger pots, by which process the plants are rendered more sturdy and branching. About the middle of May, in this latitude, the plants may be set in the open ground. They are planted for early crops on light, sandy soil at a distance of three feet apart, in hills in which a good showy foot of rotted manure has been mixed. On heavy soils which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun a few days until the plants are established. Tomatoes will always produce greater crops and be of better flavor when staked up, or when trained against walls or fences.

All our Specialty Tomato Seed is grown, selected and saved exclusively from the best specimen for seed, and is of the highest quality. MARKET GARDENERS and CANNERS will find our SELECTED TOMATO SEED RELIABLE in every respect.

Remember, the Main Thing in Making a Good Crop of Tomatoes is to Get Your Seed From Us. BUY THE BEST

THE MOST VALUABLE
Extra Early
TOMATO
EVER INTRODUCED

Moore's KING of the EARLIES
Showing Shape and Size

We have here the grandest Large Extra Early Smooth Tomato of the age for Market Gardeners, Private Gardeners and Shippers, no matter whether you plant one dozen or one million plants for your first picking. It is just the large Extra Early Tomato thousands have been looking for. It is just the tomato you need. It is the tomato above all other extra early tomatoes. It is an enormous yielder. The plant is a perfect mass of large, beautiful red fruit. It is the ideal "stem setter," and as there is a remarkable absence of leaves the fruit ripens early and almost "all at once." The tomato that will bring you wealth and fame.

Each and every vine is a perfect mass of large size fruit, as our illustration shows. It is a very compact grower and consequently can be planted one-third closer than any other early sort. If you grow early tomatoes don't miss planting it. It will be both pleasure and PROFIT to you. It is the earliest large, smooth tomato ever introduced. Pkt. 10c., 3 for 25c., 1/2 oz. 50c., 1 oz. $1.25, 1 1/2 lb. $2.25, 5 lb. $8.00.

WHAT THE PLANTERS OF MOORE'S KING OF THE EARLIES TOMATOES SAY:

I had beautiful ripe Tomatoes June 6th from your Moore's King of the Early—John Dohle, Gardener to Jan. L. Cummings, Bryn Mawr.

I took $215.75 from the ounce of your Moore's King of the Early, purchased from you last year. My first 24 baskets sold for $2.60 per basket—William Coulter, Janvriet, N. J.

My Moore's King of the Early Tomatoes were ripe and all sold before my neighbors began to pick. I realized from $1.75 to $2.50 per basket. My neighbors, who had western seed, only got 65 cents to $1.10.—Zanford Jones, Moorestown, N. J.

WE OFFER YOU
A CHANCE TO
COIN MONEY

A Most Remarkably Large, Smooth Extra Early
NEW TOMATO

Is Positively the Largest, Smooth Early Tomato in the World.

It is almost like Finding Money to grow Moore's King of the Early Tomato for market. They pick earlier and outyield any other sort grown in Burlington County. Ripe tomatoes May 31st, and almost a basket to a hill, is my record.—Samuel Banson, Burlington, N. J.

My Moore's King Tomato sold for 50c. per basket more than my neighbors' Earlyannas, and they outyield any sort ever grown here.—Samuel Sweeten, Woodbury, N. J.

Your New Early King Tomato is a Wonder—had beautiful ripe ones June 1st. All gardeners should grow them.—Michael J. Norris, Gardener to Miss M. M. Nixon, Germanown.
A Wonderful New Tomato

MOORE'S Big Victor
EXTRA EARLY

“There's Big Money In It.” Worth Many Millions of Dollars to Tomato Growers.

We have a big reputation for growing good tomato seed, and for laying the best possible word on the wise—MOORE'S BIG VICTOR EXTRA EARLY TOMATO is a brand new variety never before offered to the public, and was produced at great cost. This valuable market variety was developed from a chance seedling found growing in a field of our Moore's King of the Earlyes which we were saving for seed some four years ago. It is the earliest red variety, and the largest Extra early red variety ever produced. Its yield is enormous, every vine being a great mass of rich fruit of large size setting type. It invariably brings the highest market price. This wonderful variety is actually earlier and larger than our Moore's King of the Earlyes, but not quite so smooth—but as a large early tomato grower remarked to us—we give me earliness and large size, and the tomato will sell even if it be not smooth. He was right. Every tomato grower should plant it. Our word for it—He will make many dollars if he don't.

Pkt. 10c., 3 Pkts. 25c., ½ oz. 30c., 1 oz. 50c., ½ lb. $1.75, lb. $5.30.

MOORE'S
Wonderful Early Tomato
INTRODUCED BY US IN 1904

Most Valuable Large Second Early Red Tomato for the Market Gardener Ever Introduced.

All Who Grow Tomatoes for Canning Should Plant It as It Greatly Lengthens the Season for Packing—Yields 30 Tons Per Acre.

Since we introduced this most excellent variety it has brought joy, happiness, and satisfaction to thousands of dollars to the homes of market gardeners and others who have purchased their seeds from us. It has become a standard variety with and is now planted by private gardeners and market gardeners from the Atlantic to the Pacific, and from the Great Lakes to the Gulf of Mexico. In size it is fully as large as our famous Moore's Triumph, which is a late variety, and maintains its large size throughout the whole season. We could fill pages with unsolicited testimonials and comments about the fine qualities and great monetary value of this wonderful fine canning early tomato. It ripens evenly to the stem, has few seeds, while the productiveness is simply astounding, it having frequently produced 15 bushels of beautiful ripe fruit per plant. It not only bears early, but continues to bear ripe fruit until frost, and unlike most other varieties, the size is held up well until the last picking. It is no experiment, but is on a broad basis of firmly established merit. It is well adapted to all sections of the country, and is a standard and satisfactory early tomato in all desirable points. If you would have a "good thing" don't fail to plant it. It is of especial value to tomato growers in the states of Maine, New Hampshire, Vermont, New York, Michigan, Minnesota, Wisconsin, North and South Dakota, Idaho, and Washington, and all localities where the growing season is short, as it will withstand more frost and mature beautiful large fruit early where no other sort will. It is singularly well adapted to growing in the Dominion of Canada, as well as throughout the United States, and every market gardener, no matter where located, will find it a sure money maker. All who grow early tomatoes should plant it. The meat is uniformly firm, sweet, and bright red, and carries well. Many of our Florida and Texas customers prefer it to any other. The fruit contains very few seeds, with absolutely no core. Selected seed. Pkt. 10c., 3 for 25c., oz. 45c., ½ lb. $1.25, lb. $5.30 postpaid.

Chalk's Early Jewel Tomato

Originally Introduced By Us in 1899. A Good Large Second Early Red Tomato. The genuine seed can only be had from us. A very early large-sized red variety, well adapted to all localities; selected seed only. Pkt. 10c., 3 Pkts. 25c., oz. 35c., ½ lb. $1.00, lb. $5.30.

Astonished Me and My Neighbors

"Your Moore's Big Victor Tomato astonished me and my neighbors. Buyers paid extra money for it. The yield was enormous; no trouble to sell it. Moore's Wonderful showed fine ripe fruit four days later."

DAVID MYERS, Swedesborough, N. J.
Three Remarkably Valuable New Tomatoes, Originated, Named and Introduced by Moore & Simon

JANUARY 1, 1906

MOORE'S
SUPREME EARLY

A Marvelous New Tomato in a Class All by Itself

In introducing this most wonderful early and valuable variety to the tomato-growing public, our firm has given the name of Supreme, for the reason that it embodies all the desirable qualities produced in early tomatoes "up to date." It possesses the highest, greatest and best qualities yet attained in early tomatoes to a Supreme degree. Plant it and you will agree with us. It is a beautiful large sized, very early red, extremely firm, and as such is supreme in earliness, yield, beauty and fine quality, and what is still more valuable, it commands outside prices on any market. Our Supreme Early is in a class by itself, miles ahead of any other, the finest in the world. It is not excelled for market or home gardens. It is the tomato for king! The plant is "all fruit," with few leaves, and of compact habit. Every plant is loaded with numerous clusters of beautiful large fruit, and it is virtually a perpetual cropper. It is a most unsparing thing to pick beautiful large solid ripe fruit sixty days from setting and to yield abundantly until frost. The plants also are very hardy and will stand much more cold than any other sort. M. B. Sheffield, Lee Co., Ill., writes us: "All my other tomatoes were killed by frost while your Moore's Supreme Early remained unharmed." No tomato grower should miss planting liberally of this notable new early variety. Pkt. 10c., 3 pkt. 25c., 6 pkt. 50c., oz. 75c., 1/2 lb. $1.25, 1 lb. $2.00. It has come to stay.

MOORE'S
NEW GOLDFINDER

"DOES NOT SUN SCALD NOR BLIGHT"

This is the result of a cross between our Duke of York and Dwarf Champion resulting in a new tomato with many desirable qualities and quite distinct from all other sorts. It is distinct in color, size, shape and color of fruit, the foliage being dense and of a dark green color. The fruit is of a pleasing shade of red, medium early and is set well up, carrying the dense foliage which prevents "sun scorching," etc. David Myers, Esq., Northfield, N. J., writes: -- "Your Moore's Goldfinder Tomato pleased me mightily, while it ripened beautiful red fruit that are both very good and delicious. I cut off a number of my Earlyras and Paragons from this same, I averaged twenty cents more per bunch for them than either Paragon or my own prize.

Remarkably "up early," the Goldfinder shows its bearing, being ready for picking in a few weeks. Pedro Pederson, Ocean Heights, N. J., writes: "Your Moore's Gold Finder are yielding very early and abundantly. Every bunch I have sold before picked at an average price of 75c. per basket. Not a single plant blighted, nor a single fruit sun scorched. Will buy all my tomato seed from you next year. Pkt. 10c., 1/2 oz. 25c., 1 oz. 30c., 1/2 lb. $1.00, 1 lb. $2.00.

Moore's New Extra Early Giant Fruited Acme

THE HANDSOMEST, THE EARLIEST AND LARGEST EARLY PINK TOMATO

Positively the earliest and largest pink or purple-skinned tomato ever introduced. Extremely valuable to market gardeners and shippers. Just what you have long sought—a large fruited, early smooth, solid tomato with a pink or purple skin. Here are all pink skinned tomatoes, such as the Acme, Dwarf Champion, Beauty, Imperial and Advance have been too small in size to make them salable or profitable for the market gardener or shipper to grow. In repeated crossing and skillful selection we have produced our new Early Giant Fruited Acme which is many days earlier, much larger and vastly more productive than its old prototype, on account of its beautiful appearance and fine quality, sell more readily and for a higher price than any similar sort. This variety appeals particularly to all those who grow tomatoes for profit. It possesses all the qualities that go to make up a perfect tomato, viz: earliness, large size, quality, yield, appearance, solidity, fruit being nearly "solid red" thick, solid and almost seedless. No one could do more could you wish? We predict an enormous demand for our Early Giant Fruited Acme, when its many good qualities once become known. It is adapted to all sections of the United States, and particularly to those who ship long distances. We advise every one to plant it. Pkt. 10c., 1/2 oz. 25c., 1 oz. 30c., 1/2 lb. $1.00, 1 lb. $2.00.

-- We strongly urge all tomato growers to plant our highly improved and up to date sorts; it will be big money and is sure to excite the fancy of all the people to do so. To be successful in any business you must be up to date. Ninety per cent. Yes, ninety per cent. of the tomato growers on the Atlantic seaboard plant our tomato seeds. They simply must do it, because they cannot get any half so good anywhere else. If in need of advice as to the best sorts to us; we are experts on the subject and will be glad to hear from you.
MOORE'S NEW

"DUKE OF YORK"

OF SPECIAL VALUE TO FLORIDA GROWERS

One of the grandest Tomatoes recently introduced, color rich glossy scarlet, similar to our Simon's Sparks, an enormous cropper, round in shape, flesh very firm, large size, fine flavor. A leading feature of this superb variety is that it ripens its fruit more uniformly together than any known kind whilst its profusion of clusters averaging eight and ten large evenly formed clusters each, makes it conspicuously handsome. Ripens early to the stem, is a strong, healthy grower, not subject to rust or blight, is an enormous cropper, and produces until the vines are killed by frost, holding its size exceedingly well until the last picking. Quality the very best, very solid and meatty. It is in every way a desirable variety for market gardeners, as its beautiful appearance always insures an extra price. An excellent sort for late summer and fall. Plants should be "set out" earlier than other late sorts. Pkt. 10c., oz. 25c., 1/4 lb. $1.00, 1 lb. $4.00.

Moore's Royal Pink Tomato

A new second early variety of great merit. Sure to please all who plant it. A healthy, vigorous grower. Exceedingly prolific.

We have grown this excellent new Tomato in many localities, and find that it requires good rich soil to bring out its many valuable qualities. On soil of "good heart" and high fertility the fruit will be beautifully smooth and of good large size, and a great pleasure to the raiser.

As Solid and Meaty as Beefsteak.

The fruit of the Moore's Royal Pink is much the shape of an orange, indeed is the most symmetrical in shape of all our large list of fine varieties. It ripens remarkably early, is as early as our Moore's New Wonderful cropper, very firm flesh, has few seeds. The flavor is very delicate and agreeable. Color a beautiful glossy reddish purple. Every grower, either for private or market purposes, will be pleased with its color and attractive-shaped fruit, which is produced in unusual abundance. It always commands the highest price in the market. Pkt. 10c., 1/4 oz. 25c., oz. 50c., 1/2 lb. 75c., 1 lb. $1.25, 5 lb. $5.00.

We will sell three ten cent packets for 25c. of any one or more varieties.
You Know What You Get When You Get Tomato Seed from Moore & Simon

MOORE'S TRIUMPH TOMATO

The greatest second early and late tomato ever offered to the American gardeners. Planted last year by over 64,000 of the best gardeners and canners in America, who all unanimously endorse it as the best ever introduced.

Our illustration gives a very correct idea of the size and shape of this splendid new variety. We introduced this grand tomato to our gardening friends twelve years ago, and since then scores of seedsmen have tried without success to offer one as good. Words cannot adequately describe its admirable qualities for the market gardener, canner or private grower. We can truthfully say, however, that it is the finest medium early or late tomato ever introduced. It ripens enormous, large, solid, smooth, bright, glossy red variety of the finest quality, ripens clear to the stem, very prolific, and sure cropper; does not crack, sells on sight. Its large size might lead some to believe that its fruits are few in number; yet the fact is, it is seven more prolific in fruiting than any of the standard sorts now in cultivation. It is unquestionably the heaviest cropper known. The Tomatoes are borne in immense clusters of four to eight fruits, and occasionally ten large fruits are found on a single cluster. In solidity and neatness it has no equal, while in handsome quality none surpass it. While it is an excellent sort for medium early, it is the best in the world for a late crop. As a carrier it holds up in perfect condition longer than any other large sort. The large size, beautiful color and productivity are maintained throughout the season until killed by frost.

Price. Pkt. 3c.; 1/2 oz. 3c.; oz. 9c.; lb. $1.00; lb. $3.00.

GENERAL LIST

RE-SELECTED TROPHY. The seed we offer was saved by ourselves personally, from choice selected fruits of the original type, and cannot fail to please the most critical. Pkt. 10c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

SELECTED NEW STONE. All seed saved from the best specimens of fruit only. Pkt. 10c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

THE CUMBERLAND RED. Pkt. 10c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

CRIMSON CUSHION. Pkt. 10c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

LIVINGSTON'S PERFECTION. Pkt. 5c.; oz. 10c.; 1/3 lb. 60c.; lb. $2.00.

EARLY PARAGON. Bright red. Pkt. 5c.; oz. 10c.; 1/3 lb. 60c.; lb. $2.00.

M. & S. MATCHLESS. A large late red variety of much merit; extra selected seed. Pkt. 10c.; oz. 30c.; 1/3 lb. 85c.; lb. $3.00.

EARLY FREEDOM. Pkt. 10c.; oz. 30c.; 1/3 lb. 75c.; lb. $2.50.

CANNERS' FAVORITE. Largely used by canners throughout the United States. A medium-large, large variety, very firm, with few seeds, and enormously productive, remains in bearing a long time. Pkt. 10c.; oz. 30c.; 1/3 lb. 85c.; lb. $3.00. Large buyers will be quoted special price upon application.

NEW QUEEN. Pkt. 5c.; oz. 10c.; 1/3 lb. 60c.; lb. $1.90.

THE STONE. Bright scarlet. Pkt. 5c.; oz. 10c.; 1/3 lb. 60c.; lb. $1.90.

LIVINGSTON'S FAVORITE. Red. Pkt. 5c.; oz. 10c.; 1/3 lb. 60c.; lb. $2.00.

ENORMOUS. Improved. A large, smooth, bright red, late variety; not recommended for market purposes. Pkt. 10c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

NEW SUCCESS. A medium-sized, scarlet-fruited, second early variety with few seeds. Pkt. 10c.; oz. 30c.; 1/3 lb. 85c.; lb. $3.00.

PONDEROSA. Of very large size, but of uneven shape, and ripens un-evenly. Pkt. 10c.; oz. 35c.; 1/3 lb. $1.00; lb. $3.75.

LORILLARD. An old variety which we have very much improved in size and color. Pkt. 10c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

HORNER'S PROLIFIC. Extra early. Pkt. 15c.; oz. 45c.; 1/3 lb. $1.90.

RED CHERRY. These little fruits are borne in large clusters most abundantly, good both for preserving and pickling. Pkt. 5c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

THE PEACH. The tomatoes are two inches in diameter and in color are deep rose and golden-amber blended, all covered with delicate bloom, like the furze of a fine peach. Pkt. 5c.; oz. 40c.

RED PEAR, or PLUM-SHAPED. This is a leading favorite for pre-serving and canning, and is excellent made into "tomato figs." Delicious, rich, sweet and distinct flavor. Pkt. 5c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.25.

YELLOW PEAR or PLUM. (See page 5.)

THE TRUCKER'S FAVORITE. Color purplish red, very solid, firm flesh, and not subject to rot or crack on the vines. Pkt. 10c.; oz. 30c.; 1/3 lb. 85c.; lb. $3.00.

OTHER VARIETIES. There are many of them offered by other seedsmen. We have tried them all and know them to be either out of date or possessing little or no merit compared with the most excellent varieties illustrated in our catalogue. In this way we save our customers many thousands of dollars annually by preventing them from experimenting with useless varieties.

SELECTED DWARF CHAMPION. Our seed is saved from the largest and finest specimens only. Pkt. 5c.; oz. 10c.; 1/3 lb. 75c.; lb. $2.50.

LIVINGSTON'S BEAUTY. Pkt. 5c.; oz. 10c.; 1/3 lb. 60c.; lb. $2.00.

EARLY ACME. Pink skin variety. Pkt. 5c.; oz. 10c.; 1/3 lb. 60c.; lb. $2.00.

REDFIELD BEAUTY. An early pink-skinned sort of fair size. Pkt. 10c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.50.

BUCHEYE STATE. Pkt. 5c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.00.

LIVINGSTON'S GLOBE. Pkt. 10c.; oz. 30c.; 1/3 lb. 75c.; lb. $2.00.

DWARF STONE. A dwarf variety with large red fruit. Pkt. 10c.; oz. 35c.; 1/3 lb. $1.00; lb. $3.50.

JAPANESE TREE TOMATO

Plants grow stiff and upright, producing large, plump, red, solid fruits, very smooth and symmetrical in shape, ripening close around the stem. Pkt. 10c., 3 pks. 35c.

GOLDEN GAGE TOMATO

It is solid, always smooth, entirely free from ridges, large in size, ripens early, and is the most beautiful yellow variety ever sent out. The large and ripened fruits are sometimes tinged with red, at the blossom end. None excel it for eating raw or slicing. The handsome golden-yellow slices make a beautiful contrast in a dish with red sorts. Makes handsome, rich preserves. Pkt. 10c.; oz. 15c.; oz. 25c.; 1/3 lb. 75c.; lb. $2.75.
Turnips do best in highly enriched, light, sandy or gravelly soil, commence sowing the earliest varieties in April in drills, from twelve to fifteen inches apart, and thin out early to six or nine inches in the rows. For a succession, sow at intervals of a fortnight until the last week in August for main crops, and from August to September for late crops. August sowings may be made for the fall and main crops. Turnips may be preserved until spring by cutting off the tops about one inch from the bulb and storing in a cellar or cool shed during winter, covering the roots with dry sand; they should be harvested before severe frosts set in, though comparatively hardy, few of the varieties will survive the winter of the Northern States in the open ground.

PERFECTION RED TOP MARKET WHITE GLOBE. This fine turnip was brought to America by a very successful English market gardener. It is the sweetest, tenderest, handsomest-looking turnip white globe turnip we ever grew. Our illustration, drawn from nature, shows its smooth, regular form and rich, purple colored top. The best early globe variety grown and the most profitable market sort. Of large size and very rapid growth; fine, juicy quality. It keeps well and is excellent for early or winter market. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c.

M. & S. TELTOW GOLDEN. Very much as a market sort. Of medium size, short top and very rapid growth; globe shaped bulbs, with deep yellow flesh, very tender, stringless and of delicious flavor. The top of the bulb is of a beautiful light green, while the middle and lower part is of a beautiful rich golden-yellow color. An excellent keeper, remains firm, excellent both fall and winter sort. Sells on the strength. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c.

YELLOW, OR AMBER GLOBE. Fruit form and sweet; grows large; excellent for either table or feeding stock; keeps well. Oz. 5c., ½ lb. 25c., lb. 50c.

NORFOLK WHITE GLOBE. This is a free-growing sort, useful for both table and stock, and is the kind most generally used for both purposes. Oz. 5c., ½ lb. 15c., lb. 40c.

AMERICAN GREEN TOP ABERDEEN. This, which we introduced in 1870, is almost indispensable in every rural household. It is a vigorous, free grower, valuable for both table and stock feeding. Productive and a good keeper. Having less top than Aberdeen, often sold for it, it may be allowed to stand closer in the row. Pkt. 5c., oz. 10c., ½ lb. 20c., lb. 50c.

YELLOW FINLAND TURNIP. This is a most excellent new variety from Finland, with a very smooth skin and fine golden colored flesh. The flesh is firm, tender and sweet, very fine-grained and agreeably flavored. This excellent sort is early, hardy and a good keeper, and is pronounced the finest of all table sorts for fall or winter use. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c.

EXTRA PURPLE TOP M. & S. TELTOW, STRAP-LEAVED. This splendid new turnip is the earliest in cultivation. The bulb is very flat, of medium size, quite smooth, with a bright purple top; leaves few, short and of light color; growing very compact, with an exceedingly small top. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c.

IVORY BALL. The earliest and most perfectly formed round white turnip for garden use. Our stock has been continuously selected, resulting in a beautiful shape, with short top and a single thick root. Flesh firm, snowy white, solid and mild in flavor. A most handsome and valuable variety. This turnip has been awarded many first prizes by many horticultural societies and other agricultural bodies. Pkt. 5c., oz. 10c., ½ lb. 40c., lb. 75c.

GOLDEN BALL, or ORANGE JELLY. Very delicate, sweet yellow flesh, medium size, firm and, of excellent flavor; true stock. Pkt. 5c., oz. 10c., ½ lb. 20c., lb. 50c.

NEW EXTRA EARLY WHITE MILAN. It grows with wonderful rapidity, and is the earliest white turnip in cultivation. Of splendid quality, small top and single tap-root, it is most attractive, with clear white skin and flesh; fine grated and tender. Excellent market sort. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c.

LOW-HORN TURNIP (Weid's Original Strain). The principal merit of this strain over the imported seed is it will be found harder and a longer keeper. Specimens can be kept in good firm condition until late in May. The flesh is very sweet, tender and juicy. In some localities it is known as “Sweet French Turnip.” The root is pure white, with the flavor quickly. Delicious for table use and an excellent one for feeding stock. This is without exception a dish of great on the top, very long and smooth, and reaches maturity without delay.

One ounce for 150 feet of drill, 1 to 2 lbs. for an acre.

Ruta Baga or Swedish Turnip

CARTER'S MODEL PURPLE TOP YELLOW RUTA BAGA. Our choice stock, grows entirely without neck, and very small top and taproot. We most earnestly commend this fine sort to all white turnip for market. Pkt. 5c., oz. 10c., ½ lb. 35c., lb. 50c.

PURPLE TOP BEAUTY RUTA BAGA. Pkt. 5c., oz. 10c., ½ lb. 35c., lb. 50c.

PURPLE TOP YELLOW RUTA BAGA. Long Island grown. Oz. 5c., ½ lb. 15c., lb. 40c.

 earliest white turnip in cultivation. Of splendid quality, small top and single tap-root, it is most attractive, with clear white skin and flesh; fine grated and tender. Excellent market sort. Pkt. 5c., oz. 10c., ½ lb. 25c., lb. 50c.
CARTER'S MODEL PURPLE TOP YELLOW RUTA BAGA

A PERFECT TABLE TURNIP

No Other Sort Equal to It in Point of TENDERNES, SWEETNESS, JUICINESS or NUTRITIOUSNESS

CARTER'S MODEL PURPLE TOP YELLOW RUTA BAGA. Our choicest stock grows entirely without neck, and very small top and tap-root. Very quick growth, good globular shape, excellent table quality and best market variety. It is thoroughly fixed in type and entirely distinct from ordinary varieties which are used mainly for feeding stock. It has short leaves, grows clean and smooth as a turnip. The flesh is remarkably fine grain and delicious in flavor. Will mature in fifty days from planting. We pronounce this the best and most desirable Ruta Baga grown. We most earnestly commend this fine sort to all who grow for market, as it will bring much higher prices than any other sort.

Pkt. 50c., oz. 10c., lb. 10c., bushel $1.00.

We wish every one having a garden, and every one who grows Ruta Bagas for sale, to plant this, the "King of All Ruta Bagas." 

Every Dairyman Should Plant from One to Ten Acres-

DANISH GOLDEN MILK TURNIP

At the present price of grain for feeding stock the profits of dairying and stock-fattening is very much reduced, and the feeding of roots alone offers the solution of profitably conducting many farm industries. The sooner the farmer realizes the immense value of roots of various kinds for feeding his dairy, as well as all other stock he may have, the sooner will be the experience that degree of prosperity he has so long waited for. It is the growing and feeding of root crops alone that makes the English, Danish and other European dairy farmers so prosperous. The DAIY CAN BE MADE TO PAY BIG PROFITS

If a judicious system of root feeding be practiced, our Danish Golden Milk Turnip, which we have brought from Denmark, is the best of its class and the Turnip principally grown in that country for stock-feeding purposes; it is unusually rich in food value and will increase the flow of milk of the richest quality in a manner that will astonish the most skeptical. The roots are of immense size, of a rich golden yellow color, very solid and nutritious, of rapid growth, and a perfect keeper. In point of productiveness it is only necessary for us to say that seventy tons have been produced on one acre of ground, while from thirty-five to forty tons is an uncommon yield. Can be sown from April to July 10th, broadcast or in drills; we recommend the latter. We advise several sowings be made during the period above-mentioned, the last for late Fall and Winter use. It is also a good sort for table use. Of course it should be fed in conjunction with other food, and in this way it will enable any dairyman to reduce his feed bills twenty-five per cent., and will increase his milk supply from twenty to thirty per cent. A trial will convince. Sow from two to three pounds per acre. O. 10c., 1 lb. 25c., 2 lbs. 75c., 3 lbs. $1.00, 5 lbs. $3.00.

This remarkable variety is easily grown and combines the following good qualities, viz.: Earliness, size and prolificness. Makes valuable forage for stock. Color of meat is white, large and of rich flavor. Growers of the "peanut" have always found ready sale at remunerative prices for their product. It does not require a rich soil. Plate 7, April, two inches deep, cultivate same as potatoes. Pkt. 10c., oz. 2c., qt. 40c., postpaid.
SEEDS OF SWEET, POT AND MEDICINAL

HERBS.

A few pot and sweet herbs (for flavoring soups, meats, etc.) are indispensable to every garden, while some of the medicinal herbs will also be found very useful. Herbs in general love a mellow and free soil, and care should be taken in properly harvesting them in a dry state. The chief point is to cut them on a dry day when not quite in full blossom, and to chop the plants in a dry state, and when dry, to pack them in dry cloth, keeping them entirely excluded from the air. Sow in Spring in drills and thin out.

The varieties marked with an * are perennial.

ASHWORTH, the leaves and stems are used for cordial, garnishing and flavoring. The seeds have an aromatic, attractive taste. Pkt. 5c., oz., lb. 60c.

BALM. The leaves have a fragrant odor, and are used for making a pleasant beverage, teas, cordials, perfumes, etc. Pkt. 5c., oz., lb. 10c.

BANAN. The leaves and tops of the shoots are the parts gathered, and are used for highly seasoned dishes, as in soups, stews, and sausages; a leaf or two are sometimes introduced into sauces and puddings. Pkt. 5c., oz., lb. 10c.

BAY. The leaves furnish an oil used for softening and whitening the skin. The leaves immersed in a tumbler of Water will make a drink very beneficial for diabetics. Pkt. 5c., oz., lb. 60c.

BORAGE. Excellent for bees. The leaves are sometimes used in salads or boiled as spinach; the spikes of flowers are aromatic and can be used in cooking drinks. Pkt. 5c., oz., lb. 60c.

CARAWAY. The seeds contain an aromatic, volatile oil, and are extensively used in confectionery and medicine; in spring the under leaves are sometimes put in soups. Pkt. 5c., oz., lb. 60c.

CASTOR OIL PLANT. The seeds yield the castor oil of commerce. Will drive away ground moles if seeds are placed in their runs. Pkt. 5c., oz., lb. 60c.

CATNIP, or CATMINT. The leaves and young shoots are used for seasoning food and make an excellent feature for the sake of the flowers. Pkt. 5c., oz., lb. 60c.

CORIANDER. The seeds form an important article of commerce; they are used in the manufacture of liquor and confectionery. Pkt. 5c., oz., lb. 10c., lb. 60c.

CURCUM. The pungent seeds sometimes used as caraway, also valuable to pigeon fanciers. Pkt. 5c., oz., lb. 60c.

DILL. American. Much superior to the imported. The seeds have an aromatic odor and were in demand in ancient Greece. The seeds are employed in confectionery and for flavoring liquors. Pkt. 5c., oz., lb. 10c., lb. 60c.

ELECAMpane. Has valuable tonic properties. Pkt. 5c., oz., lb. 60c.

FENNEL. SWEET. The leaves boiled enter into many fish sauces, and are useful for garnishing; the leaves are employed in confectionery and for flavoring liquors. Pkt. 5c., oz., lb. 10c., lb. 60c.

HERBACEOUS. Also called Hog Weeds; the fruit being eaten by them; cultivated chiefly for its medicinal properties; the growing plants are supposed to absorb malaria. Pkt. 5c., oz., lb. 60c.

HOP SEED. Pkt. 5c., oz. 10c.

HORSEHOUND. Introduced as a medicine, and is also used for making hyssop tea for medicinal purposes. Pkt. 5c., oz., lb. 10c.

LAVENDER. A popular, aromatic herb, emitting a delightful perfume. Pkt. 5c., oz., lb. 10c., lb. 60c.

MARJORAM. SWEET. American. The leaves and the ends of the shoots are highly esteemed for seasoning, both in summer, and also dried for winter use. Pkt. 5c., oz., lb. 10c., lb. 60c.

MARJORAM, SWEET. Imported. Pkt. 5c., oz., lb. 10c., lb. 60c.

PENNANTHROPE. The true Pennyroyal is but little known. It forms a dense mass of bright-green foliage particularly suited for certain medicinal purposes. Pkt. 5c., oz., lb. 60c.

ROSEMARY. An aromatic herb. The oil distilled from the flowers is the chief ingredient of "Eau de Cologne." Pkt. 5c., oz., lb. 60c.

RUE. For medicinal purposes; good for foods, for the roup. Pkt. 5c., oz. 10c.

SAFFRON. The flowers contain coloring matter; aside from the commercial use, is also sometimes used in coloring and other dishes. Pkt. 5c., oz., lb. 60c.

SAGE. The most extensively used of all herbs for seasoning and dressing; indispensable. Pkt. 5c., oz., lb. 10c., lb. 60c.

SUMMER SAVORY. The leaves and flowers are extensively used for flavoring, particularly in soups and dressings. Pkt. 5c., oz., lb. 10c., lb. 60c.

WINTER SAVORY. The leaves and young shoots are used for flavoring. Pkt. 5c., oz., lb. 10c., lb. 60c.

THYME, American. Of upright habit; broad-leaved. The leaves are dried for seasoning; also useful as a bee food; a tea is also made for nervous headaches. Pkt. 5c., oz., lb. 60c.

THYME, Imported. Pkt. 5c., oz., lb. 10c., lb. 60c.

TANSY. Occupies a prominent position among domestic medicines. Pkt. 5c., oz., lb. 60c.

WORMWOOD. Used medicinally, and is beneficial for poultry; should be planted in poultry yards. Pkt. 5c., oz., lb. 60c.

TARRAGON. Strong plants. 25c. by mail, 30c. post-paid.

VEGETABLES.

BIRD SEEDS.

M. & S. MIXED BIRD SEED has become famous for its superior quality. We are nothing but freshest high-grade seed, free from mildew and dust. Our mixture of seeds is particularly related by canaries. LB. 10c., Qt. 15c., 4 Pts. 50c., Pk. 1 so., Bu. $1.00.

CANARY. Best Selected. LB. 10c., Qt. 15c., 4 Pts. 50c., Bu. $1.00.

HEMP. Qt. 20c., 4 Qts. 45c., Pk. 1 so., Bu. 75c.

VEGETABLES. For April and May delivery. 40c. per 100, $3.00 per 1000.

CAULIFLOWER PLANTS. (Italian Giant Surehead). Postage-free, ready in March and April. 40c. per doz., $3.00 per 100. Pkt. 10c., 10c. per 100.

COLD. Ready April 1st. 15c. per 100, or 3 for $1.00. From 100 beds; ready April and May. $1.00 per 100.

CELERY PLANTS, Ready in May and June. New York Improved Large Purple. Grown in pots, 60c. per doz., $4.00 per 100. Out of hot-beds, 80c. per doz., $2.00 per 100.

HOPVINE ROSES. Each, 10c., 50c. per doz., $2.50 per 100. By mail 50c. per doz.

HOPVINE PLANTS. Ready in April and May. Best seed. 40c. per 100.

PEPPER PLANTS. Ready in May and June. Leading market seeds. 20c. per 100, $2.00 per 1000.

SWEET POTATO PLANTS. Ready in May and June. We grow large quantities of the Red and Yellow Varieties, and are in a position to make consignments to dealers. See page 34.

TOMATO PLANTS. Ready in May and June. We make a specialty of tomato seeds, and always supply through the season well-grown plants of the leading varieties. 25c. per doz., $1.50 per 100, $7.50 per 100. Special Prices to buyers of Large Quantities. Correspond with us.

If wanted by mail, add 15c. per 100 extra, to cover postage.

GERMAN POT HERB SEED

For many thousands of our customers we have planted our German Pot Herb Seed with great satisfaction. We offer the finest, which for piquancy and deliciously appetizing aroma is not surpassed for flavoring all kinds of soups, stew and Hamburg steaks. Suits to please all who plant it. Pkt. 3c., oz. 15c., lb. 75c.
The Secret of Success

in Producing a Beautiful Lawn

MOORE & SIMON'S BEST

LAWN GRASS MIXTURES

We have made the formation of permanent lawns a study for years, and the finest lawns in this country to-day attest our success. The M. & S. Perfection Lawn Seed is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained, rivaling the famous lawns of Old England.

IT IS THE BEST LAWN GRASS SEED FOR OUR AMERICAN CLIMATE.

With it you can renovate old and make new lawns, grass plots, tennis courts etc., as soft as velvet and as green as emerald all summer long.

M. & S. PERFECTION LAWN GRASS SEED

...IS SUPERIOR TO ALL OTHERS...

Nothing adds more to the attractiveness of a rural home than a well-kept, close, velvety lawn. The finest quality is required in good grass seed, and for this purpose we can confidently recommend our Perfection Lawn Grass Seed. This is the very best quality of a mixture of the finest varieties of cultivated grasses, selected and nurtured under the best conditions, and is adapted to all soils and climates.

M & S. ENGLISH LAWN GRASS (Imported Seed).

A trial will convince any one of the superior merits of this mixture. The lawn is dense, compact, and the appearance of all kinds of soil, invariably producing a beautiful green lawn, sure to please all. 1 lb. 35c., 3 lb. 90c., 10 lbs. and upwards 35c. per pound.

SPECIAL MIXTURES OF GRASS SEEDS.

In preparing these mixtures for their respective uses, only such varieties of grasses are used as have been found by our long experience to produce the desired effects. These Special Mixtures of ours will be found to give much better results than where one uniform mixture is used for all purposes.

SPECIAL GRASS SEEDS FOR CEMETERIES. Qt. 25c., pk. $1.25, bu. 50.00.

SPECIAL GRASS SEEDS FOR CRICKET AND LAWN TENNIS COURTS, EMBRANKMENTS AND TERRACES. Qt. 25c., pk. $1.25, bu. 50.00.

WOOD MEADOW GRASS (Foa Nemoralis). A very nutritious grass, adapted for lawns and pastures, thrives well under trees, 1 lb. to the bu., 5 lb. to the acre, 10 lb. to the acre, 25 lb. to the acre, 50 lb. to the acre, 100 lb. $25.00.

ROUGH-TALK MEADOW GRASS (Poa Trivialis). Valuable for either moist or dry soils 55 lb. to the acre, about 14 lb. to the bu., 1 lb. 35c., bu. 50 lb. $15.00.

MEADOW FOX TAIL (Alopecurus Pratensis). One of the best pasture grasses, grows rapidly when cut or eaten down by stock, about 8 lb. to the bu., 35 lb. to the acre, 1 lb. 35c., bu. 50 lb. $25.00.

ITALIAN RYE GRASS (Lolium Italicum). This is a mixture of the Perennial Ryegrass, being earlier and more rapid in growth, producing larger leaves, more succulent food and more of it. Succeeds best in moist soil, and in such, is the best grass for soiling, affording most luxuriant and nutritious crops. Its strong germinative power, its rapid development, its luxuriant herbage, its hardy habit, its nutritive qualities, all point to its use as a valuable grass. About 20 lb. to the bu., 3 bu. to the acre, 30 bu. to the acre, 1 lb. 35c., bu. 50 lb. $30.00.

CRESTED DOGTAIL (Cynosurus Cristatus). An excellent grass for hard, dry soils, valuable for pastures and lawns, about 21 lb. to the bu., 1 lb. 35c., 50 lb. $25.00.

SHEEP'S FESCUE (Festuca Oriona). A very nutritious grass for permanent pastures, very productive and nutritious, 22 lb. to the bu., 1 lb. 35c., 50 lb. to the acre, 100 lb. $15.00.

MEADOW FESCUE (Festuca Valesiana). One of the most durable and hardy grasses, excellent for dry soils, 12 lb. to the bu., 1 lb. 35c., 50 lb. to the acre, 100 lb. $20.00.

CREeping Bent Grass (Agrostis Stolonifera). A good kind for lawns, about 20 lb. to the bu., 25 lb. to the acre, 1 lb. 35c., 50 lb. $15.00.

COLD MOUNTAIN FESCUE (Festuca Patens). A valuable lawn grass for covers, 7 lb. to the bu., 1 lb. 35c., 50 lb. to the acre, 100 lb. $22.00.

MEADOW FOXTAIL (Alopecurus Pratensis). A perennial grass of good quality; grows well in nearly all situations, wet or dry, hill or bottom land. Has round smooth stems, two or three feet high. The numerous fibrous roots penetrate solid good soil twelve to fifteen inches; makes good hay; also a permanent pasture, especially in the South. 20 to 40 lbs. per acre, broads. 1 lb. 35c., 10 lbs. $1.00, 100 lbs. $25.00.

...& SIMON'S MIXTURE.

For Sowing under Trees or in Shady Situations.

It is a combination of fine, dwarf-growing, evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Qt. 25c., pk. 85c., bu. 5.00. (For small lots, add 5c. per quart for postage.)

SPECIAL LAWN GRASS SEEDS.

For lawns, shrubbery or for ornamental purposes. A complete mixture of fine grasses, carefully selected and thoroughly sifted, for the most advantageous results. 1 lb. to the bu., 5 lb. to the acre, 25 lb. to the acre, 100 lb. $25.00.
FULLY APPRECIATING the great importance to the farmer of GOOD FIELD CROPS, we have given attention to the development of our business, and this year propose to offer a speciality, exercising great care to secure the best varieties, through selection and improvement of Farm Seeds. We have gained a national reputation, and supply each year a large number of seeds in every State of the Union, from the North, South, East and West. The prices quoted are subject to market fluctuations.

**HALE'S**

**Early Prolific Soja Beans.**

The Great Soil Improver, Makes Richer Feed Than Other Crops, Makes Poor Land Rich, Makes Rich Land Richer, Makes Good Land Better. A 100 bu. Rylls in, 30 bu. better out per acre. It is green manure, and is used for ensiling, proving to be a wonderful manure and fertilizer. The Hale's Early Prolific Soja Bean is superior to any other kind of soja bean or cow peas as a soil enricher. Its great fertilizing powers are due to its ability to draw nitrogenous nourishment from the atmosphere and converting the chemical thus gathered to the soil, thus enriching it a degree that is remarkable. In our Soja Bean we have a food and fertilizer combined. If not desired as a fertilizer it makes a highly nutritious food for cattle. As it draws great quantities of nitrogen from the atmosphere it thus ranks among the best fertilizers. The vines, properly cured, are a most desirable fodder crop for all kinds of cattle. The rye seed contains nearly 20 per cent of protein, and is rich in the most desirable ingredients of best clover hay. If desired, the plants can be harvested for the grain and the plants plowed under to fertilize the soil. The seed can be ground and fed to cattle. The seeds are the richest known vegetable substance, and when used for cattle makes a nutriment food for all classes of animals. It will make the best crop of the season. Of all green manures soja bean is the most economical. The Hale's Prolific Early Soja Bean has come to stay. There are several varieties now on the market, but repeated trials at many stations have proved beyond doubt the Hale's Prolific Early to be superior in earliness, productiveness, and soil enriching qualities than any other out of some thirty varieties tried. A good yield of Hale's Early Prolific Soja Bean is 30,000 pounds of peas and vines per acre. For sowing for cutting as a hay or forage crop, Hale's Soja Beans should be sown at the rate of one to one and a half bushels per acre. For sowing as a forage and feed crop, Hale's Soja Beans have proved beyond doubt the Hale's Prolific Early to be superior in earliness, productiveness, and soil enriching qualities than any other of the same class ever tried. A good yield of Hale's Early Prolific Soja Bean is 30,000 pounds of peas and vines per acre. For sowing for cutting as a hay or forage crop, Hale's Soja Beans should be sown at the rate of one to one and a half bushels per acre. For sowing as a forage and feed crop, Hale's Soja Beans are proving to be very profitable and desirable. Although they are not equal to cow peas as a land improver, they will make a larger growth than cow peas on the same land. The Hale's Early Prolific Soja Beans are practically the only crop that furnishes a balanced ration in one crop. Our farmers report that they do not find it necessary to feed corn, cotton seed meal, or any oil seeds with this crop. The Hale's Early Prolific Soja Beans are proving to be a most valuable crop. Among the best varieties ever introduced.

**GROW RICH.**

Make Your Own Fertilizer by Planting Hale's Early Prolific Soja Beans. The soil is made better and richer than other crops, and thus is ready for plants to thrive and flourish. The Hale's Early Prolific Soja Bean is the best and most economical of all crops. It is the best crop for the farmer who cannot do without the crops. The Hale's Early Prolific Soja Bean is the best and most economical of all crops. It is the best crop for the farmer who cannot do without the crops. The Hale's Early Prolific Soja Bean is the best and most economical of all crops. It is the best crop for the farmer who cannot do without the crops. The Hale's Early Prolific Soja Bean is the best and most economical of all crops.

**GROW RICH.**

**Make Your Own Fertilizer by Planting Hale's Early Prolific Soja Beans.**

**THE BEST.**

**Mennonite Prolific Spring Rye.**

Distinct and Valuable.

Most productive sort. Distinct from the winter rye, grain of finer quality and more productive; can be successfully grown in any latitude, and is now being largely sown in the Middle States in place of oats, being a much more profitable crop on account of its producing about four times the straw, and also as a catch crop where winter grain has failed. The straw for ensiling stands stiff, 7 to 8 feet high, produces 35 to 45 bushels of grain per acre; it does not stand like winter rye, not less than 2 bushels to the acre should be sown. The value of Mennonite Prolific Spring Rye Straw per acre is double that of winter rye, and is worth more than that of oats and its straw combined.

If we could introduce here one-tenth of the letters that we get from farmers thanking us for urging them to plant some of our Prolific Spring Rye, it would do your heart good to read them. Farmers tell us that they have made a great deal of money by sowing for bees on rye weed, oats, corn, grasses, etc., and we know that there is nothing better to make money out of than our Mennonite Prolific Spring Rye. This is grown on our farms in Pennsylvania and Ohio, and is a heavy yielder and does splendidly everywhere. We ran short last season in filling orders, but this year have a couple of thousand bushels more, and we hope that orders will be sent in to us in quantities that will keep us supplied.

This magnificent rye is of recent introduction, and it has proved to many of our farmers customers a better money-maker, a better money-maker, a better money-maker, and an easier money-maker than any other cereal planted, as good Spring Rye brought as good a price as wheat, and yielded from 30 to 30 bushels per acre more. It is a magnificent sort.

**AS A CATCH CROP.**

We sowed some of our Mennonite Prolific Spring Rye on winter wheat that had died out, waiting until almost April, and found it did splendidly. It gave us a yield of over 40 bushels per acre. It is one of the very best things to sow for a catch crop, as it always gives good yields. Price of our Mennonite Prolific Spring Rye: F. Kt. 10c., lb. 30c., 2 lbs. $1.00, postpaid by express or freight, pk. 70c., bu. $3.00, ½ bu. $1.50, SPRING RYE—ordinary sort, 3 bu. 3.00, 5 bu. 5.00, 10 bu. and over $1.00 per bu. A quantity of this hardy Winter Rye will be quoted special prices on application.

**EXCELSIOR WHITE WINTER RYE.**

A variety from Vermont that has never failed to yield at least 40 to 50 bushels per acre. With the ornament, a four-acre field yielded 52 bushels to the acre. Pr. 50c., bu. $1.50, 10 bu. and over $1.00 per bu.

**STANDS DRAUGHT BETTER THAN OTHER CROPS.**

We have never grown a crop that equalizes better than Hale's Soja Beans. It is almost impossible for any weeds to grow or thrive where a crop of Hale's Soja Beans is grown, and for effectually eradicating wire grass and any coarse annual weeds from this crop is a wonderful advantage. Another great point of value in the Hale's Soja Beans is that the roots are drawn to a remarkable degree, and with a crop where under similar conditions other crops will prove almost a failure, send your orders to us and get the genuine. Pr. 10c., lb. 35c., 3 lb. $1.00, by mail postpaid or freight qt. 25c., pk. 75c., bu. $3.75, 2 bu. $5.50, sack included.
Over the years, with the development of new technologies and transportation methods, New Zealand Oats have become a preferred choice for farmers. These oats are known for their high yield and quality, making them a valuable asset in various farming environments.

**New Zealand Oats**

Progressive farmers who have grown them pronounce them to be the most valuable Oats ever grown in America. It contains more new blood, hence more vigor and productivity, than any other oat we know of.

It has stood the test on 17,500 farms, scattered all over America, in the remotest corners and obscurities of each state and territory—everywhere it did well, despite the most terrible season ever known.

This is absolutely the earliest oat grown. Nothing like it in earliness that we know of. Our crop was ripe and cut and stacked eight days before other sorts were ripe, which stamps this variety as absolutely the earliest in existence.

It means big money to the farmer. That’s what the earliest oats always bring in this market, and especially on the farm, for many farmers are short of oats in the summer when this ripens.

It withstands drought. No sort that we have ever tested so thoroughly and completely withstand dry weather—yes, long continued hot droughts as New Zealand; the price of our New Zealand Oats is 1 lb. 30c., 1 lb. 30c. (postpaid), 25c., 3 lb. $1.50, 25c. 150 lbs. $12.50; to 250 lbs. $22.00; sacks included; indeed, it seems to be proof against every element of nature in the shape of weather, withstanding all and yielding heavily.

**Strong Straw.** Now, then, New Zealand Oats have wonderfully stiff straw, withstand-}

---

**NORTHERN GROWN SEED—OATS**

**WHITE NORWAY.** These oats are a wonderful stouter; 2 1/2 bushels have been produced from one seed, yielding fully two-thirds more than the common White Siberian. It was obtained by us from a customer in Norway three years ago. The grain is large and plump looking, often weighing 48 pounds to the measure bushel. It is a variety that is unusually strong, stiff straw, that will withstand all sorts of soil and climes, and produce a crop if any oat in the world can. This was particularly noticeable last year. Fields alongside of our White Norway Oats returned but 20 bushels to the acre, while White Norway threshed out 155 bushels per acre. Large pkt. 16c., 1 lb. 30c., 3 lb. 75c., post paid; ppt. 25c., bag of 32 lbs. $1.25, bag of 75 lb. $5.00, 10 bu. and over $3.50 per bu., sacks included.

**OTHER VARIETIES OF RECENT INTRODUCTION.** White Maine, Lincoln, Baltic, White American Blanket, Welcome, Clydesdale, White White, American Banner, White Belgian, White Russian, Prosperity, and other well-known and popular varieties of seed oats at popular prices. Each 30c. lb., or 3 lbs. 75c., postpaid. By freight or express, bags included, per legal bu. 32 lbs. 90c. to 10 bu. and over 75c., per bu. included.

**EARLY AMBER SUGAR CANE**

The high value of Northern grown sugar cane for fodder and ensilage is becoming rapidly known. It may be made to furnish the principal food for cattle, horses and mules from August until the following spring. When fed down young as a pasture, it grows rapidly again. It also withstands severe droughts with its kind. It is one of the best of our sugar cane plantations. As a fodder and for winter feed it is one of the most economical. The Early Amber is the best for fodder as well as for sugar, as it matures quickly, has been cultivated as far north as St. Paul, Minn. The seed is valuable also as food for horses and cattle, and is greedily eaten by poultry, increasing the egg-production. By mail, post-paid. 1 lb. 30c., 3 lbs. 75c., by express or freight. 91. 20c., 25c., lb. of 36 lbs. 75c., 5 bu., or over $3.50 per bu.
M. & S. FAMOUS BLACK NORWAY OATS
Imported Direct from Bergen, Norway

Few farmers are aware of the fact that the best black oats in the world is produced among the fjords of Norway facing the Arctic Ocean. It is here that the black oat is cultivated to its greatest perfection as to yield, weight, quality and freedom from disease. Our stock seed was obtained direct from Mr. Hansen Hjort, who has devoted two decades to developing his favorite strain of "Hjort's Frei Braun." Mr. Hjort has, on carefully prepared land, raised as high as 311 1/2 bushels (by weight) per acre of this truly wonderful oats. Our own and other tests the past season showed a yield of over 200 bushels per acre. Any farmer can secure the same enormous yield under the same conditions. An acre of ordinary land on your farm that will only produce 35 bushels of common oats will readily yield 100 bushels of our Famous Black Norway Oats.

We do not feel backward in pushing this Famous Black Norway Oats, because we have seen such marvelous yields of this variety the past summer that we know any farmer can make lots of money sowing it. There is nothing like it in earliness in any other kind of black oats that we know of. Our crop was ripe and stalked before any of our neighbors. The wonderful yield of this remarkable oats, as well as its resistance to the elements, is very largely due to its wonderful stinking habits. We have seen single kernels produce 102 strong, healthy stalks. Every farmer knows that when an oat stalks, its yield is increased in proportion. Take an oat that does not stroll and it cannot produce as heavily.

OTHER REASONS WHY YOU SHOULD PLANT IT

First—Drought Proof. It matures so early that the crop can be gathered before dry summer weather sets in. No storm we ever heard of so completely and thoroughly withstands dry weather.

Second—Feeding Quality. No variety equals it in superior quality. All kinds of stock prefer eating it to any other.

Third—Profit that Interests You. It makes farming profitable in every state and territory in the United States. Your neighbors will want it if they see or hear of it. They will pay you an extra price for it.

Fourth—The Last Forty Bushels. It is the last 40 bushels per acre that makes farming profitable. If the common sorts yield 30 bushels per acre, and this gave you 70 bushels, the last 40 bushels would be the profit; but if this gave you 150 bushels, it is very easy to figure out great profits on 100 acres or more. Try it and convince yourself.

Fifth—Many More Reasons. It comes from a country where rust does not exist. The low price we sell it for ought to induce every farmer to plant it. Its wonderful stilt stalk holds it up like a wall where the wind and rain beat other sorts flat. Yield, which is enormous, some say 70, 120, 150, and others 200 bushels per acre.

IF WE HAD MORE ROOM WE WOULD TELL YOU MORE

Price of Moore & Simon’s Famous Black Norway Oats

Large pkge. 15c., lb. 40c., postpaid; by freight or express, pk. 75c., 1/2 bush. $1.00, bush. $1.50, 3/4 bush. $3.50, 3 bush. $6.75, 10 bush. $13.00, 20 bush. $25.00, 25 bush. $30.00.

215 BUSHELS PER ACRE

Solomon Cutter, Genesee Oli., N. Y., says: "Your Famous Black Norway Oats was a sight to behold, standing fully four feet high, a solid mass of grain. The straw was so stiff that not a stem lodged. It yielded at the rate of 215 bushels of 32 pounds per acre. I congratulate you warmly upon your remarkable success in producing farm seeds of such superlative merit."

SPECIAL QUOTATIONS FOR LARGE QUANTITIES

BROMUS INERMIS

THE UNCROWNED KING OF GRASSES FOR ALL SOILS

It is a grass for drought-stricken countries, the grass for the great West, the grass for New Jersey, Maryland, Virginia and the poor lands of the entire South. Yes, for each and every State of the United States; in fact, anywhere and everywhere where you are apt to have long siege of dry weather; but one must not think that it does not do well on soil where there is plenty of moisture, for on such soils its magnificent, luxuriant growth comes into full play.

This grass comes to us from Russia. It grows a tremendous crop, yielding all the way from five to seven tons of excellent hay per acre, as you can cut same two or three times a year. It grows from two to five feet tall. It surely will pay everybody to plant it bountifully. Nothing that we ever had did better or pleased the public at larger better than Brome Inermis. It is very nourishing, equally as nourishing as any other grass, and can be satisfactorily compared with Timothy or Orchard Grass. We recommend it for trial, and give our unqualified endorsement. All stock eat it greedily.

The Experimental Grass Station at Garden City, Kan., says: "We have grown Brome Inermis successfully, and we think it the coming grass. It is green from the middle of March to about November."

Prof. Shaw, of Minnesota, pertinently says: "This grass cannot be obtained too soon by the farmers of the Northwest."

It is the great grass for hot, dry climates. It will grow on all kinds of soil, even on yellow sand, and is equally good for pasturing, curing into hay or cutting green. All kinds of stock eat it readily, and it is very rich in nutritive values. Perennial 2 to 6 feet high, flowering in June and August.

The Department of Agriculture says: "This is the best grass that we have yet been tried at this station. When properly sown it catches well, giving a good sod the first year; in favorable seasons a fair yield of hay may also be obtained. Up to the present the best results have been obtained by sowing plenty of seed on well-prepared ground as early as possible in the spring. From two to two and one-half bushels an acre will be sufficient for the first year of grass, depending on the season and condition of the soil. The forage, though coarse, is of excellent quality and, under ordinary circumstances, a large amount of early spring and fall feed may be obtained, in addition to a small yield of hay. The grass has endured drought perfectly and has never winter killed at any point in the West."

On our own fields, where we have now cultivated same for the fourth year, the Brome Inermis attains a height of 5 to 6 feet. It is extremely luxuriant and furnishes an endless amount of magnificent hay. When we were in Europe we were most remarkably impressed with the future of this grass. In Russia, where same is at home they cut it three times a year, and it is not an unusual thing to get nine tons of extremely nutritious hay per acre; in addition to this, good pasturage late in fall. Now, what it can do in Russia we are sure it can do even in a greater measure here in America, for we have soils that are admirably adapted to it. We have grown, in a small way, Brome Inermis and Alfalfa Clover together, and have made a mixture which we call our Bromealss Mixture. This is composed of Alfalfa and Brome properly mixed to give the best results. It is a mixture of an agricultural college in Canada or America that has tested same but inundates it empirically. You will do the same by giving it a trial, but by all means buy our American grown seed. Culture is the same as in sowing Orchard, Perennial Ry e or Kentucky Blue or Red Top. You should sow early in the spring and not sow less than 25 lbs. per acre—40 lbs. is better. Now plenty of seed at first sowing and you will get a big, heavy, splendid start at once that will last for years. Price of Brome Inermis Splendid, clean, heavy, American grown seed, lb. 25c.; postpaid, 30c.; 10 lbs., by freight, $1.75; 100 lbs. $15.00.

MILLETS

HUNGARIAN (Panicum Hungaríense). It germinates readily and with-stand drought. It has numerous stalks and bears a foot in length; the plant, in strong soil, reaching a height of three feet. One acre makes excellent hay Sow a bushel to the acre. Qt. 10c., bu. 46 lbs. $1.50.

GERMAN, or GOLDEN (Panicum Germanicum). This is an improvement on Hungarian Grass if cut just as the leaves are turning. Under some circumstances it will yield half as much more to the acre. On one occasion, we at no mowing cut and made thirteen tons of dry clean hay from three acres. Sow one bushel to the acre. Qt. 10c., bu. 40 lbs. $1.75.

EGYPTIAN, or EAST INDIA PEARL MILLET. Grows from 8 to 10 feet high. When cultivated for fodder sow in drills three feet apart and thin out in rows to one foot apart; sow 3 to 5 lbs. per acre. 10c., 15c., 20c., enough for one acre, $1.45, bu. $4.00. By mail, postpaid, pt. 30c., lb. 50c., 25 lbs. 5.00. By freight or express.

CLOVERS

BOKHARA (Melilotus Leucanthus). Affords an abundance of excellent food for bees throughout the entire season. 3⁄4 lb. 15c., 1 lb. 40c., postpaid. By freight or express, Lt. 50c., 10 lbs. $1.00.

LUCERNE, or ALFALFA (Medicago Sativa). Succeeds in nearly any good soil, and lasts for a number of years, producing three to four cuttings annually, as a season of severe drought is always fresh and green, because the roots extend deep into the soil. It grows two to three feet high, with luxuriant blossoms. It should be cut when first commencing to bloom, or it may be cut and used as ordinary clover hay. It increases fertility of the soil. Sow 8 to 10 lbs. per acre. For 10 lbs., postpaid: by express or freight, Lt. 50c., bu. $1.25.

ALFALFA CLOVER (Trifolium Hybridum). The hardest of the clovers and is sometimes called Giant White Clover. It is a perennial, very hardy and permanent pastures or hay. Its superior pastures is much liked by cattle. Blossoms flesh-colored, sweet and fragrant, much liked by bees. Sow six lbs. per acre. Lt. 25c., 1 lb. 2.00, 25 lbs. 20.00.

WHITE DUTCH CLOVER (Trifolium Repens). The best variety for lawns, as it forms a close heritage and remains green throughout the season. Sow six lbs. per acre when sown alone, half the quantity when sown with other grasses. Pt. 5c., 1 lb. 15c., 1 bu. 40c., by mail, postpaid, By freight or express, Lt. 50c., 1 lb. 75c., 25 lbs. 5.00.

SCARLET, or CRIMSON CLOVER (Trifolium incarnatum). It is the source of an unfailing supply of manure. In fact, it solves the problem of deep mowing; it is the great nitrogen gatherer and economizer in the use of fertilizers. Improves poor lands and restores fertility that has been worn down by excessive cropping. Crimson Clover grows at all times except when the ground is frozen. May be planted in spring, summer and fall. Splendid for re-seeding Red Clover that has been winter-killed. Our seed is grown in Delaware and will give much better results than the imported.

PRICE—SUBJECT TO MARKET CHANGES. Lt. 15c., (Lt. by mail postpaid, 30c.), 10 lbs. $1.25, pk. $1.00, bu. $6.00, sack of two bushels for $11.75, by freight or express.

RED CLOVER, First quality, at lowest market price.

MAMMOTH PEA VINE, or SAPLING CLOVER. Market variable. Pt. $2.50, but frequently sold by Express 50c.

THYMIC (Phleum pratense). We offer a particularly "choicest" sample. Price subject to change without notice. Pt. 15c., bu. 45 lbs. $2.50.
Harding's Hardy Upland Alfalfa

It is now possible to grow Alfalfa on any kind of ground, high or low, rolling or flat, sandy or clayey. Herefore Alfaalfa only grew to advantage on soil well supplied with moisture and it was a rare thing to have good crops of it on high ground. By years of selection and long continuous cropping on high ground in Northern latitudes, Mr. Harding, of Northern Kansas, has produced a strain of Alfalfa that produces enormous crops on high rolling land, such as the states of Pennsylvania and New York and Minnesota as well as on the rich bottom lands of the West and South. Yes, every state can grow from two to four crops a year if Harding's strain be used. It is tough, acclimated and hardy, and in our trials we have found it superior to the Turkestan Alfalfa. Harding's Hardy Upland Alfalfa, to our knowledge, can only be had from us, and as it is worth from $3.00 to $5.00 per bushel more than the ordinary kind, just give it a trial and see for yourself. It is not a new and untried thing; more than ten years of cultivation have demonstrated its worth for all kinds of lands, hay, pasture and a soil enricher.

The most valuable forage plant. It requires a deep, mellow soil, the richer the better; newly broken sod does not do so well. In the driest and most sultry weather, when every blade of grass withers, Harding's Upland Alfalfa is as fresh and green as in the spring, as its roots go down ten to twenty feet to the water table, and is deep rooted. There are well established trials where the roots have penetrated the soil to a depth of 50 feet and extended into a tunnel beneath, as shown in our engraving. Although a prodigious yield, it does not exhaust the soil, but rather improves the ground by the decay of its long roots, and converts it into rich ground, full of vegetable matter. The seed may be sown early in the spring, as soon as the frost is out of the ground, in order to catch the spring rains, as it needs moisture to germinate. In localities where irrigation is used it can be sown successfully at any time during the summer months. In our state it is not advisable to sow later than the first part of September on account of early frosts, as the young, tender plants, not having sufficient roots, would succumb to our cold winters. Late fall sowing, saying in October or November, is not advisable in localities where wind storms are prevalent during the winter and early spring, as the seed will be blown a way before it has a chance to take root. Most of our successful Alfalfa growers prefer sowing the seed broadcast, while others are more in favor of drilling it in. If the latter plan is pursued, we advise drilling the seed both length and cross ways, as the quantity of each way, in order to secure a more even stand. There is a great deal of discussion whether the seed should be sown by others or with their own, both methods being strongly advocated. Owing to the fact that Alfalfa seeds are small, the majority of growers sow the seed by itself, provided it can be put in the ground early in the season, but when the sowing is delayed we advise to sow oats or barley with it to afford some protection to the young plants against the scorching rays of the sun in midsummer. Another circumstance has to be taken into consideration. In some localities with grains, by all means, a crop of barley or oats: they can be raised as well as a crop of weeds. After the grain has been cut, and this should be done just as early as possible, it will be found that the Alfalfa has made such growth it can be cut for hay, and if left to itself, the Alfalfa will care for itself. Irrigate immediately after the grain is cut, and the Alfalfa will push out fresh shoots at once, and will furnish a light cutting in the fall, or at least good pasture. It is more difficult to establish the first year, but will, when once started, produce a crop of hay and even four crops are cut yearly, averaging five to seven tons to the acre. Now never sow less than twenty-five pounds of good clean seed to the acre, for thin sowing produces thick and coarse stalks, which are liable to stand by stock. The Alfalfa will thrive on an altitude of about 1,000 feet above sea level, but higher altitudes are not likely to thrive. The proper time to cut it is when the plant is in full bloom. The seeds ripen to perfection, and are a source of considerable wealth to our farmers. If intended to raise Alfalfa for the seed, twelve to fifteen pounds is plenty to plant an acre, as it has not already been tested. For hay crop sow twenty-five pounds to the acre. When you buy get the best. Price of Harding's Hardy Upland Alfalfa, by mail, large pkg. 10c., lb. 75c.,; express or freight, 1b. 90c., 10b. $25, 50b. $50.

THE WONDERFUL PENCILLARIA

This remark was heard everywhere, at the state fairs, agricultural shows, farmers' institutes, and, in fact, wherever wide-awake, intelligent farmers congregated, and there has never been a plant which awakened such widespread interest. Fully 225,000 farmers experimented with it last year and 2,000,000 this year. It is a wonderful plant and one of the most useful agricultural crops. It is extensively grown. The plant is a good forage plant and a deep rooted plant, and as such made multitudes of friends. It produced immense yields in spite of the worst weather. Reports came from sections where the corn crop was destroyed by hot winds, but Pencilleria laughed at the drouth and gave three to seven cuttings of fodder during the season. In other places the soil was too poor to be massed out by the wind, and Pencilleria went right ahead and made a prodigious growth.

STOOLING HABIT

Everyone is greatly astonished with the stooling nature of Pencilaria. While it begins stooling at once, still it is after being once cut off that this is especially prominent, many farmers reporting fifty, sixty-four, sixty-five, sixty-six, sixty-seven, years, and even as high as seventy-five years from one seed, each of these stalks growing seven to fourteen feet high and covered with large succulent leaves.

95 TONS PER ACRE

If there is any other plant in existence which will afford such a yield we do not know what it is.

QUALITY

In quality we claim that Pencilleria is much superior to corn fodder. This is shown by the cattle leaving corn to go to the Pencilleria. It is not coarse like corn fodder, but takes the place of hay, with better results and less expense.

HOW TO GROW

Sow in drills twenty-four to thirty-six inches apart, dropping three or four to each foot of row, and in this way three pounds will sow one acre. The seed should be covered one inch deep. Do not plant until after the last cutting, in this locality about May 1st. Cultivate between the rows. The best time to cut Pencilleria is when two to three feet high, and later cuttings when three to six feet high. In this way, it makes four to five cuttings per year.

WHO NEEDS IT

This season stockmen will especially need a quick growing forage plant and they should try Pencilleria. The farmer who wants an immense crop of hay should try Pencilleria. The dairymen who have hundreds of cows and the persons who keep only one should both try it, as it is claimed that one-fourth acre will supply a substantial depot of fodder to keep a cow in good condition throughout the summer and fall, and sufficient hay can be made from one-fourth acre to supply a cow through the winter. Stock is least to be sure to grow early if you want it, and of course you must. Price for twenty-five pkg. 25c., lb. 90c., 10b. $25, 50b. $50, or more 40c. per lb. 1b. by mail 8c., per lb.
M. & S. SPECIAL GRASS MIXTURES

CAN BE SOWN IN EITHER SPRING OR FALL.

FOR HAY AND PERMANENT PASTURE.

Our Special Mixture is prepared to meet the average need. It is made up of the grasses best calculated to afford an abundant and nutritious food supply for stock. Its formula is based upon successful experiments. For all ordinary permanent pasturage it will be found entirely satisfactory. If your fields are old and worn out, it will pay to plow up and seed again, when you will soon be cutting heavy crops from our special Permanent Hay and Pasture Mixtures. You will be able to cut two good crops each year, whereas from Timothy only you can cut but one.

It is often difficult for our patrons to select proper grasses and to mix same thoroughly for their use, and it thus comes that we are annually requested by thousands of our friends to select and mix for them sorts adapted to their soil and climate. This, from our large experience in the culture, nature and requirements of grasses for pastures and meadows, we can often do more satisfactorily than they. When customers wish for a luxuriant growth for either meadow or pasture, it is paid the every time to buy our grass mixtures. Our friends will be surprised to see the unusual satisfactory results obtained from our special mixtures. Our special mixtures consist of the following varieties: Natural Green, Orchard, Meadow Foxtail, Sheep’s Fescue, Rhode Island, Creeping Bent, Hard Fescue, Sweet Scented Vernal (True Perennial), Meadow Fescue, English Rye Grass, Italian Rye Grass, Red Top, etc., including a suitable mixture of clovers blended in proportions which, we have found from actual use, give the most satisfactory results to our many customers.

On ordinary fertile soil, three bushels of this mixture is sufficient to seed an acre, but where the land is poor a larger quantity will be necessary. Taking one soil with another, a fair average would be three bushels to the acre. Please state, in ordering, whether your ground is high or low.

For Hay and Permanent Pasture for Light soils. $2.50 per bushel of 18 lbs.
20 bushel lots, $2.45 per bushel.

Hay only. Specially recommended where a large hay crop is desired.

Pasture only. A mixture which will stand close cropping without injury.

SPECIAL QUOTATIONS FOR LARGE QUANTITIES

To those accustomed to sow Timothy and Clover, the quantity of seed we recommend will seem large, but the seeds of these permanent grasses are quite different from Timothy, being much larger and lighter. Our experience not only on our own farm, but on hundreds of other farms convinces us that, unless under exceptionally favorable circumstances, satisfactory results cannot be obtained with less seed than we recommend.

That the superiority of these Mixtures over Timothy and Clover is an assured fact, we refer to the reports of our customers and the Agricultural Press. Thousands of the most progressive farmers, during the past few years, have seeded from ten to hundreds of acres with these mixtures with most satisfactory results, and we may mention that several of the largest Stock Farms in the United States, after most careful investigations and experiments, recently ordered from us sufficient to seed down all their ground.

COW PEAS

They should be sown in the month of May or June, at the rate of one to one-and-a-half bushels to the acre and plowed under as soon as they have attained their full growth. In the South the Cow Pea is considered superior to clover as a green manuring crop; it also makes a splendid green food or a most nutritious hay. While this crop is very largely grown wherever known, with the results attained from it, the wonder is that it has not grown ten times as much as at present. It is a sure and cheap means of improving poor soil. The Cow Pea has the power to extract the costly nitrogen from the atmosphere. The best varieties of Cow Peas are the Wonderful and Black Giant. Price, qt. 25c., pk. 75c., bus. $2.25 for each variety.

AFRICAN MOSQUITO PLANT

BAINISH THE PESTS FROM ALL THEIR HAVENS

Travellers in the interior of Africa have long noted how exempt were the bodies and dwellings of certain races in the interior of the "Dark Continent." It was acertained that the natives bathed their bodies in a tea brewed from a certain plant and kept small driedbundles and sometimes living specimens of this certain plant in their abodes, the pleasant odor of which is continually kept all mosquitoes at a safe distance. The plant grows readily in pots or in any kind of soil. It is ornamental, and possesses a delightful odor. Cultivate same as any

PLT. 20c., 3 pks. 25c., oz. 50c.

FERTILIZER FREE!

Science has discovered and learned to use fertility terms that make big crops. The are sold in a form called Nitro-culture; 1$5 worth often increases yield per acre two to ten times. Insures immense alfalfa, clover, peas or bean crop first year—insures heavy corn, potato or grass crop from same soil (FERTILIZED FREE by the germs), second year. Only a few minutes' extra work required. Results guaranteed. See page 86.
NEW ASSINIBOIA FIFE SPRING WHEAT

This remarkable new spring wheat from the Assiniboia Valley does the best throughout the spring when growing country. It is a remarkable semi-hard spring wheat, yielding large crops and is free from rust. Our millers here pay more for it than any other sort. It is fully equal to the old wheat and yields a very much larger crop. It is known to be a hard winter variety in the western States, and the great milling firms use it for their highest grade flour, and it has been the most reliable variety one year with another, yielding a good crop where other sorts fail. Our seed this year is very fine and we are sure it will please our customers. **SO BUSHELS PER ACRE**—Reports of enormous yields on this great flattening wheat, this splendid food and flour producing, makes one want to buy wheat, etc., reaching in many cases **80 bushels per acre**. It is reseeded and you will find it absolutely free and clean, clear of all cuts and other weed seed. Price per bushel **$1.35**. Our farmer friends will do well to give it a thorough trial this season. We know they will like it, and we know it will pay them to pay double the price we ask for it.

**SAND or Hairy Winter Barley**

**15 TONS FORAGE ACRE**

**Vicia villosa** succeeds and produces good crops on poor soils as well as on good land; grows to a height of four to five feet. It is perfectly hardy throughout the United States, remaining green all winter. Our extensive trials show:

1. That it is a wonderful, rapid grower, and gets on with little moisture, and thrives.
2. That it withstands cold. Sand Vetch can be sown in April and May, and sown in the fall, and the next spring, where sheltered, will come forth and green and vigorous, and will form green herbage for cattle at ones.
3. That it is a tremendous yielder, producing all the way from **5 to 7 tons** of the very best hay imaginable per acre.
4. Culture. It is a great stocker therefore but **45 to 60 pounds** are sown per acre, either broadcast or in drills three feet apart. To get the best results from it, sow about one-half bushel of **Rye, Oats or Barley** with it, to furnish support for the seed. This will make good, rich soil it yields enormous crops of green fodder, running from **10 to 15 tons** per acre. It is also a remarkable grower on sandy and thin land. Frost-tolerant. Heat of the sun will soon cover the ground with a complex network, furnishing a tremendous amount of _luxus_. As a fertilizer it has but few equals, as it enriches the soil very quickly, and can be plowed under twice annually. When intended for hay, Sand Vetch should be left standing until the flowers are **3 inches** high. The seeds of the plants become well formed. The crop is then ready for the mower, and will yield, according to the soil, from **3 to 6 tons** of hay per acre. This is a hardy, fast-growing, and fertile variety, yielding from 3 to 6 tons of hay per acre. This is a hardy, fast-growing, and fertile variety, yielding from 3 to 6 tons of hay per acre. The vines are similar to peas, being 3 or 4 feet tall, and much more thickly clad with leaves and side stems, which furnish succulent feed. Individual plants will make a ten-foot growing in August and September, and the fall crop will be even more vigorous. As a forage crop it is more suitable for late cutting to prevent soil washing during winter and early spring, thus effecting a great saving of soluble mineral fertilizers which are lost in the winter. In the United States it is used extensively, owing to its adaptability to withstand severe drought, heat, and cold. The vines are very similar to peas in form, and more than twice as much as is needed for feed. Under favorable conditions, the crop of this Vetch is equivalent to putting into the ground **$60 to $68** worth of commercial fertilizer to the acre. It is one of the finest winter forage plants to start growth in spring, covering the ground with a heavy crop early in May. Every dairyman and stock-breeder in the United States is using it extensively, both for hay and stock feed, and may be fed with safety to all kinds of stock. Stock is at **$1.10 per bushel**. One ton with a half bushel of hay, oats or barley. Price of our superior grade **$1.00 per bushel.** For freight or express, **$1.10** to **$1.25 per bushel.** For freight or express, **$1.25 per bushel.** For freight or express, **$1.25 per bushel.** For freight or express, **$1.25 per bushel.** For freight or express, **$1.25 per bushel.**
Hood's Eureka Ensilage Corn.

All friends of good fodder corn will undeniably be interested in this grand new variety from Mr. Ira W. Hood, of Connecticut, a corn specialist of world-wide reputation.

We have been in the seed business many years; we have spent the greater portion of our lives in improving and helping to better the conditions of the farmer, and in all these years we have never offered anything that has given such tremendous satisfaction near and far as Hood's Superior Eureka Fodder Corn. For years our fodder corn has stood at the head of all varieties of fodder corn. There is reason for this. We grow our fodder corn for seed purposes. We keep sorting and weeding out, improving the type, improving its earliness and at the same time increasing its leafy, bushy, vigorous growth so that we have today, without any question, the very best heavy yielding, large growing, early, rich, nutritious fodder corn on earth! This statement may seem keen and strong, but there are 100,000 farmers scattered all over the United States who will back every word that we have said regards same.

For years we have been experimenting with corn for fodder and ensilage purposes growing every obtainable sort, and carefully testing its real value as a food product believing right along that rich quality is more important than large yield, but, at the same time, looking for a sort combining both, that is, big yield and rich nutritive quality. For this purpose we wanted a rapid-growing, early, short-jointed, tall corn with a great abundance of leaves and tender stalks, rich, juicy, sweet, sugary flesh in the stalks, with a tendency to mature several ears, as a corn of this nature furnishes more tons of green fodder per acre, and almost double the nourishment that common corn gives. This is what we have after, a corn maturing even in the north, good ears, fine, short-jointed stalks and a prodigal supply of leaves, and this was obtained by careful selection, in Hood's Eureka Fodder or Ensilage Corn. It is immensely ahead of, and indeed, it outstrips all other sorts in yield and twice in quality. All kinds of farm animals eat it greedily. Its yield of fodder is simply prodigious. 100,000 pounds per acre is one record, with stalks from 12 to 21 feet high. It is just the thing to make every farmer money. Price of Hood's Eureka Ensilage or Fodder Corn by freight or express, pkt. 15c., qt. 15c., ½ pk. 35c., pk. 75c., ½ bush. $1.10, bush. $4.90, 2½ bush. $14.75.

The Eureka Kitchen Garden and Hot Bed Seed Drill Works better and faster than hand work. It opens the furrow, drops the seeds and covers.

HAVE YOU A HOT BED? It is the only machine suited to sow it right. Sows up close to the sides in straight rows. Sows the smallest packet of seeds as well as a large bulk. By using this drill you save seed; you save time, you stand in an upright position, the work is easy, the plants better. Price is only $1.00. Delivered by express, $1.50.

AUSTIN'S COLOSSAL YELLOW DENT

A wonder in large size ears and robust growing fodder. This variety was first grown by us in 1902, and we were so well pleased with it that we at once decided to offer it to our customers and now have it in a greatly improved form. It is a wonderfully productive sort in both grain and fodder. It has a very striking personality and is decidedly different from all other sorts. It is adapted to a great variety of soils, the heavier the land the better. It requires fully 150 days to reach maturity, and 120 bushels per acre is a good average yield, although many of our customers report yields much above this. The kernels are very attractive looking and are easily husked, grains of a rich yellow color, firm and tight and fill out to the very tip of the cob.

One customer reports a yield of 80 bushels from ½ peck of seed. Another writes, "It is the largest and best corn I ever saw." Another customer in Ohio says, "It is a world beater." A large corn grower in Iowa writes that "It yields more than double any other sort ever grown there."

John Strong, Lebanon, Pa., writes he "grew many ears from 18 to 20 inches long, many farmers came 20 miles to see it. It is a wonder." Price. 1b. 30c., 3 lb. 75c., by mail, postpaid; by freight or express, bags included, qt. 15c., ¼ qs. 45c., pk. 75c., ½ bush. $1.15, bush. $2.35, 2 bush. $4.35.
FIELD CORN

THE LATEST IMPROVED VARIETIES ONLY ARE
THE MOST PROFITABLE SORTS TO GROW

M. & S. POOR MAN'S CORN

Possessing Magnificent Properties, Splendid Qualities and Tremendous Possibilities.
The Most Valuable New Field Corn in the World To-day.

This great corn is the result of a series of crosses and subsequently by a continuous systematic selection, accumulating and perpetuating the superior merits of its parents, we have evolved a superior new variety, which we take great pride in introducing to all growers of this important cereal in the United States and all foreign countries. We have named it the Poor Man's Corn because it will produce more corn on poor, light soils than any kind now in cultivation, thus greatly assisting the poor farmer who has little money with which to buy fertilizers. In strong, rich soils it has no superior. The ears are of good size, handsome, with large, deep grains of a rich orange color, and very small red cob, rarely producing less than two ears to the stalk. Husks and shells easily. It is also adapted to a greater variety of soils than any other varieties, producing unusually well on light or heavy land, where other varieties would not thrive. Has matured well ripened corn in 85 days, planted May 25th. One hundred and thirty bushels shelled corn to the acre are common on good corn ground, with good, but not extra, cultivation. Moreover it commands the highest market price. It is destined to be planted largely. You should be among the first. Pkt. 10c., qt. 20c. (by mail 40c.), 1/4 pk. 40c., pk. 75c., 1/2 bu. $1.15, bu. $2.00, 2 bu. $3.50.

KANSAS GOLDEN KING EARLY DENT CORN. When we have a really good new article—an article that stands as did King Saul of old, head and shoulders above his compeers—we like to make the fact known, and we do so with pleasure, for a good, new article is worth ten of poor, old sorts! We are sure that this variety of Corn—brand new, as it is—will prove the greatest heavy-yielding corn in America! It will prove a boon, a bonanza, a great-paying gold mine from the start. No need of waiting years for a return. No! This corn, planted in May, will give you inside of four months $50.00 for each and every acre you plant! Do you wish more? This glorious corn combines solid merits, and at the same time commands the highest market price. We are confident that we have attain this end in the Kansas Golden King Early Dent Corn from the Great Elk Horn Valley, Kansas. It has the greatest advantage of yielding well on thin land, comes early, will mature in from 90 to 95 days, stalks vigorous, growing from six to ten feet high without exhausting the soil, and as it roots deeply, it will stand the drought better than any other sort. The grains, as shown in the illustration, are unusually deep, and when dry 51/2 well-selected ears will make a bushel of shelled corn. This variety will yield from ten to twenty bushels more corn to the acre than any other sort. No matter whether planted on high or low ground, its yield is equally marvelous. From 80 to 140 bushels per acre is not an uncommon yield on good ground. It is sure to please all who plant it. Price, carefully saved for seed, pkt. 10c., lb. 50c., 3 lbs. 75c., postage paid. By express or freight, qt. 15c., pk. 75c., 1/2 bu. $1.15, bu. $2.00, 2 bu. $3.50, sacks free.

LEONARD SANDERS, Quincy, Ill., writes regarding this corn: Your Kansas Golden King Early Dent Corn made a splendid yield, considering the unfavorable season. 140 bushels were ready to crib almost thirty days before our home-grown seed. It has—most all of it—been spoken for, for seed. Now, then, the way to make money is to follow Mr. Leonard Sanders' example. Plant new varieties of seed corn, ears, potatoes, grasses, etc., and sell them to your neighbors for seed.

STEVENS' EARLY HICKORY KING CORN. This new early white dent corn has the largest grains and smallest cob of any corn yet introduced. The grains are so large and the cob so small that a single grain will nearly cover the diameter of the cob. Of strong, vigorous growth, the stalks take a firm hold in the ground and stand upright, resisting the severe storms. The stalks generally bear two good ears each, and occasionally three. It yields splendid crops on light soil, and is undoubtedly the best and most productive white early dent corn in cultivation. This corn is especially well adapted to light or thin land, being less exhausting to the soil than any other. All kinds of live stock eat it in preference to any of the yellow dent or flint sorts. It makes a very sweet, nutritious fodder, either green or dry. Large pkt. 10c., lb. 35c., 3 lbs. 50c., postpaid, by mail. By express or freight, qt. 15c., 1/2 pk. 35c., pk. 55c., bu. $1.75, sack of 2 bu. $3.25, sacks free, to bu. or more $1.50 per bu.
...Double Your Corn Crop...

ADVANTAGES OF CHANGING SEED CORN

There is perhaps no other crop that we raise that is so much benefited by the introduction of fresh seed from time to time as is field corn, provided the change is to a well selected stock. Our best customers will not plant their own raising of seed at all, but buy of us every year. They can grow nearly double the crop on the same land that they can from their own raising, and of a better quality and more salable in the markets. "Change your seed" is the motto of all prosperous farmers.

Golden Superior Field Corn

MAGNIFICENT VARIETY OF SPECIAL MERIT ADAPTED TO ALL KINDS OF SOIL

Thought by many to be the handsomest variety in the world, it came from a carefully selected stock of an expert grower, who has had seventeen years' experience. It has taken four premiums at the Ohio State Fair. It is truly a big sight to see a lot of it, either on the ear or shelled. In stock it is yielded over eighty-five bushels of shelled corn per acre, and the past season yielded over one hundred bushels of shelled corn per acre. It is a wonderfully strong grower and the corn very large and handsome for a corn that is one hundred and forty-five to one hundred and fifty days. It is one of the most beautiful colored, long, eared yellow corn in the world, and the grains are long, making it very handsome in appearance, and, in fact, it will sell on sight to any man who takes price in farming. You can sell seed of it to your neighbors at a fancy price. It has been proved true all over the land, and I am convinced it will pay me well to change my seed every other year.

GAINED 310 BUSHELS

John Powling, Chester, Pa., writes:—I tried your advice last season and planted 10 acres of your Golden Superior Field Corn and it yielded me 310 bushels more than ten acres of similar ground planted to Cloudsent, the latter being my own seed. I am convinced it will pay me well to change my seed every other year.

North Dakota Extra Early Prizetaker Dent Corn

This is without doubt the earliest yellow dent corn in cultivation, bright orange color, short, leafy stalks growing from 6 to 8 feet high, medium-sized ears, small red cob, long deep grains, very rich in oil and starch, and the most prolific of the earliest sorts extant. It makes better fodder than any other known variety and all stock eat it with evident relish. It ripens earlier, dries out quicker, stands the drought better, and will yield more No. 1 shelled corn than any other early dent. We believe a yield of 110 bushels per acre is possible with this variety everywhere, and 8 to 10 bushels more in places where corn is not grown as well. The gold corn is a 100-lb. sack of the 100-lb. sack per bu. 3.75, to bu. or more 3.75 per bu. It will stand the drought to a remarkable degree. Seventy pounds of ears have shelled sixty-four pounds of shelled corn. It will bring the highest market price. Makes beautiful meal. Pkt. 10c., lb. 90c., 3 lbs. 75c., by mail. Postpaid. By freight, qt. 15c., 4 qts. 40c., pk. 75c., $1.15, bu. $2.00, sack of 5 bu. $5.75, to bu. or more $5.75 per bu.

NOTICE.

Prices on all Farm Seeds Subject to Change without Notice.

The safest way—if you require considerable amounts of Farm Seeds, will be to send us a list of your actual requirements, and we will be pleased to quote lowest market prices by return mail.

100 DAY BRISTOL. Prices of extra selected seed: Pkt. 10c., ear 25c., lb. 30c., 3 lbs. 75c., postpaid, by mail. By express, freight, shelled, pk. 75c., bu. $1.75, sack of 2 bu. $3.25, 10 bu. and over $3.50 per bu., sacks included.

The True Improved Leaming Corn

Previous to our introduction of North Dakota Extra Early Prizetaker Dent Corn, the True Improved Leaming has been considered the earliest Yellow Dent in cultivation. The ears are large and handsome, with deep grain of deep orange color, small red cob, stalks grow to medium size (not large), with few suckers, producing two good ears in each stalk; husks and shells easily. One hundred and thirty-six bushels of corn have been grown to the acre on good corn ground. It is also adapted to a greater variety of soils than other varieties, producing unusually well on light or heavy land, where other varieties would not thrive. Prices, by mail, postpaid, pkt. 10c., lb. 30c., 3 lbs. 75c., by freight or express, bags included, qt. 15c., peck 50c., bush $7.00, 10 bush and over, $8.75 per bush.
ARTICHOKE

Sutton's Colossal Artichoke

It is without question the greatest root hog fattener in the world. Its yield is so enormous, bordering on the fabulous, that one can scarcely believe the quantity that can be grown from an acre of our Colossal Artichokes. Farmers who have given them a thorough trial have reported yields of 400 to 1,300 bushels per acre. It is too strong a hog feeder for any farmer to plant a barrel or more this season. Plant the Artichokes where you can allow them to remain, and your hogs, if turned into them, will grow fat and healthy, and will not know what sickness is. They need not be dug up in the fall; the hogs can be turned in on them, and they will help themselves to the roots for them. One acre will keep from 20 to 30 head in fine condition from October until April, except when the ground is frozen too hard for them to root. They are said to be a preventive of cholera and other hog diseases; and they are also highly recommended for milk cows, increasing milk and milk fat quality. They are adapted to any soil where corn or potatoes can be grown. One barrel will seed an acre, though we prefer 8 barrels on 2 acres, and they should be cut the same as corn. As their size is a cut above the rest, and the product is a giant among corns, planted in April or May, in rows 2 feet apart and 1 foot in the rows, and covered about 2 inches, they should be plowed under when the plant is about a foot high, at which time the old tuber has decayed and new ones are formed. They are not injured by freezing while in the ground. 1b. 35c., per 250 lbs. $1.00, postpaid. By freight or express, qt., 65c., pk. 90c., bu. $2.50, bbl. (enough for 1 acre), $7.00, 2 bbls. $13.00.

THE BEST VARIETIES OF POP CORN

QUEEN'S GOLDEN. The stalks grow six feet high, and the large ears are produced in abundance. Its quality and handsome appearance make it one of the most popular varieties. It is deliciously succulent. It pops perfectly white, and a single kernel expands to a diameter of nearly one inch. Per pkt. 10c., per 20c., qt., 50c., bbl. $5.00, postpaid. By express. 25c. per qt., 4 qts. 65c.

WHITE RICE. The most widely known variety; very popular for puddings. Selected seed. Per pkt. 10c., per 20c., qt., 50c., bbl. $5.00, postpaid. By express. 25c. per qt., 4 qts. 65c.

SILVER LACE. It produces so that a single kernel will produce three to four stalks. The ears are five to six inches in length, well filled out to the end with smooth, round, metallic white grains. Price of ears 10c. each, or 4 for 25c. postpaid. Shelled, 1b. 20c., per 250 lbs. 40c., per qt., 4 qts. 65c.

CYLINDER CHURNS

Made of the Best White Cedar. Combines more advantages than any other churn made, dasher quickly removed for cleaning. Will produce better ice in one-half the time and with less labor than any other. Light, neat, strong and durable. The churn for every family. Price for each.

No. 1. Will churn 2 gallons............ $1.75
  2  "  " 4  .........  3.25
  3  "  " 6  ..........  5.00
MOORE & SIMON'S SELECT LIST OF

EXTRA QUALITY FLOWER SEEDS

QUALITY—PRICES. Do not confound our high quality Flower Seeds
with the usual imported grades sent out by other houses, which are grown cheap, sold
cheap, and are in every way expensive to the buyer, our seeds are cultivated with a
view of obtaining the highest possible mark of perfection, and to supply a class of people who want nothing but the very best. We have made the price as low as pos-
sible consistent with the high quality of all the seeds herein offered.

We have gone to much trouble and expense to improve the leading specialties
such as

Asters, Cinerarias, Mignonette, Pansy, Phlox, Petunia,
Primulas, Calceolarias, Stocks, Verbenas and Zinnias

Our list has again been carefully revised and all inferior varieties discarded.

Purchasers will find our superb mixtures of the above to be of unexcep-
tional merit, which cannot be obtained elsewhere.

A LIBERAL QUANTITY of seed will be found in all our packets, much
more, in fact, than sent out by other houses.

A TRIAL ORDER will convince anyone of the high quality and superior-
ity of our varieties. Florists, especially, will derive great benefit from buying
their flower seeds from us.

Florists will find our seeds of unequalled quality.

PREMIUM SEEDS—CLUB-RATES—DISCOUNTS

Everybody Needs Seeds

So if you will go to your neighbors, show them our cata-
logue, they will gladly give you their orders for our seeds.
In this way you can make money, besides get your own
seeds free. We advise the formation of large clubs, and the
above discounts will pay anyone handsomely for a little
effort in that direction.

Full cultural directions will be found on nearly all the
packets.

ADORIS

Adonis Golden Queen.

AGERATUM

One of the leading plants for beds or borders and very useful where cut flowers are in demand; in bloom the whole summer; also good for winter blooming; annuals.

Lady in White. Large flowering, pure white, see also var. Pkt. 30c., trade pkt. 10c.

Blue Gem. Beautiful, large, dark blue flowers; finest blue variety for bedding and pot culture; 6 in. Pkt. 30c., trade pkt. 10c., 10c.

Golden Queen. Handsome, large, yellow flowers, lasting a long time in bloom; pretty, fine-cut foliage; hardy perennial; (see cut); 3 ft. Pkt. 50c., trade pkt. 10c., oz. 25c.

White Gem. The best white variety for bedding or pot culture; 6 in. Pkt. 30c., trade pkt. 10c., oz. 25c.

Dwarf Blue. 8 in. Pkt. 5c., trade pkt. 10c.

AGROSTemma

(Rose of Heaven)

An attractive, free-flowering, hardy perennial of easy culture, producing bright-colored flowers on long, slender stems like a single pink; blooms the first season; fine for cutting; 2 to 3 ft. (see cut).

Mixed Varietables. White, pink, rose, red and striped. Pkt. 5c., trade pkt. 10c.

ALYSSUM

These flower profusely throughout the season, thriving in flower garden, window boxes, vases, etc., also well adapted for ribbon lines and edgings; very fragrant, hardy, annual.

Sweet Alyssum. White, trailing; finest variety for cut flowers; 8 in. Pkt. 5c., trade pkt. 10c., 10c.

Chant of Snow. Pure white; grows only 2 to 3 inches high and flowers profusely; in fact, it is a perfect carpet of snow throughout the season. We have coined as many as 500 heads of snow-white flowers open on one plant at one time. The best sort for pot culture (see cut); 100 seeds, 91c.

Little Gem. White: very free bloomer; 4 in. Pkt. 5c., trade pkt. 10c., 25c.

Bxatitle Compactum (Basket of Gold). Beautiful golden yellow, 2 ft. Pkt. 5c., trade pkt. 10c.

AMARANTHUS

Ornamental foliage and flowering annuals of striking effect; they are of rapid growth, easy culture and very showy with flower spikes, or brightly colored foliage. For semi-tropical gardening they are unique and effective, 3 feet.

Caudat. (Love Lies Bleeding). Long racemes of curious looking, blood red, drooping scarlet. Pkt. 5c., trade pkt. 10c., oz.

Salticoll. (Fountain Plants). Pyramidal drooping scarlet. Pkt. 5c., trade pkt. 10c.

Tricolor Splendens (Joseph's Coat). Foliage very brilliant and showy. A. Tricolor. Pkt. 5c., trade pkt. 10c.

ANAGALLIS

(Pinpermell)

Largo Flowering Hybrids, mixed. Valuable for baskets, edgings and small beds, beautiful crimson, blue and scarlet shades, hardy annual, 6 in. Pkt. 30c., trade pkt 10c., 1 oz. 25c.

ANEfIONE

(Wind Flower)

Chinensis. mixed. Very beautiful, large, white, striped, scarlet, purple and blue single flowers, hardy perennial; 1 ft. Pkt. 10c., trade pkt. 25c.

ARALIA SIEBOLDII

Luxuriant decorative plant for house culture in winter and lawn in summer; large green palm-like leaves, two to four feet, tender perennial. Pkt. 10c., trade pkt. 30c.

ANTIRRHINUM

(Snapdragon)

One of our most showy and useful border plants. They succeed in any good garden soil, and are very effective in beds, will bloom until frost if seed pods are removed. Hardy perennials, blooming the first year.

New Giant Flowering, mixed. Embracing twelve of the most beautiful varieties rivaling the finest orchids in color and markings. Extra quality, 2 ft. Pkt. 50c., trade pkt. 10c., oz. 75c.

Vervaeneana Hybrid, mixed. Remarkably gorgeous colors, in endless variety, unsurpassed for beds, borders or pots (see cut); 20 in. Pkt. 10c., trade pkt. 25c., oz. $1.50.

Sutton's Gemma. This is the most beautiful type for cutting and a superb class for borders. Comprising only large flowered, most rare and choicest varieties of this famous hybridizer. Pkt. 15c., trade pkt. 30c.

AQUILEGIA (Columbine)

Very handsome, ornamental, hardy perennial plants, growing one to three feet high, of easy cultivation and bearing in profusion large flowers of novel shape and in great variety of color (see cut).

Cyanthus (Golden Spurred). Brilliant golden yellow; 3 ft. Pkt. 5c., trade pkt. 10c., oz. 25c.

Coreula Grandiflora. Beautiful violet; inner petals pure white; blue; 3 ft. Pkt. 10c., trade pkt. 30c.

Single, mixed. Extra quality, embracing twenty beautiful sorts; 2 ft. Pkt. 5c., oz. 25c.

Double, mixed. Comprising twenty-five of the handsomest and best sorts only (see cut); 15 in. Pkt. 5c., trade pkt. 15c., oz. 25c.

ARISTOCHIA

A Siberian climber; large heart-shaped foliage, and very curious brownish purple flowers, resembling a hybrid perennial; 30 ft. Pkt. 10c., trade pkt. 30c.

ASPERULA

Odorata (Sweet Woodruff). An old-fashioned favorite grown for its fragrant leaves and stems which, when dried, have an odor not unlike new mown hay, and are used for putting among clothes, etc.; also used in Germany to flavor the "Melastik" or May wine; best grown among shrubbery, or a semi-shaded position; hardy perennial; blooms first season; flowers white. Pkt. 5c., trade pkt. 15c., oz. 25c.

ASPARAGUS

Plumosus Nuans. This graceful climbing Asparagus has foliage finer than that of the most delicate form, and will last for weeks when cut. It is an excellent house plant, succeeding under almost any conditions. Pkt. 15c., 100 seeds $1.00, per 1000 $7.00.

Sprengeri (Emerald Feather). One of the best plants to grow in hanging baskets, for greenhouses or for outdoors in the summer. The fronds frequently grow 4 feet long and are now considered indispensable in all fine decorations; grows readily from seed. Pkt. 10c., 100 seeds 25c., per 1000 50c.

Plumosus Robustus. Similar to the above, Nuans, more compact in habit, and growing twice as rapid and superior in every way to latter. Pkt. 5c., 100 seeds $1.25, 1000 seeds $5.00.

AMPELOPSIS

(Boston or Japanese Ivy)

Feltchel. A Tricuspidata. Hardy climber, will adhere firmly to brick or stone walls; 6 ft. Pkt. 5c., trade pkt. 10c., oz. 25c.

Royall. A variety of feltchel of strong growth and more brilliantly colored foliage. The best hardy perennial climber. Pkt. 10c., trade pkt. 25c., oz. 25c.

AURICULA—SEE PRIMULA

BRYONOPSIS

(Laciniosa Erythrocarpa)

A beautiful mountain climber with palmate ivy-like leaves of pale green color. Its yellow flowers are followed by pretty cherry-like, green fruits which change to bright scarlet, marbled with white. Very pretty for training over trellises, arbors, porches, fences, etc. The fruits are used for hair ornaments by the women of Japan. 10 ft. Pkt. 5c., trade pkt. 15c.
MOORE & SIMON'S

ASTERS

Are Unequaled in Quality, Size and Color.

We all our Aster seed is grown by specialists of well known renown, and florists can rely upon getting better varieties and colors and higher quality and greater perfection in form and durability from us than from any other seed establishment in America.

We call particular attention to our Japanese Mammoth Flowered Chrysanthemums, Tall and Half-Dwarf types as being the finest sorts yet introduced.

All Asters require very rich, light soil, and in hot dry weather should be mulched with well rotted manure, and frequently supplied with manure water.

M. & S. Improved Comet Aster.

JAPANESE MAMMOTH FLOWERED CHRYSANTHEMUM ASTER.

These magnificent Asters we have secured from a celebrated Japanese Aster specialist. They combine more points of merit than any other one class of Asters, bearing extraordinarily large semispherical double flowers, averaging five inches in diameter, of the most symmetrical form. They are of great durability, the petals being of splendid substance, withstanding storms, rains and hot sun better than any other Asters, coming through such vicissitudes as gloriously beautiful as ever. The plants form sturdy, compact bunches, and are remarkably regular in form and even in height, so that a row or bed of them presents an unbroken sheet of brilliant color. Individual plants carry from 25 to 40 of the immense flowers, open at one time, almost crowding one another for room, and completely covering the upper half of the plant with bloom. The colors of the flowers are wonderfully beautiful, clear and rich. Their blooming season is unusually long, not only because the flowers are remarkably durable, but the maturing flowers are followed by developing buds in uninterrupted succession for weeks.

The finest tall class for either cut flowers or pot culture, height about 22 inches.

160 White Wings. Handsome, pure saffron-white, fine form.
161 Scarlet Gems. Magnificent, glowing crimson-scarlet.
162 Queen of Roses. Extra fine, lovely bright rose.
164 Light Blue. Beautiful light azure blue.
165 Dark Blue. Handsome deep rich dark blue.

Each color, pkt. 10c., trade pkt. 30c., oz. $1.00.

M. & S. Superb, mixed. Pkt. 15c., trade pkt. 50c., oz. $3.00.

JAPANESE MAMMOTH FLOWERED CHRYSANTHEMUM. (Half-Dwarf)

Undoubtedly the most beautiful and perfect of all half dwarf Asters. The flowers are very large and perfectly double and produced in the greatest profusion, while the colors are peculiarly rich, varied and brilliant. Invaluable for pot culture, height 12 to 15 inches.

M. & S. Superb, mixed. Exquisite colors. pkt. 15c., trade pkt. 50c., oz. $3.00.

TRUFFAUT'S PAON-FLOWERED CHRYSANTHEMUM.

(M. & S. Improved.)

210 White Swan. Very pure white.
211 Perfect Rose. Handsome, pure pink.
212 Azure Blue. Fine light shade.
213 Dark Bluish Red. Very rich color.
214 Choice Mixed. Pkt. 10c., trade pkt. 30c., oz. $1.25.

M. & S. Superb, mixed. Comprising all the above and many other showy sorts. Pkt. 15c., trade pkt. 50c., oz. $3.50.

Choice Mixed. Pkt. 10c., trade pkt. 30c., oz. $1.25.

SEMPE'S LATE-FLOWERING BRANCHING ASTERS.

Superior to any other class of late-flowering Branching Aster, lengthening the Aster season until frost. The flowers are large, 4 inches across, very double, of purest colors, and borne on long stems. They begin blooming about the first of September. Strong growers, 18 inches to 2 feet high. Grand for cutting.

230 Red. Pkt. 10c., trade pkt. 50c., oz. $1.25.
231 Lavender. Each color, pkt. 10c., trade pkt. 30c., oz. $1.25.
232 Mixed. Pkt. 10c., trade pkt. 50c., oz. $1.00.

Japanese Mammoth Flowered Chrysanthemum Asters.

BETTERIDGE'S EARLY MARKET.

A most excellent class blooming from two to three weeks earlier than any other class. Flowers of good size and substance.

20 White.
201 Light Blue.
202 Pink.
203 Superb Mixed.

Each color and mixed. Pkt. 20c., trade pkt. 30c., oz. $2.00.

Giant Comet Asters.

Flowers of immense size, often 6 inches across, composed of long, wavy, twisted petals, gracefully formed into loose, yet densely double, half-globes. The plants attain a height of 15 inches, each plant bearing from 20 to 30 of these magnificent flowers on long stems, which gives them an added value for cutting for vases.

233 Snow-White.
234 Deep Blue.
235 Bright Rose.
236 Lavender.
237 Mixed. Each, pkt. 10c., trade pkt. 30c., oz. $2.00.
238 German, extra choice mixed. 18 in. Pkt. 10c., trade pkt. 30c., oz. $1.00.
239 Fine Mixed China. 15 in. Pkt. 25c., trade pkt. 50c., oz. $3.00.
240 Vicks White Branching. Pkt. 10c., trade pkt. 30c., oz. $1.00.
241 Perennial Asters. Very large flowered, mixed. This class is one of great beauty, freedom of bloom and hardness, blossoms are single, of many beautiful colors such as white, rose, light and dark blue, etc., perfect forms, are hard and live for many years; 2 ft. Pkt. 20c., trade pkt. 50c.

FLORISTS WILL FIND OUR ASTERS THE BEST OBTAINABLE.
DOUBLE BALSAMS (Lady Slipper or Touch-me-not)

Remarkable perfection now attained in this old favorite summer garden annual; height, one and a half to two feet. Pkt. $1.00, trade ptk. 25c., oz. 85c.

Balsam Perfection; double white. Flowers very large, of good substance and keep long. Pkt. 10c., trade ptk. 25c., oz. 85c.

Royal Garnet. Very brilliant scarlet. Pkt. 10c., trade ptk. 20c., oz. 75c.

Rose-Flowered, extra double mixed. Embracing a large variety of handsome, large double flowers. Pkt. 10c., oz. 75c.

Perfection Camellia Flowered, superb mixed. This strain is the highest point of perfection yet attained, the flowers being immense size and faultless in form, composed of the finest varieties and most brilliant and charming colors only. Pkt. 10c., trade ptk. 30c., oz. 1.00.

BALSAM APPLE (See Momordica)

BALLOON VINE

A rapid growing annual climber; succeeds best in light soil and warm situation; flowers white; seed vessels look like miniature balloons.

Balloon Vine (Cardiospermum). Pkt. 5c., trade ptk. 10c., oz. 20c.

BARTONIA AUREA

328 California Golden Bartonia. This is one of the showiest and brightest of garden flowers; large golden blossoms in great profusion all summer; one foot; annual. Pkt. 5c., trade ptk. 10c.

BEANS

330 Ambrose, Rapid climber, fine scarlet. Pkt. 5c., pint ptc. by mail, 25c.

Browallia Speciosa Major.

BROWALLIA (Amethysis)

371 Speciosa Major. A beautiful new large-flowering variety of the most brilliant ultramarine blue, especially valuable as a pot plant for winter and early spring flowering. Excellent floral flower. Pkt. 10c., trade ptk. 25c.

372 Mixed Colors. Pkt. 25c., trade ptk. 50c., oz. 1.00.

BEGONIA

340 Double Tuberous Rooted, prize mixed. Very large flowers; unsurpassed quality. Pkt. 5c., trade ptk. 10c.

341 Bugnys Tuberous Rooted, prize mixed. An unrivalled strain of curiously formed flowers saved from selected flowers of the largest and most brilliant colors only. Pkt. 10c., trade ptk. 25c.

342 Diversifolia, mixed. Finest winter flowering sort; excellent for bedding; constant bloomer; tuber-rooted class. Pkt. 25c., trade ptk. 50c.

343 Vernon Grandiflora Dwarf. Of dwarf, compact habit, adapting itself for many purposes and particularly for the taller varieties are not suitable, such as edgings, etc. Large, bright red flowers. Pkt. 5c., trade ptk. 10c.

345 Rex Hybrids, mixed. Ornamental, and useful. Pkt. 10c., trade ptk. 25c.

BIGNONIA (Trumpet Vine)

350 Grandiflora. Beautiful hardy climber; 50 ft. Pkt. 10c., trade ptk. 25c.

BRACHYCOME

3501 Thersidoflia, mixed. Free-flowering plants, covered during the greater part of the season with a profusion of pretty Cineraria-like flowers; suitable for edgings and small beds, or pot culture. Blue, rose and white mixed; hardy annual; 6 in. (see cut.) Pkt. 5c., trade ptk. 10c., oz. 20c.

(Flora's Paint Brush)

285 Mixed. Golden yellow and flaming scarlet. Tassel-shaped flowers; a seat plant for borders; annual; 1½ ft. Pkt. 5c., trade ptk. 10c., oz. 20c.

Calliopsis or Coreopsis

Calliopsis or Coreopsis

CALCEOLARIA

An ornamental plant, producing a mass of beautiful pocket-like flowers; a universal favorite for decorating the greenhouse or conservatory. Our strains can be relied upon to produce nothing but flowers of the largest size and most brilliant coloring.

360 Heirloom Grandiflora Primula Compacta. Doubly flowered. Pkt. 5c., trade ptk. 10c.

361 Imperialis Robusta Grandiflora. Large brilliant self-colored and beautifully marked figured flowers, mixed. Finest class for florists or exhibition purposes; an unrivalled strain. Pkt. 50c., half trade ptk. 100c., trade ptk. 2.00.

362 Rugosa, mixed. Self-colored, spotted and striped; 2 ft. Pkt. 50c., half trade ptk. 1.00.

CANNA

(Indian Shot Plant)

Highly ornamental plants, producing a rich effect by their large, broad and massive foliage, and spikes of brilliant flowers. Seeds the seeds 7 to 10 hours in hot water before planting; sow in sandy loam or peat, and place in a hot-bed; when up to the second leaf, pot off singly and keep under glass until the proper season for planting out.

370 Canna Lutea. Asafoetida. Pkt. 50c., oz. 1.00.

371 Madam Crozy. Darkest red, edged with golden yellow, very free bloomer and vigorous grower. Pkt. 25c., oz. 50c.

372 Dores Mixed. Saved from the newest sorts only. Pkt. 50c., trade ptk. 1.00, oz. 2.00.

373 Choice Mixed. Pkt. 50c., oz. 1.00, oz. 2.00, Pkt. 50c., oz. 2.00.

CALLIOPSIS

These beautiful "Bright Eyes" are showy summer bedding annuals, with large bright flowers borne in great profusion all summer long, and succeeding almost everywhere. They are elegant for garden decoration and fine cutting.

375 C. Japonica. Very large flowers averaging four inches across, of a bright golden yellow, produced in great profusion for a long period, fine for cutting, hardy, perennial; flower first year. 2½ ft. Pkt. 5c., trade ptk. 15c.

376 C. Massie. Pkt. 5c., oz. 2.00.

CALENDULA

Remarkably profuse, dwarf, bushy annuals, blooming continuously and abundantly, of easy culture; indispensable for summer garden or for pot culture in the winter; 1 ft.

300 Gorgeous. This new sort must now take the lead, as its flowers are almost twice as large as any other (often four inches across), and perfectly double at the centre. The plant is also very dwarf in habit, and produces enormous blooms of a brilliant orange red, very freely, thus making it doubly valuable as a pot plant, and it is really one of the most satisfactory sorts. Pkt. 10c., trade ptk. 25c., oz. 75c.

301 Meteor. Deep golden, striped; 1 ft. Pkt. 5c., trade ptk. 10c.

302 Admiration. Shining gold, large grand double flower. Pkt. 50c., trade ptk. 1.00.

303 Royal Double. Bright yellow, black centre, fine variety, entirely distinct and very showy. Pkt. 10c., trade ptk. 25c., oz. 1.00.

305 M. & S. Superb, mixed. Composed of the above and many other beautiful sorts; 1 ft. Pkt. 5c., trade ptk. 10c., oz. 25c.
Sutton’s Giant Flowering Picotee and Bizarre Carnations.

**CAMPANULA**
(Comanbury Bells)
Well known, beautiful, hardy, herbaceous perennial, bearing a great profussion of attractive belflowers; thriving best in light, rich soil; some varieties flower the first season if planted early. 

522 **Calyanthemum, mixed** (superseding Campanula). The finest variety of Campanula. charming white, lilac, rose and blue colors; 8 ft. Pkt. 10c., trade pkt. 25c.

523 **Media, single, mixed** (Campanula). 1½ ft. Pkt. 5c., trade pkt. 20c.

542 **Media, double, mixed** (Double Campanula). 2½ ft. (see cut). Pkt. 5c., trade pkt. 10c.

**CANDYTuFT**
An old favorite, flowering profusely throughout the whole season; great favorites for beds, edgings, pots and borders; the plants are very fairly covered with blossoms, and of the easiest culture; 5 ft. high.

**ANNUAL VARIETIES**
540 **Giant White Perfection**, Producing large, white tresses of branching habit, and very free blooming; the finest annual for summer cutting (see cut). Pkt. 10c., trade pkt. 25c., oz. 75c.

541 **White Fragrant**, Very sweet scented. Pkt. 5c., oz. 10c., lb. 50c.

542 **Gem Hybrids, mixed**. A new type Candytuft, forming dense, bushy, pyramidal plants, which form a mass of large, showy flowers, lasting a long time. We consider it the most desirable Candytuft in cultivation and are sure that all who grow it will be delighted with its chaste beauty. The very best sort for pot culture or bedding; white, pink, crimson and lilac, mixed; 6 in. Pkt. 10c., trade pkt. 25c., oz. 75c.

543 **Empress**, White. Pkt. 5c., trade pkt. 10c., oz. 30c., lb. 25c.

544 **M. & S. Mixed**, Crimson, purple, white, crimson and rose; fine, early-blooming bedding plants. Pkt. 10c., trade pkt. 25c., oz. 75c.

545 **Mixed**, Pkt. 5c., oz. 10c., lb. 50c.

**PERENNIAL VARIETIES**
546 **Lagrasse**, Produces immense heads of pure white, perfect flowers; a grand florists’ flower. Pkt. 10c., trade pkt. 25c.

547 **Silver Plume**, Pure white: blooms abundantly the entire summer; excellent florists’ flowers; perennial. Pkt. 10c., trade pkt. 25c., oz. 75c.

**CENTRANTHUS**
**Celosia—Glasgow Prize**
610 ** Macrosiphon, mixed**. One of the most beautiful of annuals. The flowers are borne in large clusters, each one of which is in itself a pretty bouquet; valuable for cutting; seven varieties: red, white and pink; 8 in. Pkt. 5c., trade pkt. 10c., oz. 25c.

**CANARY BIRD VINE**
390 **Pericgrinum**, Yellow flowers with ornamental foliage. A good winter bloomer in the greenhouse. It is one of the most beautiful of all climbers, its elegant foliage adding so much to the beauty of the blossoms; 10 ft. Pkt. 5c., trade pkt. 10c., oz. 35c.

**CENTAUREA**
(White-Leaved “Dusty Miller”)
Fine for bedding, vases, hanging baskets and extensively used for margins. Sow seed from December to April. Half hardy perennial. Pkt. 10c., oz. 35c., 25c., 50c., 100c., 250c., 500c.

561 **Gymnocarpa**, Fine cut foliage; 1½ ft. Pkt. 10c., oz. 25c., 50c.

**Castor Oil Plant** (See Ricinus)

**Candystuff—Giant White Perfection**

**HARDY CARNATIONS**
Carnations are general favorites for their delicious fragrance and richness of color. They are indispensable both for greenhouse culture in winter and for the garden in summer.

560 **Sutton’s Giant Flowering Picotee and Bizarre Carnations**. A wonderfully improved strain, both in size of flower and double forms. The flowers measure three inches across and are deliciously fragrant. The variety of color is also much greater in this strain than any other. There are white, pink, deep pink, salmon, carmine, scarlet, dark crimson, maroon and many beautifully variegated flowers. There are photo-edge, spotted, striped, tinted, etc., etc. They are abundant bloomers; if sown early in greenhouse or hot-bed, they commence flowering in early summer and continue to bloom until checked by frost. They can be potted and taken in the house and will flower abundantly throughout the winter. Seed may be sown during the summer for the best winter flowering plants. Pkt. 25c., trade pkt. 50c.

561 **Giant Marguerite Scarlet**. Brilliant scarlet, extra double flowers; very desirable; 1 ft. Pkt. 10c., trade pkt. 25c.

565 **Giant Marguerite White**. Pkt. 10c., trade pkt. 25c., oz. 50c.

562 **Giant Marguerite mixed**. New perpetual flowering variety, blooming in four months from seed; beautiful colors of extra quality; very double and fragrant; 1 ft. Pkt. 10c., trade pkt. 25c.

563 **M. & S. Exhibition Everblooming**. Extra quality; saved from the finest extra double named flowers; very beautiful and brilliant colors; Not for cut; trade pkt. 25c.

**Giant Double German, mixed.** 1½ ft. Pkt. 5c., trade pkt. 25c., oz. 1.00.

**CANARY BIRD VINE**
390 **Pericgrinum**, Yellow flowers with ornamental foliage. A good winter bloomer in the greenhouse. It is one of the most beautiful of all climbers, its elegant foliage adding so much to the beauty of the blossoms; 10 ft. Pkt. 5c., trade pkt. 10c., oz. 35c.

**CENTAUREA**
(White-Leaved “Dusty Miller”)
Fine for bedding, vases, hanging baskets and extensively used for margins. Sow seed from December to April. Half hardy perennial. Pkt. 10c., oz. 35c., 25c., 50c., 100c., 250c., 500c.

561 **Gymnocarpa**, Fine cut foliage; 1½ ft. Pkt. 10c., oz. 25c., 50c.

**Castor Oil Plant** (See Ricinus)

**Candystuff—Giant White Perfection**

**HARDY CARNATIONS**
Carnations are general favorites for their delicious fragrance and richness of color. They are indispensable both for greenhouse culture in winter and for the garden in summer.

560 **Sutton’s Giant Flowering Picotee and Bizarre Carnations**. A wonderfully improved strain, both in size of flower and double forms. The flowers measure three inches across and are deliciously fragrant. The variety of color is also much greater in this strain than any other. There are white, pink, deep pink, salmon, carmine, scarlet, dark crimson, maroon and many beautifully variegated flowers. There are photo-edge, spotted, striped, tinted, etc., etc. They are abundant bloomers; if sown early in greenhouse or hot-bed, they commence flowering in early summer and continue to bloom until checked by frost. They can be potted and taken in the house and will flower abundantly throughout the winter. Seed may be sown during the summer for the best winter flowering plants. Pkt. 25c., trade pkt. 50c.

561 **Giant Marguerite Scarlet**. Brilliant scarlet, extra double flowers; very desirable; 1 ft. Pkt. 10c., trade pkt. 25c.

565 **Giant Marguerite White**. Pkt. 10c., trade pkt. 25c., oz. 50c.

562 **Giant Marguerite mixed**. New perpetual flowering variety, blooming in four months from seed; beautiful colors of extra quality; very double and fragrant; 1 ft. Pkt. 10c., trade pkt. 25c.

563 **M. & S. Exhibition Everblooming**. Extra quality; saved from the finest extra double named flowers; very beautiful and brilliant colors; Not for cut; trade pkt. 25c.

**Giant Double German, mixed.** 1½ ft. Pkt. 5c., trade pkt. 25c., oz. 1.00.
CHRYSANTHEMUM.

Showy and effective garden favorites. The hardy annuals are summerflowering border plants; good for pot culture, and quite distinct from the autumn-flowering varieties.

650 Splendens. Of exceptional beautiful red; 8 ft. Pkt. 5c., trade pkt. 25c.
652 Inodorum Plicifolium. Double white; 1½ ft. Pkt. 5c., trade pkt. 25c.
653 Maximum. New; large double yellow; excellent; 1 ft. Pkt. 10c., trade pkt. 50c.
654 Eclipse. Golden yellow, scarlet and brown; extra; ½ ft. Pkt. 10c., trade pkt. 50c., oz.
655 Golden Feather. The beautiful, large, white, daisy-like flowers are ½ to 3 inches across; the dark velvety disc in the centre is surrounded by a circle of bright golden yellow, followed by another clear-cut circle of rich crimson, as clearly defined from the outer white as if painted (see cut); 2 ft. Pkt. 10c., trade pkt. 25c.
656 Choice Mixed. Comprising all the above and many other beautiful sorts. Pkt. 10c., trade pkt. 25c.
657 Giant, white. Large white single flowers; fine for cutting; hardy perennial; ½ ft. (see cut.) Pkt. 10c., trade pkt. 25c.
659 Chinese and Japanese Royal GEMS. This seed has been saved from a large, magnificent, imperial collection; will bloom first year if sown early; hardy annual (see cut.) Pkt. 25c., trade pkt. 50c.

CLARKIA.

An old favorite, hardy, annual, plant, growing in any garden soil, and producing freely its cheerful flowers in great profusion the entire season; ½ ft.
650 Single and Double, mixed. Very brilliant colors only. Our mixture embraces over 40 varieties (see cut). Pkt. 5c., trade pkt. 10c., oz. 25c.

CLEMATIS.

(Japanese Virgin's Bower.)

Hawthorne-scented blossoms; a grand plant for pianzas, fences, in fact, any position where a climber is wanted. It is just the thing for covering terraces or embankments; does equally well in sunshine or shadow, and stands unrivalled as a plant for the cemetery.
650 Paniolda. Hardy, perennial climbers; 3½ ft. Pkt. 5c., trade pkt. 10c., oz. 15c.
651 Jackman's Flowering Hybrids. 15 ft. Pkt. 25c., trade pkt. 50c., oz. 25c.

COB\EA.

Legant, rapid-growing climbers, attaining a height of 20 to 30 feet.
650 Scandens, blue. Pkt. 10c., trade pkt. 25c., oz. 25c.
651 "San Salvador" Cobea (Cobea Macrostemma). The foliage is of bright, vivid green, and the flowers strikingly effective, with long stamens. It is a very rapid grower, and, although a perennial when used as a greenhouse climber, can be treated as an annual for the garden in summer (see cut.) Pkt. 10c., trade pkt. 25c.

COLEUS.

700 Finest Hybrids, mixed. Saved from a noted private collection of large-seeded sorts, with extraordinary and superbly rich markings. Pkt. 10c., trade pkt. 25c.

COCINZA.

(Scarlet-Fruited Ivy-Leaved Climber.)

701 Indica. A handsome climber of the gourd species, flowering the first season if started early in heat, with beautiful, smooth, glossy, ivy-like leaves, contrasting with the fine, mauve-white, bell-shaped flowers and brilliant scarlet fruit; 10 ft. Pkt. 10c., trade pkt. 25c.

COLLINSIA.

710 Extra Quality, mixed. Composed of 15 splendid sorts, very pretty free-flowering plants, blooming in whorls and several whorls around each flower stem; annual (see cut); ½ ft. Pkt. 10c., trade pkt. 25c., oz. 25c.

COTTON.

711 Gossypium. The cotton plant is always interesting, particularly to the young people of the North. The large yellow Hibiscuslike flowers are followed by pointed pods, which, on coming to maturity burst and display a profusion of white down which forms the cotton of commerce. In the North, if the seeds are started early in a box or in the house, the plants will produce mature pods before frost. Pkt. 10c.

ROYAL ENGLISH COWSLIPS.

722 Mixed. Hardy; one of the most beautiful early-blooming spring flowers; fine for beds or pots, producing large umbels of magnificent flowers of intense brilliancy of color and great variety of markings, borne on stalks about 8 inches high. Many of the blooms are 1 inch across, of shades of crimson, maroon, lilac, pink, white, yellow, etc. Pkt. 10c., trade pkt. 25c.

COWSLIPS.

Collinsia.
CINERARIA
Williams’ Brilliant Prize Strain

Our strain of Cineraria seed is unsurpassed for beautiful variety, richness of color, as well as perfection of form and large size of flower. They are unequaled for profusion of bloom, size of flower and general excellence. Blooms three and a half inches in diameter are not uncommon. This strain of Cinerarias is distinct and superior in every point of merit to that offered by any other house (see cut).

630 Giant-Flowered, brilliant prize, tall, mixed. 20 in. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
631 Giant-Flowered, brilliant prize, half dwarf, mixed. 1 ft. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
632 Giant Snowflake. Lovely white. Pkt. 50c., trade pkt. 75c.
633 Giant-Flowered, Kermesina. This superb variety is one of the richest colored of this beautiful class of plants. The flowers are of the largest size, averaging 3½ inches across, of an intense, glowing, velvety dark crimson. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
634 Double Mixed. Large-flowering double varieties, double mixed. All the rich and beautiful colors of the single exist in this variety; 2 ft. Pkt. 50c., trade pkt. 60c.
638 Stellata (Star Cineraria). Best colors; 2 to 3 feet. Pkt. 50c., ½ trade pkt. 60c., trade pkt. $1.00.

CINERARIA
(Dusty Miller)

Fine for bedding, ribbon-beds, margins and hanging baskets; prized for their beautiful, lowly silvery foliage; hardy perennial.

641 Maritima Candidissima. Compact; ½ ft. Pkt. 5c., trade pkt. 10c.

Convolvulus Major

IMPERIAL JAPANESE MORNING GLORIES

720 Double-flowering Japanese Morning Glories. Very unique, good sized flowers, of a great variety of shapes, colors and markings. Beautiful new class; 20 feet. Pkt. 5c., trade pkt. 25c.

Mammoth Butterfly, Japanese and Chinese. Comprising 40 brilliant colored sorts; they are exceedingly vigorous in growth, decorative in foliage, which is of various shades of green and silvery lustre, frequently variegated, while the flowers are nearly always of immense size, frequently six inches across; entirely new colors, such as ashy grays, slate color, bronzy reds, browns, shades of sea green, blues bordered with red, purples marbled with black, whites spotted with blue, flamed, streaked, marbled, fringed edges and all of incomparable beauty. The double-flowering sorts are really superb and can hardly be described; 20 feet (see cut). Pkt. 10c., trade pkt. 25c.

CLIMBING MORNING GLORY

A fine hardy and rapid grower, which always gives great satisfaction. They bloom early in the morning, and during the forenoon are brilliant with scores of beautiful flowers of various colors; 15 feet.

733 Variegated Leaf Morning Glory. Foliage beautifully striped and variegated; flowers of various colors. Pkt. 5c., trade pkt. 10c.
740 Fine Mixed. Twenty-five fine varieties. Pkt. 5c., trade pkt. 10c., oz. 25c.

Convolvulus Minor

DWARF MORNING GLORY

They do not climb but form bushy plants, which are a perfect mass of flowers. Handsome for baskets or borders, producing a very brilliant effect; 1 ft.

759 Tricolor Roseana. Rose, white centre, margined purple, striped with rich yellow bands. Pkt. 5c., trade pkt. 10c., oz. 25c.
732 Tricolor, finest mixed. Fifteen finest sorts. Pkt. 5c., trade pkt. 10c., oz. 25c.
735 Mauritianus. Fine trailer; blue, striped white; 2 ft. Pkt. 10c., trade pkt. 25c.

COSMOS

Beautiful autumn-blooming plants. Should be sown in spring. In the open ground, when danger of frost is past, or the seed may be started under cover and afterwards transplanted. When the plants are about a foot high, the tops should be pinched out to induce a bushy growth, and this should be continued until the middle of July.

739 Early Flowering. Red, white and pink, mixed. Pkt. 10c., trade pkt. 15c., oz. 50c.
749 New Mammoth-Flowering, pearl. A new beautiful white, Pkt. 5c., trade pkt. 10c., oz. 25c.
750 New Mammoth-Flowering, pink. Pkt. 5c., trade pkt. 10c., oz. 25c.
741 New Mammoth-Flowering, Sanguineus. Beautiful deep red. Pkt. 5c., trade pkt. 10c., oz. 25c.
744 New Mammoth-Flowering, yellow. Pkt. 5c., trade pkt. 10c., oz. 25c.
745 M. & S. Superb, new mammoth-flowering. New; flowers three to five inches across; in exquisitely beautiful shades of pink, crimson, red, white, yellow and dark maroon, and include handsomely oculated and spotted flowers also. Pkt. 10c., trade pkt. 25c.
746 Large-Flowering Hybrids, mixed. Pkt. 5c., trade pkt. 10c., oz. 25c.

Mammoth Butterfly Morning Glories.

CUPHEA

CIGAR PLANT

720 Platycenta. Scarlet, tipped white; 1 ft. Pkt. 5c., trade pkt. 10c.
733 Stringulosa. Beautiful orange; showy; 1 ft. Pkt. 10c., trade pkt. 20c.

CYCLANTHERA EXPLODENS

735 A climbing annual of the gourd species, free-growing, handsome foliage and oval-shaped fruit, exploding loudly when ripe; 20 ft. Pkt. 5c.

CYPRESS VINE

IPOMEA QUAMOILIT

One of our most popular vines, with very delicate fern-like foliage, and masses of beautiful, star-shaped flowers; annual; 15 ft.

760 Crimson. Pkt. 5c., trade pkt. 10c., oz. 25c.
762 White. Pkt. 5c., trade pkt. 10c., oz. 25c.
766 Mixed. Pkt. 5c., trade pkt. 10c., oz. 25c.

Please order flower seeds by number.
CYCLAMEN.
(William's Superb Strain.)

Charming plants with beautiful foliage and rich-colored fragrant flowers, universal favorites for winter and spring blooming. This famous strain of Giganteum varieties have large leaves and stout flower stalks, throwing the flowers well above the foliage, and cannot be excelled. (See cut.)

CYCLAMEN PERSICUM GIGANTEUM.
170 William’s White Swan. The most prolific blooming white Cyclamen & cultivation; grand flower of great substance. Pkt. 25c., 100 seeds 75c., 1,000 $3.00.
171 William’s Crimson Queen. Beyond doubt the richest color yet attained in Cyclamen. A bold well-formed flower, color deep, maroon red, handsome and effective, free bloomer. Pkt. 25c., 100 seeds 75c., 1,000 seeds $3.00.
172 William’s Rosy Morn. One of the finest in form, producing splendid trusses, of bloom; clear satin-white petals with dark claret base. Pkt. 25c., 100 seeds 75c., 1,000 seeds $3.00.
173 William’s Giganteum Mixed. Composed of ten superb unqualled varieties Pkt. 25c., 100 seeds $1.00, 1,000 $5.00.
176 Persicium (Emperor William). Extra dark red large charming flowers. Pkt. 25c., 100 seeds 75c., 1,000 seeds $3.00.
177 Persicium. Extra quality, mixed. Very rich varied colors Pkt. 25c., 100 seeds 60c., 1,000 $2.50.
179 Persicium. Very choice mixed. Superior strain, composed of the finest varieties only. Pkt. 10c., 100 seeds 25c., 1,000 seeds $3.00.

CYPERUS ALTERNIFOLIUS.
785 The Umbrella Palm is one of the very easiest culture, if given plenty of water. Indeed it will grow in a bowl, dish or vase partly filled with soil or water. From the centre of the umbrella-like leaves appear small flowers (see cut). Pkt. 10c., trade pkt. 25c.

DAHLIAS.

Many people are not aware that dahlias from seed sown in the spring will bloom beautifully the first summer, and give quite as good, if not better satisfaction than bulbs. From one or two papers of seeds many plants can be raised, which will be of the greatest variety of colors and mostly perfectly double, fully equal to many of the finest named sorts. Our dahlia seed has proved so good and satisfactory that the demand for it is simply enormous.

790 Large-flowering. Extra double mixed. Saved from the largest and handsomest sorts only; 6 ft. Pkt. 10c., trade pkt. 25c.
791 Tom Thumb, Extra double. Bouquet of Lilliputian, seed saved from brightest colors only; 2 ft. Pkt. 10c., trade pkt. 25c., 1 oz. 75c.
792 California Giants. Single mixed. Composed of the rarest and brilliant colors only; 3 ft. Pkt. 15c., trade pkt. 25c., 1 oz. 50c.
793 M. & S. Superb Mixed. Comprising all the above and about 50 other rare and interesting sorts. Pkt. 25c., trade pkt. 50c.

DAISY.

(Bellis Perennis.)

A favorite plant, in bloom from April to June. The seed we offer is saved from the finest first-quality double flowers only. Daisies can be easily raised from seed sown in the spring:

600 Giant Red. Flowers densely double and unusually large, glowing red, shaded rose. Pkt. 15c., trade pkt. 25c.
601 Giant Snowflake. Unusually large double, pure white. Pkt. 10c., trade pkt. 20c.
602 Double Quilled. Mixed colors. The petals are as round as knitting-needles. Pkt. 10c., trade pkt. 20c.
603 Giant Double Mixed. Very large densely double flowers. Extra quality. Pkt. 10c., trade pkt. 20c.
604 Double Mixed. Extra quality large flowers. Pkt. 10c., trade pkt. 20c., 1 oz. 50c.

DATURA.
(Trumpet Flower.)

The Datura is a very interesting plant; branches freely, producing large trumpet-shaped flowers a foot or more in length. Sow seed in the open ground, or start early in pots and transplant; will bloom until frost; annual.

820 Cornucopia (Horn of Plenty). A magnificent variety; stems dark purplish maroon. The flowers average 5 inches across the mouth, the interiors being glistening French white, with purple exteriors. Delightfully fragrant (see cut). Pkt. 10c., trade pkt. 20c.
821 Fastuous Double Hybrids. Mixed. Charming colors and varieties, making handsome plants, highly fragrant; 3 ft. Pkt. 5c., trade pkt. 10c.

DELPHINIUM.
(Perennial Larkspur.)

One of our most showy and useful plants, possessing almost every requisite for the adornment of the garden; producing splendid spikes of flowers in profusion throughout the summer. If sown early they bloom the first year from seed.

821 Formosum. Brilliant blue, white centre; ½ ft. Pkt. 10c., trade pkt. 25c.
822 French Large Flowered. Brilliant double varieties; 1½ ft. Pkt. 10c., trade pkt. 25c.
823 Double Hybrids (Annual). Numerous beautiful colors. Pkt. 5c., trade pkt. 10c.

DIGITALIS.
(Fox Glove.)

These, the well-known Fox Gloves, are one of the finest June flowers. Spikes of bloom 2 feet long are produced in abundance and are very fine; perennial (see cut).

826 Gloxiniallora Mixed. Beautiful gloxinia, spotted white, purple, rose and yellow flowers, all extra fine large sorts; 3 ft. (see cut). Pkt. 25c., trade pkt. 10c., 1 oz. 50c.
DANANTHUS OR PINKS

The family of “Pinks” is unrivaled for brilliancy and rich variety of color; the plants are bushy, of symmetrical form—blooming so profusely as to almost uninterrupted cover the plants until late in autumn, rendering them one of the most beautiful and satisfactory of all annuals for summer flower gardens. Height, about 1 foot.

**DOUBLE ANNUAL VARIETIES**

- **Hedderwigi Diadematus Grandiflora, mixed** (Japanese Royal Pink). Beautiful, large flowers in handsome variety. Pkt. 10c., trade pkt. 35c., oz. $1.00.
- **Laciniatus, Fl. Pl., mixed** (Double Fringed and Striped Japan Pink). Large, showy, various-colored flowers, handsomely fringed and brilliantly striped. Pkt. 25c., trade pkt. 25c., oz. 75c.
- **Hedderwigi, Fl. Pl., mixed** (Double Diadem Pink). Remarkably brilliant colors in large variety. Pkt. 5c., trade pkt. 10c., oz. 40c.

**SINGLE ANNUAL VARIETIES**

- **Phenam's Eye Pink.** Fringed white, red centre. Pkt. 5c., oz. 35c.
- **New French Hybrids.** Remarkably fine; very large flowers, with great diversity of color and markings; very beautiful. Pkt. 10c., trade pkt. 25c.

**DOUBLE PERENNIAL VARIETIES**

- **Turner's Perpetual.** Charming colors; free and constant bloomer; hardy. Pkt. 10c., trade pkt. 25c.
- **Turner's Snowball.** Large, pure white, very double, abundant bloomer; excellent for cutting; hardy. Pkt. 1c., trade pkt. 25c.

**ESCHSCHOLTZIA—(California Poppy)**

These are very easy grown, as they flourish in any situation, and are very free blooming. The foliage is finely cut and perfectly elegant; annual; 1 ft.

- **Californica.** Beautiful, large, rich yellow. Pkt. 10c., trade pkt. 25c.
- **Rose Cardinal.** Beautiful, large, Carmine flower. Pkt. 10c., trade pkt. 25c.
- **Single and Double, mixed.** Handsome colors only. Pkt. 5c., trade pkt. 25c., oz. 25c.
- **Fraseri.** Chooses of snow-white; large flowers, blooms first season from seed; excellent for cutting; perennial; 1½ ft. Pkt. 1c., trade pkt. 25c., oz. 25c.

**EUPHORBIA—(Snow on the Mountain)**

- **Variegata.** Attractive foliage, with white and green bracts, veined and margined white; annual; 2 ft. Pkt. 5c., trade pkt. 25c., oz. 25c.

**GOMPHRENA—(Bachelor's Button)**

- **Globosa Nana Compacta, mixed.** Globeshaped, everlasting flower; bright, white, rose, purple, red and orange; 1½ ft. Pkt. 5c., trade pkt. 25c., oz. 25c.

**GREVILLEA—(Silk Oak)**

- **Robustia.** A very beautiful and graceful decorative plant, with fern-like foliage; excellent for table decoration; easily raised from seed, producing good-sized plants in a short time (see cut). Pkt. 10c., trade pkt. 25c., oz. 25c.

**GLAUCIUM—(Silver Horn Poppy)**

- **Corculatum.** Silver leaves, beautiful golden flowers; vigorous growth; fine for rockery beds; perennial. 2 ft. Pkt. 5c., trade pkt. 25c., oz. 25c.

**GLOXINIA**

- **Crassifolia Large-Flowering Hybrids.** Tiggered, spotted and self-colored; florist mixed. Pkt. 25c., half trade pkt. 60c., trade pkt. $1.00.

**GODELLA SATIN FLOWER**

An attractive, hardy annual deserving more extensive cultivation. The plants bloom profusely and bear showy flowers, 3 to 4 inches across, of white, rose, crimson, lilac and spotted; 1½ ft. Pkt. 5c., trade pkt. 25c., oz. 25c.

**GYPSOPHLA—(Baby's Breath)**

- **Rose and White, mixed.** ½ ft. Pkt. 5c., trade pkt. 10c.

**RUBBER PLANT—Ficus Elastica.**

- **Dracaena Lineata.** Pretty, free-flowering, beautiful plants for rockwork, beds, borders and cutting; succeeding in any garden soil; hardy perennial. Pkt. 10c., trade pkt. 10c.
OOURUS—(Ornamental)
A large and interesting class, producing a great variety of curious fruits, many of which are peculiarly marked. All the fruits are hard shelled, and will keep for years, exciting much attention. 1910 Bottle Shaped. Pkt. 5c., trade pkt. 10c. 1915 Dipper Shaped (Calabash). Pkt. 5c., trade pkt. 10c., oz. 30c. 1920 Egg Shaped (Japanese Nut Egg) (Gourd). Pkt. 5c., trade pkt. 10c., oz. 30c. 1925 Hercules' Club. Club shaped; 6 ft. long. Pkt. 5c., trade pkt. 10c., oz. 30c. 1930 Orange Shaped. Mock Orange. Pkt. 5c., trade pkt. 10c., oz. 30c. 1935 Serpent. Fruit 3 ft. long; true. Pkt. 5c., trade pkt. 10c., oz. 30c. 1940 Sugar Trough. True. Pkt. 5c., trade pkt. 10c. 1945 Sponge, or Dish Rug (Chinese Luffa). Pkt. 5c., trade pkt. 10c., oz. 30c. 1950 Choice Mixed. Including all of the above; also gooseberries, lemons, apples, onion and pear varieties. Pkt. 5c., trade pkt. 10c., oz. 30c.

HELIANTHUS—(The Eternal Flower)
Valuable everlasting for winter bouquets. 1950 Monstrosum Album. Large, double, white. 15c. Pkt. 20c., trade pkt. 50c. 1955 Fireball. Large, bright red, double; 15c. Pkt. 20c., trade pkt. 50c. 1960 Grandiflorum, mixed. Comprising the brightest colored sorts only; 15c. Pkt. 20c., trade pkt. 50c.

HELIOTROPE
Deliciously fragrant flowering plants; high; great favorite for pot culture. 1965 Lemoine's New Early Flowering Giant. This new strain of Heliotrope blooms in a very short time from seed, and plants are as easily raised from seed as Pansies or Asters. The seedlings make a rapid growth, and are in bloom in a short time. They bloom abundantly in the garden all summer, or all the year round in pots. The panicles of bloom are often 6 inches across, three times as large as ordinary Heliotropes, while the colors range from indigo black through all shades of bluish to all shades of purple; most pans white; some with red tints; others with large white eyes. Infra-Red flowers seem to surpass the ordinary sorts. A packet of seed will furnish a bed of flowers for your garden, which would cost several dollars were you to purchase the plants, and give you great handfuls of the delicious flowers.

LARKSPUR
Popular annuals for summer garden decorations. The splendid flowers are of varied colors and are borne on long spikes; blooming within a few weeks' time. 1980 Lemoine's, mixed. From a large collection; 3ft. Pkt. 10c., trade pkt. 25c.

HELICHRYSUM—Grandiflorum.
KENILWORTH IVY.
A charming, small, neat, hardy perennial, trailing plant, blooming first year; suitable for baskets, vases, paths and rockwork; clings to walls, etc.

LINUM.

LINUM. (Hardy Perennial Varieties.)
The hardy perennial varieties are among the most attractive of our garden favorites, producing beautiful spikes of handsome flowers.

1350 Cardinalis ("Cardinal Flowers"). Long spikes of intense scarlet flowers; one of the most brilliant plants in cultivation; suitable for all situations (see cut). Pkt. 10c., trade pkt. 30c.

1311 Gerardi Hybrids, mixed. Grand new sorts; large flowers in a variety of colors and shades. Pkt. 25c., trade pkt. 30c.

1312 Mixed Hardy Hybrids. Contain many beautiful varieties. Pkt. 10c., trade pkt. 30c.

LUNARIA. (See Honesty.)

LUPINS.

LUPINS. (Sun Dial)
Ornamental, free-flowering, easily-grown garden plants, with long, graceful spikes of rich and varied-colored peashaped flowers; valuable for mixed flower borders and beds. Should be sown where they are to bloom, as they do not transplant well (see cut).

1330 Finest Mixed Annual Sorts. Containing upwards of 30 beautiful varieties; 2 ft. Pkt. 5c., oz. 10c.

LANTANA.
One of the most desirable half hardy perennial greenhouse or bedding plants, constantly in bloom, verbena-like heads, and changing in hue; 2 to 3 feet.

1320 Large-Flowering Hybrids, mixed. Pkt. 10c., 25c., trade pkt. 15c., oz. 30c.

LATHYRUS.
(Hardy or Everlasting Pea)
A beautiful, hardy climber, resembling the sweet pea, growing six to eight feet high when trained on a trellis; the flowers are borne in large clusters. One of the hardiest and most easily cultivated of plants. Blooms very early.

1320 Latifolius, white. Pkt. 10c., trade pkt. 15c., oz. 20c.
1321 Latifolius, mixed. White, red, rose and scarlet; 5 feet. Pkt. 25c., trade pkt. 10c., oz. 25c.

LAYIA
A pretty and attractive little hardy annual that ought to be generally grown for cut-flower purposes. The head is as broad as that of a Marguerite, but much wider. A bed or mass of this annual produces a fine effect, owing to the large quantity of bloom produced; 1½ in.

1360 Elegans, mixed. White and yellow. Pkt. 5c., trade pkt. 15c.

LYCHNIS.
Handsome plants, of easy culture, growing in any rich garden soil; for massing in beds and borders; blooming the first year if sown early; hardy perennial (see cut).

1347 Haageana, mixed. Brilliant orange, scarlet, crimson, pink, etc.; 1 ft. Pkt. 5c., trade pkt. 15c.

MATRICARIA.
Free-flowering, hardy plants, succeeding in any garden soil; a fine bedding plant for pot culture; blooms until frost; hardy annual; fine for cut flowers; 18 in. (see cut).

1375 Elegansissima (Ball of Snow). White; very double; 1½ ft. Pkt. 25c., trade pkt. 15c.

MAURANDIA.
Started early, and planted out in May, this makes one of the finest of all climbers. It trails beautifully over fences and walls, and its densely green foliage is not killed by the first fall frosts, and is gay with a profusion of blossoms; 1½ ft.

1380 Mixed. White, blue, red and purple; 1½ ft. Pkt. 10c., trade pkt. 25c., oz. 1.00.

LOBELIA. (Compact Varieties for Bedding.)
The following dwarf and trailing varieties of this popular and beautiful flowering plant will be found most desirable for pot culture, edgings, hanging-baskets, etc., blooming profusely from June to November; 4 to 6 in.

1300 Crystal Palace. Fine dark blue; true. Pkt. 10c., trade pkt. 25c.
1301 Orientalis. Dark blue; dark blue flowers, with a distinct white eye. Pkt. 15c., trade pkt. 30c.
1303 White Gem. Fine, new, pure white (see cut). Pkt. 10c., trade pkt. 25c.
1305 Blue Gem. The finest dwarf, blue, compact variety for pots; a perfect beauty (see cut). Pkt. 15c., trade pkt. 30c.
1307 Mixed. The above sorts only. Pkt. 10c., trade pkt. 25c.

LOBELIA. (Trailing Varieties.)
Suitable for hanging baskets, vases, etc.; 6 to 10 in.

1300 Erinus Crystal Palace. Dark blue; true. Pkt. 10c., trade pkt. 25c.
1305 Finest mixed. Beautiful white, blue and rose sorts. Pkt. 10c., trade pkt. 25c., oz. 1.00.
1304 Paxtonianna. Without doubt the finest Lobelia yet introduced. The flowers are large, of the most brilliant ultramarine blue, strikingly marked with a pure white blaze at the base of each of the two lower petals. The blooms are produced in the utmost profusion, forming a veritable blanket of blue and white over the entire plant. Pkt. 10c., trade pkt. 30c.
MARIGOLD.
(Tagetes.)

This flower, so popular of old, has been greatly improved of late years, and again is a leading garden favorite. Its large double blossoms are very showy. The varieties we offer below will delight the eye of anyone.

Dahlias Flowered. Immense flowers, 10 to 14 inches around; exceedingly double, quilled like a heart, producing flowers in the greatest profusion of primrose, lemon, orange and golden shades; 2 ft. (see cut.) Pkt. 10c., trade pkt. 10c., oz. 80c.

Nugget of Gold. Golden quilled flowers; remarkably free bloomer; 6 in. Pkt. 30c., trade pkt. 10c.

Double African, mixed. Finest sorts only; 18 in. Pkt. 50c., trade pkt. 10c., oz. 15c.

FRENCH VARIETIES.

Golden Gem. Best golden yellow for pots; 2 ft. Pkt. 10c., trade pkt. 50c.

Dwarf Compact Gold Striped. True; 1 ft. Pkt. 5c., trade pkt. 10c.

Legion d' Honor. The blooms are of medium size, rich golden yellow, with the center of each petal broadly marked with velvety crimson brown, and with clustering stamens in bright shades of orange yellow; 2 ft. (see cut.) Pkt. 50c., trade pkt. 10c.

Superba Dwarf, mixed (Lilliput.) Remarkably beautiful, bright and distinct sorts; the best class for pots; 1 ft. Pkt. 10c., trade pkt. 25c.

Dwarf French, mixed. 1 ft. Pkt. 5c., trade pkt. 10c., oz. 25c.

Multi-mixed. Embracing thirty novel sorts; excellent class for borders. Pkt. 10c., trade pkt. 25c., oz. 75c.

MESEMBRYANTHEMUM.

Known as ice plant and dew plant. Elegant trailing plants, desirable for hanging pots or vases.

Cordifolium Variegatum. Rose, variegated leaves; 6 in. Pkt. 10c., trade pkt. 30c.

MIMOSA.
(See Sensitive Plant.)

MIGNONETTE.
(Rosedula Oderata.)

This deliciously fragrant flowering plant is the most popular annual grown. Mignonette does best in as cool a situation as possible. When exposed to the full force of summer heat, it begins to form seeds.

Quaker City. New; best for pots; very free bloomer; good grower and very fragrant; plants commence to bloom very soon after they are above the ground, and when only two or three inches high, and gradually spread out and grow a little taller till they reach the height of nine or ten inches, and are one unbroken solid row of flowers and foliage. They are completely covered with bloom all the time, and for borders and bedding they are superb. The flowers are light velvety brown, petals beautifully bordered with bright yellow; (see cut.) Pkt. 10c., trade pkt. 25c., oz. 1.00.

Grandiflora Ameliorata. Red; 15 in. Pkt. 5c., trade pkt. 10c., oz. 15c.

French Mammoth. Spikes, 2 to 3 ft. long; the finest red flowering sort for cut flowers; 15 ft. Pkt. 10c., trade pkt. 25c., oz. 3.00.

Parson's White. Pure white; 1 ft. Pkt. 5c., trade pkt. 10c., oz. 25c.

Machet Perfection. True; Pkt. 10c., trade pkt. 15c., oz. 50c.

Mixed. All sorts. Pkt. 5c., trade pkt. 15c., oz. 50c.

MIMULUS.
(Monkey Flower.)

Mimulus make admirable pot plants, and equally adapted for beds in the garden, in semi-sunny positions. The colorings and markings are rich in the extreme, ranging through velvety crimson, maroon, yellow, white and pink, spotted and banded in a beautiful manner; (see cut.)

Mammoth Perfection, mixed. New; very large-flowered, banded and spotted; unequalled for large size and brilliancy of colors; very beautiful; 2 ft. Pkt. 10c., trade pkt. 30c.

Royal Red (New.) Beautiful velvety shade; 9 in. Pkt. 25c., trade pkt. 50c.

MUSK PLANT.

Moschatus Cupreus Nanus. Best for pots. Pkt. 10c., trade pkt. 30c.

MOMORDICA.
(Balsam Apple and Balsam Pear.)

Luxuriant annual climbers, with large leaves, making dense shade. The flowers are followed by ornamental, large fruits of orange or copper color, which burst and expose an interior of red, which is highly effective; 15 to 20 feet.

Balsamina (Balsam Apple.) Orange fruits. Pkt. 5c., oz. 15c.

Charantia (Balsam Pear.) Coppery scarlet colored fruits. Pkt. 5c., oz. 15c.

MUSA.
(Abyssinian Banana Plant.)

Ensete. A foliage plant of magnificent proportions; for sub-tropical massing or as single specimens, they are strikingly effective. Seeds sown early in the house will produce plants 12 to 15 feet high after the first season. Pkt. 10c., 50 seeds 60c., 100 seeds $1.00, 1000 seeds $5.00.

MYOSOTIS.
(Forget-me-not.)

These are admirable for pot culture for winter blooming, as well as for growing in the open garden. Nothing is finer for bouquets than the charming forget-me-not.

Robusta Grandiflora. Very large, bright blue flowers, pyramidal habit; 10 in. Pkt. 10c., trade pkt. 50c.

Alpestris Compacta. Blue; very fine; 4 in. Pkt. 10c., trade pkt. 30c.

Azorica. Best for cut flowers; 1 ft. Pkt. 10c., trade pkt. 50c.

Pulcherrima Semperflora. Beautiful blue flowers, ever flowering; fine for cut flowers; 8 in. Pkt. 10c., trade pkt. 50c.

We will send by mail postpaid any seven 5c. papers, or any three 10c. papers for 25c., or any fifteen 5c. pks., for 50c., or any seven 10c. pks., for 75c., and will add a premium packet besides on all orders amounting to 30c.

CUSTOMERS will please note our very liberal offer on orders by package, on page 70.
TALL or CLIMBING NASTURTIUMS.

Beautiful and luxuriant annual climbers, for trellises and arbors; of easiest culture, bearing their gorgeous flowers in profusion until killed by frost; 6 to 10 feet.

1500 Coeculum. Very bright orange scarlet; large flower. Pkt. 5c., trade pkt. 10c., oz. 15c.
1501 Dunkett's Orange. Rich golden orange, garnet b'ches. Pkt. 5c., trade pkt. 10c., oz. 15c.
1502 Shakespeare. Dark velvety maroon; dark bluish foliage; fine. Pkt. 5c., trade pkt. 10c., oz. 15c.
1503 Schenevusianum. Straw color, splashed crimson, garnet blotches. Pkt. 5c., trade pkt. 10c., oz. 15c.
1504 Goldene Leaved Sceptre. Intense scarlet; golden yellow foliage; a remarkably handsome variety; large flower. Pkt. 5c., trade pkt. 10c., oz. 15c.
1505 Rubra. Brilliant fery rose; very effective; large flower; dark leaved. Pkt. 10c., trade oz. 25c.
1506 Choice Mixed. Pkt. 5c., oz. 10c., 1 lb. 30c.
1510 M. & S. Superb, large-flowered, mixed. Comprising twenty-one novelties of a famous English raiser, offered by us exclusively, distinguished by varicolored foliage and flower of great richness and variety of coloring. Pkt. 10c., 1/2 oz. 20c., oz. 30c.
1506 Jupiter. Bright golden yellow; immense large flowers. Pkt. 10c., trade pkt. 20c., oz. 50c.

LOBB'S CLIMBING NASTURTIUMS.

The leaves and flowers are somewhat smaller than the ordinary Tall Nasturtium offered above. These are most abundant bloomers and have brighter colored flowers and are better adapted to rock-work, vases, walls, etc. Height 4 to 8 feet.

1513 Napoleon III. Golden spotted brown. Pkt. 5c., trade pkt. 10c., oz. 15c.
1514 Splifire. Splendid brilliant scarlet. Pkt. 5c., trade pkt. 10c., oz. 15c.
1515 Flaminum Grandiflorum. Scarlet and yellow; large flower. Pkt. 5c., oz. 25c.
1516 Mercuria Lactuca. Dark purple crimson, rich and velvety. Pkt. 10c., trade pkt. 15c., oz. 30c.
1517 Cholee Mixed. Pkt. 5c., trade pkt. 10c., oz. 15c.
1518 M. & S. Superb, large-flowered, mixed. Combine many novel colors and superb richness, unequaled and beautiful in the extreme. Pkt. 10c., trade pkt. 20c., oz. 50c.

TOM THUMB or BEDDING NASTURTIUMS.

For showy and constant bloom few garden flowers equal the dwarf nasturtium, which, by the way, has been greatly improved during the past few years, in colors and habit of growth. They are sure to bloom from early summer until killed by frost. No garden can be complete without a fair representation of them; 8 to 12 inches.

1520 Scarlet and gold. New, bright golden foliage; intense large scarlet flowers very showy. Pkt. 5c., trade pkt. 10c., oz. 20c.
1521 Empress of India. True, rich crimson flowers; dark foliage. Pkt. 5c., trade pkt. 10c., oz. 25c.
1524 Crystal Palace Gem. Sulphur spotted maroon. Pkt. 5c., oz. 10c.
1525 King of Tom Thumbs. Deep golden yellow. Pkt. 5c., oz. 15c.
1526 Madam Gunter Hybrids. Beautiful very dark blushed leaved class, with large brilliant dark red, crimson, rose and crimson flowers; an extra fine class for pot culture. Pkt. 10c., trade pkt. 20c., oz. 30c.
1527 Royal Theodore. Dark scarlet maroon. Pkt. 5c., oz. 15c.
1531 M. & S. Superb, large-flowered, mixed. Comprising seventeen novelties of a famous English raiser, embracing the most brilliant and conspicuous varieties offered by us exclusively. Pkt. 10c., 1/2 oz. 20c., oz. 30c.
1536 Choice Mixed. Pkt. 5c., oz. 10c., 1 lb. 30c.

OXALIS.

Exceedingly free-flowering little plants with lively foliage, and entirely covered with bright flowers; annual.

1550 Rosea, mixed. Red, white and pink; excellently adapted for pots. Pkt. 10c., trade pkt. 20c.
1553 Valdiviana. Large bright yellow; fragrant. Pkt. 10c., trade pkt. 20c.
1554 Mixed. Very fine varieties. Pkt. 5c., trade pkt. 10c.

NOLANA.

Very pretty trailing annual plants for rock-work, hanging baskets, flower borders, etc.; flowers resemble the dwarf convolvulus.

1580 Variabilis Splendens. White, violet and purple; 1 ft. Pkt. 5c., trade pkt. 10c.
...Moore & Simon’s Grand Pansies...

A universal favorite with young and old. Every child sees the face in the pansy, and, aside from its great beauty, we will treasure it as the symbol of modest worth and true affection. The smallest yard must have its Pansies. Not poor, forlorn plants struggling unaided with heat and drought and hard-baked ground, though even there yielding as handfuls of cheery bloom; but, rather, strong, vigorous plants, rioting in the cool, deep swarded beds they love, made rich with fertilizers, kept free from weeds and shaded from the hot southern sun. In such a bed one may gather great velocity Pansies by the hundreds—flowers so radiant a beauty that they scarcely seem of the earth. Although the Pansy loves coolness, and gives its largest, finest blooms in early spring and late autumn, they are so easy to grow that those living in the South can grow superb ones by giving rich bed, sheltered location, and abundant water. Do not let the plants see if you wish to keep them in bloom freely all the time.

New Giant Peacock Pansies

These are truly phenomenal pansies and the best ever offered the American public. The best in size, brilliant and rare markings and colors of unsurpassed beauty and variety. It is really and truly the only up-to-date pansy, and is unquestionably the largest, finest and in every way the most striking collection of scientifically hybridized pansies ever introduced to the American public. It contains many shades of exquisite colors never before seen in this queen of flowers. They embrace all the solid or self colors, delicately-shaded flowers: five-petaled and three-petaled edged or banded flowers of various colors, each with a distinct rim of white, yellow, or blue and dark and light marked varieties; flowers with clear, distinct eyes; striped flowers of striking beauty, and vividly colored fancy varieties, bledted, velvety, marked, and margined. Pkt. 5c., five packets $1.00. This magnificent collection is without a parallel and will give unbounded satisfaction to all who grow them.

Moore’s Giant Flowered Show Pansies

Exquisite varieties, which we especially commend to florists and those who wish to purchase separate colors. Flowers of immense size and perfect form. We unhesitatingly say that for size, variety, gorgeousness of coloring and general beauty, these magnificent varieties are without a parallel and will give the

Improved Standard Varieties

American Exhibition Prize Strain, mixed. An entirely new and highly novel strain of good size, unsurpassed for variety, richness of color, brilliancy of markings and perfection of form. Unexcelled by any other strain of American growth. Will give excellent satisfaction. Pkt. 25c., trade pkt. 50c., $1.00.

Color or Bi-color Strain. Large and very handsome; richly colored flowers, with dark spots on each petal. Pkt. 25c., trade pkt. 50c., $1.00.

Striped and Marbled. A carefully selected large flowered strain; rare varieties of great beauty. Pkt. 25c., trade pcket 50c., $1.00.

Trimaroon or Giant, mixed. True strain. Improved Extra choice, Exhibition grade. Big, bright, well-margined colors. Pkt. 25c., trade pcket 50c., $1.00.

Chestnut, a showy bloom; new. Pkt. 25c., trade pcket 50c., $1.00.

Elderado. Fine large yellow edges, beautifully margined with purple and bronze. Pkt. 25c., trade pcket 50c., $1.00.

Golden Gem. Pure yellow, without eye. Pkt. 25c., trade pcket 50c., $1.00.

Lord Beaconsfield. Improved; large deep violet purple; top petals shaded white; very attractive. Pkt. 25c., trade pcket 50c., $1.00.

Sweet Scented Pansies

This new type is a cross between the Pansy and the Violet, combining the ideal properties of each. The flowers are much larger than the Violet, more like Pansies, but with the delicious fragrance of the former. The flowers are also quite free from central rays and markings, and the habit of the plant is decdently compact, producing its flowers on long footstalks, and they appear continually from early spring until late fall. The plants possess to a considerable extent the hardy and robust nature of the Violet, and make splendid pot as well as garden-plants. The range of color runs through white buff canary and azure blue, and the coloring of each is exceedingly delicate and charming. A a most important novelty, and one in which all admirers of the Pansy and Violet will be especially delighted. Our strain is wonderfully improved over that we previously sold. Pkt. 10c., trade pcket 50c.
PASSIFLORA. (Passion Flower.)

Handsome, rapid-growing perennial climber, for greenhouse decoration or sunny positions in the open ground in summer. Indispensable for the garden or greenhouse, bearing a profusion of attractive flowers. (See ext.)

1590 Corulena Grandiflora (Large Violet). Blue: 10 ft. Pkt. 10c., trade pkt. 35c.
1691 Incarnata Grandiflora ("Small Pops"). Blooms the first season from seed. Flowers 2 or 3 inches across. Flesh color with purple rays, followed by yellow edible fruits. Pkt. 10c., trade pkt. 35c.
1592 Mixed. White, blue and scarlet. Pkt. 10c., trade pkt. 35c.

PURPLE FEATHER GRASS.

(As pretty as a Palm.)

One of the most ornamental decorative grasses ever introduced, as useful for hall or table adornment as many a palm, and having the advantage of rapid and vigorous growth. The graceful, narrow, recurving leaves are produced in succession by hundreds, and are overtopped by elegant feathery plumes a foot long. These plumes or feathers are available for vase decorations or for dry flower bouquets. Seeds should be sown indoors, in March, in pots or shallow boxes, and the plants set out when danger of frost is past. The heads will be produced from July until frost, and the whole plant is eventually veiled in a purple cloud. Greatly admired. Pkt. 10c., 3 pts. 25c.

(Pennisetum Ruppellianum. Purple feather grass.)

PHLOX DRUMMONDI NANA.

New Improved Dwarf Compact Varieties.

Small growing, very compact varieties in many brilliant colors. They attain a height of only six inches and make a very brilliant carpet of colors all summer.

1741 Stellata. New brilliant varieties, very heavily occupied with blossoms. Pkt. 10c., trade pkt. 35c., oz. $1.00.
1742 Snowball. Beautiful white. Pkt. 15c., trade pkt. 35c., oz. $3.00.
1743 Fireball. Brilliant scarlet. Pkt. 10c., trade pkt. 35c., oz. $3.00.
1745 M. & S. Superb, mixed. Comprising only the most brilliant, showy and salable colors, embracing 20 of the finest varieties. Florists will find our mixture to be of unusual merit. Pkt. 20c., trade pkt. 30c., oz., $1.00, oz. $4.00.
1747 Very Fine Mixed. Good colors. Pkt. 10c., trade pkt. 35c., oz. $3.00.

PHLOX DECUSATA.

(Hardy Perennial Phlox.)

1755 New Dwarf Large Flowering Hybrids, mixed. From the choicest sorts 15 ft. Pkt. 10c., trade pkt. 35c., oz. $3.00.

PENTSTEMON

A companionable flower that is attractive in the border, pretty in balcony boxes, and very fine for vases and cut-flower work. Blooms first year from seed, though it is a hardy perennial, the plants living in the ground over winter and blooming profusely year after year in the same spot. On this account it is very valuable. The pretty star-like flowers are three inches across and the colors are very clear. It is a most beautiful and satisfactory plant which blooms freely all the season, one plant often having a hundred or more of its large fine flowers in one time. Hardy perennial.

1770 Harwegi Giant-Flowered, mixed. Embracing brilliant colors of red, blue, purple, white, violet and rose; very large flowers ½ ft. Pkt. 10c., trade pkt. 30c.

Florists will find our PHLOXES Superb in Size and Colors

PORTULACA.

The Portulaca will stand more abuse than almost any other flower. They do not like deep shade, or wet, damp soil, but in any other situation they only ask the sowing; they will take care of themselves afterward. The dryer the weather and the hotter the sun, the more they flourish, carpeting the ground with their mat of succulent foliage, that during the fore part of the day is almost hidden by clouds of gay blossoms in every color of the rainbow. Fine for bordering walks, rock work and bedding Beautiful in ribbon beds, and they can be transplanted even in full bloom.

1790 Grandiflora Single, mixed. Extra fine. Pkt. 10c., trade pkt. 35c. oz. 50c.
1791 Grandiflora Double, mixed. Extra choice colors. Pkt. 10c., trade pkt. 30c.

POLYANTHUS.

(Primula Elatior.)

Showy, early spring, free-flowering plants, fine for either pot or outdoor culture: hardy perennials.

1799 Bright-Laced, Mixed. Very showy and attractive: flowers edged with yellow. Pkt. 15c., trade pkt. 30c.

Plants will find our PHYLOXES Superb in Size and Colors

Portulaca.

The Portulaca will stand more abuse than almost any other flower. They do not like deep shade, or wet, damp soil, but in any other situation they only ask the sowing; they will take care of themselves afterward. The dryer the weather and the hotter the sun, the more they flourish, carpeting the ground with their mat of succulent foliage, that during the fore part of the day is almost hidden by clouds of gay blossoms in every color of the rainbow. Fine for bordering walks, rock work and bedding Beautiful in ribbon beds, and they can be transplanted even in full bloom.

1790 Grandiflora Single, mixed. Extra fine. Pkt. 10c., trade pkt. 35c. oz. 50c.
1791 Grandiflora Double, mixed. Extra choice colors. Pkt. 10c., trade pkt. 30c.

POLYANTHUS.

(Primula Elatior.)

Showy, early spring, free-flowering plants, fine for either pot or outdoor culture: hardy perennials.

1799 Bright-Laced, Mixed. Very showy and attractive: flowers edged with yellow. Pkt. 15c., trade pkt. 30c.

Polyanthus. "Star of Quedlinburg."

Florists will find our PHYLOXES Superb in Size and Colors
PETUNIA—Continued

The very finest varieties and colors will be obtained from this class. Pkt. 50c., 500 seeds, 75c., 1000 seeds, $1.00.

1703 M. & S. Giant Fringed Snowball. Extra large flowers, 4 to 5 inches in diameter, of the purest glistening white. Pkt. 50c., trade pkt. $1.00.

SINGLE VARIETIES

1703 Moore's Mammoth Fringed, mottled, striped and veined. A class of remarkable beauty, size and luxuriance, unequalled by any other; the flowers are exquisitely ruffled or fringed, and are of enormous dimensions (4 to 5 inches across), but their great merits lies in the tremendous varieties of colors, markings, veining, etc., in the most beautiful combinations; the colors are rich, and gorgeous and all of lovely delicate shades. This strain represents the acme of perfection in single petunias; 10 to 15. pkt. 10c., trade pkt. 25c.

1704 California Ruffled Giants. The flowers are very large and of varied and brilliant colors. Pkt. 25c., trade pkt. 50c.

1705 Large-Flowering Yellow Throat. Large yellow throat, beautifully shaded with blue lines; remarkably fine. Pkt. 50c., trade pkt. 25c.

1706 Inimitable New Dwarf Star. Bushy; cherry red flowers striped white, excellent for pots, blooming all summer. Pkt. roc., trade pkt. 50c.

1707 Moore's Dwarf, Compact, mixed, Dwarf Bouquet Petunias. Very dwarf, handsome, compact growing sorts, all bright, charming colors such as white, rose, crimson and cinnamon striped white; very free and constant bloomers. We have seen no new flower in a long time that has pleased us so much as these beautiful dwarf Petunias. They are very hardy and strong, but the plants are dwarf, very bushy and compact, producing their bright blossoms in such wonderful profusion that each plant looks like a perfect bouquet set in the ground. They are very fine, and exceedingly hardy both summer and winter, a single specimen, or for pots, they are perfectly superb. We especially recommend them to florists for growing in pots. Sure to give satisfaction 6 to 8 inches. Pkt. 50c., trade pkt. 50c., 1-16 oz. $1.00.

1708 New Inimitable Fancy Hybrids. First quality, mixed. A superb and very showy strain, comprising many handsome varieties and colors of high merit. Striped, blotched and stained. Large funnel-shaped flowers of intense brilliancy and vivid marking; over out of bloom; fine for pots. Pkt. 10c., trade pkt. 50c., 1 oz. 50c.

1709 Pure White. Large flower; fine for masses. Pkt. 10c., trade pkt. 50c.

1710 Striped and Blotched Petunias. Very fine. Pkt. 50c., trade pkt. 50c.

1711 Splendid Hybrids, mixed. Many colors. Pkt. 50c., trade pkt. 150c., 5 oz. 1.00.

Poppies

See Page 73 for Additional Sorts

Universal garden favorites from the days of our grandmothers. There is nothing more graceful than the silky blooms of single Poppies, nodding at the apex of their long wavy lines so many routine butterflies that a passing sportsman might wait from their air. There is nothing more gorgeous than the double Poppies, bursting with fullness, glowing with color, and like great fanconis, or Snowbells (a sile), there are so few flowers easier to grow, if the precaution is taken to harden early and cover lightly, and none more useful to light up dark masses of shrubbery, mixed borders, and all sorts of landscape. Do not wait for warm weather to sow your seed, but sow very early in the spring, that the plants may have their growth made, ready to bloom at the coming of warm weather.

177 New Alpine Poppies. Recall to mind every color you have seen in Persian gardens; imagine every conceivable combination of colors. Bright yellow, vivid scarlet, pure white, gold tinged crimson, and rose colored and each color striped, blotched, edged, and bordered, on both single, semi-double, and double flowers—and you will have but a faint idea of the wonderfully varied beauty of the new Alpine Poppies. Although hardly perennial, these Poppies season from spring-sown seed. The frond, elegant, crushed satin, produced in never-ceasing succession from the beginning of the flowers last quite a week if cut as soon as open. Pkt. 10c., trade pkt. 50c., 1 oz. 50c.

1724 Large Shirley Poppies. The colors range through all shades of delicat€e rose, pink, carmine, and brilliant crimson. Many of the large single blooms are edged with white. Habit of plant dull and stout, blooms of enormous size, and of the most charming colors to be found in any flower. Display surpass a bed of these Poppies, no matter what it is. Pkt. 5c., trade pkt. 10c., 25c.
M. & S. Giant-Flowering FRINGED CHINESE PRIMROSES.

All our varieties are grown by the best German and English specialists from prize strains only, unsurpassed for variety large size and brilliancy of colors and great substance of flower. This is our Leading Specialty. The cheap grades are not kept by us, as we find they do not give satisfaction.

The "Chinese Primrose" is a great favorite for the house or conservatory. The foliage is pretty and attractive, and the flowers 1½ to 2½ inches across, borne in clusters of from 25 to 50, of perfectly charming colors. Sow in March, April and May. (See cut.)

PRIMULA.  (Various Sorts.)

With a slight protection they will stand the winter, but do better if protected by a cold frame.

1800 Giant Alba Magnifica. Large, beautiful pure white, with citron eye; compact; light green foliage. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1801 Giant Vernallon Splendens. New, handsome brilliant red; abundant bloom. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1802 Giant Holborn Blue. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1803 Giant Kermesina Splendens. Flowers of immense size; flaming, brilliant crimson, with large length golden eye. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1804 Giant Chiswick Spotted. Dark red, spotted white; very beautiful and showy. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.

ICYLAND POPPIES.

1900 Giant Alba. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1901 Giant Saffron White. New; the finest pure ivory white, with a noble truss of bloom; grand size. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1902 M. & S. Giant Exhibition Prize Strain, mixed. Remarkable for large size, variegated and brilliant colored flowers, in beautiful variety; the finest and best strain extant. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1903 Fine Mixed. Good strain. Pkt. 50c., trade pkt. 60c., trade pkt. $1.00.
1904 Giant Double, mixed. Extra quality. Pkt. 50c., 100 seeds $1.25.

DECIDUOUS TREES.

1923 Red Tulip Poplar. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.

ICELAND POPPIES.

1900 Golden Wave. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1901 Double Yellow Mixed. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.

PRYTHRUM.

1923 Yellow. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.

PORTULACA.

They do best in a hot, sunny situation, and no matter how dry the weather, they will grow and flourish, even on very poor soil.

1930 Giant Alba. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1931 Giant Saffron White. New; the finest pure ivory white, with a noble truss of bloom; grand size. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1932 M. & S. Giant Exhibition Prize Strain, mixed. Remarkable for large size, variegated and brilliant colored flowers, in beautiful variety; the finest and best strain extant. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1933 Fine Mixed. Good strain. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1934 Giant Double, mixed. Extra quality. Pkt. 50c., 100 seeds $1.25.

(Red Tulip Poplar)

1935 Red Tulip. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.

RHODANTHE.

1923 White. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1924 White Mixed. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1925 Blue. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1926 Blue Mixed. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1927 Yellow. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.
1928 Yellow Mixed. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.

RHODANTHE. (Rood Thyme)

An exceedingly beautiful flower, and one which possess a grace and beauty seldom seen. As an everlasting it is indispensable, and as a pot or garden flower it is elegant. Down later in the open ground; they are a grand summer flower. For drying they are very graceful and pretty made up into dry bouquets. Pkt. 50c., half trade pkt. 60c., trade pkt. $1.00.

RUCINUS. (Castor Oil Plant)

Picturesque foliage plants that spread rapidly and are ornamental until frost.

1930 Gibsoni. Dark purple stem; and leaves; 5 ft. Pkt. 50c., oz. 1.00.
1931 Sanguineus. Blue; 6 ft. Pkt. 50c., oz. 1.00.
1932 Corallusens. Blush; very fine plant. Pkt. 50c., oz. 1.00.
1933 Fine Mixed. Comprising 30 most novel and beautiful sorts. Pkt. 50c., oz. 1.00.
1934 Queen of Damoclia. Stem nearly black, 6 ft. Pkt. 50c., oz. 1.00.

SALPIGLOSSIS

1970 Salpiglossis Gracilis. Pkt. 50c., half trade pkt. 60c., oz. 1.00.
1975 Salpiglossis Mixed. Pkt. 50c., half trade pkt. 60c., oz. 1.00.

(Salpiglossis)

1970 Salpiglossis Variegata. Pkt. 50c., half trade pkt. 60c., oz. 1.00.

(Salpiglossis)

1970 Salpiglossis Variegata. Pkt. 50c., half trade pkt. 60c., oz. 1.00.
SALVIA.

A splendid annual, fine for greenhouse decoration and the
flower garden, of easy culture (see cut.)

SCHIZANTHUS.

(A Butterfly Flower, Christmas Orchid Flower.)

A splendid annual, fine for greenhouse decoration and the
flower garden, of easy culture (see cut.)

SEDUM.

(A Stonecrop.)

SENSITIVE PLANT.

(Mimosas.)

Curious and interesting plants; with
sensitive white flowers; the leaves close and drop when
touched or shaken; require a mixed soil.

SMILAX.

Myrsiphyllum. New crop. 6 ft. Pkt.
10c., trade pkt. 25c., oz. 40c., lb $3.50.

SWAN RIVER DAISY.

(Brachycome.)

Dichondra, mixed. Blue and white
6 in. Pkt. 25c., trade pkt. 15c.

SCABIOSA.

(Twenty Bride, or Sweet Scabious.)

SOLANUM.

(Jerusalem Cherry.)

SUNFLOWER.

(Heirloom.)

Remarking for the stately growth, size and brilliancy of their flowers
making them a very popular plant for house culture. Foliage as
graceful as an Acanthus; flowers pure white; produced in sprays of 19
to 30 flowers each, and resembling Sweet Peas. It is of the easiest
culture and ever-blooming tender perennial. Pkt. 25c., trade pkt. 25c.

SWAINSONIA.

Alba. A compact globular perennial, 11
inches high; and from base to summit bears hundreds of branches bearing a
mixture of medium-sized golden yellow flowers with small black centers;
and as specimens in the garden it is very effective. Pkt. 25c.,
trade pkt. 30c.

Miniature Sunflower "Stella." The flowers are
only about three inches across; golden yellow, with
small black centers; they are gracefully poised on
long stems, rendering them of value for cutting. The
plants produce an abundance of bloom from June
until frost; the plants grow from 1 to 4 feet high. Pkt.
25c., trade pkt. 12c.

Globe of Gold. A dwarf double annual Sunflower
forming a well branched plant, not exceeding 30 inches
in height. Each of the numerous branches carries on
its summit a large, densely double, globe-shaped flower
of deep, rich, golden yellow color (see cut). Pkt. 25c.,
trade pkt. 90c.

Mixed. The above and many other sorts. Pkt. 35c.
trade pkt. 90c.

25c., trade pkt. 30c.

SWEET WILLIAM.

This old and popular flower has been greatly improved ins
the last few years. The flowers are twice as large as they use
to be, and the colors bright and varied; hardy plants about 1
foot high; of extreme richness and variety of color, and also
deliciously sweet-scented; for clumps or borders, no plant can
surpass this old favorite (see cut.)

Globe of Gold Sunflower.

Globe of Gold Sunflower.
LARGE-FLOWERING

...SWEET PEAS

THE BEST WHITE.

Bugnot's Grandiflora, white. Pure white. The flowers, borne on long, stiff stems, are extra large, with broad, round standards that stand up boldly. The plants are robust; the best early white. Pkt. 5c., oz. 10c., lb. $1.00.

Blanche Burpee. A good white. Pkt. 5c., trade pkt. 10c., lb. 40c.

FINES1 PINK SORTS.

Bugnot's Grandiflora Sensation. A trim, meniac, expanded, shell-formed flower, white, delicately flushed and banded with blush pink. Pkt. 5c., oz. 10c., lb. $1.00.

Alice Eckford. Creamy white, flushed apricot pink. Pkt. 10c., oz. 25c., lb. 40c.

Countess of Aberdeen. Blush pink, with darker pink margins; wings peach-blossom pink. Pkt. 10c., oz. 25c., lb. 40c.

Katherine Tracy. Exquisite soft pink; a large, bold, perfect flower of much substance. Pkt. 5c., oz. 10c., lb. 40c.

Royal Robe. A fine shell-formed flower, of an exquisite shade of deep rosy pink. Pkt. 5c., oz. 10c., lb. 60c.

"Extra Early" Blanche Ferry. A selection from the above; of very dwarf, compact habit, and the earliest Sweet Pea in bloom. Splendid for forcing under glass. Pkt. 5c., oz. 10c., lb. 60c.

Little Dorrit. Large, expanded, shell-formed standard, of bright rosy pink; wings white, slightly flushed. Pkt. 5c., oz. 10c., lb. 50c.

FINES1 RED SORTS.

Bugnot's Grandiflora, red. A large, bold flower; standard bright red calyx; wings crimson; very free, long bloomer. Pkt. 5c., oz. 10c., lb. 60c.

Prince Edward of York. Is one of the largest of the new varieties, having finely expanded standards of a charming shade of scarlet, and large wings of the deepest rose color; one of the most effective Sweet Pea for any purpose. Pkt. 10c., oz. 15c., lb. $1.50.

Novelty. Rich rosy red of an orange tinge, a very bright color. Pkt. 5c., oz. 10c., lb. 75c.

Salopian. A superbly beautiful variety; deep crimson, tinged with mulberry red, suffused with rich orange scarlet; flowers large, finely formed and handsome; without doubt, one of the very finest and most desirable of the late introductions. Pkt. 5c., oz. 10c., lb. 60c.

Firefly. An intense glowing crimson scarlet; large flower; a profuse bloomer. Pkt. 5c., oz. 10c., lb. 75c.

Cattagration. Large, expanded, shell-formed flower; standard purplish claret; wings purple lake. Pkt. 5c., oz. 10c., lb. 75c.

Waverly. Immense, open, shell-formed flower; standard rosy claret; wings reddish purple. Pkt. 5c., trade pkt. 10c., lb. 50c.

Eugilant. Rich, bright crimson scarlet. Pkt. 5c., oz. 10c., lb. 75c.

BEST YELLOW.

Mrs. Eckford. A large flower of a charming primrose yellow; strong grower; profuse. Pkt. 5c., oz. 10c., lb. 60c.

Queen Victoria. This is an exquisitely lovely flower; large, finely expanded, very handsome; color soft yellow, subtly overlaid with faint purple, imparting a hue most desirable but difficult to describe; a great acquisition. Pkt. 5c., oz. 10c., lb. 50c.

THE BEST BLUE.

Bugnot's Grandiflora, blue. Large, expanded, shell-formed flower; standard purplish blue; wings silvery lavender; very free, long bloomer. Pkt. 5c., oz. 10c., lb. $1.00.

Captain of the Blues. Dark blue. Pkt. 5c., trade pkt. 10c., lb. 40c.

Celestial. Round, shell-shaped flowers; standards delicate lavender blue; wings deep lavender. Pkt. 5c., oz. 10c., lb. 75c.

Butterfly. White, flushed with rosy lavender and edged with blue. Pkt. 5c., oz. 10c., lb. 50c.

Emily Eckford. A superb large flower; standard rosy heliotrope; wings bluish heliotrope; the flowers become more blue with age. Pkt. 5c., oz. 10c., lb. 25c.

VARIUS SORTS.

Daybreak. Standard white, watered and netted with crimson lake; wings white, clotted red. Pkt. 5c., oz. 10c.

Mrs. Joseph Chamberlain. A large, round, shell-shaped flower of fine form; white ground, striped and shaded with bright rose. Pkt. 5c., oz. 10c., lb. 75c.

Triumph. Is a flower of enormous size. The standard is bold and well expanded; of the most exquisite bright orange pink; the wings white, slightly flushed with delicate purple; a perfect flower. Pkt. 10c., oz. 25c.

Saluator. Very large, round, expanded flower; standard maroon purple; wings plum purple. Pkt. 5c., oz. 10c., lb. 75c.

America. Large, bold flower; white ground, striped with bright blood red. Pkt. 5c., oz. 10c., lb. 50c.

Gray Friar. Large, shell-shaped flower, white clouded and minutely dotted with reddish bluish. Pkt. 5c., oz. 10c.

Countess of Powis. For exquisite beauty and delicate finish this lovely variety is unequalled; the color a glowing orange, suffused with light purple, with a beautiful tinge of brown; novel in the extreme. In size and color this flower is really unique. Pkt. 10c., oz. 25c.

Dwarf Cupid. The purest possible white; a form, a crowded mass that neatly hide the foliage. Pkt. 5c., oz. 10c., lb. 50c.

Drought, Mixed Large-Flowering Novelties. A class of surpassing beauty; sold exclusively by ourselves. Composed of twenty-seven of the most remarkable varieties and seedlings of exquisite rich tints. The flowers are notable for their size, abundant long blooming qualities, long stems and lasting qualities. The superb richness of this mixture has never been equalled by any other. Pkt. 2 oz. 25c., 5 lb. 50c., lb. 5.00.

M. & S. Superb, Mixed. Handsomest new large-flowering sorts only, embracing an unexcelled collection of over one hundred of the finest large-flowering varieties. Never before has it been possible to secure such a mixture as this, including the most recent novelties. Pkt. 5c., oz. 10c., lb. 5.00.

Eckford's Large-Flowering Mixed Sweet Peas. Contains some of each of the entire list of varieties. Pkt. 5c., 1/2 lb. 1.00., lb. 50c.

Fine Mixed Standard Varieties. Pkt. 5c., 1/2 lb. 1.00., lb. 35c.

SWEET SULTAN.

Centauraea Magarita. A new species of ravishing beauty, and particularly valuable as a cut flower. The blossoms are much larger than those of any other and are the very essence of purity. It is most deliciously scented, with large flower stalks, and when cut will last in water two weeks. In this respect it excels any other annual we can call to mind. Beautiful shades of white, blue, purple and yellow; annual; 18 in. Pkt. 5c., oz. 10c., trade pkt. 30c.
STOCKS OR GILLIFLOWERS.

These popular flowers are easily grown, and are so highly fragrant and of such great beauty, and have so many good qualities that they deserve a place in every garden. They should be given rich, good soil to grow in, and will amply reward good treatment, the flowers being much larger and more densely double, and there is also a much larger variety of colors and shades than here used to be.

The seed offered of the following flowers has been saved exclusively from plants cultivated in pots, thus securing the largest and most double form of flowers.

NEW GIANT-FLOWERING DOUBLE WALLFLOWER-LEAVED EMPEROR, TEN WEEK STOCK.

(Splendid New Class of Ten Week Stock, Excellent for Pots.)

2120 Cloth of Gold. Bright golden yellow. Pkt. 15c., trade pkt. 50c.
2121 Satin White. Purest snow white; exquisite. Pkt. 15c., trade pkt. 50c.
2122 Intense Dark Blue. Excellent shade; large flower, Pkt. 15c., trade pkt. 50c.
2123 Azure Blue. Beautiful sky blue; very pretty; large flower. Pkt. 15c., trade pkt. 50c.
2124 Rubra. Dark blood-red, rich and velvety; superior in color and size to all other reds; charming. Pkt. 15c., trade pkt. 50c.
2125 M. & S. Superb, mixed. Composed of the most brilliant, showy and best sorts only. Pkt. 15c., trade pkt. 50c.
2126 Choice Mixed. Pkt. 10c., trade pkt. 50c., ½ oz. 75c.

EXTRA LARGE-FLOWERING DWARF GERMAN DOUBLE, EXTRA QUALITY.

2100 White Perfection. Purest pearl white. Pkt. 10c., trade pkt. 40c., ½ oz. 50c.
2101 Mutabilis. New, very brilliant crimson and dark red shades. Pkt. 10c., trade pkt. 40c., ½ oz. 50c.
2105 Blue Bells. Handsome sort, the finest shades of light and dark blue. Pkt. 15c., trade pkt. 50c.
2106 M. & S. Superb, mixed. Composed of the most brilliant, showy and best sorts only. Pkt. 15c., trade pkt. 50c., ½ oz. 85c.
2115 Choice Mixed. Pkt. 10c., trade pkt. 25c., or 50c.
2118 Snow Bells. Uncommonly large; very double pure snow white; early; free bloomer; dwarf and compact. Pkt. 20c., trade pkt. 50c., ½ oz. 50c.
2119 Pyramidal Snowball. About two feet high; it produces from spring to late in the fall pure white, beautifully shaped double flowers. It throws out numbers of side branches, each of which bears a cluster of blossoms, and the farther they are cut the better they seem to like it. Pkt. 10c., trade pkt. 50c.

TEN WEEKS STOCKS.

Colossal.

This magnificent strain is without a rival for open ground, a luxuriant growth, attaining a height of 2½ feet. The spikes of bloom are very long, and the individual flowers are enormous in size and very double.

2130 Mixed. Six handsome colors, Pkt. 15c., trade pkt. 50c.

STATICE.

A beautiful class of showy perennials, of easy culture, blooming the first year, producing erect spikes or sprays of flowers in remarkable profusion, useful alike for cut flowers or as everlasting.

2137 Mixed. Comprising beautiful statice of light rose, dark rose, blood red, white, lilac and dark blue. Pkt. 10c., trade pkt. 50c.

THUNBERGIA.

(Black Eyed Susan.)

Beautiful rapid-growing climbers; the flowers are very pretty, and are borne profusely during the season; fine for rooms, rustic-work, or greenhouse culture.

2132 White; black eye. Pkt. 10c., trade pkt. 25c., or 50c.
2133 Orange; black eye. Pkt. 10c., trade pkt. 25c., or 50c.
2134 Buff; dark eye. Pkt. 10c., trade pkt. 25c., or 50c.
2135 Pure white. Pkt. 10c., trade pkt. 25c., or 50c.
2136 Mixed. Pkt. 10c., trade pkt. 25c., or 50c.

TORENA.

A very fine annual; a beautiful plant for vases, hanging baskets or edging, being covered the entire season with bloom; excellent for the rock garden.

2138 Bailonii. Bright golden; red throat. Pkt. 10c., trade pkt. 25c.
2140 Fournieri. Beautiful; very large porcelain blue and rich violet; throat bright yellow; very free flower. Pkt. 20c., trade pkt. 50c.
2141 Lindeni Hybrids. Beautiful hybrids of Fournieri Maxima, with large flowers of white porcelain, dark violet, light blue, yellow and brown, best for pots. Pkt. 30c., trade pkt. 50c.
2143 White Peace. This variety is unusually attractive, with large pure white flowers, with flash of rose at the base. Pkt. large, trade pkt. 50c.

TRITOMA.

(Red Hot Poker Plant or Torch Flower.)

2144 Varia Grandiflora. Splendid hardy perennial plants; admirably adapted for single clumps on the lawn or among shrubbery; where tall spikes of orange-red flowers make an effective display from August until December; 4½ to 5 feet; (see cut.) Pkt. 20c., trade pkt. 50c.

VALERIANA.

(Hardy Heliotrope.)

Very showy border plants, or for mixing with shrubbery; growing in 2 oz. garden soil, doing well in the shade; producing large corymbs of flowers, fine for bouquets; hardy perennial; 8½ ft.

2145 Mixed. Bright red, rose scarlet and white. Pkt. 10c., trade pkt. 25c., or 50c.

VINCA.

(Madagascar Periwinkle.)

Ornamental, free-blooming plants; flower from seed, if sown early, the season, continuing until frost; 1½ ft. Home-grown seed, sure to germinate.

2150 Rosea (Rose). Crimson eye. Pkt. 10c., trade pkt. 25c., or 50c.
2151 Rosea Alba. White, crimson eye. Pkt. 10c., trade pkt. 25c., or 50c.
2152 Rosea Alba Pura. Pure white. Pkt. 10c., trade pkt. 25c., or 50c.
2153 Rosea, mixed. Well assorted. Pkt. 10c., trade pkt. 25c., or 50c.

VIOLET.

(Viola Odorata.)

2157 Golden. Very large flower, superb variety. Pkt. 15c., trade pkt. 50c.
2158 Mixed. Twelve beautiful sorts. Pkt. 10c., trade pkt. 25c.

Stocks—Giant-Flowered Double Wallflower-leaved Dwarf Mixed, No. 2132.

Tritoma—Red Hot Poker.

California Violet.
VERBENA.

Verbenas in quantity are more easily obtained from seed than from cuttings, and the plants are more healthy and vigorous in growth, while they are also fragrant, particularly the white and light-colored varieties.

Specimen Flowers of M. & S. Giant Flowering Verbenas.

Our customers may rely upon our strain of Giant-Flowering Verbenas for producing the largest flowers obtainable in their respective colors.

2285 Giant, mixed. A carefully selected and greatly improved strain of new sorts, unequalled by any other for brilliant and choice varieties. Composed of the best and showiest sorts only. Will give extra satisfaction. Pkt. 10c., trade pkt. 25e., oz. 75c.

2286 French, striped. Saved from a rich collection of carnation striped flowers. Pkt. 10c., trade pkt. 25e., oz. 75c.

2287 Mammoth, mixed. Extra quality. Pkt. 10c., trade pkt. 25e., oz. 75c.

2288 Choice, mixed. Very good mixture of named sorts. Pkt. 10c., trade pkt. 25e., oz. 75c.

2289 Good, mixed. Mostly the older sorts. Pkt. 5c., trade pkt. 25e., oz. 75c.

M. & S. SUPERB ZINNIAS (Continued.)

2365 Cloth of Gold. Finest yellow. Pkt. 10c., trade pkt. 25e., oz. 75c.

2366 Superb, mixed. Compact; splendid colors; composed of 15 beautiful varieties. Pkt. 10c., trade pkt. 25e., oz. 75c.

2367 Mammoth-Flowering, mixed (Zinnia Grandiflora Robusta Pecunina & pl). The plants form handsome bushes 3 feet in height, and the mammoth perfectly-formed double flowers measure 5 to 6 inches across, comprising beautiful shades of scarlet, gold, salmon, rose, crimson, orange, gold striped, etc. Pkt. 10c., trade pkt. 25e., oz. 75c.

2368 Zebra, or Carnation Striped. A very pretty strain of striped flowers. As the colors vary on each plant, they present a curious as well as beautiful appearance. Pkt. 5c., trade pkt. 15c., oz. 50c.

2369 Bouquet. Dwarf, compact bushes, bearing very small, perfectly double, pompon-shaped flowers of the brightest colors, which profusely cover the plants during the entire summer and until frost. The flowers are charming for bouquets or posies and embrace a wide range of both light and bright colors; 1 ft. Pkt. 10c., trade pkt. 25c., oz. 75c.

2370 Quilled and Crested. A beautiful strain of this popular plant, the petals being twisted, curled and crested into the most fantastic and graceful forms. The colors comprise all the beautiful shades characteristic of the Zinnia; 15 in. Pkt. 10c., trade pkt. 25c.

2371 M. & S. Superb, mixed. Comprising all the above beautiful varieties. Pkt. 10c., trade pkt. 25c., oz. 75c.

2372 Elegans ft. pl. double, mixed. 3 ft. Pkt. 5c., trade pkt. 15c., oz. 50c.

A WILD FLOWER GARDEN.

2390 A mixture of several hundred varieties of beautiful, easy-growing, hardy flowers, producing a constant and varied bloom the whole season; for sowing in shrubbery, under trees, and in beds on which no care will be bestowed, or even for sowing in exposed situations, where wildness is preferred to order and precision. Pkt. 5c., oz. 15c., lb. 50c.
ROSES

We offer below the cream of the best varieties for garden culture, express, they paying charges, we will invariably send much larger plants for the money. We can furnish extra large plants of many sorts. Prices will be quoted by letter upon request.

A REMARKABLE NEW ROSE

BabY SCARLET RAMBLER

The rose that blooms. Blooms all the time, with a whole lot of beautiful flower clusters—not two or three roses at a time, but a continual mass of rich, bright crimson, from November to May indoors. Blooms outdoors all summer—will not "winter kill." Grows only 18 inches high. Postpaid, 1 plant 35¢, 4 for $1.00.

DOROTHY PERKINS

A SPLendid New PINK CLIMBING ROSE

The most VALUABLE ROSE SOCIETY NOSEY MIXED CRIMSON RAMBLER

Each 18c., 3 for 50c., postpaid.

In its foliage, growth and habit of blooming in immense clusters it is remarkably like Crimson Rambler, but the flowers are more double, larger and of a beautiful shell-pink color. It is of quite upright habit of growth and of remarkable vigor, making a growth of ten to fifteen feet often in a single season. The color is a most beautiful shell-pink and holds a long time without fading; even after the flower commences to fade the color is still pleasing, being then a lovely deep rose. The flowers are very scented in vigor and habit of growth the "Dorothy Perkins" is identical with the Crimson Rambler.

OTHER HARDY CLIMBING ROSES

Exed 10c., any 3 for 25c., the 6 for 50c., postpaid.

Baltimore Belle. A grand old rose: color, white, variegated carmine, rose and blush; very double; flowers in beautiful clusters.

Crimson Rambler. When grown as a bush it is equally desirable, producing in marvellous profusion large trusses of flowers, pyramidal in form, and in color a rich bright glowing crimson. When in full bloom it is a vivid crimson mass of beauty. Superb as a pot plant. It has become the fashionable holiday plant in all the large cities, where it is sold at $5.00 and $6.00 a bush. Perfectly hardy.

Empress of China. A very valuable perpetual blooming climber. Comprises flowering the last of May, and it will bloom repeatedly till very late in the fall. The flowers are small but very delicate and waxy; some what fragrant. The color is dark red in the bud.

Mary Washington. A white, perfectly double to the centre, sweet, and borne in endless numbers of large clusters all summer. One plant of Mary Washington will produce more flowers and buds than a dozen ordinary roses.

Queen of the Prairies. Clear, bright pink; large, compact and globular; very double and fully fragrant; one of the finest.

Russell's Cottage. Dark velvety crimson; very double and full; profuse bloomer.

EVERBLOOMING BEDDING ROSES

Prices, by mail postpaid, each 10c., 6 for 55c., 12 for $1.00.

South of Philadelphia they are hardy; in the North they will be benefited if given slight protection.

Varieties marked (*) are of exceptional hardiness

*Agrippina. Deep crimson, very hardy and free flowering.

Bon Sene. This remarkable rose was introduced in 1838, and up to this time no new variety has surpassed it in beauty that bears ample testimony of its valuable qualities. The color is deep rose, sometimes bright rosy crimson.

Bride. The favorite white Tea Rose, beautiful and appropriately named.

Bridesmaid. A delightful Tea Rose, a sport from the old and popular pink Tea, Catharine Mernet, but of a fine, clear, dark pink, much deeper and more constant in color than Mernet; very desirable; does exceedingly well in the open ground.

Catharine Mernet. A very beautiful Tea Rose, valued highly for its large buds; color clear, shining pink, with delicately shaded amber and fawn center.

*Champion of the World. This is a free-blooming hardy rose of great merit, introduced recently. Flowers of large size; color a lovely clear deep pink.

*Caroline Mariennes. The color is pure white, slightly tinged with pink, flowers of medium size, produced in clusters, very double, of low-growing habit, and especially adapted for the dwarf shrub garden.

*Étoile de Lyon. A rich golden yellow, a strong, healthy and vigorous grower, and a most desirable bloomer, flowers and buds early and late. Remarkably hardy.

*Hermosa. An excellent rose, blooms in fine clusters; large, very double and very fragrant. Color quite distinctive; one of the best.

*Kaiser Auguste Victoria. A continuous bloomer, producing successive crops of buds and flowers in the greatest profusion. Color pure snowy white, and when you add a rich perfume, coupled with a vigorous growth, and a moderate size, it is almost incomparable in beauty and value. The combination of its remarkable beauty and its wonderfulBLOOMING BEDDING ROSES

The following Give the Name of Collection Wanted)

The Souper Collection. Three charming Souper roses for 2c. postpaid. Each of Clothilde Souper, blush white, Pink Souper, deep pink; and Rose Souper (Monte). Three of the finest roses for outdoor or indoor culture. Will produce hundreds of flowers the first year.

The Everblooming Yellow Collection. Four hardy Yellow Everblooming Roses for 35c. postpaid. Étoile de Lyon, Madame Rose, Miss Bernard and Souvenir. These varieties are all hardy as far north as Philadelphia and bloom profusely. An infinite covering of leaves or stem will succeed perfectly even much farther north.

The Everblooming Red Collection. The four best Dark Red Everblooming Roses for 35c. postpaid. Claude Debussy, Grand Duc Auguste, Madame Francis and Prince Bonaparte. These are the cream of the dark varieties and should be in every garden.

The Everblooming Pink Collection. The four best Pink Everblooming Roses for 35c. postpaid. Champion of the World, Hermosa, Mrs. Deville, and Testout. At least three of these should be in every garden. The combination of exceptional hardiness, requiring protection only in the extreme north.

The All-Colors Everblooming Collection consists of the four preceding collections—18 roses for $1.25 postpaid.

HYBRID PERPETUAL ROSES

Roses of this class produce the largest and most beautiful flowers and the varieties offered below are all thoroughly hardy. When thoroughly established, will bloom very freely all summer long and July, and at intervals throughout the balance of the summer and fall. They should invariably be planted in the open ground; improve greatly with good culture.

Prices of all roses under this class (except as otherwise noted), each 10c., any 6 for 55c., 12 for $1.00, postpaid

Alfred Colombe. Bright carmine-cream; very large; fine shape; free flowering.

American Beauty. Rich, rosy crimson; almost continuously in flower. Asti. Bright rose; shells; very large and showy; very sweetly scented.

Bride de Bonstetten. Rich, dark red, passed to a deep velvety maroon, Caprice. A striped rose, the ground color being clear sappy pink, distinctly striped of vermilion. New. Flesh color; the finest rose we have yet seen. Each 15c., 3 for 40c.

Coppélia des Alpes. Pure white, tinged with pink in the centre.

Coffeette des Blanches. Flowers have creamy tinge instead of pink in center.

*Colonel Jacques. A grand old rose which every one knows.

Gen. Washington. Soft, glossy scarlet; covers large, broad and open in shape.

Heleen Keller. As pleasing as it is difficult to satisfactorily describe. Each 15c., 3 for 40c.

John Keynes. Fine, deep reddish-maroon; of strong, vigorous habit of growth.

*King Leopold. A grand old rose, much improved in recent years; lovely shaped flower; excellent for flower borders.
BEAUTIFUL PLANTS

By mail postpaid. We have large specimen plants which we can supply by express at corresponding higher prices on account of extra size. Price upon application.

HARDY FLOWERING SHRUBS

Orders should reach us by April 15th at the latest.

HYDRANGEA PANICULATA GRANDIFLORA

The bush, in time, attains a large size, growing in beauty by year. It is little troubled by insects or diseases. We offer the plants for sale early in March or last of October, when every branch is crowned with an immense panicle of fleecy, pure white flowers. After the blooms of this shrub have spent their beauty, the seeds appear in clusters, and nearly as broad as the base, presenting an aspect of majesty grandeur that absolutely defies description. Each 20c., 3 for 50c.

COMMON SNOWBALL. A superb old-fashioned shrub, popular and much admired. Large globular clusters of pure white flowers resembling immense masses of lace. Each 25c., 3 for 50c.

JAPAN SNOWBALL. The best of the Viburnums, of purer color and better form than the above, and one of the finest of flowering shrubs. Excellent for the old-fashioned garden and its graceful, delicate foliage makes it a lovely object at all times. Each 25c., 3 for 50c.

NEW DOUBLE GOLDEN RUBECKIA

[Gold Glow]

This is one of the grandest of the hardy flowering plants for garden, lawn, and park planting. Bears immense masses of large, round, golden yellow flowers, perfectly double like roses and two or three inches across, covering the whole plant with an almost splendid golden yellow flowers for weeks. Each 15c., 3 for 40c., postpaid.

ASPARAGUS PLUMOSA (Climbing Lace Fern)

A finer and more delicate plant than the Spengleri, but hardy and easily grown. A fine material for window and house culture, an extremely graceful window climber, bright green feathery foliage, as fine as the finest silk or lace. Each 25c., 3 for 40c., postpaid.

ASPARAGUS SPIGA (Emerald Feather Asparagus)

It makes a charming ornamental plant for the window or conservatory in winter, and is equally valuable for vases, baskets, and porch-boxes in summer, very easily grown, requires little care and keeps on growing, fresh and green, year after year. Each 15c., 3 for 40c. postpaid.

HARDY CLIMBING VINES

AMELOPSIS VITECHZ (Boston Ivy). This is one of the finest climbers we have for covering walls, as it clings firmly to the smoothest surface, covering it smoothly with overlapping foliage, giving it the appearance of a beautiful vine. Each 15c., 3 for 40c., 10 for $1.00, postpaid.

HONEY SUCKLES

For real home vines, to be near you, climbing over your windows and doorways, there is nothing prettier than sweet-scented honeysuckles; the foliage is pretty, neat and clean, the flowers are almost continuous, and their fragrance is of a kind that is unequalled by any other selection. Each 20c., 3 for 40c., postpaid.

HENRY S./JAPAN. Evergreen sort with pure white flowers, changing to yellow. Very fragrant and dense in clusters. Each 15c., 3 for 40c., 10 for $1.00, postpaid.

MONTHLY FRAGRANT. Red and yellow; very fragrant. Price of each variety 15c., 3 for 40c., 10 for $1.00 by mail, postpaid.

CLEMATIS

There is no more ornamental class of plants than clematis, and the rich show of bloom produced by the best varieties is far too magnificent to be fairly represented on paper. The flowers are produced in clusters, from four to six, and sometimes eight inches in diameter. Perfectly hardy. Each 20c., 3 for 40c., postpaid.

HENRY. Flowers constantly during summer and early autumn. The best large-flowered pure white. Each 25c., 3 for 40c., postpaid.

JACKSON. Flowers are large, intense, rich, violet, violet-purple and are produced in such masses as to form a cloud of bloom. Each 25c., 3 for 40c., postpaid.

SUBLIME. One of the loveliest of all lavender clematis, highly marked with red. Each 25c., 3 for 40c., postpaid.

SWEET BRIAR. Of exceedingly rapid growth, reaching a height of twelve feet or more. Each 20c., 3 for 40c., postpaid.

PEONY. Foliage laced with pure white flowers; a lovely climber. Each 30c. One plant each of purple and white, 35c.

COLEUS (Folage Plants)

We offer a very fine variety of coleus, and they are delicate colors. Each 15c., 3 for 30c., postpaid.

GOLDEN BEDDER. Deep golden yellow variety. Each 20c., 3 for 40c., postpaid.

PERI CARPAGN. A fine borderer with an intense red color. Each 20c.

JOHN GOOD. Leaves light green, spotted yellow. Each 20c., 3 for 40c., postpaid.

VERSCHAEFELTI. A rich velvety crimson foliage. Each 25c., 3 for 40c., postpaid.

ELIOT ROPE

One of the finest classes of plants for cutting, as the delicious fragrance of all the varieties is very durable. For the same reason they make excellent house plants, and are very desirable for 30c. postpaid.

DR. DAVISON. Fine dark blue clusters.

WHITE LADY. Large pure white flowers.

FUCHSIAS

No clase of plants are more beautiful or elegant than the fuchsias. The striking contrast of their colors—white, carmine, rose and purple—renders them perfectly charming. Young plants will bloom profusely until October, but they must be planted in the coolest spot or in partial shade, as the sun will injure the flowers. Each 15c., three for 40c., six for 75c., postpaid.

SINGLE-LEIGHT BEAUTY. A perfect gem, marvelously free-flowering. Flowers ½ in. long, bright red tube and sepals, corolla rich purple.

FUCHSIAS—Continued

ROSA-LIND. Tub and sepals white, corolla magenta-pink.

DOUBLE-GIGANT. The tube and sepals carmine, corolla a beautiful shade of light magenta.

D. HIEI. Most perfect double white fuchsia yet introduced. Tube and sepals bright crimson, corolla, contrasting with the large, pure white corolla to great advantage. A very free bloomer.

GERMANIA. Small, bright carmine, corolla violet-purple, flowers large.

HEM KIM. Sepals bright crimson-scarlet, corolla shaded same, well balanced with profusion of white.

DOUBLE PETUNIAS

Plants of the easiest culture, producing flowers in profusion. Excellent for window boxes and hanging baskets. They are among the most desirable plants. Our collection embraces a number of the best varieties, ranging in price from one to thirty cents.

CRIMSON, PINK, MAROON, WHITE, VARIAGATED, 15c. each, 3 for 30c., one each of each color.

SALVIA SPLENDENS (Scarlet Sage)

This is the finest of all the scarlet sages, producing through the entire season its brilliant spikes of flowers. 10c. each, 3 for 25c.

CANNAS

They are very effective for bedding on the lawn, and equally good when grown as potted plants in the house. They are among the most desirable plants. Our collection embraces many of the finest varieties, ranging in price from one to thirty cents.

ADONIS. The ideal scarlet.

DOROTHY. A fine scarlet white petunia.

ENCHANTRESS. Exquisite delicate pink, of largest size.

ESTELLE. A graceful variety, one of the most beautiful and purest scarlets, and is one of the best scarlets.

E. H. CRANE. Brilliant scarlet, early and free bloomer, of large size.

FLORENCE. Clear, bright red, with yellow striping scarlet.

GOVERNOR ROOSEVELT. The most perfect dark crimson, rich brilliant scarlet, Shadowed pink.

HARRY FENNS. Magnificent Crimson, large and full.

LILLIAN POND. A fine white, with 35c. In diameter.

MRS. A. H. WELSH. A fine crimson, large, beautiful and striped scarlet.

MRS. THOS. W. LAWSON. Cerise-pink, the largest of its color.

MRS. FINCHEN JOSOST. A beautiful cerise scarlet.

MRS. E. A. NELSON. Magnificent glistening pink.

PROSPERITY. The largest crimson, white, suffused with pink. Each 15c., 3 for 40c., postpaid.

AGNES. Clear white, delicately splashed and laced with clear rose pink.

Price 10c. each, 6 for 50c., $1.00 per dozen, postpaid.

CHRYSANTHEMUMS

The season of bloom and size of flowers can be regulated by pinching off the buds as they appear. Partial shade, fairly good soil and moderate moisture will bring successes that will astonish the most discriminative. They are the people’s flower. Price 10c., each, 6 for 50c. postpaid.

GEORGE W. CHILD. The flowers are of massive size, reflexed, with broad, short petal and velvety crimson.

W. DUCKHAM. The plant is of dwarf, compact growth, and comes into bloom with the first flowers of the season and continues until the latest.

GOLDEN WEDDING. The goldenest golden yellow chrysanthemum ever offered.

UCOC. Unexcelled for pot culture or cutting, pure white flower of exquisite form.

MADE DEAN. An immense pink variety finely incurred, petals broad, shell shaped.

MAJOR BONNAFFON. Soft, clear yellow, full in the center, eight inches in diameter, made with a beautiful tall and thin and finish.

SILVER PLUME. Very large and full, and of the purest white, strong stems, and keeps well even to the same size. Each 35c. postpaid.

NIVEUS. Grand, snow white variety, very irregularly incurved, out petals reflexing nearly to stem. Constitution robust, foliage large and abundant, keeping quite well for months.

GERANIUMS

Many of the single flowers are larger than a silver dollar and the trusses are immense balls of living color, while in color we find from the purest white to delicate rosy pink, carmine, carmine-scarlet, and many other shades. Price, 10c., each, three for 30c. postpaid.

DOUBLE

BEAUTE POSTICINE. Largest size trusses, flowers very large, of a beautiful bright salmon-pink.

COURTAIN OF HARCOURT. Extremely free in bloom, forming a beautiful mass of pink, the color’s very fine.

JEAN V. LAUBE. The color is a clear rose pink with distinct white eye.

S. A. NUTT. The best crimson bedding geranium.

SINGLE

GLYCE. Of soft even shade. Fleshy immeasurable, 2½ to 3 inches in diameter.

GRANVILLE. One of the finest of all the single pink.

L’AUBE. Best single white up to date.

MAURICE. One of the finest double sown and flowered geranium to date. One of the finest bloomers, continuously covered with flowers.

ROSE-SCENTED GERAN. Grown for the delightful fragrance of its foliage and most useful in making up bouquets. Price 15c. each, three for 30c. postpaid.
The fruit garden is an indispensable part of any rural home. If it is advantageously placed, a profit, and a source of the most healthful and delicious food supply any family could desire. Beginning with the strawberry in May, the supply is never exhausted until the last winter apples have gone. Cherries, raspberries, currants, blackberries, plums, peaches, grapes, etc., follow successively. They save expense, are luscious and nutritious, and are all well adapted to the fruits always finds a ready sale at a good price; they enhance its value often many times in excess of its cost.

The following varieties have been selected for their hardiness, healthfulness, and diversity, and each and every one possesses great merit. The trees here offered are young and thriving, and will make a very rapid growth and bear quickly. When growing in districts where winters are severe, North, South, East or West should plant it. Prices: Doz. 50c., 100 $1.50, 1,000 $10.00. Special prices will be quoted on lots of 10,000 and upwards.

**WARFIELD PRIZE** (Bi-sexual; Mid-season)

This is a realign among strawberries. In the New York market it commands a higher price than any other, owing to its uniform size, delicate flavor and handsome appearance. The color, when ripe, is a glossy crimson scarlet. It is an all season berry, opening early and bearing late, perfecting its fruit to the last berries. It is a great variety as the first crop, and the hardy, heavy croppers of most delicate quality, and sure to please all who grow it.

**KENTUCKY WONDER** (Bi-sexual; Mid-season to Late)

This is a great table berry, famed by many to have the highest and richest flavor of all. It is the finest late berry yet introduced, the fruit is large and juicy, and is sure to please. It is a most valuable addition to the table, and will be found a favorite among the various varieties. Our supply is very limited. Price: 100 doz. $8.00, 1,000 $15.00.

Raspberries

All our raspberries are extra selected stock, and not the ordinary light sucker plants which are frequently offered. Do not give satisfaction to those wishing to secure a fine fruitful plant at once.

**CUMBERLAND**. An extra large berry of a beautiful dark crimson to black color. Plant has the same general habit as Columbian, but is better for dry soils. Perfectly hardy, vigorous and a great cropper, both summer and fall. The fruit is of extra fine grade. In fact, we think it is the finest flavored of all raspberries, therefore most desirable for the home garden. Its beautiful color contrasts with red or white varieties and makes a very appetizing dish when served together. In many respects this is the very finest Raspberry in cultivation. Each 100 doz. $2.00.

**Miller’s Red**. Hardy, prolific, fine flavor, berry large and abundant. Each 100 doz. $1.00.

**Kansas**. One of the new blackcaps. Has produced fruit that measured 1-1/2 in. in diameter. Each 100 doz. $1.50.

**Golden Queen**. Large golden-yellow. Each 100 doz. $2.00.

**GREGG**. Large black.

**Marboro’s Brilliant**. Somewhat of the same habit as Gregg. Each 100 doz. $2.00.

**SONHEGAN**. Very fine blackberry. Each 100 doz. $2.00.

**Cuthbert**. Large, deep, glossy crimson. Each 100 doz. $2.00.

**Price**: Any of the above (except where noted), each 100 doz. 50c. per doz. $2.00 per 100. If raspberries are wanted by mail add 15c. per doz. for postage.

**CURRANTS**

Cherry. Deep red. Each 100 doz. 15c.

Lee’s Black Proliée. Best white variety. Each 100 doz. 25c.

**COURTNEY’S**. Very fine blackcurrant for preserving. Each 100 doz. 25c.

**GOOSEBERRIES**

Smith’s Improved. Each 100 doz. $2.00.

**Columbus**. Large, fruit large, oval, greenish-yellow, smooth. Each 100 doz. $1.50.

**Downing**. Large, pale green. Each 100 doz. $1.50.

**COURTNEY’S**. Very fine blackcurrant for preserving. Each 100 doz. 25c.

**BLACKBERRIES**

Our blackberries quoted herein are extra selected. They have an abundant supply of fine fruit. Each 100 doz. $1.00 each. Special quotations by the thousand.

**White Queen**. Fruit white. Each 100 doz. $1.50.

**Wilson, Jr.**. Large, productive. Each 100 doz. $1.50.

**Rathbun**. The fruit is very large and handsome. Each 100 doz. $1.00.

**GOOSEBERRIES**

**Smith’s Improved**. Each 100 doz. $2.00.

**Industry**. Large fruit. Each 100 doz. $1.50.

**Downing**. Large, pale green. Each 100 doz. $1.50.

**COURTNEY’S**. Very fine blackcurrant for preserving. Each 100 doz. 25c.

**CURRANTS**

Cherry. Deep red. Each 100 doz. 15c.

Lee’s Black Proliée. Best white variety. Each 100 doz. 25c.

**COURTNEY’S**. Very fine blackcurrant for preserving. Each 100 doz. 25c.

**PRICE**: Any of the above—four doz.—10c. each. Each 100 doz. 15c.

- North Star. The largest, strongest, most vigorous of all the red varieties. Each 35c., doz. $1.50.
- Fay’s Proliée. Color rich red, the leading variety for home use.
**Fruits, Vines, and Flowering Shrubs**

**HARDY GRAPES IN VARIETY**

Strong Two-year Old Vines, Postpaid, Each 30c., Doz. $2.50. Send Check or Money Order and Mailed Postpaid.

Agawam. Berries large, of bronze color. Bright. It resembles Campbell's Early. Clusters very large, usually shouldered. Compact and handsome, without being unfairly crowded. Skin thick and more or less shining; color: black with light purple bloom; berries large, but thin-skinned; flavor admirably. Flavor rich, sweet, slightly astringent. Resistant to mildew. Has long ripening time, a very early, often showing color late in July. It has very remarkable market qualities. Has hung upon the vines this fall sound and perfect for six weeks. Strong 3-year-old vines, each 35c., doz. $3.50. Concord. Color black, with a rich bloom. Delaware. Red, sweet, of excellent flavor. Large, deep amber in color. Ladley. Color a rich shade of red; sweet. McPike. Earlier than the Concord, bunch large and compact; skin unusually large, blue-black; berries 50c. Moore's Diamond. The earliest and finest white grape, bunch medium to large; skin thick, tough, pulp tender, sweet, with few seeds; color, quality, free from foxiness. Quality equal to best house grapes. Price, strong 3-year-old vines, 35c. each, $3.50 per doz. Moore's Early. Recently released, like Concord, two weeks earlier. Niagara. A group of varieties, including seedless, purplish-red grape, ripening with Concord. Columbus, hybrid and bunches large, black. Each 35c., doz. $3.50.

**SELECTED HARDY SHRUBS**

Extra Strong Stock.

Althea (Hibiscus). 2 varieties, 35c., each, doz. $3.50, ex. selected, 35c., doz. $3.00. Almond (Flowering). Pink and white. 35c., each, doz. $3.50. Arbutus (Pine plants). 75c., doz. $8.00. Berries (Purple and green thurberget). 35c., each, doz. $3.50. Bayberry (Butterfly). 35c., each, doz. $3.50. Carya opolrata (Blue Spruce). 35c., each, doz. $3.50. Catawba (Wild Grape). 25c., each, doz. $3.00. Deutzias. 8 varieties. 35c., each, doz. $3.50. Dogwood. Red, branchless and other colors. 35c., each, doz. $3.50. Eucalyptus (or Harbor Rush). 35c., each, doz. $3.50. Exochorda. Grandiflora. 35c., each, doz. $3.50. Elder. Golden and Cut-leaved. 35c., each, doz. $3.50. Forsythia (Golden Bell). All varieties. 35c., each, doz. $3.50. Fringe. Purple. 35c., each, doz. $3.50. Globe Flower (Kerria). 35c., each, doz. $3.50. Hydrangeas. 35c., each, doz. $3.50; extra $5.00. American Turkey. 75c. and $1.50. Horse Chestnut. White flowering. $1.00 and $2.50. Judas (Japan). $1.50. Linden. $1.50 and $2.50. Maples. Norway and sycamore. $1.00, $1.50 and $2.00. maples. Two-inch planted. 75c. each, $2.00 and $5.00. Vines, selected specimens, $3.50 each. Oaks. English, 75c., each, $3.50 and $6.00. Pine, 2 to 8 ft., $1.25 to $10 ft., $1.50 to $25. Red and scarlet, $1.25 and $3.00.

**NUTS**

**CHESTNUTS**

American Sweet. 2 yrs., 35c., each, 3 yrs., 50c., each. Dwarf (Chinquapin). 50c. each. Japanese Giant. Grafts, $1.00 each, $10.00 per doz.; $1.50 each, $15.00 per doz. Extra size, $3.00 each; seedlings 25c., each, $3.00; Paragon. $5.00 per doz.; $1.50 each, $15.00 each, $5.00 per doz., seedlings, 35c. each.

**WALNUTS**

Black. 75c., each, $8.75 per doz. $5.00 per doz. English Strong. 50c. each, $5.00 per doz. White (Bitternut). 75c., each, $8.00 per doz., 50c. each, $8.00 per dozen.
Nitro-Culture

DOUBLES YOUR CROPS

No Time, No Labor, Little Expense
Results Guaranteed or Money Refunded
Endorsed by the United States Government
100,000 Testimonials

A new, sure, and easy way has recently been discovered to make worn-out or poor land enormously productive without fertilizers and almost without expense. Plants need nitrogen—can't grow without it. Hereafter fertilizers have been put into nitrogen into the soil. Nitrogen is very necessary—the most expensive part of fertilizers. The new way is easier, surer, cheaper—it is to let nitrogen gather in the soil and feed the plants. These germes, when put into the soil, fasten themselves to the roots of the plants, draw the free nitrogen out of the air, and feed it to the plants. That's the secret of the new way that is making many farmers rich. The germes do the work—the farmer gets the profit. They save expense, reduce the work, increase the crop enormously, even make it possible to grow Alfalfa and other clover crops where they never would grow before. Nitro-Culture is a germ, sold in dry packages like a yeast cake. (Dissolve in water as per directions which come with each package) When seeds are sprinkled with the solution before planting, the germes multiply in the soil very rapidly, and cause nodules to form on the roots of plants. These nodules collect the nitrogen out of the air and feed the plant roots. Nitrogen is Plant Food, and therefore a tremendous increase in crop is bound to come.

What is Claimed for Nitro-Culture

On poor or sandy soil, any leguminous (i.e., pod bearing) crop, such as clover, alfalfa, beans, peas, vetch, peanuts, etc., can (provided good seed is used) be more than doubled the first year, by merely moistening the seed with a solution of Nitro-Culture bacteria and allowing it to dry on the seeds before planting. Perhaps the greatest benefit may be derived the second year when any crop, such as wheat, corn, cotton, potatoes, etc., may be planted without fertilizer, and they will yield double what would otherwise be taken from the same land. Many people claim that if the money value this would be equal to $20.00 per acre, or that a like amount would have to be expended on phosphates capable of producing equal results. Can you afford to overlook this cheap but effective method which nature has provided for the enrichment of the soil?

Farmers Save $25,000,000.00 a Year
Don't let Your Hogs Die. "Antikol" will Cure and Prevent Hog Cholera

Successful Treatment
During the past few years our attention has been called to the fact that there have been terrible ravages and loss throughout the country from Hog Cholera, with no sure method of fighting the disease. We at one time conducted a series of scientific tests which showed that the disease will not spread. "Antikol" is a germicide, particularly fatal to the hog cholera germ and yet absolutely harmless to the hog. It destroys the cause of cholera absolutely in a few hours and consequently, when properly used, is a perfect preventative. If the disease has already gained access to the herd, "Antikol" will kill the germes sure to be present in the food and drink of the hog, as well as effectively destroying the disease-producing bacteria in the intestine of the animal. At the same time it acts as a stimulant and gives the hog strength to resist the poisons which may have already been formed in the body.

Like anything else of merit, "Antikol" must be used in time and according to directions. A hog which has had the cholera long enough to be in a dangerous place cannot be saved by anything. It is always easier to prevent disease than cure it, and for this reason the greatest value of "Antikol" it in its use as a preventative. It is used freely the year round in all the food and water to which the hogs have access. "Antikol" is guaranteed to prevent cholera, even though the hogs on all the adjoining farms may be dying with the disease. Its cost is trifling. Its benefits almost beyond calculation.

MAGNOLIA

Scotch Collie Kennels

The pure-bred Scotch Collies are of a kind and affectionate disposition, and become strongly attached to their master's family. They are very watchful and always on the alert, while their intelligence is really marvellous. At one year old they are able to perform full duty, herding sheep, cattle, swine and other stock, attending them all day when necessary, keeping them together where they should be, and driving off all stragglers. They are not vicious, running and driving as strong as the coldest with great speed and judgment. They must be given the best food, and never abused, and they will make splendid dogs for the out of doors. They are not nervous or dangerous, and make splendid dogs for the home. They do not require much attention, being very clean and easy in every respect. They are very affectionate and fine, and are very good with children. They are not bad hunters or pointers. They are of a small and neat type, head long and short. Our stud dogs and breeding bitches are all pedigreed. They are of male puppies or spayed females, six to eight weeks old, your choice of colors, $8.00 to $12.00 each. Females, not spayed, $7.00. Stock one year old, well trained, $20.00. Every puppy or stock farm should have one of these valuable dogs.
You Must Spray to Save Your Trees, Fruits and Crops

“AUTO-SPRAY” No. 1

A SELF-OPERATING OR AUTOMATIC SPRAYER

A practical machine for spraying potatoes, tobacco, small fruits, vineyards, gardens, orchard trees, poultry houses, fruit nurseries, etc. Also excellent for whitewashing and disinfecting buildings, etc.

“Auto-Spy” No. 1 is the strongest, most useful and most generally used of all automatic sprayers. It will do all that any other sprayer can do, and in most cases it will do the work quicker and better. It has superseded the bucket and knapsack sprayers, which require constant pumping and are absolutely guaranteed against all defects. Tested before leaving the factory.

No work to operate the “Auto-Spy.” The user simply holds the nozzle and sprays the air with a few strokes of lever and then moves on. Nearly 200 of these sprayers are now in use in extremem satisfaction.

See page 97 for “Auto-Spy.” No. 1 has many improvements over all others of compressed air sprayers, and is lacking in no good feature. It is so strong and durable that a safety valve is not required. We recommend the brass tank as being longer lasting, but it is more than adequate, and it is proportionately cheaper.

When desired we furnish brass extension pipes in two-foot lengths for spraying trees. The usual equipment for tree work is three lengths, and the price is given below. With every “Auto-Spy” is supplied FREE OF CHARGE the most complete and up-to-date spray calendar ever issued.

For Factory, Garden, Vineyard, Tobacco Fields. Dust potato vines as fast as you walk, two rows at a time. Reservoir holds nearly a quart of powder. Machine weighs 4 lbs. One pump in a case complete, 3 tubes, five nozzles and strap. Our Improved Little Giant differs slightly from our Champion Duster except in size, being a little smaller. Price, $8.50.

NEW ERA SPRAYER

For Farm, Garden, Vineyard, Tobacco Fields. Dust potato vines as fast as you walk, two rows at a time. Reservoir holds nearly a quart of powder. Machine weighs 4 lbs. One pump in a case complete, 3 tubes, five nozzles and strap. Our Improved Little Giant differs slightly from our Champion Duster except in size, being a little smaller. Price, $8.50.

**NEW WONDER COMBINATION SPRAY PUMP**

All brass; 100,000 in use. This pump is Absolutely Guaranteed by the manufacturer to do as much and as good work as any $15 spray pump on the market, or money refunded. It has Automatic Mixer and Barrel Attachment, and makes Three Complete Brass Machines. It is the Best, Cheapest, and Easiest Working Spray Pump in the World. It will last for years. A fitted with an easy spray nozzle, and may be repaired as often as necessary in the same uniform size.

The “Auto-Spy” No. 3-B is perfectly practical and convenient for spraying large trees or vegetable and agricultural crops as well as poultry houses and other buildings. If desired, a stock solution may be mixed in a barrel and applied to the reservoir readily as needed. The machine loaded is easily carried from place to place, and is suitable for spraying trees that are mounted upon barrels or other large reservoirs, and will be found very satisfactory.

Price “Auto-Spy” No. 3-B. Complete with 8 feet of Hose, Extension Pipe, Stop Cock and Nozzle, $12.00. Universal Self-Cleaning Nozzle, $1.00.
INSECTICIDES AND FUNGICIDES

"TARGET BRAND" SCALE DESTROYER
GUARANTEED AND ESPECIALLY PREPARED FOR THE DESTRUCTION OF SAN

It is thoroughly soluble in water and will not separate, nor does it need to be agitated while spraying. It contains two basic ingredients that are not chemically related and allowed to be stored in the spray tank or other vessels without separating. With water it is positively neutral, there being no chemicals which could do harm to the trees, or roots, or any other material with which it comes in contact when it can be diluted in hard or soft water, and represents the cheapest, most reliable and the most reliable spray for fruit growing either on a large or small scale. It is very economical; one gallon makes from 25 to 60 gallons spraying liquid. Remember the secret of successful spraying lies in thorough application and in the finest possible mist. Price, put up in packages as follows: 1 qt. .45c, 2 qts. .70c, 3 qts. $1.00, 4 qts. $1.50, 5 qts. $2.00, 6 qts. $2.50, 25 gal. $18.75, 50 gal. in wood $30.00, 100 gal. and over 50c. per gal.

ANT EXTERMINATOR. 25c, 50c. and $1.00.

APHIS PUNK. For feeding. Box 60c., case 15 boxes, 60c.

TARGET BORDEAUX Mixture for Liquids. By simply adding water and stirring it is ready for use. 1 qt. 40c., 2 qts. 60c., 1 gal. $1.00, 5 gal. $4.10. One gallon will make one barrel liquid. Full instructions with each can.

LEGGETT'S DRY BORDEAUX FUNGICIDAL COMPOUND

This compound has proved very successful during ten years past. It kills every year Preventive of all blights. Exends plants against fleas beetles and all man.

MILDEW DUST. For mould, mildew or rust mites, in green houses or the open air. 2 lbs. 30c.

HELLEBORATE. For all insects. 1/2 lb. 10c., 1/4 lb. 15c., 1 lb. 35c., 5 lbs. 1.40. k.

COPPER SULPHATE. For early spraying and making Bordeaux Mixture. 1 lb. 15c., 25 lbs. $3.00, 100 lbs. $10.00.

FAIRMOUNT WEED KILLER. Excellent for cleaning gravel paths, driveways, and curbing, etc. 1/2 lb. 25c., makes 20 gal. treating liquid; gal. $1.25, 5 gal. $6.50.

MILDEW AND FUNGUS DUST. For mould, mildew or rust mites, in green houses or the open air. 2 lbs. 30c.

DINATE OIL. Destroys all insect in the leaves and roots of plants without injury to flower or foliage, leaving no foreign odor. This will be of a capital wash for dogs; it eases mange, destroys lice and all insects. We recommend it for all kinds of insect exterminating. Nothing better for green bug, brown and white scale on pears, rubber, plants, etc., and winter diseases of all kinds of trees, especially the black and green scale. It destroys the chalybeate mite, leaves, insects; curing cancer and skin diseases in dogs and all animals; sport; fruit trees on their blooms and fruits. A gallon equals 1 lb. 39c., 1-qt. 5c. gal. $1.25, gal. $2.00, 5 gal. can $9.00. Full directions with each package. Not available. Delivered with water 20 to 50 parts.

LONDON PURPLE (Imported). 1 lb. 35c.

NITROGEN. An economical and powerful nitrogen extract. One part to 600 of water is sufficient, strong enough to kill all insects except scale, for which use 1 to 600. Pot. bottle $1.30.

TRIP BRIGHT. 2 qts. 60c. For bees, ants, flies, etc. 1/2 lb. 15c., 1 lb. 30c., 3 lb. 50c.

LIME DUST. For lice, beetles, etc. 1/2 lb. 15c., 1 lb. 35c., 5 lbs. 1.90.

SLUG SHOT. One of the finest and best positive killers for slugs and snails. 5 lbs. 25c., 10 lbs. 50c., 100 lbs. 85c.

SULPHO-TABACCO SOAP

SULPHO-TABACCO SOAP

A UNIVERSAL INSECTICIDE, INEXPENSIVE AND HARMLESS.

Fertilizes plants and revives plant life. For destroying all manner of insects on plants, indoors and out, such as red spider, green fly, white ants, various pests, etc. of all domestic animals. 3 oz. cake 10c., by mail 8c., 6 oz. 25c., by mail 20c., 10 lbs. $3.00. Full directions with each cake.

SULPHUR POWDERED. For mildew. 1 lb. 10c., 2 lb. 20c., 5 lb. 35c., 10 lb. 50c. 100 lbs. $4.00.

TOBACCO DUST. Per lb. 1 lb. 10c., 5 lbs. 35c., 100 lbs. $3.50.

TABACCO STEMS. Bid. $1.00. Domestic, $1.50. Havana, $2.00.

WHALE OIL SOAP. 1 lb. 15c., 2 lbs. 25c., 5 lbs. 50c., 25 lbs. $2.00.

XXX CAUSTIC POTASH WHALE OIL SOAP Dissolves readily in cold or hot water, and in any desired proportion. The soap remains in solution and do not require constant stirring. Nor is there any sediment to clog the nozzle of the sprayer.

"Whale Oil SOAP is an effective remedy for many sucking insect pests, One half to one gallon of water is usually enough for green fly or aphids; an ounce for mealy bugs, and 2 oz. for most greenhouse scales. For outside purposes double the strength may be used for the same kind of pest. Two pounds to the gallon may be applied to San Jose Scale on dormant trees, and 4 oz. to the gallon is a safe spray on trees in leaf when the scale larves are seen on the branches. This soap will keep for many weeks if carefully checked." - *Rural New Yorker*, 6:3, 163, March 7, 1905, Price. 15c. lbs., 35 lbs., bags. 

XXX CAUSTIC POTASH WHALE OIL SOAP. This is an excellent soap for the destruction of scale, mealy bugs, hidden grubs, etc., and is often found to be the cheapest and most efficient way of destroying the Troubler. Price, 50 lbs. each 6 lbs., kegs, 100 lbs. each 30 lbs., kegs, 150 lbs. each 45 lb. ib., 1/2 barrel, about 255 lbs. 45c. lb., barrels, about 425 lbs. 4c. lb.
Planet Jr. No. 3 Hill and Drill Seeder. Price, $10.00

Planet Jr. No. 4 Combined Seed Drill, Single Wheel Hoe, Cultivator and Plow. Price, $10.00 Price, As a Seeder Only $8.00

A Complete Illustrated Catalogue of these Admiring Labor-Savers Sent on Application. Improvements and New Tools Have Been Made for 1906. Correspond with us if you have occasion to buy more than one tool.

This seeder is the latest and most perfect development of the hand seed drill. It sows evenly in drills, and also drops in hills at 1, 6, 8, 12 or 24 inches apart. It is thrown out of gear instantly by moving a convenient lever, or the flow of seed is stopped by pushing down the feed rod. No time is lost, no seed is wasted. It is quickly set to sow the different kinds of seeds in the exact thickness required. The accurate hill-dropping drill, which gives a regular spacing with the least seed, saves its cost over and over again in seed alone. We guarantee this drill to be accurate and give satisfaction in every respect.

Planet Jr. No. 12 Double Wheel Hoe, Cultivator and Plow. Price, $6.50

Two acres a day can easily be worked with this implement, a first-class hill-dropping seeder, a single Wheel Hoe or weeder, a cultivator and a plow. The hopper holds two quarts of seed, which can be sown in continuous rows, or dropped in hills at 4, 6, 8, 12 or 24 inches apart. The drill is detached and the tool frame substituted by removing but one bolt. It then becomes a single wheel hoe. It is useful almost every day of the season, at every stage of the garden work. With this one implement the small farmer can do practically all the work in his small crops.

Planet Jr. No. 17 Single Wheel Hoe, Cultivator and Plow. Price, $4.50

For easy gardening, and at the same time clean and perfect gardening, the kind that will make your garden the talk of the neighborhood, it is your duty to get this No. 17 Wheel Hoe. It is suited to all kinds of garden cultivation and all garden crops. You can do more and better hoeing with it in one day than you can do in three days with a hand hoe. The No. 17 has a pair of 6-inch hoes, a pair of plows for opening or covering, and a set of 4 all steel cultivator teeth. The tools shown are what gardeners use most and others can be added as wanted. No. 15, same as No. 17, but with hoes only. $3.50.

The "Fire-Fly" Garden Plow. Price, $2.25

This tool is most useful in small gardens, opening furrows for manure or seeds, and covering them quickly. Chicken-risers will find it very useful in plowing up the scratching yards. The mouldboard is of tempered and polished steel; the depth is quickly changed.

Planet Jr. No. 12 Double Celery Hiller. Price, $14.50

This is the great labor-saving implement for the celery grower, for it is constantly useful from the first thinning of the crop to the final banking and for winter trenching. With the leaf lifter you work the plants without "handling." It is thus readily seen that the whole cost of the tool may be saved quickly, even in a small field of celery.

Planet Jr. No. 8 Horse Hoe and Cultivator. Price, $8.50

Probably no other cultivating machine is so widely known as the Planet Jr. Combined Horse Hoe and Cultivator, for it is in use throughout the civilized world. It is so strongly built as to withstand incredible strain, yet it is light and easy to handle. You can do almost anything you want with it in the garden or field. It opens and closes furrows, hoes right up to the plants without danger of injuring, throws dirt to or from the rows and throws back from centre again. You can set the hoes at any angle or reverse altogether, cultivate to any depth desired, and adjust for width. Every part is perfected to make the tool acceptable to the intelligent farmer who knows the best is always the cheapest. No. 9 Horse Hoe, $7.25. Without wheel, $6.60.

Planet Jr. No. 2 Drill Seeder

PRICE, $7.00

This tool is known and used the world over, and excepting our hill and drill seeders, is the most perfect drill known. It holds three quarts, and sows in an even, regular stream, whether there is mud or not in the hopper. The index contains the names of the principal seeds, and when a name appears through the slot, the drill is set right for that seed. The opening plow, being directly between the wheels, follows all irregularities of the ground. It can be set to run deep or shallow, and the seeds are deposited in a very narrow line. The machine is extremely simple, has no agitators, belts or gearing, and will not injure any seed. The best low-priced drill on the market. We give this drill our highest endorsement.
Shallcross' New Early
Five-Eared Sugar Corn

A truly remarkable production now introduced by us for the first time. Just think of it—FIVE good, well-developed ears of deliciously sweet corn on one stalk, yea, some stalks even loaded with six ears. We know this sounds strange, nevertheless it is true—yes, every word of it. This is a splendid money maker for any market gardener and a great novelty, and desirable, too, for the kitchen garden. It is early also, yes, ten days earlier than Evergreen. We have carefully tested it the past season and our endorsement of it is strong and enthusiastic to the highest degree. It is a magnificent corn and will be a great bonanza to all who plant it. We want you and all our customers to plant it. You will surely regret it if you do not follow our advice. It cannot be too highly recommended. This and our Moore's First Early Table Corn will make you money. Just try a peck or a bushel; the more the better for you.

Price of Shallcross' New Extra Early Five-Eared Sugar Corn. By mail, postpaid, pkge. 15c., pint 25c., qt. 45c.; by express or freight, pt. 20c., qt. 35c., 4 qts. $1.00, pk. $2.00, bu. $7.50.

THE "PERFECT PLOW"
(One and Medium Two-Horse)

THE BEST GENERAL PURPOSE PLOW ON EARTH
Every Plow Fully Warranted
The Farmer's Pride
"Perfect Plows" have invariably been awarded First
Premium at all Fairs where exhibited

The "Perfect Plow" is the best one-horse plow for general purposes on earth. This is the verdict of thousands of farmers who use it, and say they would not part with it for twenty times its cost if they could not replace it. The variety of attachments which can be used, fitting it for the cultivation of all crops, makes it indispensable to the progressive farmer. It is adapted to all kinds of soil and will do first-class work in sod or stubble. It has a thorough centre draft, runs lighter than other plows and is under the complete control of the plowman. It runs so steadily that a ten-year-old boy can operate it with ease.

ECONOMICAL IN WEAR AS WELL AS IN PRICE
Its record since first put upon the market for superior performance in the field is unparalleled in the history of plow-making.

REMEMBER THAT THE "PERFECT PLOW" IS THE PLOW—Description of Attachments

No. 1-C mouldboard, illustrated on plow (in cut) is a full-sized one-horse and turns a strong furrow.
No. 1-B mouldboard (Fig. 3 in cut) is a medium one-horse, does similar work to No. 1-C, but is lighter and turns a little narrower furrow.
No. 1-A mouldboard (Fig. 2 in cut) is smaller than either the 1-C or 1-B and turns the furrow more gently. Excellent in clay or stiff lands; is very light draft and is useful for making deep, narrow furrows for planting seed, plants, etc.
Our truck mouldboard (Fig. 1 in cut) is adapted for cultivating cabbage, berries and other small plants, dirtling corn, etc.
Fig. 4, in cut, is a Dixon sweep, for splitting out middles. Specially adapted for light work. Price, 80c.

Fig. 5, in cut, is a corn and vegetable scraper or weeder, which can be used alone or with any of the single mouldboards on plow. It does excellent work. Price, 60c.

Our double mouldboard and point (Fig. 6 in cut) is used for opening furrows and hilling-up, and can be attached to the standard by removing the point and mouldboard. Any practical farmer or gardener will quickly see the immense value of this attachment. Price, $2.25.

Fig. 7, in cut, is our cutter share or sod-land point. Very popular. Price, 50c.

Fig. 8, in cut, is our potato digging attachment. Very effective for the purpose. Price, 80c.

Our truck, No. 1-A and No. 1-B moulds (Figs. 1, 2 and 3 in cut), together with an extra point and wrench suitable for all bolts in plow, are given to every purchaser of our No. 1 Plow, both Regular and Patent, free of charge.

Figs. 4, 5, 6, 7 and 8, in cut, only fit No. 1 Regular and Patent, and are sold as extras at the prices marked.
